**Subject:** RE: 60 Merrimac St., - Hatter's Point - Phase II Site Plan Final Detailed Scaled Drawings and Building Permit

Barbara,

The concerns that the police department have continue to be what I have stated in the past. There are concerns for the safety of pedestrians crossing the street from the parking lot on Merrimac Street to the property. If there is no parking available on the property, pedestrians will have to park elsewhere. Since there is no parking allowed along Merrimac Street, overflow parking will have to be in the existing parking lot across the street. The entrance to the parking lot is at the end of a curve if traveling east, and there is no crosswalk or handicap access to the sidewalk. Also in the winter, the parking lot is used for storage and that lot cannot be used. I did bring these comments up before and they were not adequately addressed in the responses. If there is any recommendations that could be provided by Stantec that could assist in alleviating these concerns, that would be greatly appreciated. Thanks,

Lauren

Officer Lauren Tirone  
Amesbury Police Department

Lauren, Jim, Denis and Peter,

Please pick up the diskette I left in your city hall mailbox Thursday evening. Some of you may already have received these files. However, please look over and send me any comment(s) or concerns prior to the Technical Assist Meeting on Tuesday, May 3rd. Mr. Michael Leach, Stantec has a copy as well. Thank you.

Regards,  
Barbara
