Construction Documents

VOLUME 1 of 2

Conformed to include Addenda 1-9

New Amesbury Elementary School

Amesbury, Massachusetts

Set Number

CONSTRUCTION DOCUMENTS
for the
NEW AMESBURY ELEMENTARY SCHOOL
AMESBURY, MASSACHUSETTS

Date: 10 MARCH 2021

ARCHITECT: DiNISCO DESIGN, INC.
99 Chauncy Street, Suite 901
Boston, MA 02111
(617) 426-2858

OWNER'S PROJECT MANAGER: NV5
44 Pleasant Street
Watertown, MA 02472
(617) 744-3110

CIVIL ENGINEER: DGT Associates
1071 Worchester Road
Framingham, MA 01701
(508) 879-0030

LANDSCAPE ARCHITECT: BROWN SARDINA, INC.
24 Roland Street
Boston, MA 02129
(617) 482-4703

STRUCTURAL ENGINEER: FOLEY BUHL ROBERTS & ASSOCIATES
2150 Washington Street
Newton, MA 02462
(617) 527-9600

GEOTECHNICAL ENGINEER: GZA GeoEnvironmental, Inc.
31 State Street, 8th Floor
Boston, MA 02109
(617) 963-1000

FOODSERVICE CONSULTANT: CRABTREE MCGRATH ASSOCIATES, INC.
161 West Main Street
Manchester, NH 03103
(603) 647-9700

CODE CONSULTANT: HASTINGS CONSULTING, INC.
142 Hanlon Road
Holliston, MA 01746
(508) 397-8417

ACOUSTICAL CONSULTANT:	L.G. COPLEY ASSOCIATES 53 Barrett Street, PO Box 920479 Needham, MA 02492 (781) 455-8814
FIRE PROTECTION and PLUMBING ENGINEERS	VAV INTERNATIONAL, INC. 400 West Cummings Park S. 4700 Woburn, MA 01801 (781) 935-7228
MECHANICAL ENGINEER:	VAV INTERNATIONAL, INC. 400 West Cummings Park S. 4700 Woburn, MA 01801 (781) 935-7228
ELECTRICAL ENGINEER:	THOMPSON ENGINEERING COMPANY, INC. 10 City Square Boston, MA 02129 (617) 886-9066
TECHNOLOGY CONSULTANT:	EDVANCE TECHNOLOGY DESIGN, INC 300 Brickstone Square, Suite 201 Andover, MA 01880 (978) 256-9900
ENVIRONMENTAL CONSULTANT:	ECMS, INC. 288 Grove St., #391 Braintree, MA 02184 (617) 338-2121
TRAFFIC CONSULTANT:	PARE CORPORATION 8 Blackstone Valley Place Lincoln, RI 02865 (401) 334-4100
LEED CONSULTANT:	THE GREEN ENGINEER 23 Bradford Street Concord, MA 01742 (978) 369-8978

VOLUME 1

TITLE SHEET 2
TABLE OF CONTENTS 6
LIST OF DRAWINGS 9

PART A – BIDDING DOCUMENTS AND CONDITIONS OF THE CONTRACT

BIDDING REQUIREMENTS
00020 – NOTICE TO BIDDERS 2
00100 – INSTRUCTIONS TO BIDDERS 6
Appendix A – Supplemental Equal Employment Opportunity, Non-Discrimination and Affirmative Action Program (5 of 5)
Appendix B – Municipal General Guidelines (11 of 11) and Revised Overall Annual Program Goals (dated 06/2020)
Appendix C – Supplemental Instructions to Bidders for Electronic Bid Projects (E-Bid) (6 of 6)
00200 – FORM FOR GENERAL BID 4
00300 – FORM FOR SUB-BID 4
00310 – LIST OF PREQUALIFIED GENERAL CONTRACTORS 2
00320 – LIST OF PREQUALIFIED TRADE SUBCONTRACTORS. 5

CONTRACT FORMS
00500 – FORM OF OWNER-CONTRACTOR AGREEMENT 8
00510 – FORM OF SECRETARY'S CERTIFICATE 1
00520 – FORM OF TAX COMPLIANCE CERTIFICATE 1
00530 – FORM OF CONTRACTOR'S EQUAL EMPLOYMENT CERTIFICATE 1
00540 – FORM OF SUBCONTRACTOR'S EQUAL EMPLOYMENT CERTIFICATE 1
00610 – FORM OF PERFORMANCE BOND 3
00620 – FORM OF PAYMENT BOND 2

CONDITIONS OF THE CONTRACT
00700 – GENERAL CONDITIONS OF THE CONTRACT (AIA Doc. A201-2007) 40
00730 – SUPPLEMENTARY CONDITIONS 68

PART B – SPECIFICATIONS

Volume 1

DIVISION 1 – GENERAL REQUIREMENTS
011000 – SUMMARY OF WORK 13
Attachment A – CORI/SORI Request Form and Application
Attachment B – School Calendar (2020-2021)
Attachment C – School Calendar (2021-2022)
012200 – UNIT PRICES 5
012300 – ALTERNATES 2
012500 – SUBSTITUTION PROCEDURES 5
Attachment A – Substitution Request Form (2 of 2)

TABLE OF CONTENTS

Number of Pages

DIVISION 1 – GENERAL REQUIREMENTS (CONT.)
012600 – CONTRACT MODIFICATION PROCEDURES 5
Attachment A – Request for Approval of Wages and Rates for Change Order Pricing (1 of 1)
Attachment B – Change Request Forms (3 of 3)
012900 – PAYMENT PROCEDURES. 8
013100 – PROJECT PROCEDURES 3
Attachment A – Construction Vehicle Transportation Routes (1 of 1)
013200 – PROJECT MEETINGS 3
013300 – SUBMITTALS 10
013320 – CONSTRUCTION PROGRESS DOCUMENTATION 13
013500 – ORDER OF CONDITIONS 1
Attachment A – Order of Conditions
Attachment B – City of Amesbury Planning Board Decision
014339 – EXTERIOR MOCK-UPS 8
015000 – TEMPORARY FACILITIES AND CONTROLS 26
Attachment A – Project Sign Layout (1 of 1)
017419 – CONSTRUCTION WASTE MANAGEMENT 7
Attachment A – Schedule W1 – Proposed Receiving Facilities (1 of 1)
Attachment B – Schedule W2 – Waste Tracking Worksheet (2 of 2)
017700 – PROJECT CLOSEOUT 15
017823 – OPERATION AND MAINTENANCE DATA 10
017839 – PROJECT RECORD DOCUMENTS 7
017900 – DEMONSTRATION AND TRAINING 8
018113 – SUSTAINABLE DESIGN REQUIREMENTS 16
Attachment A – LEEDv4-S Scorecard
Attachment B – LEEDv4 Materials Reporting Form (3 of 3)
018119 – INDOOR AIR QUALITY REQUIREMENTS 6
018300 – MINIMUM WAGE RATES 1
Attachment A – Massachusetts Prevailing Wage Rates
Attachment B – Massachusetts Weekly Certified Payroll Report Form
018623 – INTEGRATED AUTOMATION PERFORMANCE REQUIREMENTS 11
019113 – BUILDING COMMISSIONING REQUIREMENTS 36

DIVISION 2 – EXISTING CONDITIONS
023000 – SUBSURFACE EXPLORATION DATA 1
Attachment A – GZA Geotechnical Engineering Report
Attachment B – DGT Soil Test Reports
Attachment C – ECMS Phase I ESA Report
Attachment D – ECMS ACM PLM Sample Report
Attachment E – ECMS Imminent Hazard Evaluation
024100 – DEMOLITION 8

DIVISION 3 – CONCRETE
033000 – CAST-IN-PLACE CONCRETE 26

TABLE OF CONTENTS

Number of Pages

DIVISION 4 – MASONRY
*040001 – MASONRY 24

DIVISION 5 – METALS
*050001 – MISCELLANEOUS AND ORNAMENTAL IRON 12
051200 – STRUCTURAL STEEL FRAMING 13
051226 – SHEAR CONNECTORS.....5
052100 – STEEL JOIST FRAMING 5
053100 – STEEL DECKING 7
055000 – MISCELLANEOUS METALS (PART OF 050001).....6

DIVISION 6 – WOOD AND PLASTICS
061000 – ROUGH CARPENTRY 9
062000 – FINISH CARPENTRY 17

DIVISION 7 – THERMAL AND MOISTURE PROTECTION
*070001 – WATERPROOFING, DAMPPROOFING AND CAULKING 14
*070002 – ROOFING AND FLASHING 26
071326 – AIR AND VAPOR BARRIERS 13
072100 – INSULATION 8
074213 – PREFORMED CLADDING 20
074233 – PHENOLIC RAINSCREEN SYSTEM.....12
074247 – FIBER REINFORCED CEMENTITIOUS PANEL RAINSCREEN.....14
078120 – SPRAY APPLIED FIREPROOFING.....10

DIVISION 8 – DOORS AND WINDOWS
*080001 – METAL WINDOWS.....35
*080002 – GLASS AND GLAZING 7
081113 – HOLLOW METALWORK 8
081416 – WOOD AND PLASTIC DOORS 7
087100 – FINISH HARDWARE.....28

DIVISION 9 – FINISHES
*090002 – TILE.....16
*090003 – ACOUSTICAL TILE.....15
*090005 – RESILIENT FLOORING.....12
*090007 – PAINTING 12
092116 – GYPSUM WALLBOARD 17
096466 – WOOD AND ATHLETIC FLOORING 9
096816 – CARPETING.....15
098400 – ACOUSTICAL WALL TREATMENT.....7
099737 – DRY ERASE COATING 7

Conditions of the Contract

NOTICE TO BIDDERS

In accordance with Chapter 193 of the Acts and Resolves of 2004, an Act Further Regulating Public Construction in the Commonwealth, and M.G.L. Chapter 149, the City of Amesbury, the Awarding Authority, invites sealed bids from **pre-qualified filed subcontractors and pre-qualified general contractors** for the NEW AMESBURY ELEMENTARY SCHOOL, in accordance with the Contract Documents prepared by DiNisco Design, Inc., 99 Chauncy Street, Suite 901, Boston, MA 02111. The project consists of **new construction of a 98,196 SF elementary school and related site work**. **The estimated value of the General Contract is $47,000,000**.

This project is being Electronically Bid (E-Bid). All bids shall be submitted online at www.Projectdog.com. Hard copy bids will not be accepted by the Awarding Authority. Tutorials and Instructions are available online at www.Projectdog.com. Click here to download the Projectdog, Inc. Supplemental Instructions to Bidders for Electronic Bid Projects (E-Bid). For assistance, contact Projectdog Inc. at 978.499.9014.

Bids must be received no later than the dates and times specified below.

General bids and Filed Sub-bids will only be accepted from previously pre-qualified Bidders with the exception of SECTION 140001-ELEVATORS, for which no pre-qualification is required.

GENERAL BIDS will be received until **2:00 PM, prevailing time, on Tuesday, April 20, 2021** and publicly opened online forthwith.

FILED SUB-BIDS for the trades listed below will be received until **2:00 PM, prevailing time, on Tuesday, April 06, 2021** and publicly opened online forthwith.

SUBTRADES
SECTION 040001 - MASONRY
SECTION 050001 - MISCELLANEOUS AND ORNAMENTAL IRON
SECTION 070001 - WATERPROOFING, DAMPPROOFING AND CAULKING
SECTION 070002 - ROOFING AND FLASHING
SECTION 080001 - METAL WINDOWS
SECTION 080002 - GLASS AND GLAZING
SECTION 090002 - TILE
SECTION 090003 - ACOUSTICAL TILE
SECTION 090005 - RESILIENT FLOORING
SECTION 090007 - PAINTING
SECTION 140001 - ELEVATORS
SECTION 210001 - FIRE PROTECTION
SECTION 220001 - PLUMBING
SECTION 230001 - HEATING, VENTILATING AND AIR CONDITIONING
SECTION 260001 - ELECTRICAL

General Bids and Sub-bids shall be accompanied by a bid security deposit in an amount that is not less than five percent of the bid amount, considering all alternates.

The Bid Security in the form of cash, or a certified check, treasurer's or cashier's check issued by a responsible bank or trust company and made payable to the Owner must be submitted with a completed Cash Bid Bond Affidavit form and received by the Owner before the time of bidding. In addition, the Bidder must also submit a completed Cash Bid Bond Affidavit form with their E-Bid. Click here to download the Cash Bid Bond Affidavit PDF fill-in form.

Alternately, the Bid Security may be in the form of a Bid Bond, which shall be:

a) with a surety company qualified to do business in the Commonwealth of Massachusetts and satisfactory to Owner;

b) conditional upon the faithful performance by the principal of the agreements contained in the Bid; and

c) submitted with your E-Bid online at www.Projectdog.com.

Bid Forms and Contract Documents are available online at www.Projectdog.com. Enter the Project Code **841245** in the project locator box and select "Acquire Documents" to download documents. Alternatively, a free CD-ROM may be requested by contacting Projectdog – shipping & handling charges apply. All plan holders must have an active online account on www.Projectdog.com to acquire documents, receive project notifications, and to submit bids electronically.

Bidders may obtain one (1) full paper bid set for a refundable deposit of **$350.00** in the form of certified check or money order payable to Projectdog Inc. Bid sets may be mailed for a non-refundable shipping & handling fee of **$125.00** also payable to Projectdog Inc. Send request with check(s) to Projectdog Inc., 18 Graf Road – Unit 8, Newburyport, MA 01950. Alternatively, bid sets may be picked up at the offices of Projectdog Inc., Monday through Friday from 8:30 a.m. to 5:00 p.m. – please call ahead for availability. The full amount of the deposit will be refunded to all responsive Bidders who return the documents in good condition within ten (10) days post-bid. Otherwise, the deposit shall become the property of Projectdog Inc.

Bid documents will be available after **12:00 Noon, Wednesday, March 10, 2021** from Projectdog.com as outlined above.

A non-mandatory Pre-Bid Conference shall take place at **3:00 PM on Thursday, March 18, 2021** at 193 Lions Mouth Road, Amesbury, Massachusetts. Meet in the Cashman School Parking Lot near the Service Entry. Note: Attendees must follow proper COVID-19 protocols. Wearing a mask is mandatory.

Addenda, if issued, will be posted to the Projectdog website and shall be accompanied by email notification to every individual or firm on record as having received the Contract Documents. Hard copies of addenda will not be mailed or faxed. It shall be the sole responsibility of the Contractor to ascertain the existence of any and all addenda.

The CITY OF AMESBURY reserves the right to waive any informalities in or to reject any or all general bids if it be in the public interest to do so.

The CITY OF AMESBURY also reserves the right to reject any sub-bid if less than three sub-bids are received for a sub-trade or if bid prices are not acceptable without further competition.

INSTRUCTIONS TO BIDDERS

ARTICLE 1 – BIDDER'S REPRESENTATION

1.1 Each General Bidder or Sub-Bidder (hereinafter called "Bidder") by making a bid or sub-bid (hereinafter called "bid") represents that:

a. The Bidder has read and understands the Contract Documents and the bid is made in accordance therewith.

b. The Bidder has visited the site and is familiar with the local conditions under which the Work has to be performed.

1.2 Failure to so examine the Contract Documents and site will not relieve any Bidder from any obligation under the bid as submitted.

ARTICLE 2 – GENERAL BIDDER'S AND FILED SUB-BIDDER'S PREQUALIFICATION

2.1 **Only bidders who have been pre-qualified are eligible to submit bids for this project with the exception of SECTION 140001-ELEVATORS, for which no pre-qualification is required.**

2.2 General bids and filed sub-bids must be accompanied by (1) a Certificate of Eligibility issued by the Division of Capital Asset Management and Maintenance (DCAMM), showing that the Bidder has been approved to bid on projects the size and nature of this project, and (2) a Contractor Update Statement, DCAMM Form CQ3 (create a pdf file of the Certificate and browse & attach at www.projectdog.com).

2.3 The Division of Capital Asset Management and Maintenance (DCAMM) has revised the Prime/General and Sub-bidder Update Statements effective January 1, 2010. Please note that due to a typographical error, there is a revised Sub-bidder Update Statement form which issued February 5, 2010. Both forms are also available from DCAMM's web site www.mass.gov/dcam under "Contractor Certification".

2.4 The main revisions were to ensure that bidders include information that was not disclosed on their most recent Application for Certificate of Eligibility filed with the Division of Capital Asset Management and Maintenance (DCAMM). Please be careful to read all instructions on these forms if you are a bidder on a project being bid pursuant to M.G.L. Chapter 149 and/or 149A. If you have any questions regarding this matter, please contact the DCAMM Contractor Certification Office at (617) 727-9320.

2.5 It is the bidder's responsibility to obtain the necessary forms from DCAMM and make application to DCAMM in sufficient time for DCAMM to evaluate the application and issue a Certificate of Eligibility.

2.6 The Contractor Update Statement is not a public record as defined in M.G.L., Chapter 4, Section 7 and will not be open to public inspection.

ARTICLE 3 – EQUAL EMPLOYMENT OPPORTUNITY REQUIREMENTS

3.1 **Compliance with equal opportunity requirements of Appendix A, including the certifications of SECTION 00520 and SECTION 00530 are a prerequisite for receiving the award of the Contract.**

ARTICLE 4 – MBE AND WBE GOALS AND PARTICIPATION

4.1 The applicable goals for minority business enterprise (MBE) and woman business enterprise (WBE) participation established for this Contract are as follows:

- MBE – 4.2% of the CONTRACT Price
- WBE – 8.8% of the CONTRACT Price

General bidders must agree to comply with the requirements of Appendix B. The Owner has the discretion to determine whether compliance with the participation goals is feasible and may reduce or waive these goals. To reduce or waive the MBE/WBE participation goals, the apparent low General bidder must make this request in writing to the Owner no later than five (5) working days after the general bid opening. The request must be supported by documentation demonstrating good faith efforts have been made to meet the goals.

ARTICLE 5 – ELECTRONIC BID

5.1 This project is being Electronically Bid (E-Bid). All bids shall be submitted online at www.Projectdog.com. Hard copy bids will not be accepted by the Awarding Authority. Tutorials and Instructions are in Appendix C and available online at www.Projectdog.com.

ARTICLE 6 – REQUESTS FOR INTERPRETATION

6.1 All questions by prospective bidders as to the interpretations of the Information for Bidders, bid forms, form of contract, general and supplementary conditions, drawings, specifications or bonds, must be submitted in writing to DiNisco Design, Inc., 99 Chauncy Street, Boston, MA 02111, at least seven (7) days before the dates herein set for the opening of bids. Questions may be submitted via e-mail to Jim Shuttleworth (j.shuttleworth@dinisco.com) copying Tim Dorman at NV5 (tim.dorman@NV5.com). An interpretation of all questions so raised which, in the Architect's opinion requires interpretation, will be replied via Addenda. No other form of communication in this regard will be considered legal and binding. Failure of any bidder to receive any such addendum or interpretation shall not relieve such bidder from any obligation under this bid as submitted. All addenda so issued shall be covered in the Bid and shall become part of the Contract Documents.

6.2 Bidding Documents and Addenda will be posted online at Projectdog.com. This site is the only official site for prospective bidders to obtain information and digital copies of official City bid documents. Bid Forms and Contract Documents are available online at www.Projectdog.com. Enter the Project Code 000000 in the project locator box and select "Acquire Documents" to download documents. Alternatively, a free CD-ROM may be requested by contacting Projectdog – shipping & handling charges apply. All plan holders must have an active online account on www.Projectdog.com to acquire documents, receive project notifications, and to submit bids electronically.

The City does not warrant, represent or guarantee the accuracy or completeness of any bid documents and/or information retrieved from any third party source, and the City is not responsible for any loss or damage including, but not limited to, time, money, or goodwill arising from errors, inaccuracies or omissions in any third party bid documents and/or information.

It is the responsibility of each prospective bidder to check the Projectdog website on a DAILY basis through the close of bids for any applicable addenda. Prospective bidders must download all bid documents for review and bid. It is the responsiblity of each prospective bidder to verify the completeness of their downloaded bid documents before submitting a bid and accompanying executed addenda acknowledgement and other required forms.

6.3 A notification of addenda will be emailed to all prospective bidders to email addresses furnished by them for such purposes. Bidders picking up sets of bid documents will be given all addenda issued to date and will be required to sign up for all documents, acknowledging receipt. Failure of any bidder to receive any such addenda or interpretation shall not relieve such bidder from any obligation under its bid as submitted, and each bidder must confirm for itself that it has received all addenda. All addenda so issued shall become part of the Contract Documents.

ARTICLE 7 – PREPARATION AND SUBMISSION OF BIDS

7.1 Bids shall be submitted electronically on the "Form for General Bid" or the "Form for Sub-Bid" at www.Projectdog.com as appropriate. The forms enclosed in the Project Manual shall not be extracted or used.

7.2 All entries on the bid form shall be made online. Any documents that are attached to the bid must be in pdf format.

7.3 Sums shall be expressed in both words and figures in the space indicated on the bid form. Where there is a discrepancy between the bid sum expressed in words and the bid sum expressed in figures, the words shall govern. Note: the electronic bid forms match the “word” amount to the numeric “figure” amount entered.

7.4 If a bid bond is used for deposit, it shall be in a form similar to A.I.A. Document A310, "Bid Bond;" shall be with a surety company satisfactory to the Awarding Authority and qualified to do business in Massachusetts; and shall be conditioned upon the faithful performance by the principal of the agreements contained in the bid.

7.5 Each sub-bidder is required to furnish bonds as required by M.G.L. Chapter 149 c. 149 Section 44D3/4. Costs for sub-contractor’s bond premiums shall be paid for by the sub-bidder in accordance with this section.

7.6 Bid Forms will be posted online at www.Projectdog.com with the Contract Documents. Watermarked Bid Forms included in the Project Manual should not be extracted or used for electronic bidding. All required Bid Forms must be completed and submitted in PDF formatted files. The Bidder must fill-in all required fields and signatures either digitally or manually (print, fill-in, and scan to PDF).

7.7 The Bidder shall access the Projectdog.com E-Bidding System by entering the Project Code **841245** in the project locator box then selecting "GC E-Bid" or "Sub E-Bid" from the project's "Project Details" page. The Bidder must enter their bid price as a numeric, whole dollar value only with no punctuation. The E-Bidding system automatically translates the numeric value into words and displays the bid price in both figures and words on the submitted bid form.

7.8 Bidders may upload ("Add File" or "Replace File"), review ("View File"), Save, submit ("Submit my E-Bid", or retract ("Retract my E-Bid" their E-Bid at any time prior to the designated deadline. The server clock is displayed on the project's E-Bidding page and is the time of record. Bidders must select "Submit my E-Bid" prior to the designated deadline to officially submit their E-Bid online. Once submitted, an E-Bid cannot be edited. To modify a submitted E-Bid, Bidders must retract their submission, make and Save any changes, and then submit the updated E-Bid. Upon submitting or retracting their E-Bid, Bidders will receive a convenience e-mail for informational purposes only. Bidders are encouraged to contact Projectdog if the email is not received.

7.9 Bidders are strongly encouraged to review their submitted E-Bid package by selecting "View My Bid Package" from the project's E-Bidding page. Uploaded files may be reviewed individually by selecting "View File". It is the Bidder's responsibility to confirm online that their E-Bid package has been submitted successfully. Timely submission of an E-Bid shall be the full responsibility of the Bidder. It is also the Bidder's responsibility to ensure that their submitted bid is 100% true, complete and accurate.

ARTICLE 8 – TAXES

8.1 The Awarding Authority is exempt from payment of the Massachusetts Sales Tax. The General Contractor will be provided a Certificate of Exemption number at the Pre-Construction Conference.

ARTICLE 9 – ALTERNATES

9.1 Each Bidder shall acknowledge all alternates listed.

9.2 Each Bidder shall bid on all Alternates by entering the dollar amount and selecting the "Add" or "Subtract" radio button necessitated by each Alternate listed in the corresponding space on the project's E-Bidding page. If an Alternate does not involve a change in dollar value, the Bidder shall so indicate by typing **"0"** for the dollar value of that Alternate and by selecting the **"Add"** radio button in the corresponding space on the project's E-Bidding page.

9.3 Filed Sub-Bidders

If the Alternate does not affect the sub-trade category of work, the Sub-Bidder shall so indicate by typing **"0"** for the dollar value of that Alternate and by selecting the **"Add"** radio button in the corresponding space on the project's E-Bidding page.

9.4 General Bidders shall enter on the Form for General Bid a single amount for each alternate which shall consist of the Sub-Bidder's amounts and the amount for work performed by the General Contractor.

9.5 The Low Bidder will be determined on the basis of the sum of the base bid and the alternates accepted. Alternates will be accepted in the order that they are listed.

ARTICLE 10 – ELECTRONIC SUBMISSION OF BIDS

10.1 Electronic Submission of Filed Sub-Bids

Sub-bids, including the security bid deposit bond or cash bid bond affidavit, DCAM Sub-bidder Certificate of Eligibility, and DCAM Sub-Bidder Update Statement shall be submitted electronically online at www.projectdog.com. No hard copy bids will be accepted.

You will receive an email confirming submission of your bid. Keep the email as a receipt that your bid was submitted. Note: you may modify your bid at any time prior to the bid date and time advertised. You will receive a new email each time you re-submit your bid.

10.1.1 Date and time for receipt of bids is set forth in the Notice to Bidders.

10.1.2 Timely submission of a bid online shall be the full responsibility of the Bidder. Note: The project countdown clock on the website is the official clock that will determine when the bids are due.

10.2 Electronic Submission of General Bids

General Bids, including the bid security deposit bond or cash bid bond affidavit, DCAM Certificate of Eligibility, and Prime / General Contractor Update Statement (CQ3) shall be submitted electronically online at www.projectdog.com. No hard copy bids will be accepted. You will receive an email confirming submission of your bid. Keep the email as a receipt that your bid was submitted. Note: You may modify your bid at any time prior to the bid date and time advertised. You will receive a new email each time you re-submit your bid.

10.2.1 Date and time for receipt of bids is set forth in the Notice to Bidders.

10.2.2 Timely submission of a bid online shall be the full responsibility of the Bidder. Note: The project countdown clock on the website is the official clock that will determine when the bids are due.

10.3 Cash bid security deposits, payable to the Awarding Authority (The City of Amesbury, MA), shall be either cash, certified check, or treasurer's or cashier's check issued by a responsible bank or trust company and must be submitted with the completed Cash Bid Bond Affidavit form and received by the Awarding Authority before the time of bidding. The **cash** bid deposit, **if used in lieu of a bid security deposit bond**, and completed Cash Bid Bond Affidavit form shall be hand delivered by appointment only or mailed to:

City of Amesbury, Treasurer's Office
62 Friend Street
Amesbury, MA 01913
(978) 388-8105 (call for appointment)

In addition, the Bidder must also submit a completed a Cash Bid Bond affidavit form with their e-bid. This form is available from the Projectdog website.

ARTICLE 11 – WITHDRAWAL OF BIDS

11.1 Withdrawal of Bids (Before Opening of Bids):

Any bid may be withdrawn (retracted) prior to the designated deadline by selected "Retract My E-Bid" from the project's E-Bidding page. Upon retracting, the Bidder will receive a convenience e-mail for informational purposes only. It is the Bidder's responsibility to review and confirm online that their bid has been retracted successfully.

11.2 Withdrawn bids may be resubmitted up to the time designated for the receipt of bids.

11.3 No bid of the three lowest General Bidders and the Sub-bidders they name on their general bids, and of the three lowest Sub-Bidders for each sub-trade shall be withdrawn within thirty days, Saturdays, Sundays, and legal holidays excluded, after the opening of the general bids.

ARTICLE 12 – AWARD

12.1 At its sole discretion, the Awarding Authority reserves the right to waive any informalities in or to reject any or all general and/or subcontractor bids if it be in the public interest to do so.

12.2 At its sole discretion, the Awarding Authority also reserves the right to reject any sub-bid if it determines that such sub-bid does not represent the bid of a person competent to perform the work as specified or if less than three sub-bids are received for sub-trade or if bid prices are not acceptable without further competition.

12.3 The Contract will be awarded to the lowest responsible and eligible bidder except in the event of substitution as provided under M.G.L. Chapter 149, Section 44E and 44F, in which case the procedure as required by said Section shall govern the award of the Contract.

12.4 As used herein, the term "lowest responsible and eligible Bidder" shall mean the General Bidder whose bid is the lowest of those Bidders demonstrably possessing the skill, ability, and integrity necessary for the faithful performance of the Work and who shall certify that he is able to furnish labor that can work in harmony with all other labor employed on the Work.

12.5 Refer to ARTICLE 3 – EQUAL EMPLOYMENT OPPORTUNITY REQUIREMENTS and ARTICLE 4 – MBE AND WBE GOALS AND PARTICIPATION for additional criteria for award of contract.

END OF SECTION

APPENDIX A

Supplemental Equal Employment Opportunity, Non-Discrimination and Affirmative Action Program

THE COMMONWEALTH OF MASSACHUSETTS

SUPPLEMENTAL EQUAL EMPLOYMENT OPPORTUNITY, NON-DISCRIMINATION AND AFFIRMATIVE ACTION PROGRAM

APPENDIX A

I. Definitions

For purposes of this contract,

"Minority" means a person who meets one or more of the following definitions:

(a) American Indian or Native American means: all persons having origins in any of the original peoples of North America and who are recognized as an Indian by a tribe or tribal organization.
(b) Asian means: All persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian sub-continent, or the Pacific Islands, including, but not limited to China, Japan, Korea, Samoa, India, and the Philippine Islands.
(c) Black means: All persons having origins in any of the Black racial groups of Africa, including, but not limited to, African-Americans, and all persons having origins in any of the original peoples of the Cape Verdean Islands.
(d) Eskimo or Aleut means: All persons having origins in any of the peoples of Northern Canada, Greenland, Alaska, and Eastern Siberia.
(e) Hispanic means: All persons having their origins in any of the Spanish-speaking peoples of Mexico, Puerto Rico, Cuba, Central or South America, or the Caribbean Islands.

"State construction contract" means a contract for the construction, reconstruction, installation, demolition, maintenance or repair of a building or capital facility, or a contract for the construction, reconstruction, alteration, remodeling or repair of a public work undertaken by a department, agency, board, or commission of the commonwealth.

"State assisted construction contract" means a contract for the construction, reconstruction, installation, demolition, maintenance or repair of a building or capital facility undertaken by a political subdivision of the commonwealth, or two or more political subdivisions thereof, an authority, or other instrumentality and whose costs of the contract are paid for, reimbursed, grant funded, or otherwise supported, in whole or in part, by the commonwealth.

II. Equal Opportunity, Non-Discrimination and Affirmative Action

During the performance of this Contract, the Contractor and all subcontractors (hereinafter collectively referred to as "the Contractor") for a state construction contract or a state assisted construction contract, for him/herself, his/her assignees and successors in interest, agree to comply with all applicable equal employment opportunity, non-discrimination and affirmative action requirements, including but not limited to the following:

In connection with the performance of work under this contract, the Contractor shall not discriminate against any employee or applicant for employment because of race, color, religious creed, national origin, sex, sexual orientation, genetic information, military service, age, ancestry or disability, shall not discriminate in the selection or retention of subcontractors, and shall not discriminate in the procurement of materials and rentals of equipment.

The aforesaid provision shall include, but not be limited to, the following: employment upgrading, demotion, or transfer; recruitment advertising, layoff or termination; rates of pay or other forms of compensation; conditions or privileges of employment; and selection for apprenticeship or on-the-job training opportunity. The Contractor shall comply with the provisions of chapter 151B of the Massachusetts General Laws, as amended, and all other applicable anti-discrimination and equal opportunity laws, all of which are herein incorporated by reference and made a part of this Contract.

The Contractor shall post hereafter in conspicuous places, available for employees and applicants for employment, notices to be provided by the Massachusetts Commission Against Discrimination setting forth the provisions of the Fair Employment Practices Law of the Commonwealth (Massachusetts General Laws Chapter 151B).

In connection with the performance of work under this contract, the Contractor shall undertake, in good faith, affirmative action measures to eliminate any discriminatory barriers in the terms and conditions of employment on the grounds of race, color, religious creed, national origin, sex, sexual orientation, genetic information, military service, age, ancestry or disability. Such affirmative action measures shall entail positive and aggressive measures to ensure non-discrimination and to promote equal opportunity in the areas of hiring, upgrading, demotion or transfer, recruitment, layoff or termination, rate of compensation, apprenticeship and on-the-job training programs. A list of positive and aggressive measures shall include, but not be limited to, advertising employment opportunities in minority and other community news media; notifying minority, women and other community-based organizations of employment opportunities; validating all job specifications, selection requirements, and tests; maintaining a file of names and addresses of each worker referred to the Contractor and what action was taken concerning such worker; and notifying the administering agency in writing when a union with whom the Contractor has a collective bargaining agreement has failed to refer a minority or woman worker. These and other affirmative action measures shall include all actions required to guarantee equal employment opportunity for all persons, regardless of race, color, religious creed, national origin, sex, sexual orientation, genetic information, military service, age, ancestry or disability. One purpose of this provision is to ensure to the fullest extent possible an adequate supply of skilled tradesmen for this and future Commonwealth public construction projects.

III. Minority and Women Workforce Participation

Pursuant to his/her obligations under the preceding section, the Contractor shall strive to achieve on this project the labor participation goals contained herein. Said participation goals shall apply in each job category on this project including but not limited to bricklayers, carpenters, cement masons, electricians, ironworkers, operating engineers and those classes of work enumerated in Section 44F of Chapter 149 of the Massachusetts General Laws. The participation goals for this project shall be 15.3% for minorities and 6.9% for women. The participation goals, as set forth herein, shall not be construed as quotas or set-asides; rather, such participation goals will be used to measure the progress of the Commonwealth's equal opportunity, non-discrimination and affirmative action program. Additionally, the participation goals contained herein should not be seen or treated as a floor or as a ceiling for the employment of particular individuals or group of individuals.

