1. I have spent my academic and professional career in the energy field, ranging from construction to energy efficiency program design and my knowledge and skills can be a valued asset for the town of Amesbury. I moved up to Amesbury with my wife 4 years ago and we have set our roots here and don't plan on moving. I'd like to set an example for my kids and show them that it is important to give back to your community and this is a good way to start. I have the ability to help the community understand how utility markets work as well as understanding what is out there for energy efficiency rebates and funding to make homes and business more energy efficient. My extensive construction background can also be useful in future energy efficient projects that the town might get involved with as well.
2. I studied Architecture during my undergraduate degree then further my education with a graduate degree in Construction Management. I started my career with Conservation Services Group as an Energy Auditor for homes and business then moved onto Clearesult as a Regional Field Manager for energy auditors in Massachusetts. My responsibilities included, training energy auditors, account manager for Nantucket's energy projects within Mass Save, contractor training and much more. I am currently the Director for Muirfield Mechanical, as design build mechanical service provider. We design and build mechanical systems for homes, businesses, schools and manufacturing facilities. We specialized in high efficient heating and cooling systems and clean room design and build.
3. I have not held any offices in Amesbury or elsewhere.
4. As of right now I can give 2-4 hours a week to the town, some more if needed.
