Re: Boston Gas d/b/a National Grid – Minor Modification to Site Plan
MGP Remediation Project

Dear Nipun:

Please include National Grid on the next available Planning Board agenda, which I understand is May 23rd, for the purpose of allowing National Grid to present the Board with a revised set of site plans. National Grid is requesting that the Planning Board approve the revised plan set as a minor modification to the Site Plan set approved under the 4/13/15 Planning Board Decision, in accordance with condition II.9 of that Decision. The revised plan set is dated 4/8/15 and conforms to the plans approved by the Conservation Commission in the Amended Order of Conditions dated 8/17/15.

The 4/8/15 plans do not change the remedy or any aspect of the site's restoration after completion of the project, and they reduce the overall project area and impact to wetland resource areas. The differences between the previously approved plans and the version being submitted here as a minor modification relate to construction methods and are described on the enclosed document titled *Summary of Plan Revisions (April 8,2015)*.

In addition to presenting the updated plans, we would like to update the Planning Board on National Grid's progress with this project since the last time we appeared before them.

Please do not hesitate to contact me if you have any questions or require further information. We appreciate the Planning Board's consideration of this matter.

Sincerely,

Michael S. Giaimo