IV. Liaison Committee

At the discretion of the agency that administers the contract for the construction project there may be established for the life of the contract a body to be known as the Liaison Committee. The Liaison Committee shall be composed of one representative each from the agency or agencies administering the contract for the construction project, hereinafter called the administering agency, a representative from the Office of Affirmative action, and such other representatives as may be designated by the administering agency.

The Contractor (or his/her agent, if any, designated by him/her as the on-site equal employment opportunity officer) shall recognize the Liaison Committee as an affirmative action body, and shall establish a continuing working relationship with the Liaison Committee, consulting with the Liaison Committee on all matters related to minority recruitment, referral, employment and training.

V. Reports and Records

The Contractor shall prepare projected workforce tables on a quarterly basis when required by the administering agency. These shall be broken down into projections, by week, of workers required in each trade. Copies shall be furnished one week in advance of the commencement of the period covered, and also, when updated, to the administering agency and the Liaison Committee when required.

The Contractor shall prepare weekly reports in a form approved by the administering agency, unless information required is required to be reported electronically by the administering agency, the number of hours worked in each trade by each employee, identified as woman, minority, or non-minority. Copies of these shall be provided at the end of each such week to the administering agency and the Liaison Committee.

Records of employment referral orders, prepared by the Contractor, shall be made available to the administering agency on request.

The Contractor will provide all information and reports required by the administering agency on instructions issued by the administering agency and will permit access to its facilities and any books, records, accounts and other sources of information which may be determined by the administering agency to effect the employment of personnel. This provision shall apply only to information pertinent to the Commonwealth's supplementary non-discrimination, equal opportunity and access and opportunity contract requirements. Where information required is in the exclusive possession of another who fails or refuses to furnish this information, the Contractor shall so certify to the administering agency and shall set forth what efforts he has made to obtain the information.

VI. Access to Work Site

A designee of the administering agency and a designee of the Liaison Committee shall each have a right to access the work site.

VII. Solicitations for Subcontracts, and for the Procurement of Materials and Equipment

In all solicitations either by competitive bidding or negotiation made by the Contractor either for work to be performed under a subcontract or for the procurement of materials or equipment, each potential subcontractor or supplier shall be notified in writing by the Contractor of the Contractor's obligations under this contract relative to non-discrimination and equal opportunity.

VIII. Sanctions

Whenever the administering agency believes the General or Prime Contractor or any subcontractor may not be operating in compliance with the provisions of the Fair Employment Practices Law of the Commonwealth (Massachusetts General Laws Chapter 151B), the administering agency may refer the matter to the Massachusetts Commission Against Discrimination ("Commission") for investigation.

Following the referral of a matter by the administering agency to the Massachusetts Commission Against Discrimination, and while the matter is pending before the MCAD, the administering agency may withhold payments from contractors and subcontractors when it has documentation that the contractor or subcontractor has violated the Fair Employment Practices Law with respect to its activities on the Project, or if the administering agency determines that the contractor has materially failed to comply with its obligations and the requirements of this Section. The amount withheld shall not exceed a withhold of payment to the General or Prime Contractor of 1/100 or 1% of the contract award price or $5,000, whichever sum is greater, or, if a subcontractor is in non-compliance, a withhold by the administering agency from the General Contractor, to be assessed by the General Contractor as a charge against the subcontractor, of 1/100 or 1% of the subcontractor price, or $1,000 whichever sum is greater, for each violation of the applicable law or contract requirements. The total withheld from any one General or Prime Contractor or subcontractor on a Project shall not exceed $20,000 overall. No withhold of payments or investigation by the Commission or its agent shall be initiated without the administering agency providing prior notice to the Contractor.

If, after investigation, the Massachusetts Commission Against Discrimination finds that a General or Prime Contractor or subcontractor, in commission of a state construction contract or state-assisted construction contract, violated the provisions of the Fair Employment Practices Law, the administering agency may convert the amount withheld as set forth above into a permanent sanction, as a permanent deduct from payments to the General or Prime Contractor or subcontractor, which sanction will be in addition to any such sanctions, fines or penalties imposed by the Massachusetts Commission Against Discrimination:

No sanction enumerated under this Section shall be imposed by the administering agency except after notice to the General or Prime Contractor or subcontractor and an adjudicatory proceeding, as that term is used, under Massachusetts General Laws Chapter 30A, has been conducted.

IX. Severability

The provisions of this section are severable, and if any of these provisions shall be held unconstitutional by any court of competent jurisdiction, the decision of such court shall not affect or impair any of the remaining provisions.

X. Contractor's Certification

A bidder for a state construction contract or state assisted construction contract will not be eligible for award of the contract unless such bidder has submitted to the administering agency the following certifications, which shall be incorporated into the resulting contract:

a. Contractor's Equal Employment Certificate – SECTION 00530

b. Subcontractor's Equal Employment Certificate – SECTION 00540

XI. Subcontractor Requirements

Prior to the award of any subcontract for a state construction contract or a state assisted construction contract, regardless of tier, the Prime or General Contractor shall provide all prospective subcontractors with a complete copy of this Section entitled "Supplemental Equal Employment Opportunity, Non-Discrimination and Affirmative Action Program" and will incorporate the provisions of this Section by reference into any and all contracts or work orders for all subcontractors providing work on the Project. In order to ensure that the said subcontractor's certification becomes a part of all subcontracts under the prime contract, the Prime or General Contractor shall certify in writing to the administering agency that it has complied with the requirements as set forth in the proceeding paragraph.

APPENDIX B

Revised Overall Annual Program Participation Goals for
MBE & WBE Participation

Supplier Diversity Office Construction Reform Program
Municipalities General Guidelines, including
Attachments A, B, C and D; and Exhibits A, B and C

REVISED OVERALL ANNUAL PROGRAM PARTICIPATION GOALS FOR MBE & WBE PARTICIPATION ON CERTAIN STATE FUNDED BUILDING PROJECTS

Affirmative Marketing Program Announcement:

Pursuant to M.G.L. c 7c, §6 and M.G.L. c. 7, §61(l), the Supplier Diversity Office ("SDO") and the Division of Capital Asset Management and Maintenance ("DCAMM") have set new Overall Annual Program Goals for Minority Business Enterprise ("MBE") and Women Business Enterprise ("WBE") Participation. These new Overall Annual MBE and WBE Participation Goals apply to the total dollar amount of contracts awarded annually for construction work and design services on affected capital facility projects and state assisted building projects as those projects are defined in the above referenced laws and related Executive Orders.

Effective July 1, 2020, and until such time as the Overall Annual MBE and WBE Participation Goals may be revised, the MBE and WBE participation goals applicable to annual spending by those affected public awarding authorities on their building construction and design project awards are as follows:

Overall Annual Program Goals Applied to Awarded Projects

	Construction Awards	Design Awards
MBE Participation	4.2%	6.6%
WBE Participation	8.8%	15.0%

Important Note: *These are annual goals and are only applicable to the overall annual dollar value of contracts awarded by an awarding authority. These overall annual participation goals should not be applied in setting MBE and WBE participation goals on individual construction or design projects. Individual project goals shall be set using project specific information including project costs, MBE/WBE availability and other applicable factors.*

For those individual building construction or design contracts advertised for procurement on or after July 1, 2020 for which MBE and WBE Participation Goals are set, the MBE and WBE participation goals shall be established on a project by project basis and be listed as separate MBE and WBE participation goals in procurement documents and contracts.

MBE and WBE goals for individual building construction and design contracts shall be established on a project by project basis, using project specific information including estimated project costs, MBE/WBE availability, project specific and other applicable factors. Municipal public awarding authorities should contact SDO, and state public awarding authorities should contact DCAMM for additional information on setting project participation goals on individual projects, as well as their project compliance and participation reporting responsibilities.

SUPPLIER DIVERSITY OFFICE
CONSTRUCTION REFORM PROGRAM
MUNICIPALITIES GENERAL GUIDELINES

The Supplier Diversity Office (SDO) issues the Construction Reform Program guidelines on the Municipality Guidelines webpage in accordance with the statutory standards set forth in Chapter 193 of the Acts of 2004, which includes a municipal affirmative marketing program for currently certified firms in the Commonwealth of Massachusetts.

THE BIDDING AND CONTRACT INSTRUCTIONS ON THE MUNICIPALITY GUIDELINES WEBPAGE MUST BE INCORPORATED INTO CONTRACT DOCUMENTS, AS REQUIRED BY CHAPTER 193 OF THE ACTS OF 2004.

Municipalities must incorporate Minority Business Enterprise (MBE) and Women Business Enterprise (WBE) goals into both their design and construction procurement for municipal contracts for the construction, reconstruction, alteration, remodeling, repair or demolition of any public building by any city or town that includes funding provided by the Commonwealth such as legislative appropriations, grant awards, reimbursements and municipal commitments to use state funds.

Only firms which are **currently** MBE or WBE **certified** by the Supplier Diversity Office (SDO) at the date of contract award will be counted for Construction Reform program purposes. The firm's current SDO state certification letter **shall serve as the sole and exclusive proof of state certification**.

Certification as a Disadvantaged Business Enterprise (DBE), certification as an MBE/WBE by any agency other than SDO, or submission of an application to SDO for certification as an MBE/WBE **shall not confer** MBE or WBE status on a firm for purposes of construction reform program participation credit.

Affirmative Marketing Participation Goals:
The combined goals below were established by the Division of Capital Asset Management and Maintenance (DCAMM) and the Supplier Diversity Office (SDO) and require a reasonable representation of both MBE and WBE firms:

Design Participation: Combined MBE/WBE goal of ~~(17.9%)~~ *21.6%
Construction Participation: Combined MBE/WBE goal of ~~(10.4%)~~ *13.0%

Documentation submitted with your signature means that you swear under the pains and penalties of perjury that you have read and understand it. Any false claims for MBE/WBE credit are subject to the Massachusetts False Claims Act and any applicable civil or criminal penalties as determined by the Massachusetts Attorney General's office.1

Questions and Contact Information:
Separate and individual PDF files are attached for your reference. All questions concerning the Construction Reform Act and the implementation of the new law may be directed to the SDO Director of Construction Reform at **617-502-8851** or by e-mail at **John.B.Fitzpatrick@state.ma.us**

1 See generally, MG.L. c.12, §§5A-5O, inclusive.

*MODIFIED PER CENTRAL REGISTER ISSUED UPDATED GOALS 6/2020

ATTACHMENT A

PROCEDURE FOR PRE-ADVERTISING ADJUSTMENT OF MBE/WBE PARTICIPATION GOALS

A. Affirmative Marketing Participation Goals:
The combined goals below were established by the Division of Capital Asset Management and Maintenance (DCAMM) and the Supplier Diversity Office (SDO) and require a reasonable representation of both MBE and WBE firms.

Design Participation: **Combined MBE/WBE goal of (~~17.9%~~)** *21.6%
Construction Participation: **Combined MBE/WBE goal of (~~10.4%~~)** *13.0%

All documentation submitted in connection with MBE/WBE credit must be true, accurate and correct to the best of your knowledge. Your signature on any MBE/WBE goal-related document means that you have read and understand it. Any false claims for MBE/WBE credit are subject to the Massachusetts False Claims Act and any applicable civil or criminal penalties as determined by the Massachusetts Attorney General's office. [1]

B. Criteria for Adjustment of Goals:
An Awarding Authority may file a written request for the adjustment of participation goals with the Executive Director of the SDO prior to the advertising of the contract.[2] Factors that may be considered include any or all of the following:

- Actual availability of SDO certified Minority-Owned Business Enterprises (MBE) or Women-Owned Business Enterprises (WBE);
- The geographic location of the project;
- The scope of work of the project including the opportunities for sub-contracting and subdividing the work and other relevant factors; and
- The SDO, at the request of the awarding authority or any perspective bidder may agree to assist in MBE/WBE outreach. The SDO is not required nor obligated to do this. It is a complementary service provided, and one the SDO strongly suggests be taken advantage of.

C. Project Thresholds:
Participation Goals[3] can be adjusted by the Awarding Authority without filing a formal request with SDO if the total estimated construction or design cost is $100,000 or less.

D. Supporting Documentation for Design and Construction Projects will include, but are not limited to the following:

1. Documents to support a reduction/waiver request should include a general description of the project, a copy of the detailed project estimates and the deadline for placement of project advertisement;
2. The reasons that the Awarding Authority or its representative is requesting a reduction/waiver of the MBE/WBE participation goals;
3. Documentation that there may be a lack of eligible MBE/WBEs to perform the design or construction contract work after reviewing the SDO Business Directory;
4. Documentation that all subcontracting opportunities were identified and made available to meet the MBE/WBE participation goals;
5. The Awarding Authority may also submit any other information supporting its request for adjustment of the MBE/WBE participation goals; and
6. All applicable sections of the **Massachusetts False Claims Act** as well as any related civil or criminal penalties as determined by the Massachusetts Attorney General are incorporated by reference into this document.[4]

E. Request for Adjustment of Design and Construction Goals:

1. Requests by an Awarding Authority for Adjustment of MBE/WBE Participation Goals must be submitted in writing no less than ten (10) working days before the deadline for placement of advertisements for the contract.
   Applications should be directed to the SDO Director of Construction Reform, One Ashburton Place, Room 1017, Boston, MA 02108 or by e-mail to: John.B.Fitzpatrick@state.ma.us,
2. Requests for adjustments on Design and Construction Goals must be applied for separately and are not interchangeable. Participation credits for modular projects can be awarded under either the design or construction goals, but not both.
3. The written request for the reduction/waiver must include the reasons for it and all supporting documentation.
4. The SDO will provide a written response prior to the advertising deadline.

---

[1] *See generally*, MG.L. c.12, §§5A-5O, inclusive.
[2] In rare instances after advertising and before bidding based on new information you may request an adjustment post-advertisement. Any adjustment granted must be the subject of an Addendum.
[3] For state-assisted building projects.
[4] *See generally*, MG.L. c.12, §§5A-5O, inclusive.

*MODIFIED PER CENTRAL REGISTER ISSUED UPDATED GOALS 6/2020

ATTACHMENT B

PROCEDURES FOR PRE-BID REDUCTION/WAIVER OF MBE/WBE PARTICIPATION GOALS

A. Affirmative Marketing Participation Goals:

The combined goals below were established by the Division of Capital Asset Management and Maintenance (DCAMM) and the Supplier Diversity Office (SDO) and require a reasonable representation of both MBE and WBE firms.

Design Participation: **Combined MBE/WBE goal of (~~17.9%~~)** *21.6%
Construction Participation: **Combined MBE/WBE goal of (~~10.4%~~)***13.0%

All documentation submitted in connection with MBE/WBE credit must be true, accurate and correct to the best of your knowledge. Your signature on any MBE/WBE goal-related document means that you have read and understand it. Any false claims for MBE/WBE credit are subject to the Massachusetts False Claims Act and any applicable civil or criminal penalties as determined by the Massachusetts Attorney General's office. [1]

B. Criteria for Adjustment of Goals: [2]

Potential Bidders may request a written adjustment before bids are submitted. An awarding authority cannot grant an adjustment of goals. Only the SDO has the authority to do this. Written requests must demonstrate that there is no feasible way to meet established contract goals and that a **"Diligent Good Faith Effort"** was made to comply. The request for reduction/waiver will ultimately be decided by the SDO. Factors that may be considered include any or all of the following:

- Actual availability of certified Minority- and/or Women-Owned Business Enterprises (MBE/WBEs);
- The geographic location of the project;
- The scope of work of the project including the opportunities for sub-contracting and subdividing the work;
- Documentation that shows the Bidder attempted in a diligent good faith effort to fulfill contract goals and was unable to do so; and
- Other relevant factors;

Although the SDO is not obligated to do so, the SDO may agree to assist either an awarding authority or any potential bidder with its MBE/WBE outreach. **We strongly encourage you to use this service.**

C. Required Supporting Documentation from Potential Construction Bidders:

- Using the SDO Reduction/Waiver Request form, the Bidder must prove that notices were sent to certified firms.
- They must break down larger scopes of work into its smallest component parts so that the widest available pool of ready, willing and able certified MBE/WBE firms may participate;
- In the event that an individual scope of work was not made available to ready, willing and able certified firms in certain trade categories,[3] a bidder must explain why in writing. Follow up documentation such as phone logs, or e-mail may be required to determine with certainty whether the firms were interested in performing the work.
- Additional documentation of reasonable efforts on the part of the Bidder to assist a potential MBE/WBE firm may include items such as, but not limited to: (a) bonding, insurance, lines of credit or any other type of assistance; or (b) evidence that the Bidder placed advertisements in appropriate media and trade association publications.
- The Bidder shall also submit any other information reasonably requested by the Awarding Authority.

D. Process for Requesting Waiver/Reduction of Construction Goals:

Requests from prospective general Bidders to reduce or waive the MBE/WBE participation goals must be written. An awarding authority must receive such requests no later than **ten (10) working days** before the general bids are due. Requests submitted beyond this deadline will not be considered.

[1] *See generally,* MG.L. c.12, §§5A-5O, inclusive.
[2] Applies to waivers and reductions.
[3] Other than work performed by filed Sub-Bidders.

*MODIFIED PER CENTRAL REGISTER ISSUED UPDATED GOALS 6/2020

ATTACHMENT C
MODEL BIDDING INSTRUCTIONS

A. Affirmative Marketing Participation Goals:
Each Municipality must enforce the current Affirmative Marketing Goals developed by the Division of Capital Asset Management and Maintenance (DCAMM) and Supplier Diversity Office (SDO) as follows: [1]

Design Participation: **Combined MBE/WBE goal of (~~17.9%~~)** *21.6%
Construction Participation: **Combined MBE/WBE goal of ~~(10.4%)~~***13.0%

All documentation submitted in connection with MBE/WBE credit must be true, accurate and correct to the best of your knowledge. Your signature on any MBE/WBE goal-related document means that you have read and understand it. Any false claims for MBE/WBE credit are subject to the Massachusetts False Claims Act and any applicable civil or criminal penalties as determined by the Massachusetts Attorney General's office. [2]

A. MBE and WBE Participation Requirements:

1. Compliance with the requirements of this Section is a pre-requisite for receiving a Contract Award. The Contractor must utilize a reasonable representation mix of both MBE and WBE firms whose collective participation either meets or exceeds the overall combined contract goal. Both MBE and WBE firms shall have an opportunity to work on public projects with a combined MBE/WBE goal.
2. Projects with a combined goal must include a reasonable representation of **both** MBE **and** WBE firms to meet or exceed the combined goal. Both categories must be reflected in the participation goals, e.g. bidders who meet the participation goals of one category, such as MBE, must still find WBE representation. Combined contract participation goals must be reported and tracked separately.
3. The MBE and WBE participation goals for this Contract are set forth above. The Awarding Authority reserves the right to accept and review written requests but does not have the authority to reduce or waive the MBE or WBE participation goals established for this contract. Waivers or reductions of MBE/WBE participation are contingent on the following: (a) MBE/WBE availability, (b) geographic location, (c) scope of work, (d) the percentage of work available for subcontracting to MBE/WBEs and/or (e) other relevant factors including documentation by General Bidder showing a **Diligent, Good Faith Effort** to secure commitments from MBE/WBE subcontractors. If these criteria are met, the Awarding Authority may submit the General Bidders request along with all the foregoing documentation to the Executive Director of the Supplier Diversity Office (SDO) for final determination.
4. All contracts shall provide MBE/WBE firms with contracting opportunities. If a bidder fails to make a subcontracting opportunity available to certified MBEs/WBEs, it must explain why in writing. The Bidder shall also demonstrate that, where commercially reasonable, subcontracts were divided into smaller scopes or tasks capable of being performed by MBE/WBEs.
5. A successful bidder must provide notice of: (a) each MBE/WBE solicited, and (b) each MBE/WBE listed in the SDO directory under the applicable trade category that was not solicited and reasons therefore. The Bidder shall also state the date that notices were mailed and provide a copy of the written notice(s) sent.
6. Reasonable follow up efforts include written notices sent to MBE/WBEs with telephone calls or personal visits in order to determine with certainty whether the MBE/WBEs were interested in performing the work. Phone logs or other documentation must be submitted.
7. A statement of the response received from each MBE/WBE solicited, including the reason for rejecting any MBE/WBE who submitted a bid or proposal may also be provided
8. If MBE/WBEs have difficulty obtaining bonding, insurance or lines of credit to participate in the project, prospective bidders must show reasonable efforts were made to assist MBE/WBEs to obtain bonding, insurance, or lines of credit.
9. Reasonable efforts may also include whether a Bidder placed advertisements in appropriate media and trade association publications announcing the Bidder's interest in obtaining bids or proposals from MBE/WBEs, and/or sent written notification to MBE/WBE economic development assistance agencies, trade groups and other organizations notifying them of the Contract and the work to be subcontracted by the Bidder to MBE/WBEs. The Bidder shall also submit any other information reasonably requested by the Awarding Authority to show that the Bidder has taken all possible reasonable steps to achieve the MBE/WBE participation goals.
10. If **filed Sub-Bids** are solicited for this Contract, requests to reduce or waive the MBE/WBE participation goals must be received by the Awarding Authority no later than ten (10) working days after the list of filed Sub-Bidders is sent by the Awarding Authority to persons who have taken out plans for the Contract. If there are no filed Sub-Bids solicited for this Contract, requests to reduce or waive the MBE/WBE participation goals for this Contract must be received by the Awarding Authority no later than ten (10) working days before the date set for the receipt of general Bids. **The Awarding Authority Will Not Consider Any Request To Reduce Or Waive The MBE/WBE Participation Goals For This Contract That Is Received After These Deadlines.**
11. Within five (5) working days after the opening of general Bids, the low Bidder shall submit the following documents to the Awarding Authority's Affirmative Marketing Construction Officer (AMCO): (a) a completed Schedule for Participation by MBE/WBE ("Schedule for Participation") in the form provided by the Awarding Authority showing MBE/WBE participation in amounts equal to or exceeding the MBE/WBE participation goals for this Contract, (b) a completed Letter of Intent in the form provided by the Awarding Authority for each MBE/WBE listed in the Schedule for Participation, and (c) the most recent SDO

*MODIFIED PER CENTRAL REGISTER ISSUED UPDATED GOALS 6/2020

[1] Periodically, goals may be changed or adjusted. Check the SDO web site for current MBE/WBE participation goals.
[2] *See generally*, MG.L. c.12, §§5A-5O, inclusive.

certification letter for each MBE/WBE listed in the Schedule of MBE/WBE Participation showing that the MBE/WBE is certified in the area of work for which it is listed on the Letter of Intent.

12. Each Letter of Intent shall describe the work to be performed by the MBE/WBE (the "MBE/WBE Work") with enough specificity to allow an awarding authority to determine which specific items count for MBE/WBE participation credit. The Awarding Authority reserves the right to reject any Letter of Intent if the price to be paid for the MBE/WBE Work does not bear a reasonable relationship to the value of such work under the Contract.
13. Within five (5) working days after receipt of the Schedule for MBE/WBE Participation, Letters of Intent, and most recent SDO certification letter, the Awarding Authority shall review and either approve or disapprove the apparent low Bidder's submissions. If the apparent low Bidder has not submitted an appropriate Schedule for MBE/WBE Participation and appropriate Letters of Intent and SDO most recent certification letter establishing that the MBE/WBE participation goal for the project will be met, the apparent low Bidder will be considered ineligible for Award of the Contract and the Awarding Authority will Award the Contract to the second lowest eligible and responsible Bidder, subject to said Bidder's compliance with these conditions. If funds are insufficient to award to the second lowest Bidder, the project may have to be re-bid.
14. General Conditions of the Contract require the Contractor to submit, within thirty (30) days of the Contract Date, copies of current certification letters for all subcontractors, signed subcontracts with all subcontractors or a purchase order or invoice from each material supplier and/or manufacturer listed on the Schedule for MBE/WBE Participation.
15. A filed sub-Bidder is not required to submit a Schedule of MBE/WBE Participation with its Bid. It may submit a Letter of Intent with its Bid if it is a SDO certified MBE/ WBE. If a filed sub-Bidder intends to sub-subcontract work to a SDO certified MBE/WBE, and the awarding authority permits limited sub-sub-contracting for purposes of MBE/WBE participation, and the filed sub-Bidder wishes that sub-subcontract to be credited toward the participation goals for this Contract, the filed sub-Bidder should submit a Letter of Intent from that MBE/WBE with its Bid.

ATTACHMENT D
MODEL CONTRACT INSTRUCTIONS FOR
MUNICIPAL CONTRACTS AND STATE ASSISTED BUILDING PROJECTS

A. Affirmative Marketing Participation Goals:
The combined goals below were established by the Division of Capital Asset Management and Maintenance (DCAMM) and the Supplier Diversity Office (SDO) and require a reasonable representation of both MBE and WBE firms:

Design Participation: **Combined MBE/WBE goal of ~~(17.9%)~~** *21.6%
Construction Participation: **Combined MBE/WBE goal of ~~(10.4%)~~***13.0%

All documentation submitted in connection with MBE/WBE credit must be true, accurate and correct to the best of your knowledge. Your signature on any MBE/WBE goal-related document means that you have read and understand it. Any false claims for MBE/WBE credit are subject to the Massachusetts False Claims Act and any applicable civil or criminal penalties as determined by the Massachusetts Attorney General's Office. [1]

B. MBE/WBE Participation Credit:

1. MBE and WBE participation goals are not interchangeable.
2. Participation credit is only given for actual contract work performed by currently certified MBE, WBE or M/WBE firm.
3. If the firm awarded the contract is itself currently certified as a MBE/WBE, 100% participation credit will be given for the work performed.
4. If the prime contractor is not a certified firm, it shall only receive credit for the portion of work completed by the certified firm.
5. MBE/WBE participation credit will be given to a supplier **only** if they are regularly engaged in sales of equipment or supplies to the construction industry from an established place of businesses and bear the risk of loss for product sold prior to delivery to a customer.
6. A contractor can count only 10% of the contract price towards an MBE or WBE goal on DCAMM projects.

C. Establishing MBE/WBE Status:

1. A business will be eligible for participation credit only if it has been certified by the Supplier Diversity Office (SDO) as a minority business enterprise (MBE) or a woman business enterprise (WBE).
2. Certification as a MBE/WBE **by any other agency other than SDO does not** confer the status to the firm for the purposes of contract participation credit.
3. Participation credit shall only be given to firms which are certified at the time of contract award
4. A firm currently being initially reviewed as part of the certification process cannot be used by a contractor towards MBE/WBE participation credit.

D. Performance of Contract Work by MBE/WBEs:

1. Only currently certified MBE/WBE firms count towards participation goals. If during the course of a contract, a SDO certified MBE/WBE firm is decertified their participation credit will be counted up until the date of decertification
2. An awarding authority will not grant MBE/WBE participation credit unless the contract work is actually completed by a certified SDO MBE/WBE firm. No credit will be given for work done by others or for work not on a MBE/WBE schedule of participation.
3. Once a letter of intent and a MBE/WBE letter of participation are approved, a contractor may not perform this same work using its own staff without the prior express written prior approval of the Awarding Authority.
4. The Contractor shall monitor the performance of MBE/WBE Work to ensure that each scheduled MBE/WBE performs its own work with its own workforce.

[1] *See generally,* MG.L. c. 12, §§5A-5O, inclusive.

*MODIFIED PER CENTRAL REGISTER ISSUED UPDATED GOALS 6/2020

5. The Contractor and each MBE/WBE subcontractor shall provide the Awarding Authority with all information and documentation necessary to ascertain whether or not an MBE/WBE has performed its own MBE/WBE Work with its own personnel, tools and equipment.
6. Failure to submit documentation to the Awarding Authority shall establish conclusively for the purpose of giving MBE/WBE participation credit under this Contract that such MBE/WBE did not perform such work.

E. Notification of Changes in MBE/WBE Work:

If during the performance of a contract, a contractor determines or has reason to believe that:

1. A scheduled MBE/WBE is unable or unwilling to perform its MBE/WBE Work;
2. There has been or will be a change in any MBE/WBE Work; or
3. That the Contractor will be unable to meet the MBE/WBE participation goal(s) for the Contract for any reason.

Then he/she shall immediately notify the Awarding Authority in writing. Any notice of a change in MBE/WBE Work shall include a revised Schedule of MBE/WBE Participation, and additional or amended Letters of Intent and related subcontracts, as needed.

F. Good Faith Efforts Needed to Support Changes/Reduction of MBE/WBE Participation Goals:

If there is a change or reduction in any MBE/WBE Work which will result in the Contractor failing to meet the MBE/WBE participation goal(s), then he/she shall undertake a diligent, good faith effort to make up the shortfall as follows:

1. The Contractor shall identify all items of the Work remaining to be performed under the Contract that they made available for subcontracting to MBE/WBEs along with that which wasn't along with reasons why.
2. The Contractor shall send written notices to all MBE/WBEs ready, willing and able to perform such work. The contractor will provide the Awarding Authority with documentation identifying: (i) each MBE/WBE solicited, and (ii) each MBE/WBE listed in the SDO directory under the applicable trade category that was not solicited and the reasons why. The Contractor shall also advise the Awarding Authority of the dates that notices were sent and provide a copy of the written notice(s) sent.
3. The Contractor shall make reasonable efforts to follow up on the written notices, including telephone calls or personal visits in order to determine with certainty whether the MBE/WBEs were interested in performing the work. Phone logs or other documentation must be submitted to the Awarding Authority upon request.
4. The Contractor shall make documented reasonable efforts to assist MBE/WBEs that need assistance in obtaining insurance, bonds, or lines of credit in order to perform work under the Contract. Supporting documentation will be provided to the Awarding Authority upon request.
5. The Contractor shall provide the Awarding Authority with a statement of the response received from each MBE/WBE solicited, including the reason for rejecting any MBE/WBE who submitted a proposal.
6. The Contractor shall take any additional measures including, without limitation, placing advertisements in appropriate media and trade association publications announcing the Contractor's interest in obtaining proposals from MBE/WBEs, and/or sending written notification to MBE/WBE economic development assistance agencies, trade groups and other organizations notifying them of the project and of the work available to be subcontracted by the Contractor to MBE/WBEs.

If the Contractor is unable to meet the MBE/WBE participation goals for this Contract after complying fully with each of the above requirements and is otherwise in full compliance with the terms of this provision, the Awarding Authority may reduce the MBE/WBE participation goals for this Contract to the extent that such goals cannot be achieved.

G. Suspension of Payment and/or Performance for Noncompliance:

If a reduction of MBE/WBE goals was given but sufficient good faith efforts (see above) were not documented, then after proper written notice, the Awarding Authority has the discretion to:

1. Suspend payment to the Contractor of an amount equal to the value of the work which was to have been performed by an MBE/WBE pursuant to the Contractor's Schedule of MBE/WBE Participation but which was not so performed, in order to ensure that sufficient Contract funds will be available if liquidated damages are assessed;
2. Suspend the Contractor's performance of this Contract in whole or in part.

Notice Required Prior to Suspension: The Awarding Authority shall give the Contractor prompt written notice of any action taken and shall give the Contractor and any other interested party, including any MBE/WBEs, an opportunity to present evidence to it that the Contractor is in compliance with the requirements, or that there is some justifiable reason for waiving the requirements in whole or in part. The Awarding Authority may invite SDO to participate in these proceedings

If, based on a totality of the circumstances, it can be shown that all reasonable steps were taken and that the Contractor is in full compliance with the requirements of this Attachment, or that the Contractor has met or will meet the MBE/WBE participation goals for this Contract, the Awarding Authority shall release any funds withheld and lift any related suspension of the Contractor's performance.

H. Liquidated Damages; Termination

If payment by the Awarding Authority or performance by the Contractor is suspended, and if the breach cannot be cured or that same contractor fails to take all reasonable and immediate efforts to comply with the MBE/WBE participation goals set forth in this Contract, subject to the notice provisions above:

1. The Awarding Authority may terminate this Contract; or
2. The Awarding Authority may retain from final payment to the Contractor, as liquidated damages, an amount equal to the difference between:
    a. The total of the MBE/WBE participation goals set forth in this Contract, and;
    b. The amount of MBE/WBE participation credit earned by the Contractor for MBE/WBE Work performed under this Contract minus the cost to restore the loss to the Awarding Authority.
3. Any liquidated damages will be assessed separately for MBE and WBE participation.

Discretionary Option to Review Any Additional Mitigating Evidence Prior to Final Decision: Before exercising its rights and remedies, the Awarding Authority may but is not required to give the Contractor and any other interested party a final opportunity to present evidence that the Contractor is in compliance with the requirements or that there is some justifiable reason for waiving the requirements of this Attachment in whole or in part. The Awarding Authority may invite SDO to participate in these proceedings.

EXHIBIT A

SCHEDULE FOR PARTICIPATION
BY MINORITY/WOMEN BUSINESS ENTERPRISES

Project Number_____
Project Location_____
Project Name _____

A. Filed Sub-bidders utilizing MBE/WBE firms, and MBE/WBE Sub-bidders attach to Filed Sub-bid.
B. General Contractor must submit to the Awarding Authority within five (5) working days of the opening of General Bids.

BIDDER CERTIFICATION:
The Bidder agrees that if awarded the contract it will expend at least the amount of the contract set forth below for MBE/WBE participation. For purposes of this commitment, the MBE and WBE designation means that a business has been certified by SDO as either a MBE, WBE or MBE/WBE. The Bidder must indicate the MBE/WBE firms it intends to utilize on the project as follows (attach additional sheets if necessary):

Company Name & Address	**MBE or WBE**	**Describe MBE/WBE Scopes of Work (clarify "Labor Only", "Material Only" or "Labor and Material")**	**If Supplier, Indicate Total Value of Supplies (60% of Total Counts toward Participation)**	**Total Dollar Value of Participation**

Sign Up

Every user of Projectdog.com has a unique username and password for their account. **MANDATORY: All users must keep usernames and passwords PRIVATE and SECURE. Do not share accounts.**

1. Go to **www.Projectdog.com**.
2. Select the "Sign Up" (Fig 1).
3. Complete all required form fields and press Submit. An automatic email will be sent to the registered email.
4. Select the confirmation link in the email to complete the registration.

