MEMORANDUM

Date: February 18, 2016
Atten: Municipal Council
Subject: National Grid Underground Utility Pet. 20210030

284 Elm Street proposed Underground Conduit Location Petition received 2-4-2016

The Amesbury DPW has reviewed the proposed underground conduit location connection to Pole #81 as requested by National Grid for 284 Elm Street in Amesbury on Plan # 20210030 dated January 14, 2016 and received by the City Clerk on February 4, 2016. The DPW has no significant concerns with the placement of the conduit and wire to the utility Pole. The proposed underground electric utility is to be installed as part of the new hotel at 284 Elm Street. The DPW review was completed to address the City's concerns of possible underground utility conflicts. This review was not intended to provide any indication that the property owners abutting the proposed work locations (including MADOT) have no concerns with the addition of the conduits and wire.

Prior to installation of any underground conduit, Dig safe, the City of Amesbury Department of Public Works, and the City Water and Sewer Departments shall be informed of the proposed activities.

Should additional information be required, please feel free to contact Rob Desmarais, DPW Director, or myself.

Sincerely,

Peter A. Manor
City Engineer