Fig 1

Login

1. Go to **www.Projectdog.com**.
2. Enter a registered email address and password (Fig 1).
3. Press Login.

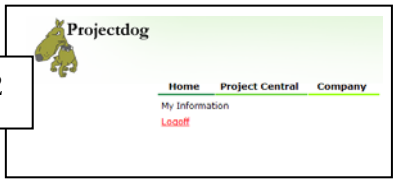

Fig 2

Logoff

1. Hover over Home (Fig 2).
2. Select "Logoff".

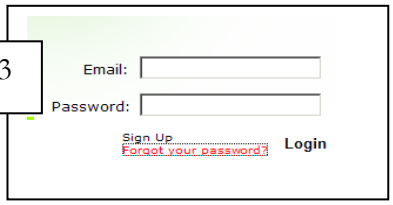

Fig 3

Forgotten Password

1. Select "Forgot your password?" (Fig 3).
2. Enter the e-mail address.
3. Select "Send Info". An automated e-mail will be sent with the password.

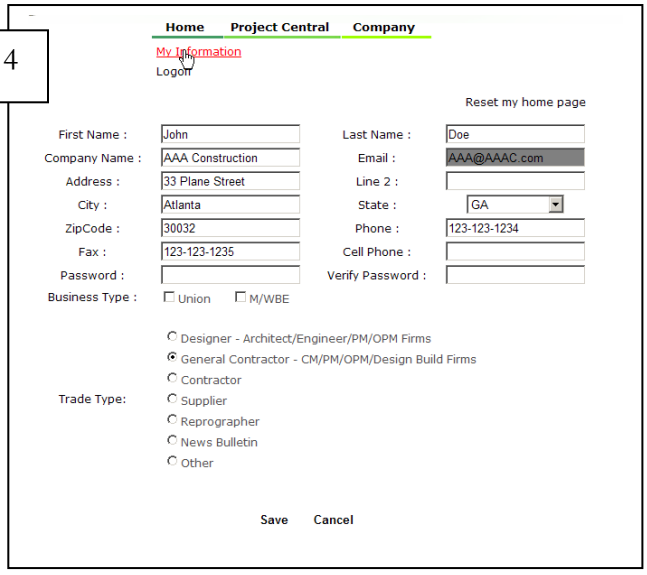

Fig 4

Account Information

View and edit user contact information. To change an email address, users must register a new account. Call Projectdog to have the old account removed.

1. Hover over Home (Fig 4).
2. Click "My Information".
3. Edit information as needed.
4. Click "Save" to finalize edits.

Electronic Bid (E-Bid)

This project is being **Electronically Bid** at www.Projectdog.com. Hard copy bids will not be accepted by the Awarding Authority. Go to www.Projectdog.com and Login with an existing account or click Sign Up to register for free. Enter a project code or search by keyword to access the "Project Details" page. Select "Acquire Documents" to download all bidding documents.

How to Submit an E-Bid

Complete and save all required forms as PDF files. Please be sure to sign all required signatures either digitally or manually.

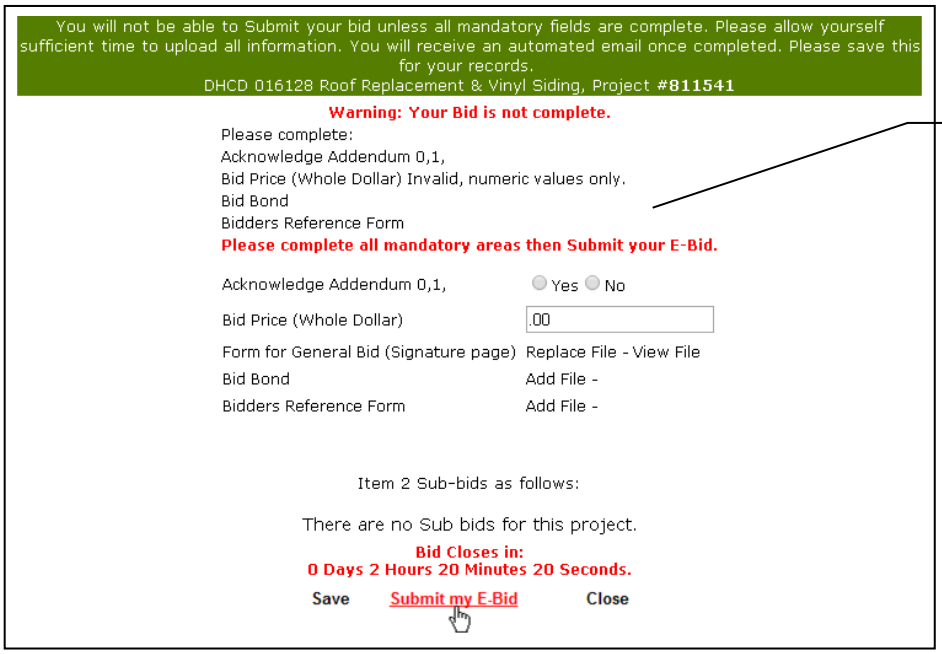
1. Select the **GC E-Bid** or **Sub E-Bid** link located on the "Project Details" page.

   Subcontractors select a bidding trade;

   General Contractors will not be able to submit an E-Bid until the official sub bid tabulation is released by the Awarding Authority.

2. Answer / enter / upload all required areas. Enter all dollar value amounts as a whole dollar values only.

3. Select "Submit My E-Bid." Review the submitted bid package via the "View My Bid Package" link.



It's that simple!

© Copyright by Projectdog.com, All rights reserved.

Add File

Click "Add File" on the E-Bid page to open the Upload Assistant window. Then click "Browse" or "Choose File" to upload a PDF file.

Warning

E-Bids cannot be submitted unless all areas are complete.

Save before adding files or closing the window or E-Bid data may need to be re-entered.

Projectdog.com server time is set to industry standards at time-a.nist.gov. Bidders are encouraged to update their computer clock.

Bidders may save, submit or modify an Electronic Bid (E-Bid) at any time prior to bid close. Once submitted, a bid cannot be edited. To modify a bid the bidder must retract the bid, make any necessary changes, and then submit the bid again. Upon submitting or retracting the bidder will receive a convenience email for informational purposes only. Bidders are encouraged to contact Projectdog if an email is not received.

It is the bidder's responsibility to review and confirm online that a bid has been submitted and/or retracted and that the bid is 100% true, complete and accurate. All bidders are required to review their submitted E-Bid via the "View My Bid Package" link.

If a bid is submitted prior to an addendum being issued the bidder will receive an automated email for informational purposes only stating the bidder must review the addendum, retract the bid, acknowledge all addenda, and submit the bid again. If a bidder fails to acknowledge addenda their bid may be rejected by the Awarding Authority.

Once the bid deadline has closed the E-Bid links are no longer available. All E-Bids are compiled in real time upon bid close and published forthwith on the "Project Details" page titled as "List of Bids Received". Official bid tabulations are posted at the discretion of the Awarding Authority.

For additional assistance, call Projectdog at (978) 499-9014 (M-F, 9AM-5PM).

Bid Bond Affidavit

This document is an affidavit form that is drafted to serve as a statement wherein the person (Bidder) who signs it swears under penalty of perjury that the facts and information that are identified in this affidavit are true. **This affidavit is in lieu of an insurance Bid Bond certificate.**

Bidders submitting the Bid Bond Affidavit form and the 5% Bid Deposit in the form of cash, certified check, treasurer's or cashier's check issued by a responsible bank or trust company shall ensure that these documents are received by the Awarding Authority prior to the closing of the electronic bid.

Both the completed Bid Bond Affidavit form and the Bid Deposit shall be enclosed in a sealed envelope with the following information plainly marked on the outside:

DO NOT OPEN BEFORE: *[indicate DATE and TIME of bid opening]*

Project Name: _____
Project Number: _____
Bidder's Name: _____
Business Address: _____
Phone Number: _____

It is the Bidder's responsibility to ensure that the completed Bid Bond Affidavit form and Bid Deposit are submitted as stated above and received by the Awarding Authority prior to the closing of electronic bids. The completed Bid Bond Affidavit form must also be uploaded via the project E-bid "Bid Bond" link at www.Projectdog.com.

The Bidder understands and consents that any failure to do so whether his own or other fault may result in the rejection of said bid. The Bidder is solely responsible for the accuracy and value of the Bid Deposit. In the event that the Bid Deposit is less than the required amount as outlined in the project specifications the bid may be rejected.

E. The undersigned agrees that, if he is selected as General Contractor, he will within five (5) days, Saturdays, Sundays, and legal holidays excluded, after presentation thereof by the Awarding Authority, execute a Contract in accordance with the terms of this general bid and furnish a performance bond and also a labor and materials payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of one hundred percent (100%) of the Contract Price, the premiums for which are to be paid by the General Contractor and are included in the Contract Price.

The undersigned agrees that he will comply with the non-discrimination and affirmative action minority manpower ratio and steps prescribed in Article 16 of the General Conditions, including compliance with the minority Subcontractor's requirements specified therein.

F. The undersigned hereby certifies that he is able to furnish labor that can work in harmony with all other elements of labor employed or to be employed on the work; that all employees to be employed at the worksite will have successfully completed a course in construction safety and health approved by the United States Occupational Safety and Health Administration that at least 10 hours in duration at the time the employee begins work and who shall furnish documentation of successful completion of said course with the first certified payroll report for each employee; and that he will comply with all laws and regulations applicable to award made subject to Section Forty-Four, A. of Chapter 149 of the General Laws.

G. The undersigned further certifies under the penalties of perjury that this bid is in all respects bona fide, fair and made without collusion or fraud with any other person. As used in this subsection the word "person" shall mean any natural person, joint venture, partnership, corporation or other business or legal entity.

H. The undersigned further certifies under penalty of perjury that the said undersigned is not presently debarred from doing public construction work in the Commonwealth under the provisions of Section Twenty-Nine F of Chapter Twenty-Nine, or any other applicable debarment provisions of any other Chapter of the General Laws or any rule or regulations promulgated thereunder.

AIA® Document A101™ – 2007 SP

Standard Form of Agreement Between Owner and Contractor, for use on a Sustainable Project where the basis of payment is a Stipulated Sum

AGREEMENT made as of the day of in the year
(In words, indicate day, month and year.)

BETWEEN the Owner:
(Name, legal status, address and other information)

City of Amesbury
62 Friend Street
Amesbury, MA 01913

and the Contractor:
(Name, legal status, address and other information)

for the following Project:
Amesbury Elementary School
193 Lions Mouth Road
Amesbury, MA 01913

The Architect:
(Name, legal status, address and other information)

DiNisco Design, Inc.
99 Chauncy Street
Suite 901
Boston, MA 02111

The Owner and Contractor agree as follows.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

AIA Document A201™–2007 SP, General Conditions of the Contract for Construction, for use on a Sustainable Project, is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

1 THE CONTRACT DOCUMENTS

2 THE WORK OF THIS CONTRACT

3 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

4 CONTRACT SUM

5 PAYMENTS

6 DISPUTE RESOLUTION

7 TERMINATION OR SUSPENSION

8 MISCELLANEOUS PROVISIONS

9 ENUMERATION OF CONTRACT DOCUMENTS

10 INSURANCE AND BONDS

ARTICLE 1 THE CONTRACT DOCUMENTS

The Contract Documents consist of this Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, the Sustainability Plan, Addenda issued prior to execution of this Agreement, other documents listed in this Agreement and Modifications issued after execution of this Agreement, all of which form the Contract, and are as fully a part of the Contract as if attached to this Agreement or repeated herein. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral. An enumeration of the Contract Documents, other than a Modification, appears in Article 9.

ARTICLE 2 THE WORK OF THIS CONTRACT

The Contractor shall fully execute the Work described in the Contract Documents, except as specifically indicated in the Contract Documents to be the responsibility of others.

ARTICLE 3 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

§ 3.1 The date of commencement of the Work shall be the date to be fixed in a notice to proceed issued by the Owner.

(Paragraphs deleted)

§ 3.2 The Contract Time shall be measured from the date of commencement.

§ 3.3 *The Contractor shall achieve Substantial Completion of the entire Work not later than* ***641 calendar days*** *from the date of commencement, shall achieve Final Completion within 60 days of the Substantial Completion, and as* ***defined in SECTION 011000-SUMMARY OF WORK, Paragraph 1.10E which describes Summer Phase Work Substantial Completion Requirements****.*

(Paragraphs deleted)

, subject to adjustments of this Contract Time as provided in the Contract Documents.

(Paragraphs deleted)

The Contractor shall be subject to the assessment of liquidated damages for each day of delay in achieving Substantial Completion f**or the entire Work, Substantial Completion for Summer Phase Work** and Final Completion, as set forth in Article 8.4 of the General Conditions of the Contract. The Owner's right to assess liquidated damages shall not preclude the Owner from the exercise of any other rights to recover damages on account of the Contractor's failure to achieve Substantial Completion and Final Completion within the time required, subject to adjustments of this Contract Time as provided in the Contract Documents.

(Paragraphs deleted)

ARTICLE 4 CONTRACT SUM

§ 4.1 The Owner shall pay the Contractor the Contract Sum in current funds for the Contractor's performance of the Contract. The Contract Sum shall be _____ dollars ($ _____), subject to additions and deductions as provided in the Contract Documents.

§ 4.2 The Contract Sum is based upon the following alternates, if any, which are described in the Contract Documents and are hereby accepted by the Owner:
(State the numbers or other identification of accepted alternates. If the bidding or proposal documents permit the Owner to accept other alternates subsequent to the execution of this Agreement, attach a schedule of such other alternates showing the amount for each and the date when that amount expires.)

§ 4.3 Unit prices,
(Paragraphs deleted)
are as set forth in SECTION 012200-UNIT PRICES.
(Table deleted)
(Table deleted)
(Paragraphs deleted)

ARTICLE 5 PAYMENTS

§ 5.1 Progress Payments

§ 5.1.1 Based upon Applications for Payment submitted to the Architect by the Contractor and Certificates for Payment issued by the Architect, the Owner shall make progress payments on account of the Contract Sum to the Contractor as provided below and elsewhere in the Contract Documents.

§ 5.1.2 The period covered by each Application for Payment shall be one calendar month ending on the last day of the month:

§ 5.1.3 Provided that an Application for Payment is received by the Architect not later than the last day of a month, the Owner shall make payment of the certified amount to the Contractor not later than the fifteenth day of the following month. If an Application for Payment is received by the Architect after the application date fixed above, payment shall be made by the Owner not later than fifteen (15) days after the Architect receives the Application for Payment in accordance with Section 9.6 of the General Conditions.

§ 5.1.4 Each Application for Payment shall be based on the most recent schedule of values submitted by the Contractor in accordance with the Contract Documents. The schedule of values shall allocate the entire Contract Sum among the various portions of the Work. The schedule of values shall be prepared in such form and supported by such data to substantiate its accuracy as the Architect may require. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment.

§ 5.1.5 Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment.

§ 5.1.6 Subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

.1 Take that portion of the Contract Sum properly allocable to completed Work as determined by multiplying the percentage completion of each portion of the Work by the share of the Contract Sum allocated to that portion of the Work in the schedule of values, less retainage of five percent (5%). Pending final determination of cost to the Owner of changes in the Work, amounts not in dispute shall be included.

.2 Add that portion of the Contract Sum properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction (or, if approved in advance by the Owner, suitably stored off the site at a location agreed upon in writing), less retainage of five percent (5 %);

AIA Document A101™ – 2007 SP. Copyright © 2012 by The American Institute of Architects. **All rights reserved. WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law.** This document was produced by AIA software at 10:49:03 on 12/23/2016 under Order No.2860153788_1 which expires on 12/23/2017, and is not for resale.
User Notes: (1500597305)

You created this PDF from an application that is not licensed to print to novaPDF printer (http://www.novapdf.com)

.3 Subtract the aggregate of previous payments made by the Owner; and

.4 Subtract amounts, if any, for which the Architect has withheld or nullified a Certificate for Payment as provided in Section 9.5 of the General Conditions, AIA Document A201–2007 SP.

§ 5.1.7 The progress payment amount determined in accordance with Section 5.1.6 shall be further modified under the following circumstances:

.1 Add, upon Substantial Completion of the Work, a sum sufficient to increase the total payments to the full amount of the Contract Sum, less such amounts as the Architect shall determine for incomplete Work, retainage applicable to such work and unsettled claims;
(Paragraph deleted)

.2 Add, if final completion of the Work is thereafter materially delayed through no fault of the Contractor, any additional amounts payable in accordance with Section 9.10 of AIA Document A201–2007 SP.

§ 5.1.8 Reduction or limitation of retainage, if any, shall be as set forth in Section 9.6 of the General Conditions and in accordance with M.G.L. Ch. 30 Section 39K.
(If it is intended, prior to Substantial Completion of the entire Work, to reduce or limit the retainage resulting from the percentages inserted in Sections 5.1.6.1 and 5.1.6.2 above, and this is not explained elsewhere in the Contract Documents, insert here provisions for such reduction or limitation.)

§ 5.1.9 Except with the Owner's prior approval, the Contractor shall not make advance payments to suppliers for materials or equipment which have not been delivered and stored at the site.

§ 5.2 Final Payment

§ 5.2.1 Final payment, constituting the entire unpaid balance of the Contract Sum, shall be made by the Owner to the Contractor when

.1 the Contractor has fully performed the Contract except for the Contractor's responsibility to correct Work as provided in Section 12.2.2 of AIA Document A201–2007 SP, and to satisfy other requirements, if any, which extend beyond final payment; and

.2 a final Certificate for Payment has been issued by the Architect.

§ 5.2.2 The Owner's final payment to the Contractor shall be made in accordance with Section 9.10 of the General Conditions and M.G.L. Ch. 30 Section 39K.

ARTICLE 6 DISPUTE RESOLUTION

§ 6.1 Initial Decision Maker

The Architect will serve as Initial Decision Maker pursuant to Section 15.2 of AIA Document A201–2007 SP, unless the parties appoint below another individual, not a party to this Agreement, to serve as Initial Decision Maker.
(If the parties mutually agree, insert the name, address and other contact information of the Initial Decision Maker, if other than the Architect.)

§ 6.2 Binding Dispute Resolution

For any Claim subject to, but not resolved by, Section 15.2 of AIA Document A201–2007 SP, the method of binding dispute resolution shall be as follows:

AIA Document A101™ – 2007 SP. Copyright © 2012 by The American Institute of Architects. **All rights reserved. WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law.** This document was produced by AIA software at 10:49:03 on 12/23/2016 under Order No.2860153788_1 which expires on 12/23/2017, and is not for resale.

You created this PDF from an application that is not licensed to print to novaPDF printer (http://www.novapdf.com)

(Check the appropriate box. If the Owner and Contractor do not select a method of binding dispute resolution below, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, Claims will be resolved by litigation in a court of competent jurisdiction.)

[ ] Arbitration pursuant to Section 15.4 of AIA Document A201–2007 SP

[X] Litigation in a court of competent jurisdiction

[ ] Other: *(Specify)*

ARTICLE 7 TERMINATION OR SUSPENSION

§ 7.1 The Contract may be terminated by the Owner or the Contractor as provided in Article 14 of AIA Document A201–2007 SP.

§ 7.2 The Work may be suspended by the Owner as provided in Article 14 of AIA Document A201–2007 SP.

ARTICLE 8 MISCELLANEOUS PROVISIONS

§ 8.1 Where reference is made in this Agreement to a provision of AIA Document A201–2007 SP or another Contract Document, the reference refers to that provision as amended or supplemented by other provisions of the Contract Documents.

§ 8.2 Payments due and unpaid under the Contract shall bear interest
(Paragraphs deleted)
in accordance with M.G.L. Ch. 30 Section 39K.

§ 8.3 The Owner's representative:
(Name, address and other information)

NV5
70 Fargo Street, Suite 800
Boston, MA 02210

§ 8.4 The Contractor's representative:
(Name, address and other information)

§ 8.5
Neither the Owner's nor the Contractor's representative shall be changed without ten days written notice to the other party.

§ 8.6 Other provisions:

ARTICLE 9 ENUMERATION OF CONTRACT DOCUMENTS

§ 9.1 The Contract Documents, except for Modifications issued after execution of this Agreement, are enumerated in the sections below.

§ 9.1.1 The Agreement is this executed AIA Document A101–2007 SP, Standard Form of Agreement Between Owner and Contractor, for use on a Sustainable Project.

PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS: That we _____
(Name of Contractor)

a _____ hereinafter called "Principal" and
(Corporation, Partnership, Joint Venture or Individual)

_____of _____, State of _____
(Surety) (City & State)

_____ hereinafter called the "Surety" and licensed by the State Division of Insurance to do business under the laws of the Commonwealth of Massachusetts, are held and firmly bound to the City/Town of _____, Massachusetts, hereinafter called "Owner", in the penal sum of
_____ Dollars
($_____) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that Whereas, the Principal entered into a certain contract with the Owner, dated the _____ day of _____, 20___ (the "Construction Contract"), for the construction described as follows: _____
_____.

NOW, THEREFORE, if the Principal shall well, truly and faithfully perform its duties, all the undertakings, covenants, terms, conditions, and agreements of the Construction Contract during the original term thereof, and any extensions thereof which may be granted by the Owner, with or without notice to the Surety, and if he shall satisfy all claims and demands incurred under the Construction Contract, and shall fully indemnify and save harmless the Owner from all costs and damages which it may suffer by reason of failure to do so, and shall reimburse and repay the Owner all outlay and expense which the Owner may incur in making good any default, then this obligation shall be void; otherwise to remain in full force and effect.

PROVIDED, FURTHER, that the Surety's obligation under this Bond shall arise after (1) the Owner has declared the Principal in default of the Construction Contract or any provision thereof or (2) has declared that the Principal has failed, or is otherwise unable or unwilling, to execute the work consistent with, and in conformance to, the Construction Contract (collectively referred to as a "Contractor Default"). The determination of a Contractor Default shall be made solely by the Owner. The Owner need not terminate the Construction Contract to declare a Contractor Default or to invoke its rights under this Bond.

When the Surety's obligation under this Bond arises, the Surety, at its sole expense and at the consent and election of the Owner, shall promptly take one of the following steps: (1) arrange for the Principal to perform and complete the work of the Construction Contract: (2) arrange for a contractor other than the Principal to perform and complete the work of the Construction Contract; (3) reimburse the Owner, in a manner and at such time as the Owner shall decide, for all costs and expenses incurred by the Owner in performing and completing the work of the Construction Contract. Surety will keep Owner reasonably informed of the progress, status and results of any investigation of any claim of the Owner.

If the Surety does not proceed as provided in this Bond with due diligence and all deliberate speed, the Surety shall be deemed to be in default of this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner.

After the Surety's obligation under this Bond arises, the Surety is obligated, to the limit of the amounts of this Bond, for (1) the correction of defective work and completion of the Construction Contract; (2) additional design, professional services, and legal costs, including attorneys' fees, resulting from the Contractor Default or from the default of the Surety under this Bond; (3) any additional work beyond the Construction Contract made necessary by the Contractor Default or default of the Surety under this Bond; (4) indemnification obligation of the Principal, if any, as provided in the Construction Contract; and (5) liquidated damages as provided in the Construction Contract, or if none are so specified, actual and foreseeable consequential damages resulting from the Contractor Default or default of the Surety under this Bond.

Any proceeding, legal or equitable, under this Bond shall be instituted in any court of competent jurisdiction in the Commonwealth of Massachusetts.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Construction Contract or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this Bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Construction Contract or to the work or to the specifications.

IN WITNESS WHEREOF, this instrument is executed in _____ ( ) counterparts, each one of which shall be deemed an original, this the _____ day of _____, 20___.

NOTE: Date of Bond must not be prior to date of Contract. If Contractor is a Partnership, all partners should execute Bond.

PAYMENT BOND

KNOW ALL MEN BY THESE PRESENTS: That we _____

_____ a_____ _____
(Name of Contractor) (Corporation, Partnership, Joint Venture or Individual)

hereinafter called "Principal" and _____ of _____,
(Surety)

State of _____ hereinafter called the "Surety" and licensed by the State
(City and State)

Division of Insurance to do business under the laws of the Commonwealth of Massachusetts, are held and firmly bound to the City/Town of _____, Massachusetts, hereinafter called "Owner", in the penal sum of _____ Dollars ($_____) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that Whereas, the Principal entered into a certain contract with the Owner, dated the _____ day of _____, 20___, for the construction described as follows:

NOW, THEREFORE, if the Principal shall promptly make payment to all persons, firms, subcontractors, and corporations furnishing materials for or performing labor in the prosecution of the work provided for in such contract, and any authorized extension or modification thereof, including all amounts due for materials, lubricants, oil, gasoline, coal and coke, repairs on machinery, equipment and tools, consumed or used in connection with the construction of such work, and all insurance premiums on said work, and for all labor, performed in such work whether by subcontractor or otherwise, then this obligation shall be void; otherwise to remain in full force and effect.

PROVIDED, FURTHER, that the said Surety, for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of this contract or to the work or to the specifications.

PROVIDED, FURTHER, that no final settlement between the Owner and the Contractor shall abridge the right of any beneficiary hereunder, whose claim may be unsatisfied.

IN WITNESS WHEREOF, this instrument is executed in ____ ( ) counterparts, each one of which shall be deemed an original, this the _____ day of _____, 20__.

ARTICLE 1 GENERAL PROVISIONS

§ 1.1 Basic Definitions

§ 1.1.1 The Contract Documents

The Contract Documents are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and consist of the Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, the Sustainability Plan, Addenda issued prior to execution of the Contract, other documents listed in the Agreement and Modifications issued after execution of the Contract. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive or (4) a written order for a minor change in the Work issued by the Architect. Unless specifically enumerated in the Agreement, the Contract Documents do not include the advertisement or invitation to bid, Instructions to Bidders, sample forms, other information furnished by the Owner in anticipation of receiving bids or proposals, the Contractor's bid or proposal, or portions of Addenda relating to bidding requirements.

§ 1.1.2 The Contract

The Contract Documents form the Contract for Construction. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Contractor and the Architect or the Architect's consultants, (2) between the Owner and a Subcontractor or a Sub-subcontractor, (3) between the Owner and the Architect or the Architect's consultants or (4) between any persons or entities other than the Owner and the Contractor. The Architect shall, however, be entitled to performance and enforcement of obligations under the Contract intended to facilitate performance of the Architect's duties.

§ 1.1.3 The Work

The term "Work" means the construction and services required by the Contract Documents, whether completed or partially completed, and includes all other labor, materials, equipment and services provided or to be provided by the Contractor to fulfill the Contractor's obligations. The Work may constitute the whole or a part of the Project.

§ 1.1.4 The Project

The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by the Owner and by separate contractors.

§ 1.1.5 The Drawings

The Drawings are the graphic and pictorial portions of the Contract Documents showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules and diagrams.

§ 1.1.6 The Specifications

The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, systems, standards and workmanship for the Work, and performance of related services.

§ 1.1.7 Instruments of Service

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

§ 1.1.8 Initial Decision Maker

The Initial Decision Maker is the person identified in the Agreement to render initial decisions on Claims in accordance with Section 15.2 and certify termination of the Agreement under Section 14.2.2.

§ 1.1.9 Special Definitions

§ 1.1.9.1 Sustainable Objective

The Sustainable Objective is the Owner's goal of incorporating Sustainable Measures into the design, construction, maintenance and operations of the Project to achieve a Sustainability Certification or other benefit to the environment, to enhance the health and well-being of building occupants, or to improve energy efficiency. The Sustainable Objective is identified in the Sustainability Plan.

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. To report copyright violations, e-mail copyright@aia.org.

§ 1.1.9.2 Sustainable Measure
A Sustainable Measure is a specific design or construction element, or post occupancy use, operation, maintenance or monitoring requirement that must be completed in order to achieve the Sustainable Objective. The Owner, Architect and Contractor shall each have responsibility for the Sustainable Measure(s) allocated to them in the Sustainability Plan.

§ 1.1.9.3 Sustainability Plan
The Sustainability Plan is a Contract Document that identifies and describes: the Sustainable Objective; the targeted Sustainable Measures; implementation strategies selected to achieve the Sustainable Measures; the Owner's, Architect's and Contractor's roles and responsibilities associated with achieving the Sustainable Measures; the specific details about design reviews, testing or metrics to verify achievement of each Sustainable Measure; and the Sustainability Documentation required for the Project.

§ 1.1.9.4 Sustainability Certification
The Sustainability Certification is the initial third-party certification of sustainable design, construction, or environmental or energy performance, such as LEED®, Green Globes™, Energy Star or another rating or certification system, that may be designated as the Sustainable Objective or part of the Sustainable Objective for the Project. The term Sustainability Certification shall not apply to any recertification or certification occurring subsequent to the initial certification.

§ 1.1.9.5 Sustainability Documentation
The Sustainability Documentation includes all documentation related to the Sustainable Objective or to a specific Sustainable Measure that the Owner, Architect or Contractor is required to prepare in accordance with the Contract Documents. Responsibility for preparation of specific portions of the Sustainability Documentation will be allocated among the Owner, Architect and Contractor in the Sustainability Plan and may include documentation required by the Certifying Authority.

§ 1.1.9.6 Certifying Authority
The Certifying Authority is the entity that establishes criteria for achievement of a Sustainability Certification and is authorized to grant or deny a Sustainability Certification.

§ 1.2 Correlation and Intent of the Contract Documents
§ 1.2.1 The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results.

§ 1.2.2 Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

§ 1.2.3 Unless otherwise stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

§ 1.3 Capitalization
Terms capitalized in these General Conditions include those that are (1) specifically defined, (2) the titles of numbered articles or (3) the titles of other documents published by the American Institute of Architects.

§ 1.4 Interpretation
In the interest of brevity the Contract Documents frequently omit modifying words such as "all" and "any" and articles such as "the" and "an," but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

§ 1.5 Ownership and Use of Drawings, Specifications and Other Instruments of Service
§ 1.5.1 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and will retain all common law, statutory and other reserved rights, including copyrights. The Contractor, Subcontractors, Sub-subcontractors, and material or equipment suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official

To report copyright violations, e-mail copyright@aia.org.

regulatory requirements or for other purposes in connection with this Project is not to be construed as publication in derogation of the Architect's or Architect's consultants' reserved rights.

§ 1.5.2 The Contractor, Subcontractors, Sub-subcontractors and material or equipment suppliers are authorized to use and reproduce the Instruments of Service provided to them solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Contractor, Subcontractors, Sub-subcontractors, and material or equipment suppliers may not use the Instruments of Service on other projects or for additions to this Project outside the scope of the Work without the specific written consent of the Owner, Architect and the Architect's consultants.

§ 1.6 Transmission of Data in Digital Form

If the parties intend to transmit Instruments of Service or any other information or documentation in digital form, they shall endeavor to establish necessary protocols governing such transmissions, unless otherwise already provided in the Agreement or the Contract Documents.

ARTICLE 2 OWNER

§ 2.1 General

§ 2.1.1 The Owner is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Owner shall designate in writing a representative who shall have express authority to bind the Owner with respect to all matters requiring the Owner's approval or authorization. Except as otherwise provided in Section 4.2.1, the Architect does not have such authority. The term "Owner" means the Owner or the Owner's authorized representative.

§ 2.1.2 The Owner shall furnish to the Contractor within fifteen days after receipt of a written request, information necessary and relevant for the Contractor to evaluate, give notice of or enforce mechanic's lien rights. Such information shall include a correct statement of the record legal title to the property on which the Project is located, usually referred to as the site, and the Owner's interest therein.

§ 2.2 Information and Services Required of the Owner

§ 2.2.1 Prior to commencement of the Work, the Contractor may request in writing that the Owner provide reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract. Thereafter, the Contractor may only request such evidence if (1) the Owner fails to make payments to the Contractor as the Contract Documents require; (2) a change in the Work materially changes the Contract Sum; or (3) the Contractor identifies in writing a reasonable concern regarding the Owner's ability to make payment when due. The Owner shall furnish such evidence as a condition precedent to commencement or continuation of the Work or the portion of the Work affected by a material change. After the Owner furnishes the evidence, the Owner shall not materially vary such financial arrangements without prior notice to the Contractor.

§ 2.2.2 Except for permits and fees that are the responsibility of the Contractor under the Contract Documents, including those required under Section 3.7.1, the Owner shall secure and pay for necessary approvals, easements, assessments and charges required for construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

§ 2.2.3 The Owner shall furnish surveys describing physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site. The Contractor shall be entitled to rely on the accuracy of information furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

§ 2.2.4 The Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Contractor's performance of the Work with reasonable promptness after receiving the Contractor's written request for such information or services.

§ 2.2.5 Unless otherwise provided in the Contract Documents, the Owner shall furnish to the Contractor one copy of the Contract Documents for purposes of making reproductions pursuant to Section 1.5.2.

§ 2.2.6 The Owner shall perform those Sustainable Measures identified as the responsibility of the Owner in the Sustainability Plan, including any approved changes, or as otherwise required by the Contract Documents. The Owner

This document was created on 03/08/2021 12:05:59 under the terms of AIA Documents on Demand® Order No. 2010675659 , is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Documents-on-Demand – End User License Agreement. To report copyright violations, e-mail copyright@aia.org.

shall require that each of its contractors and consultants perform the services or work assigned to them in accordance with the Sustainability Plan.

§ 2.2.7 The Owner shall comply with the requirements of the Certifying Authority as they relate to the ownership, operation and maintenance of the Project both during construction and after completion of the Project.

§ 2.3 Owner's Right to Stop the Work

If the Contractor fails to correct Work that is not in accordance with the requirements of the Contract Documents as required by Section 12.2 or repeatedly fails to carry out Work in accordance with the Contract Documents, the Owner may issue a written order to the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity, except to the extent required by Section 6.1.3.

§ 2.4 Owner's Right to Carry Out the Work

If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a ten-day period after receipt of written notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to other remedies the Owner may have, correct such deficiencies. In such case an appropriate Change Order shall be issued deducting from payments then or thereafter due the Contractor the reasonable cost of correcting such deficiencies, including Owner's expenses and compensation for the Architect's additional services made necessary by such default, neglect or failure. Such action by the Owner and amounts charged to the Contractor are both subject to prior approval of the Architect. If payments then or thereafter due the Contractor are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner.

ARTICLE 3 CONTRACTOR

§ 3.1 General

§ 3.1.1 The Contractor is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Contractor shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all matters under this Contract. The term "Contractor" means the Contractor or the Contractor's authorized representative.

§ 3.1.2 The Contractor shall perform the Work in accordance with the Contract Documents, including any Sustainable Measures identified as the responsibility of the Contractor in the Sustainability Plan.

§ 3.1.3 The Contractor shall not be relieved of obligations to perform the Work in accordance with the Contract Documents either by activities or duties of the Architect in the Architect's administration of the Contract, or by tests, inspections or approvals required or performed by persons or entities other than the Contractor.

§ 3.2 Review of Contract Documents and Field Conditions by Contractor

§ 3.2.1 Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become generally familiar with local conditions under which the Work is to be performed and correlated personal observations with requirements of the Contract Documents.

§ 3.2.2 Because the Contract Documents are complementary, the Contractor shall, before starting each portion of the Work, carefully study and compare the various Contract Documents relative to that portion of the Work, as well as the information furnished by the Owner pursuant to Section 2.2.3, shall take field measurements of any existing conditions related to that portion of the Work, and shall observe any conditions at the site affecting it. These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however, the Contractor shall promptly report to the Architect any errors, inconsistencies or omissions discovered by or made known to the Contractor as a request for information in such form as the Architect may require. It is recognized that the Contractor's review is made in the Contractor's capacity as a contractor and not as a licensed design professional, unless otherwise specifically provided in the Contract Documents.

§ 3.2.2.1 The Contractor shall meet with the Owner and Architect to discuss alternatives in the event the Owner or Architect recognizes a condition that will affect achievement of a Sustainable Measure or achievement of the Sustainable Objective. If any condition is discovered by, or made known to, the Contractor that will adversely affect the Contractor's achievement of a Sustainable Measure for which the Contractor is responsible pursuant to the

Sustainability Plan, the Contractor will promptly provide notice to the Architect and meet with the Owner and Architect to discuss alternatives to remedy the condition.

§ 3.2.3 The Contractor is not required to ascertain that the Contract Documents are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, lawful orders of public authorities, or requirements of the Certifying Authority, but the Contractor shall promptly report to the Architect any nonconformity discovered by or made known to the Contractor as a request for information in such form as the Architect may require.

§ 3.2.4 If the Contractor believes that additional cost or time is involved because of clarifications or instructions the Architect issues in response to the Contractor's notices or requests for information pursuant to Sections 3.2.2 or 3.2.3, the Contractor shall make Claims as provided in Article 15. If the Contractor fails to perform the obligations of Sections 3.2.2 or 3.2.3, the Contractor shall pay such costs and damages to the Owner as would have been avoided if the Contractor had performed such obligations. If the Contractor performs those obligations, the Contractor shall not be liable to the Owner or Architect for damages resulting from errors, inconsistencies or omissions in the Contract Documents, for differences between field measurements or conditions and the Contract Documents, or for nonconformities of the Contract Documents to applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities.

§ 3.3 Supervision and Construction Procedures

§ 3.3.1 The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention. The Contractor shall be solely responsible for, and have control over, construction means, methods, techniques, sequences and procedures and for coordinating all portions of the Work under the Contract, unless the Contract Documents give other specific instructions concerning these matters. If the Contract Documents give specific instructions concerning construction means, methods, techniques, sequences or procedures, the Contractor shall evaluate the jobsite safety thereof and, except as stated below, shall be fully and solely responsible for the jobsite safety of such means, methods, techniques, sequences or procedures. If the Contractor determines that such means, methods, techniques, sequences or procedures may not be safe, the Contractor shall give timely written notice to the Owner and Architect and shall not proceed with that portion of the Work without further written instructions from the Architect. If the Contractor is then instructed to proceed with the required means, methods, techniques, sequences or procedures without acceptance of changes proposed by the Contractor, the Owner shall be solely responsible for any loss or damage arising solely from those Owner-required means, methods, techniques, sequences or procedures.

§ 3.3.2 The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons or entities performing portions of the Work for, or on behalf of, the Contractor or any of its Subcontractors.

§ 3.3.3 The Contractor shall be responsible for inspection of portions of Work already performed to determine that such portions are in proper condition to receive subsequent Work.

§ 3.4 Labor and Materials

§ 3.4.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

§ 3.4.2 Except in the case of minor changes in the Work authorized by the Architect in accordance with Sections 3.12.8 or 7.4, the Contractor may make substitutions only with the consent of the Owner, after evaluation by the Architect and in accordance with a Change Order or Construction Change Directive.

§ 3.4.2.1 The Contractor shall include, with any request for substitution, a written representation identifying any potential effect the substitution may have on the Project's achievement of a Sustainable Measure or the Sustainable Objective. The Owner and Architect shall be entitled to rely on any such representation. In preparing this representation, the Contractor may request additional information from the Architect describing how the product, material or equipment, for which a substitution is proposed, was intended to satisfy the requirements of a Sustainable Measure or contribute toward achievement of the Sustainable Objective. The Architect shall respond to the Contractor's request in accordance with Section 4.2.14.

§ 3.4.3 The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Work. The Contractor shall not permit employment of unfit persons or persons not properly skilled in tasks assigned to them.

§ 3.5 Warranty

§ 3.5.1 The Contractor warrants to the Owner and Architect that materials and equipment furnished under the Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Contractor further warrants that the Work will conform to the requirements of the Contract Documents and will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Contractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Contractor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage. If required by the Architect, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

§ 3.5.2 The Contractor shall perform the Sustainable Measures required to be performed by the Contractor in accordance with the Contract Documents; however, nothing contained in this Section 3.5 shall be construed as a guarantee or warranty by the Contractor that the Project will achieve the Sustainable Objective.

§ 3.6 Taxes

The Contractor shall pay sales, consumer, use and similar taxes for the Work provided by the Contractor that are legally enacted when bids are received or negotiations concluded, whether or not yet effective or merely scheduled to go into effect.

§ 3.7 Permits, Fees, Notices and Compliance with Laws

§ 3.7.1 Unless otherwise provided in the Contract Documents, the Contractor shall secure and pay for the building permit as well as for other permits, fees, licenses, and inspections by government agencies necessary for proper execution and completion of the Work that are customarily secured after execution of the Contract and legally required at the time bids are received or negotiations concluded.

§ 3.7.2 The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to performance of the Work.

§ 3.7.3 If the Contractor performs Work knowing it to be contrary to applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, the Contractor shall assume appropriate responsibility for such Work and shall bear the costs attributable to correction.

§ 3.7.4 Concealed or Unknown Conditions

If the Contractor encounters conditions at the site that are (1) subsurface or otherwise concealed physical conditions that differ materially from those indicated in the Contract Documents or (2) unknown physical conditions of an unusual nature that differ materially from those ordinarily found to exist and generally recognized as inherent in construction activities of the character provided for in the Contract Documents, the Contractor shall promptly provide notice to the Owner and the Architect before conditions are disturbed and in no event later than 21 days after first observance of the conditions. The Architect will promptly investigate such conditions and, if the Architect determines that they differ materially and cause an increase or decrease in the Contractor's cost of, or time required for, performance of any part of the Work, will recommend an equitable adjustment in the Contract Sum or Contract Time, or both. If the Architect determines that the conditions at the site are not materially different from those indicated in the Contract Documents and that no change in the terms of the Contract is justified, the Architect shall promptly notify the Owner and Contractor in writing, stating the reasons. If either party disputes the Architect's determination or recommendation, that party may proceed as provided in Article 15.

§ 3.7.5 If, in the course of the Work, the Contractor encounters human remains or recognizes the existence of burial markers, archaeological sites or wetlands not indicated in the Contract Documents, the Contractor shall immediately suspend any operations that would affect them and shall notify the Owner and Architect. Upon receipt of such notice, the Owner shall promptly take any action necessary to obtain governmental authorization required to resume the operations. The Contractor shall continue to suspend such operations until otherwise instructed by the Owner but shall continue with all other operations that do not affect those remains or features. Requests for adjustments in the Contract Sum and Contract Time arising from the existence of such remains or features may be made as provided in Article 15.

§ 3.8 Allowances

§ 3.8.1 The Contractor shall include in the Contract Sum all allowances stated in the Contract Documents. Items covered by allowances shall be supplied for such amounts and by such persons or entities as the Owner may direct, but the Contractor shall not be required to employ persons or entities to whom the Contractor has reasonable objection.

§ 3.8.2 Unless otherwise provided in the Contract Documents,

- **.1** allowances shall cover the cost to the Contractor of materials and equipment delivered at the site and all required taxes, less applicable trade discounts;
- **.2** Contractor's costs for unloading and handling at the site, labor, installation costs, overhead, profit and other expenses contemplated for stated allowance amounts shall be included in the Contract Sum but not in the allowances; and
- **.3** whenever costs are more than or less than allowances, the Contract Sum shall be adjusted accordingly by Change Order. The amount of the Change Order shall reflect (1) the difference between actual costs and the allowances under Section 3.8.2.1 and (2) changes in Contractor's costs under Section 3.8.2.2.

§ 3.8.3 Materials and equipment under an allowance shall be selected by the Owner with reasonable promptness.

§ 3.9 Superintendent

§ 3.9.1 The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site during performance of the Work. The superintendent shall represent the Contractor, and communications given to the superintendent shall be as binding as if given to the Contractor.

§ 3.9.2 The Contractor, as soon as practicable after award of the Contract, shall furnish in writing to the Owner through the Architect the name and qualifications of a proposed superintendent. The Architect may reply within 14 days to the Contractor in writing stating (1) whether the Owner or the Architect has reasonable objection to the proposed superintendent or (2) that the Architect requires additional time to review. Failure of the Architect to reply within the 14 day period shall constitute notice of no reasonable objection.

§ 3.9.3 The Contractor shall not employ a proposed superintendent to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not change the superintendent without the Owner's consent, which shall not unreasonably be withheld or delayed.

§ 3.10 Contractor's Construction Schedules

§ 3.10.1 The Contractor, promptly after being awarded the Contract, shall prepare and submit for the Owner's and Architect's information a Contractor's construction schedule for the Work. The schedule shall not exceed time limits current under the Contract Documents, shall be revised at appropriate intervals as required by the conditions of the Work and Project, shall be related to the entire Project to the extent required by the Contract Documents, and shall provide for expeditious and practicable execution of the Work.

§ 3.10.2 The Contractor shall prepare a submittal schedule, promptly after being awarded the Contract and thereafter as necessary to maintain a current submittal schedule, and shall submit the schedule(s) for the Architect's approval. The Architect's approval shall not unreasonably be delayed or withheld. The submittal schedule shall (1) be coordinated with the Contractor's construction schedule, and (2) allow the Architect reasonable time to review submittals. If the Contractor fails to submit a submittal schedule, the Contractor shall not be entitled to any increase in Contract Sum or extension of Contract Time based on the time required for review of submittals.

§ 3.10.3 The Contractor shall perform the Work in general accordance with the most recent schedules submitted to the Owner and Architect.

§ 3.11 Documents and Samples at the Site and Sustainability Documentation

§ 3.11.1 The Contractor shall maintain at the site for the Owner one copy of the Drawings, Specifications, Addenda, Change Orders and other Modifications, in good order and marked currently to indicate field changes and selections made during construction, and one copy of approved Shop Drawings, Product Data, Samples and similar required submittals. These shall be available to the Architect and shall be delivered to the Architect for submittal to the Owner upon completion of the Work as a record of the Work as constructed.

§ 3.11.2 The Contractor shall be responsible for preparing and completing the Sustainability Documentation required from the Contractor by the Contract Documents, including any Sustainability Documentation required to be submitted

after Substantial Completion. The Contractor shall submit the Sustainability Documentation to the Architect in accordance with any schedules or deadlines set forth in, or as otherwise required by, the Contract Documents. In the absence of schedules or deadlines for submission of Sustainability Documentation in the Contract Documents, the Contractor will submit the Sustainability Documentation with reasonable promptness so that the Architect may submit the Sustainability Documentation to the Certifying Authority.

§ 3.12 Shop Drawings, Product Data and Samples

§ 3.12.1 Shop Drawings are drawings, diagrams, schedules and other data specially prepared for the Work by the Contractor or a Subcontractor, Sub-subcontractor, manufacturer, supplier or distributor to illustrate some portion of the Work.

§ 3.12.2 Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams and other information furnished by the Contractor to illustrate materials or equipment for some portion of the Work.

§ 3.12.3 Samples are physical examples that illustrate materials, equipment or workmanship and establish standards by which the Work will be judged.

§ 3.12.4 Shop Drawings, Product Data, Samples and similar submittals are not Contract Documents. Their purpose is to demonstrate the way by which the Contractor proposes to conform to the information given and the design concept expressed in the Contract Documents for those portions of the Work for which the Contract Documents require submittals. Review by the Architect is subject to the limitations of Section 4.2.7. Informational submittals upon which the Architect is not expected to take responsive action may be so identified in the Contract Documents. Submittals that are not required by the Contract Documents may be returned by the Architect without action.

§ 3.12.5 The Contractor shall review for compliance with the Contract Documents, approve and submit to the Architect Shop Drawings, Product Data, Samples and similar submittals required by the Contract Documents in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Owner or of separate contractors.

§ 3.12.6 By submitting Shop Drawings, Product Data, Samples and similar submittals, the Contractor represents to the Owner and Architect that the Contractor has (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

§ 3.12.7 The Contractor shall perform no portion of the Work for which the Contract Documents require submittal and review of Shop Drawings, Product Data, Samples or similar submittals until the respective submittal has been approved by the Architect.

§ 3.12.8 The Work shall be in accordance with approved submittals except that the Contractor shall not be relieved of responsibility for deviations from requirements of the Contract Documents by the Architect's approval of Shop Drawings, Product Data, Samples or similar submittals unless the Contractor has specifically informed the Architect in writing of such deviation at the time of submittal and (1) the Architect has given written approval to the specific deviation as a minor change in the Work, or (2) a Change Order or Construction Change Directive has been issued authorizing the deviation. The Contractor shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples or similar submittals by the Architect's approval thereof.

§ 3.12.9 The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data, Samples or similar submittals, to revisions other than those requested by the Architect on previous submittals. In the absence of such written notice, the Architect's approval of a resubmission shall not apply to such revisions.

§ 3.12.10 The Contractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Contract Documents for a portion of the Work or unless the Contractor needs to provide such services in order to carry out the Contractor's responsibilities for construction means, methods, techniques, sequences and procedures. The Contractor shall not be required to provide professional services in violation of applicable law. If professional design services or certifications by a design professional related to systems, materials or equipment are specifically required of the Contractor by the Contract Documents, the Owner and the Architect will specify all performance and design criteria that such services must satisfy. The Contractor shall cause such services or certifications to be provided by a properly licensed design professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop Drawings and

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. other submittals prepared by such professional. Shop Drawings and other submittals related to the Work designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to the Architect. The Owner and the Architect shall be entitled to rely upon the adequacy, accuracy and completeness of the services, certifications and approvals performed or provided by such design professionals, provided the Owner and Architect have specified to the Contractor all performance and design criteria that such services must satisfy. Pursuant to this Section 3.12.10, the Architect will review, approve or take other appropriate action on submittals only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Contractor shall not be responsible for the adequacy of the performance and design criteria specified in the Contract Documents.

§ 3.12.10.1 In the event the Contractor's design professional proposes the use of materials or equipment that have had limited testing or verification of performance, the Contractor shall discuss with the Architect and Owner the proposed use of such materials or equipment and potential effects on the Sustainable Objective that may occur if the materials or equipment fail to perform in accordance with the manufacturer's or supplier's representations. The Owner will render a written decision regarding the use of such materials or equipment in a timely manner. In the event the Owner elects to proceed with the use of such materials or equipment, the Contractor and Architect shall be permitted to rely on the manufacturer's or supplier's representations and shall not be responsible for any damages arising from the failure of the material or equipment to perform in accordance with the manufacturer's or supplier's representations.

§ 3.13 Use of Site

The Contractor shall confine operations at the site to areas permitted by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities and the Contract Documents and shall not unreasonably encumber the site with materials or equipment.

§ 3.14 Cutting and Patching

§ 3.14.1 The Contractor shall be responsible for cutting, fitting or patching required to complete the Work or to make its parts fit together properly. All areas requiring cutting, fitting and patching shall be restored to the condition existing prior to the cutting, fitting and patching, unless otherwise required by the Contract Documents.

§ 3.14.2 The Contractor shall not damage or endanger a portion of the Work or fully or partially completed construction of the Owner or separate contractors by cutting, patching or otherwise altering such construction, or by excavation. The Contractor shall not cut or otherwise alter such construction by the Owner or a separate contractor except with written consent of the Owner and of such separate contractor; such consent shall not be unreasonably withheld. The Contractor shall not unreasonably withhold from the Owner or a separate contractor the Contractor's consent to cutting or otherwise altering the Work.

§ 3.15 Cleaning Up

§ 3.15.1 The Contractor shall keep the premises and surrounding area free from accumulation of waste materials or rubbish caused by operations under the Contract. At completion of the Work, the Contractor shall remove waste materials, rubbish, the Contractor's tools, construction equipment, machinery and surplus materials from and about the Project. The Contractor shall also recycle, reuse, remove or dispose of materials as required by the Contract Documents.

§ 3.15.2 The Contractor, in accordance with the Contract Documents, shall prepare and submit to the Architect and Owner a construction waste management and disposal plan setting forth the procedures and processes for salvaging, recycling or disposing of construction waste generated from the Project.

§ 3.15.3 If the Contractor fails to clean up in accordance with Section 3.15.1 and as provided in the Contract Documents, the Owner may do so and Owner shall be entitled to reimbursement from the Contractor.

§ 3.16 Access to Work

The Contractor shall provide the Owner and Architect access to the Work in preparation and progress wherever located.

§ 3.17 Royalties, Patents and Copyrights

The Contractor shall pay all royalties and license fees. The Contractor shall defend suits or claims for infringement of copyrights and patent rights and shall hold the Owner and Architect harmless from loss on account thereof, but shall not be responsible for such defense or loss when a particular design, process or product of a particular manufacturer or manufacturers is required by the Contract Documents, or where the copyright violations are contained in Drawings, Specifications or other documents prepared by the Owner or Architect. However, if the Contractor has reason to believe

that the required design, process or product is an infringement of a copyright or a patent, the Contractor shall be responsible for such loss unless such information is promptly furnished to the Architect.

§ 3.18 Indemnification

§ 3.18.1 To the fullest extent permitted by law the Contractor shall indemnify and hold harmless the Owner, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), but only to the extent caused by the negligent acts or omissions of the Contractor, a Subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity that would otherwise exist as to a party or person described in this Section 3.18.

§ 3.18.2 In claims against any person or entity indemnified under this Section 3.18 by an employee of the Contractor, a Subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable, the indemnification obligation under Section 3.18.1 shall not be limited by a limitation on amount or type of damages, compensation or benefits payable by or for the Contractor or a Subcontractor under workers' compensation acts, disability benefit acts or other employee benefit acts.

ARTICLE 4 ARCHITECT

§ 4.1 General

§ 4.1.1 The Owner shall retain an architect lawfully licensed to practice architecture or an entity lawfully practicing architecture in the jurisdiction where the Project is located. That person or entity is identified as the Architect in the Agreement and is referred to throughout the Contract Documents as if singular in number.

§ 4.1.2 Duties, responsibilities and limitations of authority of the Architect as set forth in the Contract Documents shall not be restricted, modified or extended without written consent of the Owner, Contractor and Architect. Consent shall not be unreasonably withheld.

§ 4.1.3 If the employment of the Architect is terminated, the Owner shall employ a successor architect as to whom the Contractor has no reasonable objection and whose status under the Contract Documents shall be that of the Architect.

§ 4.2 Administration of the Contract

§ 4.2.1 The Architect will provide administration of the Contract as described in the Contract Documents and will be an Owner's representative during construction until the date the Architect issues the final Certificate for Payment. The Architect will have authority to act on behalf of the Owner only to the extent provided in the Contract Documents.

§ 4.2.2 The Architect will visit the site at intervals appropriate to the stage of construction, or as otherwise agreed with the Owner, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine in general if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. The Architect will not have control over, charge of, or responsibility for, the construction means, methods, techniques, sequences or procedures, or for the safety precautions and programs in connection with the Work, since these are solely the Contractor's rights and responsibilities under the Contract Documents, except as provided in Section 3.3.1.

§ 4.2.3 On the basis of the site visits, the Architect will keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and report to the Owner (1) known deviations from the Contract Documents and from the most recent construction schedule submitted by the Contractor, and (2) defects and deficiencies observed in the Work, including those that will impact the Contractor's achievement of its Sustainable Measures. The Architect will not be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect will not have control over or charge of and will not be responsible for acts or omissions of the Contractor, Subcontractors, or their agents or employees, or any other persons or entities performing portions of the Work.

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. This document was created on 03/08/2021 12:05:59 under the terms of AIA Documents on Demand® Order No. 2010675659 , is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Documents-on-Demand – End User License Agreement. To report copyright violations, e-mail copyright@aia.org.

§ 4.2.4 Communications Facilitating Contract Administration
Except as otherwise provided in the Contract Documents or when direct communications have been specially authorized, the Owner and Contractor shall endeavor to communicate with each other through the Architect about matters arising out of or relating to the Contract. Communications by and with the Architect's consultants shall be through the Architect. Communications by and with Subcontractors and material suppliers shall be through the Contractor. Communications by and with separate contractors shall be through the Owner.

§ 4.2.5 Based on the Architect's evaluations of the Contractor's Applications for Payment, the Architect will review and certify the amounts due the Contractor and will issue Certificates for Payment in such amounts.

§ 4.2.6 The Architect has authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect will have authority to require inspection or testing of the Work in accordance with Sections 13.5.2 and 13.5.3, whether or not such Work is fabricated, installed or completed. However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Contractor, Subcontractors, material and equipment suppliers, their agents or employees, or other persons or entities performing portions of the Work.

§ 4.2.7 The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect's action will be taken in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review. Review of such submittals is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which remain the responsibility of the Contractor as required by the Contract Documents. The Architect's review of the Contractor's submittals shall not relieve the Contractor of the obligations under Sections 3.3, 3.5 and 3.12. The Architect's review shall not constitute approval of safety precautions or, unless otherwise specifically stated by the Architect, of any construction means, methods, techniques, sequences or procedures. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

§ 4.2.8 The Architect will prepare Change Orders and Construction Change Directives, and may authorize minor changes in the Work as provided in Section 7.4. If the Architect determines that implementation of a proposed change would materially impact a Sustainable Measure or the Sustainable Objective, the Architect shall notify the Owner, who may authorize further investigation of such change. The Architect will investigate and make determinations and recommendations regarding concealed and unknown conditions as provided in Section 3.7.4.

§ 4.2.9 The Architect will conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion pursuant to Section 9.8; receive and forward to the Owner, for the Owner's review and records, written warranties, Sustainability Documentation and related documents required by the Contract and assembled by the Contractor pursuant to Section 9.10; and issue a final Certificate for Payment pursuant to Section 9.10.

§ 4.2.10 If the Owner and Architect agree, the Architect will provide one or more project representatives to assist in carrying out the Architect's responsibilities at the site. The duties, responsibilities and limitations of authority of such project representatives shall be as set forth in an exhibit to be incorporated in the Contract Documents.

§ 4.2.11 The Architect will interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

§ 4.2.12 Interpretations and decisions of the Architect will be consistent with the intent of, and reasonably inferable from, the Contract Documents and will be in writing or in the form of drawings. When making such interpretations and decisions, the Architect will endeavor to secure faithful performance by both Owner and Contractor, will not show partiality to either and will not be liable for results of interpretations or decisions rendered in good faith.

§ 4.2.13 The Architect's decisions on matters relating to aesthetic effect will be final if consistent with the intent expressed in the Contract Documents.

§ 4.2.14 The Architect will review and respond to requests for information about the Contract Documents. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness. If appropriate, the Architect will prepare and issue supplemental Drawings and Specifications in response to the requests for information.

ARTICLE 5 SUBCONTRACTORS

§ 5.1 Definitions

§ 5.1.1 A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the Work at the site. The term "Subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Subcontractor or an authorized representative of the Subcontractor. The term "Subcontractor" does not include a separate contractor or subcontractors of a separate contractor.

§ 5.1.2 A Sub-subcontractor is a person or entity who has a direct or indirect contract with a Subcontractor to perform a portion of the Work at the site. The term "Sub-subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Sub-subcontractor or an authorized representative of the Sub-subcontractor.

§ 5.2 Award of Subcontracts and Other Contracts for Portions of the Work

§ 5.2.1 Unless otherwise stated in the Contract Documents or the bidding requirements, the Contractor, as soon as practicable after award of the Contract, shall furnish in writing to the Owner through the Architect the names of persons or entities (including those who are to furnish materials or equipment fabricated to a special design) proposed for each principal portion of the Work. The Architect may reply within 14 days to the Contractor in writing stating (1) whether the Owner or the Architect has reasonable objection to any such proposed person or entity or (2) that the Architect requires additional time for review. Failure of the Owner or Architect to reply within the 14-day period shall constitute notice of no reasonable objection.

§ 5.2.2 The Contractor shall not contract with a proposed person or entity to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not be required to contract with anyone to whom the Contractor has made reasonable objection.

§ 5.2.3 If the Owner or Architect has reasonable objection to a person or entity proposed by the Contractor, the Contractor shall propose another to whom the Owner or Architect has no reasonable objection. If the proposed but rejected Subcontractor was reasonably capable of performing the Work, the Contract Sum and Contract Time shall be increased or decreased by the difference, if any, occasioned by such change, and an appropriate Change Order shall be issued before commencement of the substitute Subcontractor's Work. However, no increase in the Contract Sum or Contract Time shall be allowed for such change unless the Contractor has acted promptly and responsively in submitting names as required.

§ 5.2.4 The Contractor shall not substitute a Subcontractor, person or entity previously selected if the Owner or Architect makes reasonable objection to such substitution.

§ 5.3 Subcontractual Relations

By appropriate agreement, written where legally required for validity, the Contractor shall require each Subcontractor, to the extent of the Work to be performed by the Subcontractor, to be bound to the Contractor by terms of the Contract Documents, and to assume toward the Contractor all the obligations and responsibilities, including the responsibility for safety of the Subcontractor's Work, which the Contractor, by these Documents, assumes toward the Owner and Architect. Each subcontract agreement shall preserve and protect the rights of the Owner and Architect under the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights, and shall allow to the Subcontractor, unless specifically provided otherwise in the subcontract agreement, the benefit of all rights, remedies and redress against the Contractor that the Contractor, by the Contract Documents, has against the Owner. Where appropriate, the Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. The Contractor shall make available to each proposed Subcontractor, prior to the execution of the subcontract agreement, copies of the Contract Documents to which the Subcontractor will be bound, including the Sustainability Plan and, upon written request of the Subcontractor, identify to the Subcontractor terms and conditions of the proposed subcontract agreement that may be at variance with the Contract Documents. Subcontractors will similarly make copies of applicable portions of such documents available to their respective proposed Sub-subcontractors.

§ 5.4 Contingent Assignment of Subcontracts

§ 5.4.1 Each subcontract agreement for a portion of the Work is assigned by the Contractor to the Owner, provided that

.1 assignment is effective only after termination of the Contract by the Owner for cause pursuant to Section 14.2 and only for those subcontract agreements that the Owner accepts by notifying the Subcontractor and Contractor in writing; and

.2 assignment is subject to the prior rights of the surety, if any, obligated under bond relating to the Contract.

When the Owner accepts the assignment of a subcontract agreement, the Owner assumes the Contractor's rights and obligations under the subcontract.

§ 5.4.2 Upon such assignment, if the Work has been suspended for more than 30 days, the Subcontractor's compensation shall be equitably adjusted for increases in cost resulting from the suspension.

§ 5.4.3 Upon such assignment to the Owner under this Section 5.4, the Owner may further assign the subcontract to a successor contractor or other entity. If the Owner assigns the subcontract to a successor contractor or other entity, the Owner shall nevertheless remain legally responsible for all of the successor contractor's obligations under the subcontract.

ARTICLE 6 CONSTRUCTION BY OWNER OR BY SEPARATE CONTRACTORS

§ 6.1 Owner's Right to Perform Construction and to Award Separate Contracts

§ 6.1.1 The Owner reserves the right to perform construction or operations related to the Project with the Owner's own forces, and to award separate contracts in connection with other portions of the Project or other construction or operations on the site under Conditions of the Contract identical or substantially similar to these including those portions related to insurance and waiver of subrogation. If the Contractor claims that delay or additional cost is involved because of such action by the Owner, the Contractor shall make such Claim as provided in Article 15.

§ 6.1.2 When separate contracts are awarded for different portions of the Project or other construction or operations on the site, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner-Contractor Agreement.

§ 6.1.3 The Owner shall provide for coordination of the activities of the Owner's own forces and of each separate contractor with the Work of the Contractor, who shall cooperate with them. The Contractor shall participate with other separate contractors and the Owner in reviewing their construction schedules. The Contractor shall make any revisions to the construction schedule deemed necessary after a joint review and mutual agreement. The construction schedules shall then constitute the schedules to be used by the Contractor, separate contractors and the Owner until subsequently revised.

§ 6.1.4 Unless otherwise provided in the Contract Documents, when the Owner performs construction or operations related to the Project with the Owner's own forces, the Owner shall be deemed to be subject to the same obligations and to have the same rights that apply to the Contractor under the Conditions of the Contract, including, without excluding others, those stated in Article 3, this Article 6 and Articles 10, 11 and 12.

§ 6.2 Mutual Responsibility

§ 6.2.1 The Contractor shall afford the Owner and separate contractors reasonable opportunity for introduction and storage of their materials and equipment and performance of their activities, and shall connect and coordinate the Contractor's construction and operations with theirs as required by the Contract Documents.

§ 6.2.2 If part of the Contractor's Work depends for proper execution or results upon construction or operations by the Owner or a separate contractor, the Contractor shall, prior to proceeding with that portion of the Work, promptly report to the Architect apparent discrepancies or defects in such other construction that would render it unsuitable for such proper execution and results. Failure of the Contractor so to report shall constitute an acknowledgment that the Owner's or separate contractor's completed or partially completed construction is fit and proper to receive the Contractor's Work, except as to defects not then reasonably discoverable.

§ 6.2.3 The Contractor shall reimburse the Owner for costs the Owner incurs that are payable to a separate contractor because of the Contractor's delays, improperly timed activities or defective construction. The Owner shall be

responsible to the Contractor for costs the Contractor incurs because of a separate contractor's delays, improperly timed activities, damage to the Work or defective construction.

§ 6.2.4 The Contractor shall promptly remedy damage the Contractor wrongfully causes to completed or partially completed construction or to property of the Owner or separate contractors as provided in Section 10.2.5.

§ 6.2.5 The Owner and each separate contractor shall have the same responsibilities for cutting and patching as are described for the Contractor in Section 3.14.

§ 6.3 Owner's Right to Clean Up

If a dispute arises among the Contractor, separate contractors and the Owner as to the responsibility under their respective contracts for maintaining the premises and surrounding area free from waste materials and rubbish, the Owner may clean up and the Architect will allocate the cost among those responsible.

ARTICLE 7 CHANGES IN THE WORK

§ 7.1 General

§ 7.1.1 Changes in the Work may be accomplished after execution of the Contract, and without invalidating the Contract, by Change Order, Construction Change Directive or order for a minor change in the Work, subject to the limitations stated in this Article 7 and elsewhere in the Contract Documents.

§ 7.1.2 A Change Order shall be based upon agreement among the Owner, Contractor and Architect; a Construction Change Directive requires agreement by the Owner and Architect and may or may not be agreed to by the Contractor; an order for a minor change in the Work may be issued by the Architect alone.

§ 7.1.3 Changes in the Work shall be performed under applicable provisions of the Contract Documents, and the Contractor shall proceed promptly, unless otherwise provided in the Change Order, Construction Change Directive or order for a minor change in the Work.

§ 7.2 Change Orders

§ 7.2.1 A Change Order is a written instrument prepared by the Architect and signed by the Owner, Contractor and Architect stating their agreement upon all of the following:

- **.1** The change in the Work;
- **.2** The amount of the adjustment, if any, in the Contract Sum; and
- **.3** The extent of the adjustment, if any, in the Contract Time.

§ 7.3 Construction Change Directives

§ 7.3.1 A Construction Change Directive is a written order prepared by the Architect and signed by the Owner and Architect, directing a change in the Work prior to agreement on adjustment, if any, in the Contract Sum or Contract Time, or both. The Owner may by Construction Change Directive, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions or other revisions, the Contract Sum and Contract Time being adjusted accordingly.

§ 7.3.2 A Construction Change Directive shall be used in the absence of total agreement on the terms of a Change Order.

§ 7.3.3 If the Construction Change Directive provides for an adjustment to the Contract Sum, the adjustment shall be based on one of the following methods:

- **.1** Mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation;
- **.2** Unit prices stated in the Contract Documents or subsequently agreed upon;
- **.3** Cost to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage fee; or
- **.4** As provided in Section 7.3.7.

§ 7.3.4 If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are materially changed in a proposed Change Order or Construction Change Directive so that application of such unit prices to quantities of Work proposed will cause substantial inequity to the Owner or Contractor, the applicable unit prices shall be equitably adjusted.

To report copyright violations, e-mail copyright@aia.org.

§ 7.3.5 Upon receipt of a Construction Change Directive, the Contractor shall promptly proceed with the change in the Work involved and advise the Architect of the Contractor's agreement or disagreement with the method, if any, provided in the Construction Change Directive for determining the proposed adjustment in the Contract Sum or Contract Time.

§ 7.3.6 A Construction Change Directive signed by the Contractor indicates the Contractor's agreement therewith, including adjustment in Contract Sum and Contract Time or the method for determining them. Such agreement shall be effective immediately and shall be recorded as a Change Order.

§ 7.3.7 If the Contractor does not respond promptly or disagrees with the method for adjustment in the Contract Sum, the Architect shall determine the method and the adjustment on the basis of reasonable expenditures and savings of those performing the Work attributable to the change, including, in case of an increase in the Contract Sum, an amount for overhead and profit as set forth in the Agreement, or if no such amount is set forth in the Agreement, a reasonable amount. In such case, and also under Section 7.3.3.3, the Contractor shall keep and present, in such form as the Architect may prescribe, an itemized accounting together with appropriate supporting data. Unless otherwise provided in the Contract Documents, costs for the purposes of this Section 7.3.7 shall be limited to the following:

- **.1** Costs of labor, including social security, old age and unemployment insurance, fringe benefits required by agreement or custom, and workers' compensation insurance;
- **.2** Costs of materials, supplies and equipment, including cost of transportation, whether incorporated or consumed;
- **.3** Rental costs of machinery and equipment, exclusive of hand tools, whether rented from the Contractor or others;
- **.4** Costs of premiums for all bonds and insurance, permit fees, and sales, use or similar taxes related to the Work; and
- **.5** Additional costs of supervision and field office personnel directly attributable to the change.

§ 7.3.8 The amount of credit to be allowed by the Contractor to the Owner for a deletion or change that results in a net decrease in the Contract Sum shall be actual net cost as confirmed by the Architect. When both additions and credits covering related Work or substitutions are involved in a change, the allowance for overhead and profit shall be figured on the basis of net increase, if any, with respect to that change.

§ 7.3.9 Pending final determination of the total cost of a Construction Change Directive to the Owner, the Contractor may request payment for Work completed under the Construction Change Directive in Applications for Payment. The Architect will make an interim determination for purposes of monthly certification for payment for those costs and certify for payment the amount that the Architect determines, in the Architect's professional judgment, to be reasonably justified. The Architect's interim determination of cost shall adjust the Contract Sum on the same basis as a Change Order, subject to the right of either party to disagree and assert a Claim in accordance with Article 15.

§ 7.3.10 When the Owner and Contractor agree with a determination made by the Architect concerning the adjustments in the Contract Sum and Contract Time, or otherwise reach agreement upon the adjustments, such agreement shall be effective immediately and the Architect will prepare a Change Order. Change Orders may be issued for all or any part of a Construction Change Directive.

§ 7.4 Minor Changes in the Work

The Architect has authority to order minor changes in the Work not involving adjustment in the Contract Sum or extension of the Contract Time and not inconsistent with the intent of the Contract Documents. Such changes will be effected by written order signed by the Architect and shall be binding on the Owner and Contractor.

ARTICLE 8 TIME

§ 8.1 Definitions

§ 8.1.1 Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work.

§ 8.1.2 The date of commencement of the Work is the date established in the Agreement.

§ 8.1.3 The date of Substantial Completion is the date certified by the Architect in accordance with Section 9.8.

§ 8.1.4 The term "day" as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.

To report copyright violations, e-mail copyright@aia.org.

§ 8.2 Progress and Completion

§ 8.2.1 Time limits stated in the Contract Documents are of the essence of the Contract. By executing the Agreement the Contractor confirms that the Contract Time is a reasonable period for performing the Work.

§ 8.2.2 The Contractor shall not knowingly, except by agreement or instruction of the Owner in writing, prematurely commence operations on the site or elsewhere prior to the effective date of insurance required by Article 11 to be furnished by the Contractor and Owner. The date of commencement of the Work shall not be changed by the effective date of such insurance.

§ 8.2.3 The Contractor shall proceed expeditiously with adequate forces and shall achieve Substantial Completion within the Contract Time.

§ 8.3 Delays and Extensions of Time

§ 8.3.1 If the Contractor is delayed at any time in the commencement or progress of the Work by an act or neglect of the Owner or Architect, or of an employee of either, or of a separate contractor employed by the Owner; or by changes ordered in the Work; or by labor disputes, fire, unusual delay in deliveries, unavoidable casualties or other causes beyond the Contractor's control; or by delay authorized by the Owner pending mediation and arbitration; or by other causes that the Architect determines may justify delay, then the Contract Time shall be extended by Change Order for such reasonable time as the Architect may determine.

§ 8.3.2 Claims relating to time shall be made in accordance with applicable provisions of Article 15.

§ 8.3.3 This Section 8.3 does not preclude recovery of damages for delay by either party under other provisions of the Contract Documents.

ARTICLE 9 PAYMENTS AND COMPLETION

§ 9.1 Contract Sum

The Contract Sum is stated in the Agreement and, including authorized adjustments, is the total amount payable by the Owner to the Contractor for performance of the Work under the Contract Documents.

§ 9.2 Schedule of Values

Where the Contract is based on a stipulated sum or Guaranteed Maximum Price, the Contractor shall submit to the Architect, before the first Application for Payment, a schedule of values allocating the entire Contract Sum to the various portions of the Work and prepared in such form and supported by such data to substantiate its accuracy as the Architect may require. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment.

§ 9.3 Applications for Payment

§ 9.3.1 At least ten days before the date established for each progress payment, the Contractor shall submit to the Architect an itemized Application for Payment prepared in accordance with the schedule of values, if required under Section 9.2, for completed portions of the Work. Such application shall be notarized, if required, and supported by such data substantiating the Contractor's right to payment as the Owner or Architect may require, such as copies of requisitions from Subcontractors and material suppliers, and shall reflect retainage if provided for in the Contract Documents.

§ 9.3.1.1 As provided in Section 7.3.9, such applications may include requests for payment on account of changes in the Work that have been properly authorized by Construction Change Directives, or by interim determinations of the Architect, but not yet included in Change Orders.

§ 9.3.1.2 Applications for Payment shall not include requests for payment for portions of the Work for which the Contractor does not intend to pay a Subcontractor or material supplier, unless such Work has been performed by others whom the Contractor intends to pay.

§ 9.3.2 Unless otherwise provided in the Contract Documents, payments shall be made on account of materials and equipment delivered and suitably stored at the site for subsequent incorporation in the Work. If approved in advance by the Owner, payment may similarly be made for materials and equipment suitably stored off the site at a location agreed upon in writing. Payment for materials and equipment stored on or off the site shall be conditioned upon compliance by the Contractor with procedures satisfactory to the Owner to establish the Owner's title to such materials and equipment

To report copyright violations, e-mail copyright@aia.org.

or otherwise protect the Owner's interest, and shall include the costs of applicable insurance, storage and transportation to the site for such materials and equipment stored off the site.

§ 9.3.3 The Contractor warrants that title to all Work covered by an Application for Payment will pass to the Owner no later than the time of payment. The Contractor further warrants that upon submittal of an Application for Payment all Work for which Certificates for Payment have been previously issued and payments received from the Owner shall, to the best of the Contractor's knowledge, information and belief, be free and clear of liens, claims, security interests or encumbrances in favor of the Contractor, Subcontractors, material suppliers, or other persons or entities making a claim by reason of having provided labor, materials and equipment relating to the Work.

§ 9.4 Certificates for Payment

§ 9.4.1 The Architect will, within seven days after receipt of the Contractor's Application for Payment, either issue to the Owner a Certificate for Payment, with a copy to the Contractor, for such amount as the Architect determines is properly due, or notify the Contractor and Owner in writing of the Architect's reasons for withholding certification in whole or in part as provided in Section 9.5.1.

§ 9.4.2 The issuance of a Certificate for Payment will constitute a representation by the Architect to the Owner, based on the Architect's evaluation of the Work and the data comprising the Application for Payment, that, to the best of the Architect's knowledge, information and belief, the Work has progressed to the point indicated and that the quality of the Work is in accordance with the Contract Documents. The foregoing representations are subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to results of subsequent tests and inspections, to correction of minor deviations from the Contract Documents prior to completion and to specific qualifications expressed by the Architect. The issuance of a Certificate for Payment will further constitute a representation that the Contractor is entitled to payment in the amount certified. However, the issuance of a Certificate for Payment will not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work, (2) reviewed construction means, methods, techniques, sequences or procedures, (3) reviewed copies of requisitions received from Subcontractors and material suppliers and other data requested by the Owner to substantiate the Contractor's right to payment, or (4) made examination to ascertain how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

§ 9.5 Decisions to Withhold Certification

§ 9.5.1 The Architect may withhold a Certificate for Payment in whole or in part, to the extent reasonably necessary to protect the Owner, if in the Architect's opinion the representations to the Owner required by Section 9.4.2 cannot be made. If the Architect is unable to certify payment in the amount of the Application, the Architect will notify the Contractor and Owner as provided in Section 9.4.1. If the Contractor and Architect cannot agree on a revised amount, the Architect will promptly issue a Certificate for Payment for the amount for which the Architect is able to make such representations to the Owner. The Architect may also withhold a Certificate for Payment or, because of subsequently discovered evidence, may nullify the whole or a part of a Certificate for Payment previously issued, to such extent as may be necessary in the Architect's opinion to protect the Owner from loss for which the Contractor is responsible, including loss resulting from acts and omissions described in Section 3.3.2, because of

- **.1** defective Work not remedied;
- **.2** third party claims filed or reasonable evidence indicating probable filing of such claims unless security acceptable to the Owner is provided by the Contractor;
- **.3** failure of the Contractor to make payments properly to Subcontractors or for labor, materials or equipment;
- **.4** reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Sum;
- **.5** damage to the Owner or a separate contractor;
- **.6** reasonable evidence that the Work will not be completed within the Contract Time, and that the unpaid balance would not be adequate to cover actual or liquidated damages for the anticipated delay; or
- **.7** repeated failure to carry out the Work in accordance with the Contract Documents.

§ 9.5.2 When the above reasons for withholding certification are removed, certification will be made for amounts previously withheld.

§ 9.5.3 If the Architect withholds certification for payment under Section 9.5.1.3, the Owner may, at its sole option, issue joint checks to the Contractor and to any Subcontractor or material or equipment suppliers to whom the Contractor failed to make payment for Work properly performed or material or equipment suitably delivered. If the Owner makes payments by joint check, the Owner shall notify the Architect and the Architect will reflect such payment on the next Certificate for Payment.

§ 9.6 Progress Payments

§ 9.6.1 After the Architect has issued a Certificate for Payment, the Owner shall make payment in the manner and within the time provided in the Contract Documents, and shall so notify the Architect.

§ 9.6.2 The Contractor shall pay each Subcontractor no later than seven days after receipt of payment from the Owner the amount to which the Subcontractor is entitled, reflecting percentages actually retained from payments to the Contractor on account of the Subcontractor's portion of the Work. The Contractor shall, by appropriate agreement with each Subcontractor, require each Subcontractor to make payments to Sub-subcontractors in a similar manner.

§ 9.6.3 The Architect will, on request, furnish to a Subcontractor, if practicable, information regarding percentages of completion or amounts applied for by the Contractor and action taken thereon by the Architect and Owner on account of portions of the Work done by such Subcontractor.

§ 9.6.4 The Owner has the right to request written evidence from the Contractor that the Contractor has properly paid Subcontractors and material and equipment suppliers amounts paid by the Owner to the Contractor for subcontracted Work. If the Contractor fails to furnish such evidence within seven days, the Owner shall have the right to contact Subcontractors to ascertain whether they have been properly paid. Neither the Owner nor Architect shall have an obligation to pay or to see to the payment of money to a Subcontractor, except as may otherwise be required by law.

§ 9.6.5 Contractor payments to material and equipment suppliers shall be treated in a manner similar to that provided in Sections 9.6.2, 9.6.3 and 9.6.4.

§ 9.6.6 A Certificate for Payment, a progress payment, or partial or entire use or occupancy of the Project by the Owner shall not constitute acceptance of Work not in accordance with the Contract Documents.

§ 9.6.7 Unless the Contractor provides the Owner with a payment bond in the full penal sum of the Contract Sum, payments received by the Contractor for Work properly performed by Subcontractors and suppliers shall be held by the Contractor for those Subcontractors or suppliers who performed Work or furnished materials, or both, under contract with the Contractor for which payment was made by the Owner. Nothing contained herein shall require money to be placed in a separate account and not commingled with money of the Contractor, shall create any fiduciary liability or tort liability on the part of the Contractor for breach of trust or shall entitle any person or entity to an award of punitive damages against the Contractor for breach of the requirements of this provision.

§ 9.7 Failure of Payment

If the Architect does not issue a Certificate for Payment, through no fault of the Contractor, within seven days after receipt of the Contractor's Application for Payment, or if the Owner does not pay the Contractor within seven days after the date established in the Contract Documents the amount certified by the Architect or awarded by binding dispute resolution, then the Contractor may, upon seven additional days' written notice to the Owner and Architect, stop the Work until payment of the amount owing has been received. The Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shut-down, delay and start-up, plus interest as provided for in the Contract Documents.

§ 9.8 Substantial Completion

§ 9.8.1 Substantial Completion is the stage in the progress of the Work when the Work or designated portion thereof is sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work for its intended use. Except for that portion of the Sustainability Documentation which by its nature must be provided after Substantial Completion, the Contractor shall submit all other Sustainability Documentation required from the Contractor by the Contract Documents no later than the date of Substantial Completion. Verification that the Project has achieved the Sustainable Objective, or the actual achievement of the Sustainable Objective, shall not be a condition precedent to issuance of a Certificate of Substantial Completion in accordance with Section 9.8.4.

§ 9.8.2 When the Contractor considers that the Work, or a portion thereof which the Owner agrees to accept separately, is substantially complete, the Contractor shall prepare and submit to the Architect a comprehensive list of items to be completed or corrected prior to final payment. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

To report copyright violations, e-mail copyright@aia.org.

§ 9.8.3 Upon receipt of the Contractor's list, the Architect will make an inspection to determine whether the Work or designated portion thereof is substantially complete. If the Architect's inspection discloses any item, whether or not included on the Contractor's list, which is not sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work or designated portion thereof for its intended use, the Contractor shall, before issuance of the Certificate of Substantial Completion, complete or correct such item upon notification by the Architect. In such case, the Contractor shall then submit a request for another inspection by the Architect to determine Substantial Completion.

§ 9.8.4 When the Work or designated portion thereof is substantially complete, the Architect will prepare a Certificate of Substantial Completion that shall establish the date of Substantial Completion, shall establish responsibilities of the Owner and Contractor for security, maintenance, heat, utilities, damage to the Work and insurance, and shall fix the time within which the Contractor shall finish all items on the list accompanying the Certificate. Warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or designated portion thereof unless otherwise provided in the Certificate of Substantial Completion.

§ 9.8.5 The Certificate of Substantial Completion shall be submitted to the Owner and Contractor for their written acceptance of responsibilities assigned to them in such Certificate. Upon such acceptance and consent of surety, if any, the Owner shall make payment of retainage applying to such Work or designated portion thereof. Such payment shall be adjusted for Work that is incomplete or not in accordance with the requirements of the Contract Documents.

§ 9.9 Partial Occupancy or Use

§ 9.9.1 The Owner may occupy or use any completed or partially completed portion of the Work at any stage when such portion is designated by separate agreement with the Contractor, provided such occupancy or use is consented to by the insurer as required under Section 11.3.1.5 and authorized by public authorities having jurisdiction over the Project. Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner and Contractor have accepted in writing the responsibilities assigned to each of them for payments, retainage, if any, security, maintenance, heat, utilities, damage to the Work and insurance, and have agreed in writing concerning the period for correction of the Work and commencement of warranties required by the Contract Documents. When the Contractor considers a portion substantially complete, the Contractor shall prepare and submit a list to the Architect as provided under Section 9.8.2. Consent of the Contractor to partial occupancy or use shall not be unreasonably withheld. The stage of the progress of the Work shall be determined by written agreement between the Owner and Contractor or, if no agreement is reached, by decision of the Architect.

§ 9.9.2 Immediately prior to such partial occupancy or use, the Owner, Contractor and Architect shall jointly inspect the area to be occupied or portion of the Work to be used in order to determine and record the condition of the Work.

§ 9.9.3 Unless otherwise agreed upon, partial occupancy or use of a portion or portions of the Work shall not constitute acceptance of Work not complying with the requirements of the Contract Documents.

§ 9.10 Final Completion and Final Payment

§ 9.10.1 Upon receipt of the Contractor's written notice that the Work is ready for final inspection and acceptance and upon receipt of a final Application for Payment, the Architect will promptly make such inspection and, when the Architect finds the Work acceptable under the Contract Documents and the Contract fully performed, the Architect will promptly issue a final Certificate for Payment stating that to the best of the Architect's knowledge, information and belief, and on the basis of the Architect's on-site visits and inspections, the Work has been completed in accordance with terms and conditions of the Contract Documents and that the entire balance found to be due the Contractor and noted in the final Certificate is due and payable. The Architect's final Certificate for Payment will constitute a further representation that conditions listed in Section 9.10.2 as precedent to the Contractor's being entitled to final payment have been fulfilled. Verification that the Project has achieved the Sustainable Objective, or the actual achievement of the Sustainable Objective, shall not be a condition precedent to issuance of the final Certificate for Payment.

§ 9.10.2 Neither final payment nor any remaining retained percentage shall become due until the Contractor submits to the Architect (1) an affidavit that payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner) have been paid or otherwise satisfied, (2) a certificate evidencing that insurance required by the Contract Documents to remain in force after final payment is currently in effect and will not be canceled or allowed to expire until at least 30 days' prior written notice has been given to the Owner, (3) a written statement that the Contractor knows of no substantial reason that the insurance will not be renewable to cover the period required by the Contract Documents, (4) all Sustainability Documentation required from the Contractor by the Contract Documents, (5) consent

of surety, if any, to final payment and (6), if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts, releases and waivers of liens, claims, security interests or encumbrances arising out of the Contract, to the extent and in such form as may be designated by the Owner. If a Subcontractor refuses to furnish a release or waiver required by the Owner, the Contractor may furnish a bond satisfactory to the Owner to indemnify the Owner against such lien. If such lien remains unsatisfied after payments are made, the Contractor shall refund to the Owner all money that the Owner may be compelled to pay in discharging such lien, including all costs and reasonable attorneys' fees.

§ 9.10.3 If, after Substantial Completion of the Work, final completion thereof is materially delayed through no fault of the Contractor or by issuance of Change Orders affecting final completion, and the Architect so confirms, the Owner shall, upon application by the Contractor and certification by the Architect, and without terminating the Contract, make payment of the balance due for that portion of the Work fully completed and accepted. If the remaining balance for Work not fully completed or corrected is less than retainage stipulated in the Contract Documents, and if bonds have been furnished, the written consent of surety to payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by the Contractor to the Architect prior to certification of such payment. Such payment shall be made under terms and conditions governing final payment, except that it shall not constitute a waiver of claims.

§ 9.10.4 The making of final payment shall constitute a waiver of Claims by the Owner except those arising from

- **.1** liens, Claims, security interests or encumbrances arising out of the Contract and unsettled;
- **.2** failure of the Work to comply with the requirements of the Contract Documents; or
- **.3** terms of special warranties required by the Contract Documents.

§ 9.10.5 Acceptance of final payment by the Contractor, a Subcontractor or material supplier shall constitute a waiver of claims by that payee except those previously made in writing and identified by that payee as unsettled at the time of final Application for Payment.

ARTICLE 10 PROTECTION OF PERSONS AND PROPERTY

§ 10.1 Safety Precautions and Programs

The Contractor shall be responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the performance of the Contract.

§ 10.2 Safety of Persons and Property

§ 10.2.1 The Contractor shall take reasonable precautions for safety of, and shall provide reasonable protection to prevent damage, injury or loss to

- **.1** employees on the Work and other persons who may be affected thereby;
- **.2** the Work and materials and equipment to be incorporated therein, whether in storage on or off the site, under care, custody or control of the Contractor or the Contractor's Subcontractors or Sub-subcontractors; and
- **.3** other property at the site or adjacent thereto, such as trees, shrubs, lawns, walks, pavements, roadways, structures and utilities not designated for removal, relocation or replacement in the course of construction.

§ 10.2.2 The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities bearing on safety of persons or property or their protection from damage, injury or loss.

§ 10.2.3 The Contractor shall erect and maintain, as required by existing conditions and performance of the Contract, reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards, promulgating safety regulations and notifying owners and users of adjacent sites and utilities.

§ 10.2.4 When use or storage of explosives or other hazardous materials or equipment or unusual methods are necessary for execution of the Work, the Contractor shall exercise utmost care and carry on such activities under supervision of properly qualified personnel.

§ 10.2.5 The Contractor shall promptly remedy damage and loss (other than damage or loss insured under property insurance required by the Contract Documents) to property referred to in Sections 10.2.1.2 and 10.2.1.3 caused in whole or in part by the Contractor, a Subcontractor, a Sub-subcontractor, or anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable and for which the Contractor is responsible under Sections 10.2.1.2 and 10.2.1.3, except damage or loss attributable to acts or omissions of the Owner or Architect or

anyone directly or indirectly employed by either of them, or by anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Contractor. The foregoing obligations of the Contractor are in addition to the Contractor's obligations under Section 3.18.

§ 10.2.6 The Contractor shall designate a responsible member of the Contractor's organization at the site whose duty shall be the prevention of accidents. This person shall be the Contractor's superintendent unless otherwise designated by the Contractor in writing to the Owner and Architect.

§ 10.2.7 The Contractor shall not permit any part of the construction or site to be loaded so as to cause damage or create an unsafe condition.

§ 10.2.8 Injury or Damage to Person or Property
If either party suffers injury or damage to person or property because of an act or omission of the other party, or of others for whose acts such party is legally responsible, written notice of such injury or damage, whether or not insured, shall be given to the other party within a reasonable time not exceeding 21 days after discovery. The notice shall provide sufficient detail to enable the other party to investigate the matter.

§ 10.3 Hazardous Materials
§ 10.3.1 The Contractor is responsible for compliance with any requirements included in the Contract Documents regarding hazardous materials. If the Contractor encounters a hazardous material or substance not addressed in the Contract Documents and if reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a material or substance, including but not limited to asbestos or polychlorinated biphenyl (PCB), encountered on the site by the Contractor, the Contractor shall, upon recognizing the condition, immediately stop Work in the affected area and report the condition to the Owner and Architect in writing.

§ 10.3.2 Upon receipt of the Contractor's written notice, the Owner shall obtain the services of a licensed laboratory to verify the presence or absence of the material or substance reported by the Contractor and, in the event such material or substance is found to be present, to cause it to be rendered harmless. Unless otherwise required by the Contract Documents, the Owner shall furnish in writing to the Contractor and Architect the names and qualifications of persons or entities who are to perform tests verifying the presence or absence of such material or substance or who are to perform the task of removal or safe containment of such material or substance. The Contractor and the Architect will promptly reply to the Owner in writing stating whether or not either has reasonable objection to the persons or entities proposed by the Owner. If either the Contractor or Architect has an objection to a person or entity proposed by the Owner, the Owner shall propose another to whom the Contractor and the Architect have no reasonable objection. When the material or substance has been rendered harmless, Work in the affected area shall resume upon written agreement of the Owner and Contractor. By Change Order, the Contract Time shall be extended appropriately and the Contract Sum shall be increased in the amount of the Contractor's reasonable additional costs of shut-down, delay and start-up.

§ 10.3.3 To the fullest extent permitted by law, the Owner shall indemnify and hold harmless the Contractor, Subcontractors, Architect, Architect's consultants and agents and employees of any of them from and against claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area if in fact the material or substance presents the risk of bodily injury or death as described in Section 10.3.1 and has not been rendered harmless, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), except to the extent that such damage, loss or expense is due to the fault or negligence of the party seeking indemnity.

§ 10.3.4 The Owner shall not be responsible under this Section 10.3 for materials or substances the Contractor brings to the site unless such materials or substances are required by the Contract Documents. The Owner shall be responsible for materials or substances required by the Contract Documents, except to the extent of the Contractor's fault or negligence in the use and handling of such materials or substances.

§ 10.3.5 The Contractor shall indemnify the Owner for the cost and expense the Owner incurs (1) for remediation of a material or substance the Contractor brings to the site and negligently handles, or (2) where the Contractor fails to perform its obligations under Section 10.3.1, except to the extent that the cost and expense are due to the Owner's fault or negligence.

§ 10.3.6 If, without negligence on the part of the Contractor, the Contractor is held liable by a government agency for the cost of remediation of a hazardous material or substance solely by reason of performing Work as required by the Contract Documents, the Owner shall indemnify the Contractor for all cost and expense thereby incurred.

§ 10.4 Emergencies

In an emergency affecting safety of persons or property, the Contractor shall act, at the Contractor's discretion, to prevent threatened damage, injury or loss. Additional compensation or extension of time claimed by the Contractor on account of an emergency shall be determined as provided in Article 15 and Article 7.

ARTICLE 11 INSURANCE AND BONDS

§ 11.1 Contractor's Liability Insurance

§ 11.1.1 The Contractor shall purchase from and maintain in a company or companies lawfully authorized to do business in the jurisdiction in which the Project is located such insurance as will protect the Contractor from claims set forth below which may arise out of or result from the Contractor's operations and completed operations under the Contract and for which the Contractor may be legally liable, whether such operations be by the Contractor or by a Subcontractor or by anyone directly or indirectly employed by any of them, or by anyone for whose acts any of them may be liable:

- **.1** Claims under workers' compensation, disability benefit and other similar employee benefit acts that are applicable to the Work to be performed;
- **.2** Claims for damages because of bodily injury, occupational sickness or disease, or death of the Contractor's employees;
- **.3** Claims for damages because of bodily injury, sickness or disease, or death of any person other than the Contractor's employees;
- **.4** Claims for damages insured by usual personal injury liability coverage;
- **.5** Claims for damages, other than to the Work itself, because of injury to or destruction of tangible property, including loss of use resulting therefrom;
- **.6** Claims for damages because of bodily injury, death of a person or property damage arising out of ownership, maintenance or use of a motor vehicle;
- **.7** Claims for bodily injury or property damage arising out of completed operations; and
- **.8** Claims involving contractual liability insurance applicable to the Contractor's obligations under Section 3.18.

§ 11.1.2 The insurance required by Section 11.1.1 shall be written for not less than limits of liability specified in the Contract Documents or required by law, whichever coverage is greater. Coverages, whether written on an occurrence or claims-made basis, shall be maintained without interruption from the date of commencement of the Work until the date of final payment and termination of any coverage required to be maintained after final payment, and, with respect to the Contractor's completed operations coverage, until the expiration of the period for correction of Work or for such other period for maintenance of completed operations coverage as specified in the Contract Documents.

§ 11.1.3 Certificates of insurance acceptable to the Owner shall be filed with the Owner prior to commencement of the Work and thereafter upon renewal or replacement of each required policy of insurance. These certificates and the insurance policies required by this Section 11.1 shall contain a provision that coverages afforded under the policies will not be canceled or allowed to expire until at least 30 days' prior written notice has been given to the Owner. An additional certificate evidencing continuation of liability coverage, including coverage for completed operations, shall be submitted with the final Application for Payment as required by Section 9.10.2 and thereafter upon renewal or replacement of such coverage until the expiration of the time required by Section 11.1.2. Information concerning reduction of coverage on account of revised limits or claims paid under the General Aggregate, or both, shall be furnished by the Contractor with reasonable promptness.

§ 11.1.4 The Contractor shall cause the commercial liability coverage required by the Contract Documents to include (1) the Owner, the Architect and the Architect's consultants as additional insureds for claims caused in whole or in part by the Contractor's negligent acts or omissions during the Contractor's operations; and (2) the Owner as an additional insured for claims caused in whole or in part by the Contractor's negligent acts or omissions during the Contractor's completed operations.

§ 11.2 Owner's Liability Insurance

The Owner shall be responsible for purchasing and maintaining the Owner's usual liability insurance.

§ 11.3 Property Insurance

§ 11.3.1 Unless otherwise provided, the Owner shall purchase and maintain, in a company or companies lawfully authorized to do business in the jurisdiction in which the Project is located, property insurance written on a builder's risk "all-risk" or equivalent policy form in the amount of the initial Contract Sum, plus value of subsequent Contract

Modifications and cost of materials supplied or installed by others, comprising total value for the entire Project at the site on a replacement cost basis without optional deductibles. Such property insurance shall be maintained, unless otherwise provided in the Contract Documents or otherwise agreed in writing by all persons and entities who are beneficiaries of such insurance, until final payment has been made as provided in Section 9.10 or until no person or entity other than the Owner has an insurable interest in the property required by this Section 11.3 to be covered, whichever is later. This insurance shall include interests of the Owner, the Contractor, Subcontractors and Sub-subcontractors in the Project.

§ 11.3.1.1 Property insurance shall be on an "all-risk" or equivalent policy form and shall include, without limitation, insurance against the perils of fire (with extended coverage) and physical loss or damage including, without duplication of coverage, theft, vandalism, malicious mischief, collapse, earthquake, flood, windstorm, falsework, testing and startup, temporary buildings and debris removal including demolition occasioned by enforcement of any applicable legal requirements, and shall cover reasonable compensation for Architect's and Contractor's services and expenses required as a result of such insured loss.

§ 11.3.1.2 If the Owner does not intend to purchase such property insurance required by the Contract and with all of the coverages in the amount described above, the Owner shall so inform the Contractor in writing prior to commencement of the Work. The Contractor may then effect insurance that will protect the interests of the Contractor, Subcontractors and Sub-subcontractors in the Work, and by appropriate Change Order the cost thereof shall be charged to the Owner. If the Contractor is damaged by the failure or neglect of the Owner to purchase or maintain insurance as described above, without so notifying the Contractor in writing, then the Owner shall bear all reasonable costs properly attributable thereto.

§ 11.3.1.3 If the property insurance requires deductibles, the Owner shall pay costs not covered because of such deductibles.

§ 11.3.1.4 This property insurance shall cover portions of the Work stored off the site, and also portions of the Work in transit.

§ 11.3.1.5 Partial occupancy or use in accordance with Section 9.9 shall not commence until the insurance company or companies providing property insurance have consented to such partial occupancy or use by endorsement or otherwise. The Owner and the Contractor shall take reasonable steps to obtain consent of the insurance company or companies and shall, without mutual written consent, take no action with respect to partial occupancy or use that would cause cancellation, lapse or reduction of insurance.

§ 11.3.2 Boiler and Machinery Insurance

The Owner shall purchase and maintain boiler and machinery insurance required by the Contract Documents or by law, which shall specifically cover such insured objects during installation and until final acceptance by the Owner; this insurance shall include interests of the Owner, Contractor, Subcontractors and Sub-subcontractors in the Work, and the Owner and Contractor shall be named insureds.

§ 11.3.3 Loss of Use Insurance

The Owner, at the Owner's option, may purchase and maintain such insurance as will insure the Owner against loss of use of the Owner's property due to fire or other hazards, however caused. The Owner waives all rights of action against the Contractor for loss of use of the Owner's property, including consequential losses due to fire or other hazards however caused.

§ 11.3.4 If the Contractor requests in writing that insurance for risks other than those described herein or other special causes of loss be included in the property insurance policy, the Owner shall, if possible, include such insurance, and the cost thereof shall be charged to the Contractor by appropriate Change Order.

§ 11.3.5 If during the Project construction period the Owner insures properties, real or personal or both, at or adjacent to the site by property insurance under policies separate from those insuring the Project, or if after final payment property insurance is to be provided on the completed Project through a policy or policies other than those insuring the Project during the construction period, the Owner shall waive all rights in accordance with the terms of Section 11.3.7 for damages caused by fire or other causes of loss covered by this separate property insurance. All separate policies shall provide this waiver of subrogation by endorsement or otherwise.

§ 11.3.6 Before an exposure to loss may occur, the Owner shall file with the Contractor a copy of each policy that includes insurance coverages required by this Section 11.3. Each policy shall contain all generally applicable conditions, definitions, exclusions and endorsements related to this Project. Each policy shall contain a provision that

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. The "American Institute of Architects," "AIA," the AIA Logo, "A201," and "AIA Contract Documents" are registered trademarks and may not be used without permission. To report copyright violations, e-mail copyright@aia.org.

the policy will not be canceled or allowed to expire, and that its limits will not be reduced, until at least 30 days' prior written notice has been given to the Contractor.

§ 11.3.7 Waivers of Subrogation
The Owner and Contractor waive all rights against (1) each other and any of their subcontractors, sub-subcontractors, agents and employees, each of the other, and (2) the Architect, Architect's consultants, separate contractors described in Article 6, if any, and any of their subcontractors, sub-subcontractors, agents and employees, for damages caused by fire or other causes of loss to the extent covered by property insurance obtained pursuant to this Section 11.3 or other property insurance applicable to the Work, except such rights as they have to proceeds of such insurance held by the Owner as fiduciary. The Owner or Contractor, as appropriate, shall require of the Architect, Architect's consultants, separate contractors described in Article 6, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waivers of subrogation by endorsement or otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

§ 11.3.8 A loss insured under the Owner's property insurance shall be adjusted by the Owner as fiduciary and made payable to the Owner as fiduciary for the insureds, as their interests may appear, subject to requirements of any applicable mortgagee clause and of Section 11.3.10. The Contractor shall pay Subcontractors their just shares of insurance proceeds received by the Contractor, and by appropriate agreements, written where legally required for validity, shall require Subcontractors to make payments to their Sub-subcontractors in similar manner.

§ 11.3.9 If required in writing by a party in interest, the Owner as fiduciary shall, upon occurrence of an insured loss, give bond for proper performance of the Owner's duties. The cost of required bonds shall be charged against proceeds received as fiduciary. The Owner shall deposit in a separate account proceeds so received, which the Owner shall distribute in accordance with such agreement as the parties in interest may reach, or as determined in accordance with the method of binding dispute resolution selected in the Agreement between the Owner and Contractor. If after such loss no other special agreement is made and unless the Owner terminates the Contract for convenience, replacement of damaged property shall be performed by the Contractor after notification of a Change in the Work in accordance with Article 7.

§ 11.3.10 The Owner as fiduciary shall have power to adjust and settle a loss with insurers unless one of the parties in interest shall object in writing within five days after occurrence of loss to the Owner's exercise of this power; if such objection is made, the dispute shall be resolved in the manner selected by the Owner and Contractor as the method of binding dispute resolution in the Agreement. If the Owner and Contractor have selected arbitration as the method of binding dispute resolution, the Owner as fiduciary shall make settlement with insurers or, in the case of a dispute over distribution of insurance proceeds, in accordance with the directions of the arbitrators.

§ 11.4 Performance Bond and Payment Bond
§ 11.4.1 The Owner shall have the right to require the Contractor to furnish bonds covering faithful performance of the Contract and payment of obligations arising thereunder as stipulated in bidding requirements or specifically required in the Contract Documents on the date of execution of the Contract.

§ 11.4.2 Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

ARTICLE 12 UNCOVERING AND CORRECTION OF WORK
§ 12.1 Uncovering of Work
§ 12.1.1 If a portion of the Work is covered contrary to the Architect's request or to requirements specifically expressed in the Contract Documents, it must, if requested in writing by the Architect, be uncovered for the Architect's examination and be replaced at the Contractor's expense without change in the Contract Time.

§ 12.1.2 If a portion of the Work has been covered that the Architect has not specifically requested to examine prior to its being covered, the Architect may request to see such Work and it shall be uncovered by the Contractor. If such Work is in accordance with the Contract Documents, costs of uncovering and replacement shall, by appropriate Change Order, be at the Owner's expense. If such Work is not in accordance with the Contract Documents, such costs and the cost of

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. The "American Institute of Architects," "AIA," the AIA Logo, "A201," and "AIA Contract Documents" are registered trademarks and may not be used without permission. To report copyright violations, e-mail copyright@aia.org.

correction shall be at the Contractor's expense unless the condition was caused by the Owner or a separate contractor in which event the Owner shall be responsible for payment of such costs.

§ 12.2 Correction of Work

§ 12.2.1 Before or After Substantial Completion

The Contractor shall promptly correct Work rejected by the Architect or failing to conform to the requirements of the Contract Documents, whether discovered before or after Substantial Completion and whether or not fabricated, installed or completed. Costs of correcting such rejected Work, including additional testing and inspections, the cost of uncovering and replacement, and compensation for the Architect's services and expenses made necessary thereby, shall be at the Contractor's expense.

§ 12.2.2 After Substantial Completion

§ 12.2.2.1 In addition to the Contractor's obligations under Section 3.5, if, within one year after the date of Substantial Completion of the Work or designated portion thereof or after the date for commencement of warranties established under Section 9.9.1, or by terms of an applicable special warranty required by the Contract Documents, any of the Work is found to be not in accordance with the requirements of the Contract Documents, the Contractor shall correct it promptly after receipt of written notice from the Owner to do so unless the Owner has previously given the Contractor a written acceptance of such condition. The Owner shall give such notice promptly after discovery of the condition. During the one-year period for correction of Work, if the Owner fails to notify the Contractor and give the Contractor an opportunity to make the correction, the Owner waives the rights to require correction by the Contractor and to make a claim for breach of warranty. If the Contractor fails to correct nonconforming Work within a reasonable time during that period after receipt of notice from the Owner or Architect, the Owner may correct it in accordance with Section 2.4.

§ 12.2.2.2 The one-year period for correction of Work shall be extended with respect to portions of Work first performed after Substantial Completion by the period of time between Substantial Completion and the actual completion of that portion of the Work.

§ 12.2.2.3 The one-year period for correction of Work shall not be extended by corrective Work performed by the Contractor pursuant to this Section 12.2.

§ 12.2.3 The Contractor shall remove from the site portions of the Work that are not in accordance with the requirements of the Contract Documents and are neither corrected by the Contractor nor accepted by the Owner.

§ 12.2.4 The Contractor shall bear the cost of correcting destroyed or damaged construction, whether completed or partially completed, of the Owner or separate contractors caused by the Contractor's correction or removal of Work that is not in accordance with the requirements of the Contract Documents.

§ 12.2.5 Nothing contained in this Section 12.2 shall be construed to establish a period of limitation with respect to other obligations the Contractor has under the Contract Documents. Establishment of the one-year period for correction of Work as described in Section 12.2.2 relates only to the specific obligation of the Contractor to correct the Work, and has no relationship to the time within which the obligation to comply with the Contract Documents may be sought to be enforced, nor to the time within which proceedings may be commenced to establish the Contractor's liability with respect to the Contractor's obligations other than specifically to correct the Work.

§ 12.3 Acceptance of Nonconforming Work

If the Owner prefers to accept Work that is not in accordance with the requirements of the Contract Documents, the Owner may do so instead of requiring its removal and correction, in which case the Contract Sum will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

ARTICLE 13 MISCELLANEOUS PROVISIONS

§ 13.1 Governing Law

The Contract shall be governed by the law of the place where the Project is located except that, if the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 15.4.

§ 13.2 Successors and Assigns

§ 13.2.1 The Owner and Contractor respectively bind themselves, their partners, successors, assigns and legal representatives to covenants, agreements and obligations contained in the Contract Documents. Except as provided in Section 13.2.2, neither party to the Contract shall assign the Contract as a whole without written consent of the other. If

To report copyright violations, e-mail copyright@aia.org.

either party attempts to make such an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

§ 13.2.2 The Owner may, without consent of the Contractor, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Contractor shall execute all consents reasonably required to facilitate such assignment.

§ 13.3 Written Notice

Written notice shall be deemed to have been duly served if delivered in person to the individual, to a member of the firm or entity, or to an officer of the corporation for which it was intended; or if delivered at, or sent by registered or certified mail or by courier service providing proof of delivery to, the last business address known to the party giving notice.

§ 13.4 Rights and Remedies

§ 13.4.1 Duties and obligations imposed by the Contract Documents and rights and remedies available thereunder shall be in addition to and not a limitation of duties, obligations, rights and remedies otherwise imposed or available by law.

§ 13.4.2 No action or failure to act by the Owner, Architect or Contractor shall constitute a waiver of a right or duty afforded them under the Contract, nor shall such action or failure to act constitute approval of or acquiescence in a breach there under, except as may be specifically agreed in writing.

§ 13.5 Tests and Inspections

§ 13.5.1 Tests, inspections and approvals of portions of the Work shall be made as required by the Contract Documents and by applicable laws, statutes, ordinances, codes, rules and regulations or lawful orders of public authorities. Unless otherwise provided, the Contractor shall make arrangements for such tests, inspections and approvals with an independent testing laboratory or entity acceptable to the Owner, or with the appropriate public authority, and shall bear all related costs of tests, inspections and approvals. The Contractor shall give the Architect timely notice of when and where tests and inspections are to be made so that the Architect may be present for such procedures. The Owner shall bear costs of (1) tests, inspections or approvals that do not become requirements until after bids are received or negotiations concluded, and (2) tests, inspections or approvals where building codes or applicable laws or regulations prohibit the Owner from delegating their cost to the Contractor.

§ 13.5.2 If the Architect, Owner or public authorities having jurisdiction determine that portions of the Work require additional testing, inspection or approval not included under Section 13.5.1, the Architect will, upon written authorization from the Owner, instruct the Contractor to make arrangements for such additional testing, inspection or approval by an entity acceptable to the Owner, and the Contractor shall give timely notice to the Architect of when and where tests and inspections are to be made so that the Architect may be present for such procedures. Such costs, except as provided in Section 13.5.3, shall be at the Owner's expense.

§ 13.5.3 If such procedures for testing, inspection or approval under Sections 13.5.1 and 13.5.2 reveal failure of the portions of the Work to comply with requirements established by the Contract Documents, all costs made necessary by such failure including those of repeated procedures and compensation for the Architect's services and expenses shall be at the Contractor's expense.

§ 13.5.4 Required certificates of testing, inspection or approval shall, unless otherwise required by the Contract Documents, be secured by the Contractor and promptly delivered to the Architect.

§ 13.5.5 If the Architect is to observe tests, inspections or approvals required by the Contract Documents, the Architect will do so promptly and, where practicable, at the normal place of testing.

§ 13.5.6 Tests or inspections conducted pursuant to the Contract Documents shall be made promptly to avoid unreasonable delay in the Work.

§ 13.6 Interest

Payments due and unpaid under the Contract Documents shall bear interest from the date payment is due at such rate as the parties may agree upon in writing or, in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.

§ 13.7 Time Limits on Claims

The Owner and Contractor shall commence all claims and causes of action, whether in contract, tort, breach of warranty or otherwise, against the other arising out of or related to the Contract in accordance with the requirements of the final dispute resolution method selected in the Agreement within the time period specified by applicable law, but in any case not more than 10 years after the date of Substantial Completion of the Work. The Owner and Contractor waive all claims and causes of action not commenced in accordance with this Section 13.7.

ARTICLE 14 TERMINATION OR SUSPENSION OF THE CONTRACT

§ 14.1 Termination by the Contractor

§ 14.1.1 The Contractor may terminate the Contract if the Work is stopped for a period of 30 consecutive days through no act or fault of the Contractor or a Subcontractor, Sub-subcontractor or their agents or employees or any other persons or entities performing portions of the Work under direct or indirect contract with the Contractor, for any of the following reasons:

.1 Issuance of an order of a court or other public authority having jurisdiction that requires all Work to be stopped;

.2 An act of government, such as a declaration of national emergency that requires all Work to be stopped;

.3 Because the Architect has not issued a Certificate for Payment and has not notified the Contractor of the reason for withholding certification as provided in Section 9.4.1, or because the Owner has not made payment on a Certificate for Payment within the time stated in the Contract Documents; or

.4 The Owner has failed to furnish to the Contractor promptly, upon the Contractor's request, reasonable evidence as required by Section 2.2.1.

§ 14.1.2 The Contractor may terminate the Contract if, through no act or fault of the Contractor or a Subcontractor, Sub-subcontractor or their agents or employees or any other persons or entities performing portions of the Work under direct or indirect contract with the Contractor, repeated suspensions, delays or interruptions of the entire Work by the Owner as described in Section 14.3 constitute in the aggregate more than 100 percent of the total number of days scheduled for completion, or 120 days in any 365-day period, whichever is less.

§ 14.1.3 If one of the reasons described in Section 14.1.1 or 14.1.2 exists, the Contractor may, upon seven days' written notice to the Owner and Architect, terminate the Contract and recover from the Owner payment for Work executed, including reasonable overhead and profit, costs incurred by reason of such termination, and damages.

§ 14.1.4 If the Work is stopped for a period of 60 consecutive days through no act or fault of the Contractor or a Subcontractor or their agents or employees or any other persons performing portions of the Work under contract with the Contractor because the Owner has repeatedly failed to fulfill the Owner's obligations under the Contract Documents with respect to matters important to the progress of the Work, the Contractor may, upon seven additional days' written notice to the Owner and the Architect, terminate the Contract and recover from the Owner as provided in Section 14.1.3.

§ 14.2 Termination by the Owner for Cause

§ 14.2.1 The Owner may terminate the Contract if the Contractor

.1 repeatedly refuses or fails to supply enough properly skilled workers or proper materials;

.2 fails to make payment to Subcontractors for materials or labor in accordance with the respective agreements between the Contractor and the Subcontractors;

.3 repeatedly disregards applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of a public authority; or

.4 otherwise is guilty of substantial breach of a provision of the Contract Documents.

§ 14.2.2 When any of the above reasons exist, the Owner, upon certification by the Initial Decision Maker that sufficient cause exists to justify such action, may without prejudice to any other rights or remedies of the Owner and after giving the Contractor and the Contractor's surety, if any, seven days' written notice, terminate employment of the Contractor and may, subject to any prior rights of the surety:

.1 Exclude the Contractor from the site and take possession of all materials, equipment, tools, and construction equipment and machinery thereon owned by the Contractor;

.2 Accept assignment of subcontracts pursuant to Section 5.4; and

.3 Finish the Work by whatever reasonable method the Owner may deem expedient. Upon written request of the Contractor, the Owner shall furnish to the Contractor a detailed accounting of the costs incurred by the Owner in finishing the Work.

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. To report copyright violations, e-mail copyright@aia.org.

§ 14.2.3 When the Owner terminates the Contract for one of the reasons stated in Section 14.2.1, the Contractor shall not be entitled to receive further payment until the Work is finished.

§ 14.2.4 If the unpaid balance of the Contract Sum exceeds costs of finishing the Work, including compensation for the Architect's services and expenses made necessary thereby, and other damages incurred by the Owner and not expressly waived, such excess shall be paid to the Contractor. If such costs and damages exceed the unpaid balance, the Contractor shall pay the difference to the Owner. The amount to be paid to the Contractor or Owner, as the case may be, shall be certified by the Initial Decision Maker, upon application, and this obligation for payment shall survive termination of the Contract.

§ 14.3 Suspension by the Owner for Convenience

§ 14.3.1 The Owner may, without cause, order the Contractor in writing to suspend, delay or interrupt the Work in whole or in part for such period of time as the Owner may determine.

§ 14.3.2 The Contract Sum and Contract Time shall be adjusted for increases in the cost and time caused by suspension, delay or interruption as described in Section 14.3.1. Adjustment of the Contract Sum shall include profit. No adjustment shall be made to the extent

- **.1** that performance is, was or would have been so suspended, delayed or interrupted by another cause for which the Contractor is responsible; or
- **.2** that an equitable adjustment is made or denied under another provision of the Contract.

§ 14.4 Termination by the Owner for Convenience

§ 14.4.1 The Owner may, at any time, terminate the Contract for the Owner's convenience and without cause.

§ 14.4.2 Upon receipt of written notice from the Owner of such termination for the Owner's convenience, the Contractor shall

- **.1** cease operations as directed by the Owner in the notice;
- **.2** take actions necessary, or that the Owner may direct, for the protection and preservation of the Work; and
- **.3** except for Work directed to be performed prior to the effective date of termination stated in the notice, terminate all existing subcontracts and purchase orders and enter into no further subcontracts and purchase orders.

§ 14.4.3 In case of such termination for the Owner's convenience, the Contractor shall be entitled to receive payment for Work executed, and costs incurred by reason of such termination, along with reasonable overhead and profit on the Work not executed.

ARTICLE 15 CLAIMS AND DISPUTES

§ 15.1 Claims

§ 15.1.1 Definition

A Claim is a demand or assertion by one of the parties seeking, as a matter of right, payment of money, or other relief with respect to the terms of the Contract. The term "Claim" also includes other disputes and matters in question between the Owner and Contractor arising out of or relating to the Contract. The responsibility to substantiate Claims shall rest with the party making the Claim.

§ 15.1.2 Notice of Claims

Claims by either the Owner or Contractor must be initiated by written notice to the other party and to the Initial Decision Maker with a copy sent to the Architect, if the Architect is not serving as the Initial Decision Maker. Claims by either party must be initiated within 21 days after occurrence of the event giving rise to such Claim or within 21 days after the claimant first recognizes the condition giving rise to the Claim, whichever is later.

§ 15.1.3 Continuing Contract Performance

Pending final resolution of a Claim, except as otherwise agreed in writing or as provided in Section 9.7 and Article 14, the Contractor shall proceed diligently with performance of the Contract and the Owner shall continue to make payments in accordance with the Contract Documents. The Architect will prepare Change Orders and issue Certificates for Payment in accordance with the decisions of the Initial Decision Maker.

To report copyright violations, e-mail copyright@aia.org.

§ 15.1.4 Claims for Additional Cost

If the Contractor wishes to make a Claim for an increase in the Contract Sum, written notice as provided herein shall be given before proceeding to execute the Work. Prior notice is not required for Claims relating to an emergency endangering life or property arising under Section 10.4.

§ 15.1.5 Claims for Additional Time

§ 15.1.5.1 If the Contractor wishes to make a Claim for an increase in the Contract Time, written notice as provided herein shall be given. The Contractor's Claim shall include an estimate of cost and of probable effect of delay on progress of the Work. In the case of a continuing delay, only one Claim is necessary.

§ 15.1.5.2 If adverse weather conditions are the basis for a Claim for additional time, such Claim shall be documented by data substantiating that weather conditions were abnormal for the period of time, could not have been reasonably anticipated and had an adverse effect on the scheduled construction.

§ 15.1.6 Claims for Consequential Damages

The Contractor and Owner waive Claims against each other for consequential damages arising out of or relating to this Contract. This mutual waiver includes

.1 damages incurred by the Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons;

.2 damages incurred by the Contractor for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, and for loss of profit except anticipated profit arising directly from the Work; and

.3 damages resulting from failure of the Project to achieve the Sustainable Objective or one or more of the Sustainable Measures including unachieved energy savings, unintended operational expenses, lost financial or tax incentives, or unachieved gains in worker productivity.

This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination in accordance with Article 14. Nothing contained in this Section 15.1.6 shall be deemed to preclude an award of liquidated damages, when applicable, in accordance with the requirements of the Contract Documents.

§ 15.2 Initial Decision

§ 15.2.1 Claims, excluding those arising under Sections 10.3, 10.4, 11.3.9, and 11.3.10, shall be referred to the Initial Decision Maker for initial decision. The Architect will serve as the Initial Decision Maker, unless otherwise indicated in the Agreement. Except for those Claims excluded by this Section 15.2.1, an initial decision shall be required as a condition precedent to mediation of any Claim arising prior to the date final payment is due, unless 30 days have passed after the Claim has been referred to the Initial Decision Maker with no decision having been rendered. Unless the Initial Decision Maker and all affected parties agree, the Initial Decision Maker will not decide disputes between the Contractor and persons or entities other than the Owner.

§ 15.2.2 The Initial Decision Maker will review Claims and within ten days of the receipt of a Claim take one or more of the following actions: (1) request additional supporting data from the claimant or a response with supporting data from the other party, (2) reject the Claim in whole or in part, (3) approve the Claim, (4) suggest a compromise, or (5) advise the parties that the Initial Decision Maker is unable to resolve the Claim if the Initial Decision Maker lacks sufficient information to evaluate the merits of the Claim or if the Initial Decision Maker concludes that, in the Initial Decision Maker's sole discretion, it would be inappropriate for the Initial Decision Maker to resolve the Claim.

§ 15.2.3 In evaluating Claims, the Initial Decision Maker may, but shall not be obligated to, consult with or seek information from either party or from persons with special knowledge or expertise who may assist the Initial Decision Maker in rendering a decision. The Initial Decision Maker may request the Owner to authorize retention of such persons at the Owner's expense.

§ 15.2.4 If the Initial Decision Maker requests a party to provide a response to a Claim or to furnish additional supporting data, such party shall respond, within ten days after receipt of such request, and shall either (1) provide a response on the requested supporting data, (2) advise the Initial Decision Maker when the response or supporting data will be furnished or (3) advise the Initial Decision Maker that no supporting data will be furnished. Upon receipt of the response or supporting data, if any, the Initial Decision Maker will either reject or approve the Claim in whole or in part.

This document was created on 03/08/2021 12:05:59 under the terms of AIA Documents on Demand® Order No. 2010675659 , is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Documents-on-Demand – End User License Agreement. To report copyright violations, e-mail copyright@aia.org.

§ 15.2.5 The Initial Decision Maker will render an initial decision approving or rejecting the Claim, or indicating that the Initial Decision Maker is unable to resolve the Claim. This initial decision shall (1) be in writing; (2) state the reasons therefor; and (3) notify the parties and the Architect, if the Architect is not serving as the Initial Decision Maker, of any change in the Contract Sum or Contract Time or both. The initial decision shall be final and binding on the parties but subject to mediation and, if the parties fail to resolve their dispute through mediation, to binding dispute resolution.

§ 15.2.6 Either party may file for mediation of an initial decision at any time, subject to the terms of Section 15.2.6.1.

§ 15.2.6.1 Either party may, within 30 days from the date of an initial decision, demand in writing that the other party file for mediation within 60 days of the initial decision. If such a demand is made and the party receiving the demand fails to file for mediation within the time required, then both parties waive their rights to mediate or pursue binding dispute resolution proceedings with respect to the initial decision.

§ 15.2.7 In the event of a Claim against the Contractor, the Owner may, but is not obligated to, notify the surety, if any, of the nature and amount of the Claim. If the Claim relates to a possibility of a Contractor's default, the Owner may, but is not obligated to, notify the surety and request the surety's assistance in resolving the controversy.

§ 15.2.8 If a Claim relates to or is the subject of a mechanic's lien, the party asserting such Claim may proceed in accordance with applicable law to comply with the lien notice or filing deadlines.

§ 15.3 Mediation

§ 15.3.1 Claims, disputes, or other matters in controversy arising out of or related to the Contract except those waived as provided for in Sections 9.10.4, 9.10.5, and 15.1.6 shall be subject to mediation as a condition precedent to binding dispute resolution.

§ 15.3.2 The parties shall endeavor to resolve their Claims by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration is stayed pursuant to this Section 15.3.2, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.

§ 15.3.3 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 15.4 Arbitration

§ 15.4.1 If the parties have selected arbitration as the method for binding dispute resolution in the Agreement, any Claim subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of the Agreement. A demand for arbitration shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the arbitration. The party filing a notice of demand for arbitration must assert in the demand all Claims then known to that party on which arbitration is permitted to be demanded.

§ 15.4.1.1 A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation, but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the Claim would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the Claim.

§ 15.4.2 The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

AIA Document A201® – 2007 SP. Copyright © 2012 by The American Institute of Architects. All rights reserved. § 15.4.3 The foregoing agreement to arbitrate and other agreements to arbitrate with an additional person or entity duly consented to by parties to the Agreement shall be specifically enforceable under applicable law in any court having jurisdiction thereof.

§ 15.4.4 Consolidation or Joinder

§ 15.4.4.1 Either party, at its sole discretion, may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation, (2) the arbitrations to be consolidated substantially involve common questions of law or fact, and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).

§ 15.4.4.2 Either party, at its sole discretion, may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an additional person or entity shall not constitute consent to arbitration of any claim, dispute or other matter in question not described in the written consent.

§ 15.4.4.3 The Owner and Contractor grant to any person or entity made a party to an arbitration conducted under this Section 15.4, whether by joinder or consolidation, the same rights of joinder and consolidation as the Owner and Contractor under this Agreement.

SUPPLEMENTARY CONDITIONS

Amending the General Conditions of the Contract for Construction
AIA Document A201 (2007 **SP** edition)

I. SUPPLEMENTARY CONDITIONS

The following addendum supplements, modifies, deletes and/or adds to the General Conditions. Where any Article, Paragraph or subparagraph in the General Conditions is supplemented by one of the following paragraphs, the provisions of such Article, Paragraph, or Subparagraph shall remain in effect and the supplemental provisions shall be considered as added thereto. Where any Article, Paragraph, or subparagraph in the General Conditions is amended, voided or superseded by any of the following paragraphs, the provisions of such Article, Paragraph or subparagraph not so amended, voided, or superseded shall remain in effect.

II. MODIFICATIONS TO VARIOUS ARTICLES OF THE AIA CONDITIONS

ARTICLE 1 GENERAL PROVISIONS

1.1.1 In the first sentence, delete "are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and" after "The Contract Documents".

Insert "between the Owner and Contractor (hereinafter the Agreement)" after "consist of the Agreement".

In the last sentence:

Delete "Unless specifically enumerated in the Agreement".

Delete "not" after "Contract Documents do".

Delete "other" after "sample forms,".

Delete "or" after "or proposal," and insert "and".

Delete "bidding requirements" after "relating to" and insert "those documents."

1.1.2 Add to the end of the sub-section:

The Contractor understands that the Architect's obligations under its agreement with the Owner are solely for the benefit of the Owner, and that in performing such obligations the Architect may consequently increase the burdens and expense of the Contractor, Subcontractors or material suppliers.

1.1.8 Delete "Claims" and insert "claims".

Delete "and certify termination of the Agreement under Section 14.2.2.".

1.1.9.1 Add to the end of the sub-section:

Refer to SECTION 018113-SUSTAINABLE DESIGN REQUIREMENTS in the Specifications for additional information and requirements.

1.2.1 Add to the end of the sub-section:

All Work mentioned or indicated in the Contract Documents shall be performed by the Contractor as part of this Contract unless it is specifically indicated in the Contract Documents that such Work is to be done by others. Should the Drawings or the Specifications disagree in themselves or with each other, the Contractor shall provide the better quality or greater quantity of Work unless otherwise directed by written addendum to the Contract.

1.2.1.1 Add new sub-section 1.2.1.1 as follows:

All work mentioned or indicated in the Contract Documents shall be performed by the Contractor as part of this Contract unless it is specifically indicated in the Contract Documents that such Work is to be done by others. In the event of any conflict, discrepancy or ambiguity among the Contract Documents, the documents shall be construed according to the following priorities:

Highest Priority: Modifications – later date to take precedence

Second Priority: Agreement

Third Priority: Addenda – later date to take precedence

Fourth Priority: General Conditions

Fifth Priority: General Requirements – Division 1

Sixth Priority: Drawings and Specifications

Among Drawings, large scale details shall control over small scale details, and figured dimensions shall control over Drawings not dimensioned. In the event of conflicts, discrepancies or ambiguities between the Drawings and the Specifications, or within either the Drawings or the Specifications, the Contractor shall provide the better quality or greater quantity of Work, or comply with the more stringent requirement, as applicable, unless otherwise directed by a Modification.

1.2.2 Add to the end of the sentence:

, except that the performance of filed sub-trade work shall comply with the provisions of chapter 149 of the General Laws of the Commonwealth of Massachusetts. The Contractor and all Subcontractors shall refer to all of the Drawings, including those showing primarily the Work of the mechanical, electrical and other specialized trades, and to all of the Sections of the Specifications, and shall perform all Work reasonably inferable therefrom as being necessary to produce the indicated results.

1.2.4 Add the following new sub-sections 1.2.4 to 1.2.12 as follows:
-1.2.12

§ 1.2.4 All indications or notations which apply to one of a number of similar situations, materials or processes shall be deemed to apply to all such situations, materials or processes wherever they appear in the Work, except where a contrary result is clearly indicated by the Contract Documents.

§ 1.2.5 Where codes, standards, requirements and publications of public and private bodies are referred to in the Specifications, references shall be understood to be to the latest revision prior to the date of receiving bids, except where otherwise indicated.

§ 1.2.6 Where no explicit quality or standards for materials or workmanship are established for Work, such Work is to be of good quality for the intended use and consistent with the quality of the surrounding Work and of the construction of the Project generally.

§ 1.2.7 All manufactured articles, materials, and equipment shall be applied, installed, connected, erected, used, cleaned, and conditioned in accordance with the manufacturer's written or printed directions and instructions unless otherwise indicated in the Contract Documents.

§ 1.2.8 The Mechanical, Electrical and Fire Protection Drawings are diagrammatic only, and are not intended to show the alignment, physical locations or configurations of such Work. Such Work shall be installed without additional cost to the Owner to clear all obstructions, permit proper clearances for the Work of other trades, and present an orderly appearance where exposed. Prior to beginning such Work, the Contractor shall prepare coordination drawings showing the exact alignment, physical location and configuration of the Mechanical, Electrical and Fire Protection installations and demonstrating to the Contractor's satisfaction that the installations will comply with the preceding sentence. A copy of the drawings shall be submitted to the Architect, and the Contractor shall revise and resubmit the drawings if so directed by the Architect.

§ 1.2.9 Exact locations of fixtures and outlets shall be obtained from the Architect as provided in subparagraph 3.2.5 before the Work is roughed in; Work installed without such information from the Architect shall be relocated at the Contractor's expense.

§ 1.2.10 Test boring or soil test information included with the Contract Documents or otherwise made available to the Contractor was obtained by the Owner for use by the Architects in the design of the Project or Work. The Owner does not hold out such information to the Contractor as a completely accurate indication of subsurface conditions, and no claim for extra cost or extension of time resulting from a reliance by the Contractor on such information shall be allowed except as provided in subparagraph 3.7.4.

§ 1.2.11 Where the Work is to fit with existing conditions or work to be performed by others, the Contractor shall fully and completely join the Work with such conditions or work, unless otherwise specified. Owner provided drawings showing existing conditions or construction are based on available documents and are not guaranteed to show actual existing conditions.

§ 1.2.12 The Contract is subject to, and shall be performed in accordance with, all laws, statutes, regulations, codes, ordinances, rules and orders of the United States of America, the Commonwealth of Massachusetts, the City of Amesbury, and other governmental or public agencies and authorities, and all amendments thereto, (collectively, “laws and regulations”) and any agreements between the Owner and any such governmental or public agencies and authorities, and other agreements or commitments, if any, referred to or incorporated in the Contract Documents, and where any provisions contained in the Contract Documents do not conform to or are inconsistent with such laws and regulations or agreements to which the Contract is subject or by which it is governed, such laws and regulations or agreements shall have precedence over any matters set forth in the Contract Documents.

1.5.1 Delete 1.5.1 and replace as follows:

§ 1.5.1 All Drawings, Specifications and copies thereof furnished by the Owner are and shall remain the Owner's property. They are to be used only with respect to this Project and are not to be used on any other project without the prior written consent of the Owner. With the exception of one contract set for each party to the Contract, such documents are to be returned or suitably accounted for to the Owner at the completion of the Work. Submission or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of any reserved rights.

ARTICLE 2 OWNER

2.1.2 Delete sub-section 2.1.2.

2.2.1 Delete the last three sentences.

2.2.3 In the first sentence insert “available” after “shall furnish”.

Delete the last sentence and replace as follows:

The Owner makes no warranty as to the accuracy or completeness of such information, and the Contractor shall exercise proper precautions relating to the safe performance of the Work.

2.2.4 Delete the last sentence.

2.2.5 Add to the end of the sub-section as follows:

All additional copies will be furnished upon request at the cost of reproduction.

2.3 Delete from the last sentence “, except to the extent required by Section 6.1.3” and add as follows:

The Contractor shall resume the Work after such stoppage promptly upon written notice to do so from the Owner. The Contractor shall remain responsible for maintaining the progress of the Work and shall not be entitled to any increase in the Contract Sum or Contract Time. The Contractor shall be responsible for all costs incurred by the Owner attributable to such an order to stop the Work.

2.4 In the second sentence:

Delete “Change Order” and replace with “Construction Change Directive”.

Insert “and Owner’s Project Manager’s” after “for the Architect’s”.

Delete the third sentence.

Add to the end of the section as follows:

The rights of the Owner hereunder are in addition to any other rights set forth in the Contract Documents or available at law or in equity.

2.5 Add new sub-section as follows:

§ 2.5 Commissioning
§ 2.5.1 The Owner may, through an independent commissioning agent, perform tests / inspections of building systems to validate the proper installation and performance of the Work. Refer to SECTION 019113-BUILDING COMMISSIONING REQUIREMENTS in the Specifications for additional information and requirements.

ARTICLE 3 CONTRACTOR

3.2.1 Delete “generally” after “the site, become”.

Add to the end of the sub-section as follows:

The Contractor shall not be entitled to any change in the Contract Time or Contract Sum on account of its failure, or that of any Subcontractor, to comply with the foregoing requirements.

3.2.2 Delete the beginning of the second sentence as follows:

These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however,

Delete the last sentence and replace as follows:

If the Contractor performs any construction activity that it knows or should know involves a recognized error, inconsistency or omission in the Contract Documents without such notice to the Architect, the Contractor shall assume appropriate responsibility for such performance and shall bear responsibility for the costs of any required correction.

3.2.3 Delete "not" after "Contractor is".

Delete ", but" after "public authorities" and create new sentence beginning with "The Contractor shall promptly".

3.2.4 Delete "claims" after "the Contractor shall make" and insert "a claim".

Delete the last sentence.

3.2.5 Add new sub-sections 3.2.5 to 3.2.7 as follows:
-3.2.7

§ 3.2.5 Any claim by the Contractor or Subcontractors that, in submitting their respective bids, they did not include all items as shown in the Contract Documents will be given no consideration for an adjustment of any kind. If any item is specified in a Section which would not normally furnish this item it shall be the responsibility of the Contractor to coordinate the situation with the Subcontractor, and if the item under consideration is not to be provided by the Subcontractor it shall be the responsibility of the Contractor to provide the work in question, without any additional cost to the Owner.

§ 3.2.6 The Contractor shall give the Architect timely notice of any additional Drawings, Specifications, or instructions required to define the Work in greater detail, or to permit the proper progress of the Work.

§ 3.2.7 The Contractor shall not proceed with any Work not clearly and consistently defined in detail in the Contract Documents, but shall request additional drawings or instructions from the Architect as provided in Sub-section 3.2.3. If the Contractor proceeds with such Work without obtaining further Drawings, Specifications or instructions, the Contractor shall correct Work incorrectly done at the Contractor's own expense.

3.3.1 Add to the end of the first sentence as follows:

which shall not be less than such state of skill and attention generally rendered by the contracting profession for projects similar to the Project in scope, difficulty and location. The Contractor shall adequately staff the Project to properly and thoroughly manage, schedule and supervise all construction activities.

Delete the last sentence.

3.3.2 Add the last sentence as follows:

This obligation shall also extend to the presence on the Site of suppliers of materials or equipment, their employees, contractors, and agents engaged in the Work.

3.3.4 Add new sub-sections 3.3.4 to 3.3.5 as follows:
-3.3.5

§ 3.3.4 The Contractor shall arrange for and attend job meetings with the Architect and such other persons as the Owner or the Architect may from time to time wish to have present. Job meetings shall be held at the site unless otherwise agreed by all parties and the schedule for job meetings shall be subject to the Owner's approval. If requested by the Owner, the Contractor shall prepare and circulate minutes of job meetings in a form acceptable to the Owner (or, at the Owner's election, meeting minutes will be prepared by the Architect or OPM). The Contractor shall be represented at such meetings by a principal, project manager, general superintendent or other authorized main office representative, as well as by the Contractor's own project superintendent. An authorized representative of any Subcontractor or Sub-subcontractor shall attend such meetings if requested by the Owner or the Architect or OPM. See sub-section 5.3.2.

§ 3.3.5 The Contractor shall be responsible for properly laying out the Work, and for all lines, elevations and measurements for all of the Work subject, however, to the Owner's obligations under Sub-section 2.2.3. Without limitation, the Contractor shall establish the building grades, lines, levels, column, wall and partition lines required by the various Subcontractors in laying out their Work. The Contractor shall verify the figures shown on the Drawings before laying out the Work and will be responsible for any errors or inaccuracies resulting from its failure to do so. If the Contractor, while laying out the Work, becomes aware of any conflicts between the Drawings or Specifications and the actual layout of the Work, or any conflicts or inconsistencies in the Drawings and Specifications themselves, the Contractor shall promptly notify the Architect and the Owner, without whose instructions the Contractor shall not adjust the matter except at its own risk.

3.4.1 Add to the last sentence as follows:

The word "provide" shall mean furnish and install complete, including connections, unless otherwise specified. The Contractor shall furnish labor that can and will work in harmony with all other elements of labor employed or to be employed on the Project. The Contractor warrants that its financial condition is sound and that the Contractor is capable of obtaining any bonds or increase in bond amounts now or hereafter required pursuant to the Contract Documents. The Contractor shall promptly advise the Owner of any occurrence, event, fact, or other matter that has had, will have, or might reasonably be predicted to have a material adverse effect upon the financial condition of the Contractor or its ability to properly perform the Contract. Directions, specifications and recommendations by manufacturers for installation, handling, sorting, adjustment and operation of their materials or equipment shall be complied with; but the Contractor shall nonetheless have the responsibility of determining whether such directions, specifications and recommendations may safely and suitable by employed in the Work, and of notifying the Owner in advance, in writing, of any deviation or modification necessary for installation safety or proper operation of the item.

3.4.3 Add to the end of the second sentence as follows:

, and the Contractor shall ensure that all workers to be employed on the Project have successfully completed a course in construction safety and health approved by the United States Occupational Safety and Health Administration (OSHA) of at least 10 hours. The Contractor shall be responsible for maintaining all safety precautions at and around the Project site. On the Owner's request, the Contractor shall permanently remove from the Project site any employee of the Contractor or any Subcontractor who fails to comply with the requirements of the Contract Documents or whose presence or behavior is deemed by the Owner to be adverse to the success of the Project or the Owner's interests.

3.4.3.1 Add new sub-section 3.4.3.1 as follows:

§ 3.4.3.1 CORI Reporting: In accordance with G.L. c71m Section 38R, criminal offender record information ("CORI"), including the taking of fingerprints, from the Massachusetts Criminal History Systems Board, relating to any worker who is scheduled to work in or about areas of the School occupied by students. The Contractor and Subcontractors shall cooperate fully and immediately with a request from the Owner or OPM to identify the workers who may be placed in a position where they may have direct and unmonitored contact with the students. The Contractor and its subcontractors shall notify the OPM at least two weeks before any workers may be working in areas of the School property of an occupied school by the students and will provide a listing of the workers who they anticipate will be working in those areas. The Owner reserves the right to stop work if there has been a failure to comply with this paragraph, in which event the Contractor and Subcontractors shall have no claim for damages, delays or time extensions against the Owner. Refer to SECTION 011000-SUMMARY OF WORK of the Specifications for additional information and requirements.

3.4.4 Add new sub-sections 3.4.4 to 3.4.11 as follows:
-3.4.11

§ 3.4.4 No laborer, worker, mechanic, foreman or inspector working within this Commonwealth in the employ of the Contractor, Subcontractor or other person doing or contracting to do the whole or part of the work contemplated by the contract, shall be required or permitted to work more than eight hours in any one day or more than forty-eight hours in any one week, or more than six days in any one week, except in cases of emergency.

§ 3.4.5 Every employee under this contract shall lodge, board and trade where and with whom he elects, and neither the Contractor nor his agents or employees shall, either directly or indirectly, require as a condition of the employment of any person that the employee shall lodge, board or trade at a particular place or with a particular person.

§ 3.4.6 The Contractor shall pay to any reserve police officer employed by him in any city or town the prevailing rate of wage paid to regular police officers in such city or town.

§ 3.4.7 It is the obligation of the Contractor to assure that the Contractor and all of its subcontractors comply with the requirements of the Massachusetts Prevailing Wage Law, MGL c. 149 §26-27H. The Contractor shall be responsible for all loss, cost and damage suffered or incurred by the Owner as a result of any stop work order or other enforcement action taken by the Attorney General under the authority of MGL c.149 §27, and shall release, indemnify, hold harmless and defend the Owner, the Architect, their officers, employees and consultants, from and against all claims, actions, suits, fines, or administrative proceedings arising out of or related to the violation by the Contractor or any subcontractor of the said Prevailing Wage Law (or, in the case of the Contractor's defense obligation, the claimed violation thereof). Unless otherwise expressly provided in the Contract Documents, all payroll records required to be submitted to the Owner shall be delivered to a designated employee of the Owner, and not to the Architect.

§ 3.4.8 The Contractor is solely responsible for the proper and safe operation and maintenance of all utility systems within the construction limits, whether these are supplied by the Owner's distribution system or otherwise, until the Work is accepted by the Owner, and until the Owner has notified the Contractor that other arrangements have been made. The Contractor shall maintain and operate appurtenances within the construction area, which serve the distribution system, subject to periodic inspection by the Owner's operating personnel. Inspection by any representative or personnel of the Owner shall not relieve the Contractor or responsibilities in connection with operation and maintenance of these facilities and equipment. The Contractor shall notify the Owner's representatives at least 72 hours in advance of the desire to extend, connect, disconnect, turn on or off any mechanical, electric, water or other service from the authorized representatives of the Owner. All plumbing, heating, and electrical work, including installation of equipment and any other work to be performed by the Contractor, shall be carried out without interference with the Owner's normal operation. Where any work requires interruption of any service, the Contractor shall make advance arrangements with the Owner for dealing with such interruption.

§ 3.4.9 The Contractor shall furnish and pay for all water and electricity required to complete the installation of the Work. Refer to SECTION 015000-TEMPORARY FACILITIES AND CONTROLS in the Specifications for additional information and requirements.

§ 3.4.10 (NOT USED)

§ 3.4.11 The Contractor shall be responsible for materials which are removed from the Work or from the site, including the Owner's property, which are to be built back into the Work at a later time. The costs of damage to or loss of such materials while removed from the Work or the Owner's property shall be borne by the Contractor.

3.5 Add to the end of the first sentence as follows:

and, promptly after written notification of non-conformance, shall be repaired or replaced by the Contractor with Work conforming to such requirements.

Delete the second to last sentence.

3.5.2 -3.5.8 **Renumber sub-section 3.5.2 beginning "The Contractor shall perform the Sustainable Measures…" to 3.5.11, and add new sub-sections 3.5.2 to 3.5.10 as follows:**

§ 3.5.2 The Contractor shall be responsible for determining that all materials furnished for the Work meet all requirements of the Contract Documents. The Architect may require the Contractor to produce reasonable evidence that a material meets such requirements, such as certified reports of past tests by qualified testing laboratories, reports of studies by qualified experts, or other evidence which, in the opinion of the Architect, would lead to a reasonable certainty that any material used, or proposed to be used, in the Work meets the requirements of the Contract Documents. All such data shall be furnished at the Contractor's expense. This provision shall not require the Contractor to pay for periodic testing of different batches of the same material, unless such testing is specifically required by the Contract Documents to be performed at the Contractor's expense.

§ 3.5.3 If the Contractor proposes to use a material which, while suitable for the intended use, deviates in any way from the detailed requirements of the Contract Documents, the Contractor shall inform the Architect in writing of the nature of such deviations at the time the material is submitted for approval and request approval of the deviation.
The Architect shall judge the design and appearance of proposed substitutes, an may refuse to approve any substitute which, in the Architect's opinion, would be out of character or otherwise inconsistent with the character or quality of design of the Project. An item shall be considered equal to the item so named or described if, in the opinion of the Architect:

a. it is at least equal in quality, durability, appearance, strength and design.
b. it performs at least equally the function imposed by the general design for the work; and
c. it conforms substantially, even with deviations, to the detailed requirements for the items as indicated by the specifications.

§ 3.5.4 In informing the Architect of deviations or substitutions, the Contractor shall provide, upon request, evidence leading to a reasonable certainty that the proposed substitution or deviation will provide a quality of result at least equal to that otherwise attainable in accordance with the Contract Documents. If, in the opinion of the Architect, the evidence presented by the Contractor does not provide a sufficient basis for such reasonable certainty, the Architect may reject such substitution or deviation without further investigation.

By making requests for substitutions, the Contractor:

.1 represents that it has personally investigated the proposed substitute product and determined that it meets the conditions specified in Sub-section 3.5.4;

.2 represents that it will provide the same warranties and guarantees for the substitute product that it would for that specified;

.3 certifies that all cost data presented with respect to the proposed substitution are accurate and complete and include all related (direct and indirect) costs under the Contract, and waives all claims for additional costs related to the substitution that subsequently become apparent; and

.4 will coordinate the installation of the substitute, if approved, making such changes as may be required for the Work to be complete in all respects.

§ 3.5.5 Any additional cost, or any loss or damage arising from the substitution of any material or any method for those originally specified shall be borne by the Contractor, notwithstanding approval or acceptance of such substitution by the Owner or the Architect, unless such substitution was made at the written request or direction of the Owner or the Architect.

§ 3.5.6 The warranty provided in this paragraph 3.5 shall be in addition to and not in limitation of any other warranty required by the Contract Documents or otherwise prescribed by law.

§ 3.5.7 The Contractor shall procure and deliver to the Architect, no later than the date claimed by the Contractor as the date of Substantial Completion, all special warranties required by the Contract Documents. Delivery by the Contractor shall constitute the Contractor's guarantee to the Owner that the warranty will be performed in accordance with its terms and conditions.

§3.5.8 The Contractor shall guarantee all Work for a period of one year after Date of Substantial Completion, or by the terms of any special guarantee required by the Contract Documents. The Contractor shall, upon written notice from the Owner, promptly correct defective Work or Work not in accordance with the Contract Documents.

§ 3.5.9 The Contract Documents are intended to produce a building of consistent character and quality of design. All components of the building including visible items of mechanical and electrical equipment have been selected to have a coordinated design in relation to the overall appearance of the building. The Architect shall judge the design and appearance of proposed substitutions on the basis of their suitability in relation to the overall design of the Project, as well as for their intrinsic merits. The Architect will not approve as equal to materials or equipment specified proposed substitutions which, in the Architect's opinion, would be out of character, obtrusive, or otherwise inconsistent with the character or quality of design of the Project. In order to permit coordinated design of color and finishes the Contractor shall, if required by the Architect, furnish the substituted material in any color, finish, texture, or pattern which would have been available from the manufacturer(s) originally specified, at no additional cost to the Owner.

§ 3.5.10 No additional charge shall be made by the Contractor for attending meetings at the site to diagnose problems or to instruct the Owner's personnel in the proper operation or maintenance of the Work, or for making initial or seasonal adjustments (not including normal maintenance) of mechanical systems or other Work during the applicable warranty period. The Contractor shall provide such service promptly upon request from the Owner. In case of emergency, service shall be provided as necessary to avoid loss or damage or to maintain normal use of the premises.

3.6.1 Add new sub-section 3.6.1 as follows:

§ 3.6.1 The project is exempt from the Massachusetts Sales Tax to the extent permitted by G.L. c.64H, §6(f). The exemption number will be provided by the Awarding Authority to the Contractor.

3.7.1 Add to the end of the sub-section as follows:

Such permits and approvals shall include, without limitation, plumbing and electrical inspections, certificates of occupancy upon completion of the Work and permits for temporary occupancy or obstruction of sidewalks, streets or other public ways. Fees for local permits and inspections will be waived. The Contractor shall not use, occupy or obstruct, nor permit any Subcontractor or any other person performing the Work to use, occupy or obstruct, any lands or areas outside of the legal limits of the site, unless written permission satisfactory to the Owner has been obtained by the Contractor at the Contractor's sole cost. The Contractor shall arrange for all local policemen required to be present at or adjacent to the site for traffic control or other purposes. Refer to SECTION 011000-SUMMARY OF WORK in the Specifications for additional information and requirements.

3.7.2 Add to the end of the sub-section as follows:

If any of the Work is required to be inspected or approved by any public authority, the Contractor shall cause such inspection or approval to be performed and shall comply with any instructions or corrections ordered by the public authority.

3.7.3 Delete “knowing it” after “performs Work” and replace with “it knows or should know”.

3.7.4 Delete sub-section 3.7.4 and replace as follows:

§ 3.7.4 Concealed or Unknown Conditions. Claims for concealed or unknown conditions shall be governed by Chapter 30, Section 39N of the General Laws of the Commonwealth of Massachusetts, as amended.

3.7.5 Delete second and last sentences.

3.8 Delete section 3.8 in its entirety.

3.9.1 In the first sentence:

Insert “, in accordance with the Contract Documents,” after “shall employ”.

Insert “at all times” after “the Project site”.

3.9.4 Add new sub-sections 3.9.4 and 3.9.5 as follows:
-3.9.5

§ 3.9.4 The Contractor shall coordinate and supervise the Work performed by Subcontractors to the end that the Work is carried out without conflict between trades and so that no trade, at any time, causes delay to the general progress of the Work. The Contractor and all Subcontractors shall at all times afford each trade, any separate contractor, or the Owner, every reasonable opportunity for the installation of Work and the storage of materials.

§ 3.9.5 The Contractor shall provide the Owner and the Architect with contact information, including telephone numbers, of the Superintendent and Project Manager, by which they can be contacted at all times, including non-work hours, in the event of emergencies.

3.10.1 In the first sentence delete "promptly" after "The Contractor" and replace with "within twenty (20) days".

In the second sentence, insert "or as requested by the Architect" after "conditions of the Work and Project".

Add to the end of the sub-section as follows:

The construction schedule shall be in such form and contain such information as the Architect and Owner require. The construction schedule shall be resource loaded for the Contractor and all subcontractors, with each resource identified by name, description, unit of measure, and calendar assignment. For each class of work included in the Contractor's schedule of values, the construction schedule shall show the percentage of completion to be obtained and the total dollar value of the work to be completed as of the first of each month until Substantial Completion. All calculations shall be on the basis of work in place, but not including the value of materials delivered but not in place.

3.10.3 Add to the end of the sub-section as follows:

The Contractor's compliance with the construction schedule is a material obligation of the Contract.

3.10.4 Add new sub-sections 3.10.4, 3.10.5, and 3.10.6 as follows:
-3.10.6

§ 3.10.4 The Contractor shall monitor the progress of the Work for conformance with the requirements of the construction schedule and shall promptly advise the Owner of any delays or potential delays. The construction schedule shall be updated every month (or more frequently if requested by the Owner) to reflect actual conditions (such updates are sometimes referred to in these General Conditions as "progress reports"). In the event any progress report indicates delays in achievement of any milestone date set forth in such schedule, the Contractor shall propose in written form an affirmative plan (the "Recovery Schedule") to correct the delay, including overtime and/or additional labor, if necessary, which Recovery Schedule shall indicate the date by which the progress of the Work will comply with the construction schedule, and shall be subject to the approval of the Owner and the Architect. In no event shall any progress report or Recovery Schedule constitute an adjustment in the construction schedule, Contract Time or any milestone date unless any such adjustment is agreed to by the Owner and authorized pursuant to a Change Order.

§ 3.10.5 In the event (i) that the performance of the Work, as of a milestone date, has not progressed or reached the level of completion required by the construction schedule, and (ii) the progress of the Work is not brought back into compliance with the construction schedule on the date proposed by the Recovery Schedule, or the Contractor otherwise fails to comply with the Recovery Schedule, the Owner shall have the right to order the Contractor to take corrective measures to expedite the progress of the Work, including, without limitation, (1) supplying additional manpower, equipment, and facilities, (2) working additional shifts or overtime, (3) working additional days, and (4) other similar measures (hereinafter referred to collectively as "Corrective Measures"). Such Corrective Measures shall continue until the progress of the Work complies with the stage of completion required by the Contract Documents.

§ 3.10.6 The Contractor shall not be entitled to an adjustment in the Contract Sum in connection with Corrective Measures required by the Owner under or pursuant to Section 3.10.5. The Owner may exercise the rights furnished the Owner under or pursuant to Section 3.10.5 as frequently as reasonably necessary to ensure that the Contractor's performance of the Work complies with the milestone dates set forth in the construction schedule.

3.11.1 Add to the end of the sub-section as follows:

Without limitation, the Contractor shall keep at the site at all times a separate and complete set of blackline prints of the Drawings and Specifications on which shall be noted neatly, accurately and currently, as the Work progresses and in no event less often than monthly: (a) the progress of the Work installed by coloring in all pipe lines, ducts and other apparatus as constructed or installed, and (b) all revisions to the Work, including but not limited to plumbing, fire protection, electrical, HVAC and architectural work, wherever such Work was installed other than as shown on the Drawings or as described in the Specifications (with approval as required pursuant to the Contract Documents). The Contractor shall be responsible for assuring that the progress of the Work and all revisions are delineated by the specific trades involved on a current basis. The Owner and the Architect shall have access to such as-built Drawings at all times. When final as-built Drawings are found by the Architect to be complete, the Contractor shall furnish to the Architect the record set of Drawings in hard copy reproducible format with each sheet clearly marked "Record Drawing" and dated. In addition, the Contractor shall update the Drawings contained in the Architect's CADD files to reflect all changes during construction of the Work so as to make the CADD Drawings consistent with the Record Drawings. The Architect will make available to the Contractor the electronic CADD files for the Drawings prepared by the Architect for the Project. Delivery by the Contractor of the final as-built Record Drawings, and the CADD Drawings updated to reflect as-built conditions, shall be a condition to final payment, and furnishing of the Record Drawings and CADD Drawings may be carried on the punch list with a scheduled value determined by the Architect. Refer to SECTION 017839-PROJECT RECORD DOCUMENTS and SECTION 017700-PROJECT CLOSEOUT of the Specifications for additional information and requirements.

3.12.6 Add to the end of the sub-section as follows:

By approving and submitting Shop Drawings, Product Data, Samples, and similar submittals the Contractor thereby represents that the Contractor has determined and verified all dimensions, quantities, field dimensions, relations to existing work, coordination with work to be installed later, coordination with information on previously accepted Shop Drawings, Product Data, Samples, or similar submittals and verification of compliance with all the requirements of the Contract Documents. The accuracy of all such information is the responsibility of the Contractor. In reviewing Shop Drawings, Product Data, Samples, and similar submittals the Architect shall be entitled to rely upon the Contractor's representation that such information is correct and accurate.

3.12.10 Add to the end of the last sentence as follows:

, except as provided in Section 3.2.

3.12.11 Add new sub-section 3.12.11 as follows:

§ 3.12.11 When professional certification of materials, systems or equipment is required by the Contract Documents, the Owner shall be entitled to rely upon such certifications, and neither the Owner nor the Architect shall be expected to make an independent examination with respect to the performance of such materials, systems or equipment.

3.12.12 Add new sub-sections 3.12.12 to 3.12.13 as follows:
-3.12.13

§ 3.12.12 The Architect will review Shop Drawings, Product Date, Samples and similar submittals two times: once upon original submission and a second time if revisions or corrections are requested by the Architect. Submittals not initially approved by the Architect shall be corrected by the Contractor prior to the second submittal.

§ 3.12.12.1 The Contractor shall also reimburse the Owner amounts charged to the Owner by the Architect for reviewing Shop Drawings, Product Data, Samples and similar submittals which have to be revised and resubmitted after the second review by the Architect.

§ 3.12.12.2 The Contractor shall also reimburse the Owner amounts charged to the Owner by the Architect for evaluating deviations and substitutions proposed by the Contractor, for making revisions to the Contract Documents on account thereof, and for responding to requests for information and providing other services on account of such proposed deviations or substitutions, all regardless of whether such proposed deviations or substitutions are approved or rejected by the Architect.

§ 3.12.13 Refer to SECTION 013300-SUBMITTALS in the Specifications for additional information and requirements.

3.13 Add to the end of the section as follows:

The right of possession of the premises and the improvements made thereon by the Contractor shall remain at all times with the Owner. The Contractor's right to entry and use thereof arises solely from the permission granted by the Owner under the Contract Documents. The Owner shall not be liable to the Contractor, the Subcontractors, their employees, or anyone else with respect to the conditions of the premises, except only for a condition caused directly and solely by the negligence of the Owner.

3.14.3 Add new sub-section 3.14.3 as follows:

§ 3.14.3 The Contractor shall be responsible to install all required sleeves and inserts for any built-in building component. No finished materials or existing structural work shall be cut unless shown on the Contract Documents, without the Architect's approval after submittal of appropriate detail drawings. Cutting and patching of all building elements caused by failure to provide or properly locate sleeves, forms and inserts, incorrect location of Work or failure to cooperate with other trades, shall be completed by the Contractor without additional cost to the Owner. All such installation and repair work shall be carried out by mechanics skilled in the repair trade involved, with due regard to the trade practices and suitable protection of existing work all at no cost to the Owner and subject to the Owner approval.

3.15.1 Add "site" to the end of the second sentence.

3.15.3 Add to the end of the sentence as follows:

, and may deduct all costs thereof from any payment due the Contractor.

3.15.4 Add new sub-section 3.15.4 as follows:

§ 3.15.4 Without limitation, the Contractor shall be responsible for the removal of all crates, cartons and other flammable waste materials or trash from the work areas regardless of cause at the end of each working day or at more frequent intervals if required to maintain the site in a safe and orderly condition. At the completion of the Work, the Contractor shall remove all waste materials and rubbish from and about the site as well as all tools, construction equipment, machinery and surplus materials, and shall leave the site in a neat and clean condition satisfactory to the Owner. Immediately prior to the Architect's inspection for Substantial Completion, the Contractor shall completely clean the premises. Concrete and ceramic surfaces shall be cleaned and washed. Resilient coverings shall be cleaned, waxed and buffed. Woodwork shall be dusted and cleaned. Sash, fixtures and equipment shall be thoroughly cleaned. Stains, spots, dust, marks and smears shall be removed from all surfaces. Hardware and all metal surfaces shall be cleaned and polished. Glass and plastic surfaces shall be thoroughly cleaned on both sides by professional window cleaners. All damaged, broken or scratched glass or plastic shall be replaced by the Contractor at the Contractor's expense.

3.16 Insert ", Owner's representatives" after "provide the Owner".

3.18.1 Delete the first sentence and replace as follows:

To the fullest extent permitted by law the Contractor shall indemnify and hold harmless the Owner, OPM, Architect, Architect's consultants, the Massachusetts School Building Authority (hereafter MSBA), and agents and employees of any of them from and against claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work, including claims, damage, loss or expense attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property, including the Work, caused in whole or in part by the negligent or wrongful acts or omissions of the Contractor, a Subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations, including those of indemnity, which would otherwise exist as to a party or person described in this section.

3.18.3 Add new sub-sections 3.18.3 to 3.18.5 as follows:
-3.18.5

§ 3.18.3 Nothing contained herein shall be construed to create a contractual relationship or cause of action between the Architect and the Contractor, except as expressly provided in Sub-section 3.18.1 above. The Contractor shall not bring any suit, action or other proceeding in law, equity, or arbitration against the Architect, or the officers or employees of the Architect, for the enforcement of any provisions of this Contract.

§ 3.18.4 With respect to any Liabilities of a type not covered by insurance and required to be provided hereunder or otherwise carried by the Owner or the Contractor, the Contractor's indemnity obligation under this Contract shall not extend to any loss or damage to the extent caused by the negligence of an Indemnitee. Accordingly, if any such uninsured Liability involves a claim of comparative or contributory negligence of an Indemnitee, all legal fees and expenses incurred in defending such claim, and any loss or damage determined to be payable as a result of the occurrence giving rise to the Liability (by settlement, judgment or otherwise) shall be apportioned between or among the responsible parties based upon relative degrees of fault, except in the instance of gross negligence or willful misconduct of the Contractor (in which case the Contractor's indemnity shall be absolute and complete and not reduced by the comparative or contributory negligence of an Indemnitee).

§ 3.18.5 If the Contractor has acknowledged its indemnification obligation with respect to a particular claim in accordance with the terms hereof, the Contractor shall assume, at its sole cost and expense, the defense of such claim. Counsel selected for such defense shall be reasonably acceptable to the Indemnitee. The Indemnitee shall be entitled (but not required) to participate in (but not control) such defense through its own counsel and at its own expense; provided that if the counsel selected by the Contractor advises that, due to actual or potential conflicts, separate counsel should represent the Indemnitee, the expense of such separate counsel shall be an indemnified expense in accordance with the terms hereof. If the Contractor does not acknowledge its indemnification obligation for a particular claim, or does not timely assume the defense thereof, the Indemnitee may defend such claim in such manner as it may deem appropriate. The Contractor shall be responsible for paying the Indemnitees, on a current basis, for all legal fees and expenses incurred by the Indemnitee in defending such claim within thirty (30) days of billing therefor. Notwithstanding its control of a defense, the Contractor shall not (i) make any admission or take any other action that is binding on, or otherwise attributable to any Indemnitee, or (ii) consent to any settlement, entry of judgment, or other disposition, in all instances without the prior written consent of the affected Indemnitee.

ARTICLE 4 ARCHITECT

4.1.1 Replace sub-section 4.1.1 as follows:

> The person variously referred to in the Contract Documents as the Architect or Engineer is one and the same, and is the person or organization identified in the Agreement, and includes his or its authorized representatives.

4.1.2 In the first sentence delete ", Contractor" after "consent of the Owner".

In the second sentence insert "of the Owner" after "Consent".

4.1.3 Delete sub-section 4.1.3.

4.2.1 In the first sentence delete "and will be an Owner's representative during construction until the date the Architect issues the final Certificate for Payment."

4.2.3 In the first sentence delete "reasonably" after "will keep the Owner".

4.2.10 Delete sub-section 4.2.10.

4.2.11 Replace sub-section 4.2.11 as follows:

> § 4.2.11 The Architect will, if requested, interpret the requirements of the Contract Documents or evaluate the performance thereunder by the Contractor. The Architect will render, in writing, instructions and other interpretations, clarifications, decisions and approvals necessary for the proper execution and progress of the Work, with reasonable promptness. Either party to the Contract may request such interpretations from the Architect by written request to the Architect with a copy thereof given to the other party, or the Architect may initiate such instructions or interpretations. A request for interpretation or additional information concerning the Contract Documents shall be in a form prepared or approved by the Architect and shall include a reasonably detailed written statement that indicates the specific Drawings or Specifications as to which clarification or interpretation is requested, and the nature of the clarification or interpretation requested. The Architect may, as it judges desirable, issue as a part of such instructions or interpretations additional drawings, sketches, or other material indicating in greater detail the construction or design of the various parts of the Work, and provided such drawings or instructions are reasonably consistent with the previously existing Contract Documents, the Work shall be executed in accordance with such additional drawings or instructions without increase in the Contract Sum or extension of the Contract Time. If the Contractor

believes that a change in the Work has occurred by reason of the Architect's instructions or other interpretation or decision of the Architect hereunder, the Contractor shall give notice and proceed as provided in Section 15.1. The parties agree that the Architect's duties under this subparagraph shall be governed by Chapter 30, Section 39P of the General Laws of the Commonwealth of Massachusetts, as amended.

4.2.12 Delete the second sentence.

4.2.13 Replace sub-section 4.2.13 as follows:

§ 4.2.13 Decisions on matters relating to aesthetic effect shall be resolved by the Architect consistently with the intent expressed in the Contract Documents, subject however to the Owner's approval.

ARTICLE 5 SUBCONTRACTORS

5.2.1 Delete the last sentence.

5.2.2 In the second sentence insert "and legally permissible" after "has made reasonable".

5.2.3 Delete the last two sentences and replace as follows:

No increase in the Contract Sum or Contract Time shall be allowed for such change.

5.2.4 Add to the end of the sub-section as follows:

The applicable provisions of Chapter 149, Section 44F of the General Laws of the Commonwealth of Massachusetts shall apply to filed sub-bid subcontractors, including without limitation the obligation relative to subcontractor performance and payment bonds.

5.2.5 Add new sub-section 5.2.5 as follows:

§ 5.2.5 The Contractor when sub-contracting with sub-bidders that filed sub-bids pursuant to M.G.L. c. 149 § 44F shall use the form of subcontract set forth in M.G.L. c.149, § 44F. The form of subcontract for non-filed Subcontractors shall be submitted to the Owner for its approval, which shall not be unreasonably withheld or delayed. Each subcontract shall expressly provide for the contingent assignment referred to in Sub-section 5.4.1. The Contractor shall furnish the Owner with copies of executed subcontracts upon request.

5.3.1 Designate entirety of text under § 5.3 as sub-section 5.3.1.

5.3.2 Add new sub-section 5.3.2 as follows:

> § 5.3.2 When the presence of a subcontractor or sub-subcontractor is required at a job meeting, the subcontractor or sub-subcontractor shall be represented by an authorized representative who is empowered to make binding commitments on matters to be discussed at such meetings, such as costs, payments, change order, time schedules and manpower. Notices required under the Contract may be served on such representatives.

5.4.1 In sub-heading .1 delete "Section 14.2" and replace with "Article 14".

Add new sub-heading .3 as follows:

> .3 The Owner may further assign the subcontract to a successor contractor or other entity.

Delete last sentence of sub-section.

5.4.2 Delete sub-sections 5.4.2 and 5.4.3.
-5.4.3

ARTICLE 6 CONSTRUCTION BY OWNER OR SEPARATE CONTRACTORS

6.1.1 At the end of the first sentence delete "including those portions related to insurance and waiver of subrogation".

In the second sentence delete "Claim" after "shall make such" and replace with "claim".

6.1.4 Delete sub-section 6.1.4 and replace as follows:

> § 6.1.4 The Owner reserves the right to enter any part of the Project site at any time to inspect the Work or to perform other work with its own forces or separate contractors, or to address any emergency situation. Such access is not to be construed to mean partial occupancy by the Owner and no claim for increase in the Contract Time or Sum will be considered unless such Owner's contractors have delayed or damaged the Contractor's Work. The Contractor shall permit the Owner to place and install as much furniture, equipment and other material during the progress of the Work as is possible before completion of the various parts of the Work and agrees that such placing and installation of equipment shall not in any way evidence the completion or acceptance of the Work or any portion of it.

6.2.3 Delete the last sentence.

6.2.5 Delete sub-section 6.2.5.

ARTICLE 7 CHANGES IN THE WORK

7.2.2 Add new sub-section 7.2.2 as follows:

> § 7.2.2 Upon request of the Owner or the Architect, the Contractor shall without cost to the Owner submit to the Architect, in such form as the Architect may require, an accurate written estimate of the cost of any proposed extra Work or change. The estimate shall indicate the quantity and unit cost of each item of material, and the number of hours of work and hourly rate for each class of labor, as well as a description and the amounts of all other costs chargeable under the terms of this Article. Unit labor costs for the installation of each item of material shall be shown if required by the Architect. The Contractor shall promptly revise and resubmit each estimate if the Architect determines that it is not in compliance with the requirements of this Article, or that it contains errors of fact or mathematical errors. If required by the Architect, in order to establish the exact cost of new Work added or of previously required Work omitted, the Contractor shall obtain and furnish to the Architect bona fide proposals from recognized suppliers for furnishing any material included in such Work. Such estimates shall be furnished promptly so as to occasion no delay in the Work, and shall be furnished at the Contractor's expense. The Contractor shall state in the estimate any extension of time required for the completion of the Work if the change or extra work is ordered.

7.3.3 Delete the first sentence of the sub-section and replace as follows:

> If the Construction Change Directive provides for an adjustment to the Contract Sum, and if the Contract Documents include a unit price for the work that is the subject of such directive, such unit price shall be the basis of the adjustment to the Contract Sum, unless the Owner, in its sole discretion, chooses another method. If, however, the Contract Documents do not include a unit price for such work, the adjustment shall be based on one of the following methods, as selected by the Owner:

In sub-heading .2 delete “stated in the Contract Documents or” after “Unit prices”.

Add to the end of the sub-section as follows:

> Contract modification is permitted only in accordance with SECTION 012600-CONTRACT MODIFICATION PROCEDURES of the Specifications.

7.3.4 Delete sub-section 7.3.4 and replace as follows:

> § 7.3.4 If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are materially changed in a proposed Change Order or Construction Change Directive so that, in the opinion of the Architect, application of such unit prices to quantities of Work proposed will cause substantial inequity to the Owner, the applicable unit prices shall be equitably adjusted.

7.3.5 In the first sentence add after "the Work involved and" as follows:

> , within five (5) calendar days from receipt of the Construction Change Directive,"

Insert "by written notice" after "advise the Architect".

Add to the end of the sub-section as follows:

> Failure to so advise the Architect within such 5-day period (1) shall be interpreted as Contractor's agreement with the proposed method of adjustment; (2) shall constitute an irrevocable waiver of any right of the Contractor to submit a claim on account of the method of adjustment; and (3) shall cause the Construction Change Directive to be deemed and constitute a Change Order.

7.3.6 In the second sentence delete "recorded as" after "immediately shall be" and replace with "deemed and shall constitute".

Add to the end of the sub-section as follows:

> Refer to SECTION 012600-CONTRACT MODIFICATION PROCEDURES in the Specifications for additional requirements.

7.3.7 Delete first sentence and replace as follows:

If the proposed method of adjustment in the Contract Sum is based on unit prices that are stated in the Contract Documents, such unit prices shall be the basis of any adjustment to the Contract Sum, unless the Owner has chosen another method pursuant to subparagraph 7.3.3. If the proposed method of adjustment is not based on such unit prices and the Contractor objects to the proposed method of adjustment, the Contractor must notify the Architect of such objection in writing within five (5) calendar days from Contractor's receipt of the Construction Change Directive. Failure to so object will irrevocably waive any such objections and claims on account of such method of adjustment, and the Construction Change Directive shall be deemed and shall constitute a Change Order. If the Contractor does so object, the adjustment to the Contract Sum shall be determined by the Architect on the basis of reasonable expenditures and savings of those performing the Work attributable to the change, including, in case of an increase in the Contract Sum, a reasonable allowance for overhead and profit.

In sub-heading .4 insert "and" after "and insurance," and delete ", and sales, use or similar taxes related to the Work" after "permit fees".

Delete sub-heading .5 and replace as follows:

.5 A reasonable allowance for overhead and profit.

7.3.9 Delete the end of the first sentence starting after "Directive to the Owner," and replace as follows:

amounts for such changes in the Work shall not be included in Applications for Payment. Such amounts shall only be included in an Application for Payment after the adjustment for the Construction Change Directive has been included in a Change Order signed by the Owner and the Contractor.

7.3.11 Add new sub-section 7.3.11 as follows:

7.3.11 In Subparagraph 7.3.7, the allowance for the combined overhead and profit included in the total cost to the Owner for a change in the Work shall be based on the following schedule:

.1 For the Contractor, for work performed by the Contractor's own forces: 10 percent of the net cost. Net cost shall be the cost of labor and materials only. All other costs, such as, insurance and bonds shall be factored after the net cost total.

.2 For the Contractor, for work performed by one or more Subcontractors: 10 percent of the combined net cost of addition and deductions of the Subcontractors. Net cost shall be the cost of labor and materials only. All other costs, such as, insurance and bonds shall be factored after the net cost total.

.3 For each Subcontractor, for Work performed by the Subcontractor or his Sub-subcontractors: 10 percent of the combined net cost of their Work. Net cost shall be the cost of labor and materials only. All other costs, such as, insurance and bonds shall be factored after the net cost total.

.4 In any event, the total allowance for overhead and profit for a Change in the Work shall not exceed 20 percent of the net cost of the Work.

.5 For a Change in the Work resulting in a net deduction in costs, there shall be no allowance for overhead and profit.

.6 Cost to which overhead and profit is to be applied shall be determined in accordance with Subparagraph 7.3.6.

.7 Proposals, except those so minor that their propriety can be seen by inspection, shall be accompanied by a complete itemization of costs including labor, materials and Subcontracts. Labor and materials shall be itemized in the manner prescribed above. Where major cost items are Subcontracts, they shall be itemized also. In no case will a change involving over $500 be approved without such itemization.

7.3.12 Add new sub-sections 7.3.12 to 7.3.12.3 as follows:
-7.3.12.3

§ 7.3.12 Work Performed Under Protest. The Contractor shall perform all work as directed by the Owner. If the Owner determines that certain work for which the Contractor has requested a Change Order does not represent a change in the Contract, the Contractor shall perform such work under protest and shall follow the Procedures described in subparagraphs 7.3.12.1 and 7.3.12.2, below and the claim procedures set forth in Article 15.

§ 7.3.12.1 The Contractor shall, on or before the first working day following commencement of such work or sustaining such damage, submit to the OPM and the Architect a written statement of the nature of such work or damage sustained. The Contractor will not be entitled to compensation for any portion of its Change Order claim related to work performed prior to the Owner's receipt of such written statement.

§ 7.3.11.2 On or before the second working day after the commencement of any such work or sustaining of such damage, and daily thereafter, the Contractor shall file with the OPM and the Architect itemized statements of the details and costs of such work performed or damage sustained, calculated pursuant to subparagraph 7.3.7; and unless such statements be made as required, its claim for such compensation shall be forfeited and

invalid and it shall not be entitled to payment on account of any such work or damage.

§ 7.3.12.3 If the Construction Change Directive is for work which is to be compensated on the basis of Time and Materials calculated pursuant to subparagraph 7.3.7, the Contractor shall maintain detailed records on a time and materials basis of work required by the Construction Change Directive. At the beginning of each day in which Time and Materials work is to be performed, the Contractor shall notify the OPM where and what type of work is to be performed; and at the end of each work day in which Time and Materials work was performed, the Contractor must obtain the signature of the OPM verifying actual time spent and materials used on the change. Costs submitted without the signed verification of the OPM will not be approved.

ARTICLE 8 TIME

8.2.2 In the first sentence delete ", except by agreement or instruction of the Owner in writing, prematurely".

8.2.4 Add new sub-sections 8.2.4 and 8.2.5 as follows:
-8.2.5

§ 8.2.4 Unless specifically required by law, no payment under this Contract shall be due until the construction schedule, required by Section 3.10, and conforming to the requirements of the General Requirements has been accepted by the Architect.

§ 8.2.5 If the Architect in reviewing any Application for Payment determines that the amount of completed Work in place as certified by the Architect is less than 90% of the Work in place required by the Contractor's construction schedule or schedule of values provided for in Section 9.2, or that there have been delays to critical paths and the Contract completion date will not be met, or that, in the Owner's sole discretion, there is reasonable concern that the Work will not be Substantially Complete by the date required in the Contract Documents, the Contractor shall be required to submit a recovery schedule with a written description of the steps the Contractor intends to take to put the Project back on schedule. At the Owner's option, the Contractor shall take some or all of the following actions at no additional cost to the Owner:

.1 Increase the number of workers on the site, in such quantities and trades as will substantially eliminate the backlog of work;

.2 Increase the number of working hours per shift, shifts per day, working days per week, amount of construction equipment, or any combination of the foregoing, sufficiently to substantially eliminate backlog of work; or

.3 Reschedule activities so that the completion dates initially scheduled will be met.

8.3.1 Insert "(except weather)" after "casualties or other causes".

Delete "pending mediation and arbitration" after "delay authorized by Owner".

Add to the end of the sub-section as follows:

, and this shall be the Contractor's sole remedy for such delay. Under no circumstances will the Contractor be entitled to an increase in the Contract Sum, or to any other damages, on account of or in connection with any delay, regardless of the cause of such delay, and Contractor agrees not to make any claim for such damages, including, but not limited, claims for damages on account of having to perform out-of-sequence work, claims for damages on account of loss of production, and claims for damages on account of hindrances or interference with the work.

8.3.3 Replace sub-section 8.3.3 as follows:

§ 8.3.3 No claim for extension of time shall be allowed on account of failure of the Architect to furnish Drawings, Specifications or instructions or to return Shop Drawings or Samples until 15 working days after receipt by the Architect of written demand for such instructions, Drawings, or Samples, and not then unless such claim be reasonable.

8.3.4 Add new sections 8.3.4 to 8.3.7 as follows:
-8.3.7

§ 8.3.4 No extension of time shall be granted because of seasonal or abnormal variations in temperature, humidity or precipitation, which conditions shall be wholly at the risk of the Contractor, whether occurring within the time originally scheduled for completion or within the period of any extension granted. There shall be no increase in the Contract Sum on account of any additional costs of operations or conditions resulting therefrom.

§ 8.3.5 The Contractor hereby agrees that the Contractor shall have no claim for damages of any kind against the Owner or the Architect on account of any delay in the commencement of the Work and/or any hindrance, delay or suspension of any portion of the Work, whether such delay is caused by the Owner, the Architect, or otherwise, except as and to the extent expressly provided in G.L. c. 30, §39N. The Contractor acknowledges that the Contractor's sole remedy for any such delay and/or suspension will be an extension of time as provided in this Article.

§ 8.3.6 This section is subject to M.G.L. c.30 §39O.

§ 8.3.6.1 The Owner may order the Contractor in writing to suspend, delay or interrupt all or any part of the work for such period of time as it may determine to be appropriate for the convenience of the Owner; provided, however, that if there is a suspension, delay or interruption for fifteen (15) days or more due to a failure of the Owner to act within the time specified in this Contract, the Owner shall make an adjustment in the Contract Sum for any increase in the cost of performance of this Contract but shall not include any profit to the Contractor on such increase; and provided further, that the Owner shall not make any adjustment in the Contract Sum under this provision for any suspension, delay, interruption or failure to act to the extent that such is due to any cause for which this Contract provides for an equitable adjustment of the Contract Sum under any other contract provisions.

§ 8.3.6.2 The Contractor must submit the amount of a claim under paragraph 8.3.6.1 to the Owner in writing as soon as practicable after the end of the suspension, delay, interruption or failure to act and, in any event, not later than the date of final payment under this Contract and, except for costs due to a suspension order, the Owner shall not approve any costs in the claim incurred more than twenty days before the Contractor notified the Owner in writing of the act or failure to act involved in the claim.

§ 8.3.6.3 In the event a suspension, delay, interruption or failure to act of the Owner increases the cost of performance to any Subcontractor, that Subcontractor shall have the same rights against the Contractor for payment for an increase in the cost of its performance as paragraphs 8.3.6.1 and 8.3.6.2 give the Contractor against the Owner, but nothing in paragraphs 8.3.6.1 and 8.3.6.2 shall in any way change, modify or alter any other rights which the Contractor or the Subcontractor may have against each other.

§ 8.3.7 If the progress of the Work is delayed by an act or neglect of the Contractor, a Subcontractor, Sub-subcontractor, or anyone directly or indirectly employed by them, so that the Substantial Completion date is extended beyond the date set forth in Paragraph 8.2, subject to adjustment of the Contract Time as provided for in the Contract Documents, then the Contractor shall reimburse the Owner upon demand for amounts charged by the Architect and the OPM for administration of the Contract during such extension.

8.4 Add new section 8.4 as follows:

§ 8.4 LIQUIDATED DAMAGES

§ 8.4.1 It is expressly understood and agreed, by and between the Contractor and Owner, that the time for the completion of the Work described herein is a reasonable time for the completion of same, taking into consideration the average climatic range and usual industrial and/or residential conditions prevailing in this locality. If the said Contractor shall neglect, fail or refuse to complete the Work within the times herein specified, or any proper extension thereof granted by the Owner, then the Contractor does hereby agree, as a part consideration for the awarding of this Contract, to pay to the Owner $2,000.00, not as a penalty but as liquidated damages for such breach of contract, for each and every calendar day that the Contractor shall be in default after the time stipulated for completing the Work. The said amount is fixed and agreed upon by and between the Contractor and the Owner because of the impracticability and difficulty of fixing and ascertaining the actual damages the Owner would in such event sustain, and said amount is agreed to be the amount of damages which the Owner would sustain and said amount shall be deducted by the Owner from periodic payments.

ARTICLE 9 SCHEDULE OF VALUES

9.2 Add to the end of the section as follows:

, and shall be revised if later found by the Architect to be inaccurate. In addition, the Contractor shall submit to the Architect, at least 14 days before the first Application for Payment, a Cash Flow Schedule that shows the percentage completion to be obtained and the total dollar value of Work to be completed as of the first of each month until Substantial Completion. All calculations in the Cash Flow Schedule shall be on the basis of Work in place and shall exclude the value of materials delivered but not in place.

9.2.1 Add new sub-section 9.2.1 as follows:

§ 9.2.1 The Cash Flow Schedule shall be based on an orderly progression of the Work allowing adequate time for each operation (including adequate time for submission and review of submittals) and leading to a reasonable certainty of Substantial Completion by the date established in the Agreement. The Cash Flow Schedule will be reviewed by the Architect for compliance with the requirements of the Contract Documents. Unless specifically required by law, no payment under this Contract shall be due until the Cash Flow Schedule has been reviewed and approved by the Architect. The Architect's review of the Cash Flow Schedule shall not impose any duty on the Architect or the Owner with respect to the timing, planning, scheduling or execution of the Work. In particular if the Contractor proposes a Cash Flow Schedule indicating a date of Substantial Completion which is earlier than the Contract Time the Contractor shall not be entitled to additional payment or compensation of any kind if for any reason the full Contract Time is required to achieve Substantial Completion of the Work.

9.3.1.1 Delete sub-section 9.3.1.1.

9.3.2 Add to the end of the sub-section as follows:

The Owner may deduct the amount of such costs from payments due the Contractor. Where the Owner has approved payment for materials and equipment stored off-site, all costs for storage, insurance, transportation and other costs shall be borne solely by the Contractor. The Contractor shall assume responsibility to protect all such materials from loss or damage at no costs to the Owner, until they are finally incorporated into the Work, whether or not they have been paid for by the Owner. In approving payment for materials and equipment stored off-site, the Owner may require, without limitation, evidence that the off-site location is properly secure, proof of insurance, and segregation and/or marking of stored materials or equipment, and the ability of the Architect or Owners Representative to visit the location of the stored material, at the Contractor's expense, for verification purposes.

9.3.4 Add new sub-sections 9.3.4-9.3.5 as follows:
-9.3.5

§ 9.3.4 Each Application for Payment or periodic estimate requesting payment shall be accompanied by a certificate from each Subcontractor stating that the Subcontractor has been paid all amounts due the Subcontractor on account of previous applications for payment submitted by the Subcontractor, or else stating the amount not so paid and the reason for the discrepancy. In the event of any such discrepancy, the Contractor shall furnish the Contractor's own written explanation to the Owner through the Architect. Such certificate shall be in a form acceptable to the Owner. If requested by the Owner or the Architect, such certificates shall be provided by Sub-subcontractors or suppliers.

§ 9.3.5 On a schedule established by the Architect, generally one week prior to formal submission of each Application for Payment, the Contractor shall submit the Application for Payment in draft form, including all supporting materials, to the Architect and the Owner. The Contractor shall meet with the Architect as necessary to review the draft Application for Payment, and shall supply additional information as requested by the Architect or the Owner so as to substantiate all amounts to be included in the Application for Payment. Upon agreement of the parties, the Contractor shall formally submit the Application for Payment.

9.4.1 Insert at the beginning of the first sentence as follows:

Subject to the Contractor's compliance with Section 9.3 and the provisions of Section 9.6,

9.5.1 Add new sub-headings .8, .9, .10, .11, and .12 as follows:

.8 failure of the Contractor or mechanical or electrical trade subcontractors to comply with requirements of the General Requirements for maintaining record drawings. The Contractor shall check record drawings each month. Written confirmation that the record drawings are current will be required by the Architect before approval of the Contractor's monthly payment requisition;

.9 failure of the Contractor to provide required warranties under Section 9.3, claims for direct payment, or reasonable evidence indicating probable filing of such claims;

.10 costs incurred by the Owner under Section 10.2.5;

.11 failure of the Contractor to submit prerequisite documentation required by the General Requirements; or

.12 liquidated damages due the Owner pursuant to Section 8.4.

9.5.3 Delete sub-section 9.5.3.

9.6.1.1 Add new sub-section 9.6.1.1 as follows:

§ 9.6.1.1 No certificate for payment by the Architect, nor any progress payment made by the Owner, nor any partial or full use or occupancy of the Work or the Project by the Owner, shall constitute an acceptance of any Work not in accordance with the Contract Documents.

9.6.2.1 Add new sub-sections 9.6.2.1 to 9.6.2.5 as follows:
-9.6.2.5

§ 9.6.2.1 (a) Forthwith after the Contractor receives payment on account of a periodic estimate, the Contractor shall pay to each Subcontractor the amount paid for the labor performed and the materials furnished by that Subcontractor, less any amount specified in any court proceedings barring such payment and also less any amount claimed due from the Subcontractor by the Contractor.

(b) Not later than the sixty-fifth day after each Subcontractor substantially completes his work in accordance with the plans and specifications, the entire balance due under the subcontract, less amounts retained by the Owner as the estimated cost of completing the incomplete and unsatisfactory items of work, shall be due the Subcontractor; and the Owner shall pay that amount to the Contractor. The Contractor shall forthwith pay to the Subcontractor the full amount received from the Owner less any amount specified in any court proceedings barring such payment and also less any amount claimed due from the Subcontractor by the Contractor.

(c) Each payment made by the Owner to the Contractor pursuant to Subsections (a) and (b) of this Section for the labor performed and the materials furnished by a Subcontractor shall be made to the Contractor for the account of that Subcontractor; and the Owner shall take reasonable steps to compel the Contractor to make each such payment to each such Subcontractor. If the Owner has received a demand for direct payment from a Subcontractor for any amount which has already been included in a payment to the Contractor or which is to be included in a payment to the Contractor for payment to the Subcontractor as provided in Subsections (a) and (b), the Owner shall act upon the demand as provided in this Subsection 9.6.2.

(d) If, within seventy days after the Subcontractor has substantially completed the subcontract work, the Subcontractor has not received from the Contractor the balance due under the subcontract including any amount due for extra labor and materials furnished to the Contractor, less any amount retained by the Owner as the estimated cost of completing the incomplete and unsatisfactory items of work, the Subcontractor may demand direct payment of that balance from the Owner. The demand shall be by a sworn statement delivered to or sent by certified mail to the Owner, and a copy shall be delivered to or sent by certified mail to the Contractor at the same time. The demand shall contain a detailed breakdown of the balance due under the subcontract and also a statement of the status of completion of the subcontract work. Any demand made after substantial completion of the subcontract work shall be valid even if delivered or mailed prior to the seventieth day after the Subcontractor has substantially completed the subcontract work. Within ten days after the Subcontractor has delivered or so mailed the demand to the Owner and delivered or so mailed a copy to the Contractor, the Contractor may reply to the demand. The reply shall be by a sworn statement delivered to or sent by certified mail to the Owner, and a copy shall be delivered to or sent by certified mail to the Subcontractor at the same time. The reply shall contains a detailed breakdown of the balance due under the subcontract, including any amount due for extra labor and materials furnished to the Contractor and of the amount due for each claim made by the Contractor against the Subcontractor.

(e) Within fifteen days after receipt of the demand by the Owner, but in no event prior to the seventieth day after substantial completion of the subcontract work, the Owner shall make direct payment to the Subcontractor of the balance due under the subcontract, including any amount due for extra labor and materials furnished to the Contractor, less any amount (i) retained by the Owner as the estimated cost of completing the incomplete or unsatisfactory items of work, (ii) specified in any court proceedings barring such payment, or (iii) disputed by the Contractor in the sworn reply; provided that the Owner shall not deduct from a direct payment any amount as provided in part (iii) if the reply is not sworn to, or for which the sworn reply does not contain the detailed breakdown required by Subsection (d). The Owner shall make further direct payments to the Subcontractor forthwith after the removal of the basis for deductions from direct payments made as provided in parts (i) and (ii) of this Subsection.

(f) The Owner shall forthwith deposit the amount deducted from a direct payment as provided in part (iii) of Subsection (e) in an interest-bearing joint account in the names of the Contractor and the Subcontractor in a bank in Massachusetts selected by the Owner or agreed upon by the Contractor and the Subcontractor and shall notify the Contractor and the Subcontractor of the date of the deposit and the bank receiving the deposit. The bank shall pay the amount in the account, including accrued interest, as provided in an agreement between the Contractor and the Subcontractor or as determined by decree of a court of competent jurisdiction.

(g) All direct payments and all deductions from demands for direct payments deposited in an interest-bearing account or accounts in a bank pursuant to Subsection (f) shall be made out of amounts payable to the Contractor at the time of receipt of a demand for direct payment from a Subcontractor and out of amounts which later become payable to the Contractor and in the order of receipt of such demands from Subcontractors. All direct payments shall discharge the obligation of the Owner to the Contractor to the extent of such payment.

(h) The Owner shall deduct from payments to a Contractor amounts which, together with the deposits in interest-bearing accounts pursuant to Subsection (f), are sufficient to satisfy all unpaid balances of demands for direct payment received from Subcontractors. All such amounts shall be earmarked for such direct payments, and the Subcontractors shall have a right in such deductions prior to any claims against such amounts by creditors of the Contractor.

(i) If the Subcontractor does not receive payment as provided in Subsection (a) or if the Contractor does not submit a periodic estimate for the value of the labor or materials performed or furnished by the Subcontractor and the Subcontractor does not receive payment for same when due less the deductions provided for in Subsection (a), the Subcontractor may demand direct payment by following the procedure in Subsection (d) and the Contractor may file a sworn reply as provided in that same Subsection. A demand made after the first day of the month following that for which the Subcontractor performed or furnished the labor and materials for which the Subcontractor seeks payment shall be valid even if delivered or mailed prior to the time payment was due on a periodic estimate from the Contractor. Thereafter the Owner shall proceed as provided in Subsections (e), (f), (g) and (h).

§ 9.6.2.2 Any assignment by a Subcontractor of the rights under this section to a surety company furnishing a bond under the provisions of M.G.L. c.149, section 29 shall be invalid. The assignment and subrogation rights of the surety to amounts included in a demand for direct payment which are in the possession of the Owner or which are on deposit pursuant to Subsection (f) of Subsection 9.6.2.1 shall be subordinate to the rights of all Subcontractors who are entitled to be paid under this section and who have not been paid in full.

§ 9.6.2.3 "Subcontractor" as used in this Subsection 9.6.2 shall mean a person who files a sub-bid and receives a subcontract as a result of that filed sub-bid or who is approved by the Owner in writing as a person performing labor or both performing labor and furnishing materials pursuant to a contract with the Contractor. "Subcontractor" as used in other provisions of the Contract Documents shall, except as otherwise expressly provided, have the meaning set forth in Subsection 5.1.1.

§ 9.6.2.4 The Contractor or a Subcontractor shall enforce a claim to any portion of the amount of a demand for direct payment deposited as provided in Subsection (f) of Subsection 9.6.2.1 by a petition in equity in the superior court against the other and the bank shall not be a necessary party. A Subcontractor shall enforce a claim for direct payment or a right to require a deposit as provided in Subsection (f) of Subsection 9.6.2.1 by a petition in equity in the superior court against the Owner and the Contractor shall not be a necessary party. Upon motion of any party the court shall advance for speedy trial any petition filed as provided in this Section. M.G.L. c.231, § 59 and 59B shall apply to such petitions. A decree in any such proceeding shall not include interest on the disputed amount deposited in excess of the interest earned for the period of any such deposit. No person except a Subcontractor filing a demand for direct payment for which no funds due the Contractor are available for direct payment shall have a right to file a petition in a court of equity against the Owner claiming a demand for direct payment is premature, and such Subcontractor must file the petition before the Owner has made a direct payment to the Subcontractor and has made a deposit of the disputed portion as provided in part (iii) of Subsection (e) and in Subsection (f) of Subsection 9.6.2.1.

§ 9.6.2.5 In any petition to collect any claim for which a Subcontractor has filed a demand for direct payment the court shall, upon motion of the Contractor, reduce by the amount of any deposit of a disputed amount by the Owner as provided in part (iii) of Subsection (e) and in Subsection (f) of Subsection 9.6.2.1 any amount held under a trustee writ or pursuant to a restraining order or injunction.

9.6.3 Delete sub-section 9.6.3.

9.6.4 Delete "If the Contractor fails to furnish such evidence within seven days," from the beginning of the second sentence.

9.6.5 Delete sub-section 9.6.5.

9.6.7 Delete sub-section 9.6.7.

9.6.8 Add new sub-section 9.6.8 as follows:

§ 9.6.8 Notwithstanding the provisions of Section 9.6 all progress payments shall be made in accordance with Chapter 30, Sections 39F, 39G and 39K (as appropriate) of the General Laws of the Commonwealth of Massachusetts, as amended.

9.7 Delete section 9.7.

9.8.1 Add **after the first sentence** of the sub-section as follows:

In addition, Substantial Completion for the entire Project shall be achieved only when: (1) the Owner has beneficial occupancy and use of the entire Project for all its intended uses; (2) all Project systems included in the Work are operational and acceptable to the Owner; (3) all governmental inspections for the Project have been successfully completed, all governmental approvals and related paperwork have been delivered to the Owner, and final and unconditional certificates of occupancy for the entire Project have been delivered to the Owner, (4) the only remaining Work to be performed is minor in nature and the remaining Work may reasonably be performed without having a material adverse effect on or materially interfering with the Owner's occupancy and use of the Project and (5) all prerequisites to Substantial Completion defined in the Contract Documents have been completed.

9.8.2 Add to the end of the first sentence as follows:

together with the estimated value of completing or correcting such items (the "Punchlist") and (2) the permits and certificates referenced in Section 13.5. The Architect shall have the right to modify and supplement the Punchlist, including the estimated value of completion or correction.

9.8.5 Delete sub-section 9.8.5 and replace as follows:

> § 9.8.5 The Certificate of Substantial Completion shall be submitted to the Owner and Contractor by the Architect. The certificate shall state the date of substantial completion, shall state any consequent responsibilities of the Contractor and the Owner in accordance with the Contract Documents. The Contractor shall complete and correct any incomplete and defective work within forty-five (45) calendar days from the date of Substantial Completion

9.8.6 Add new sub-section 9.8.6 as follows:

> § 9.8.6 Services provided by the Architect to conduct more than two (2) inspections of completed Work and any inspections beyond sixty (60) days after the date of substantial completion of any portion of the Work as stated in the Agreement shall be paid by the Contractor to the Owner. The Owner may deduct the cost of such services and inspections from payments due the Contractor.

9.9.1 Delete the end of the first sentence starting after "Work at any stage".

Delete the second sentence and replace as follows:

> Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner has accepted in writing the responsibilities assigned to it and the Contractor for payments, retainage, if any, security, maintenance, heat, utilities, damage to the Work and insurance.

Delete the second to last sentence.

9.9.3 Replace the "." at the end of the sub-section with "," and add the following:

> nor relieve the Contractor from its obligation to complete the Work, or its responsibility for loss or damage due to or arising out of defects in, or malfunctioning of, systems, materials, equipment or other elements of the Work, nor from other unfulfilled obligations or responsibilities of the Contractor under the Contract. The Contractor shall make no Claim for extension of the Contract Time or for damages of any kind arising directly or indirectly out of the exercise by the Owner of the rights reserved under this Section 9.9.

9.10.1 Add **after the second sentence** of the sub-section as follows:

By Final Completion, the Contractor shall have completed its performance of all Punchlist items, completed all balancing of mechanical and other applicable systems and all seasonal system adjustments that are reasonably necessary to proper functioning of the completed Project, delivered to the Owner all operations and maintenance manuals and completed related training for such manuals, and delivered to the Owner all required warranties and guarantees.

Add to the end of the sub-section as follows:

If, through no fault of the Architect, the Architect (including its subconsultants) is required to conduct more than two (2) inspections of the Work to determine final completion, the Contractor shall be responsible for any fees assessed by the Architect for Additional Services on account of such additional inspections. The Contractor shall promptly reimburse the Owner for any such additional fees or, if the same are not promptly reimbursed, the Owner may deduct such amounts due from amounts otherwise payable to the Contractor.

9.10.2 Delete sub-section 9.10.2 and replace with the following:

§ 9.10.2 Prior to and as a condition precedent to final completion and final payment, all of the following matters shall have been resolved and documents and items shall have been received and approved in writing by the Owner:

.1 final documents of similar nature to those required by the Contract Documents in connection with any Application for Payment hereunder;

.2 all final permits, approvals (including, without limitation, the approval of the Owner's insurance company, if required), certificates, affidavits and authorizations as required by Subsection 13.5.4, including an unconditional permanent and full Certificate of Occupancy, unless those permits, approvals, certificates, affidavits and authorizations are not received by the Owner solely for reasons as to which the Contractor or Subcontractors have no responsibility;

.3 formally prepared "as-built" drawings, records and related data including all field notes of all the Work all in accordance with the requirements of the Contract Documents;

.4 all operating and maintenance manuals as required by the Contract Documents, parts lists, the final version of the Project Directory, and repair source lists;

.5 all guarantees and warranties to which the Owner is entitled under the Contract Documents;

.6 satisfactory proof that all claims arising out of the Work have been released;

.7 acknowledgment of prior payments and waivers of lien (to the extent permitted by law) from all Subcontractors and the Contractor;

.8 the Architect's certificate certifying that the Work is complete;

.9 reasonable assurances that all practical orientation and operating instructions for all materials, systems, and equipment have been satisfactorily completed, and that all required training of Owner's personnel has been completed;

.10 a satisfactory report by the Contractor which is approved by the Architect that all mechanical systems have been and are properly balanced;

.11 an affidavit that all payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or its property might in any way be responsible or encumbered, have been paid or otherwise satisfied;

.12 a certificate evidencing that insurance required by the Contract Documents to remain in force after final payment is currently in effect and will not be cancelled or allowed to expire until at least 30 days' prior written notice has been given to the Owner;

.13 consent of surety, if required, to final payment;

.14 if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts, releases and waivers of liens, claims, security interests or encumbrances arising out of the Contract, to the extent and in such form as may be designated by the Owner;

.15 delivery of all spare parts required to be submitted pursuant to the Contract Documents;

.16 a general release of the Owner from the Contractor and, if requested, from any Subcontractor; and

.17 all sustainability documentation required from the Contractor is received.

If the final documentation submitted by the Contractor is not deemed complete by the Owner, or if the Owner deems the Work incomplete in any respect, the Contractor shall promptly complete any such Work and shall promptly resubmit the final documentation. Refer to SECTION 017823-OPERATION AND MAINTENANCE DATA and SECTION 019113-GENERAL COMMISSIONING in the Specifications for additional requirements.

9.10.3 Delete sub-sections 9.10.3 and 9.10.4.
-9.10.4

9.10.5 Insert "for payment for Work performed and of all other claims of which the payee knew or should have known at the time of final payment," after "claims that payee".

9.10.6 Add new sub-section 9.10.6 as follows:

§ 9.10.6 Notwithstanding anything in the Contract Documents to the contrary, final payment shall be made in accordance with the requirements of M.G.L.c.30, §39K (building projects) or §39G (public works projects), as amended.

ARTICLE 10 PROTECTION OF PERSONS AND PROPERTY

10.1.1 Add to the end of the sub-section as follows:

Such precautions and programs shall include, but are not limited to, compliance by the Contractor and all Subcontractors with all safety precautions and programs required by the Occupational Safety and Health Act and regulations promulgated thereunder, other applicable laws and regulations, the Contract Documents, and any insurance carrier providing insurance coverage for the Owner or the Contractor in connection with the Project. Without limiting the generality of the foregoing, the Contractor shall, promptly after issuance of the Notice to Proceed, prepare a written safety program which shall be submitted to the Owner and the Architect and issued to all Subcontractors and all forces employed on the work. Such program shall include regular safety meetings, and the Contractor shall prepare, circulate and maintain on file at the site minutes of all safety meetings.

10.2.1 In the first sentence change two instances of “reasonable” to “all necessary”.

Add new sub-heading .4 as follows:

.4 work or property of the Owner, its tenants, or other parties at or near the Project site with the Owner's permission.

10.2.5 At the beginning and end of the first sentence:

Delete “and” after “10.2.1.2”.

Insert “and 10.2.1.4” after “10.2.1.3”.

Delete the remainder of the first sentence as follows:

, except damage or loss attributable to acts or omissions of the Owner or Architect or anyone directly or indirectly employed by either of them, or by anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Contractor.

Add to the end of the sub-section as follows:

Where the damage or loss presents an immediate danger to the public, the Owner, in its sole discretion and at the Contractor’s expense, may promptly remedy such damage or loss without prior notice to the Contractor.

10.2.9 Add new sub-sections 10.2.9 to 10.2.16 as follows:
-10.2.16

§ 10.2.9 The Contractor shall provide and maintain in good operating condition suitable and adequate fire protection equipment and services, and shall comply with all reasonable recommendations regarding fire protection made by the representatives of the fire insurance company carrying insurance on the Work or by the local fire chief or fire marshal. The area within the site limits shall be kept orderly and clean, and all combustible rubbish shall be promptly removed from the site. During any flame cutting and/or welding operation, incombustible curtains and blankets shall be used to intercept and catch hot metal, sparks and burning embers. The Contractor shall employ a watchperson equipped with portable fire extinguishing equipment to maintain a fire watch continuously during all flame cutting and welding operations and for four hours minimum thereafter. All fire doors shall be kept clear of rubbish and in operating condition and closed during non-working hours. The Contractors shall not allow any locking and blocking of any door in the building, except entrance doors during non-working hours.

§ 10.2.10 The Contractor shall at all times protect excavations, trenches, buildings and materials from rain water, groundwater, backup or leakage of sewers, drains and other piping, and from water of any other origin and shall remove promptly any accumulation of water. The Contractor shall provide and operate all pumps, piping and other equipment necessary to this end.

§ 10.2.11 The Contractor shall remove snow and ice which might result in damage or delay.

§ 10.2.12 During the progress of the Work and at all times prior to the date of Substantial Completion or occupancy of the Work by the Owner, whichever is earlier, the Contractor shall provide temporary heat, ventilation, and enclosure, adequate to permit the Work to proceed in a timely fashion, and to prevent damage to completed Work or Work in progress, or to materials stored on the premises. The use of the permanent heating and/or ventilation systems for temporary heat and/or ventilation shall be subject to the prior written approval of the Owner and Architect.

§ 10.2.13 [G.L. c.149, §44F(1)] The Contractor shall install weather protection and furnish adequate heat in the protected area from November 1 to March 31.

§ 10.2.14 The Contractor shall provide adequate facilities to keep the Site secure at all times when the Contractor's personnel are not present, from commencement of the Work until Substantial Completion, to assure that the Work, all materials and equipment stored at the Site, and all other property of the Owner located within the site limits or within other areas occupied or controlled by the Contractor, are fully and completely protected against loss or damage due to vandalism, theft, malicious mischief, pilferage or unexplained disappearance. If the Contractor fails to comply with the requirements of this Subsection 10.2.13, then the Owner may provide appropriate security, and charge the cost thereof to the Contractor. The Owner's provision of such security, or failure to do so, shall not relieve the Contractor of its sole responsibility to pay for loss or damage to such property due to vandalism, theft, malicious mischief, pilferage or unexplained disappearance, to the extent not covered by the Owner's insurance.

§ 10.2.15 The Contractor shall arrange for and provide all police details required by the local Police Department to be present at or adjacent to the site for traffic control purposes. The cost of police details so required shall be paid by the City. Refer to SECTION 011000-SUMMARY OF WORK for additional information and requirements.

§ 10.2.16 The Contractors shall protect and maintain in operation all pipelines, conduits, sewers, drains, poles, wiring and the like that in any way interfere with the Work, whether or not they are specifically show on the Drawings. The Contractor shall see that all such items are protected, supported and/or moved as necessary to adjust them to the Work.

10.3.1 Delete the second sentence and replace as follows:

The Contractor shall not cause or permit any introduction onto, under, or near the Owner's property of any hazardous materials or substances as defined by any applicable law, and shall not cause of permit any release, discharge, transportation, storage, or disposal of such materials or substances onto, under, or near the Owner's property or areas near the Owner's property. If the Contractor encounters or recognizes on the site any material known or reasonably believed to be hazardous, including but not limited to asbestos or polychlorinated biphenyl (PCB), the Contractor shall immediately stop Work in the area affected and report the condition to the Owner and Architect in writing. The Contractor and the Owner shall cooperate in implementing measures to remove or contain said material and the Contractor shall comply with all directions of the Architect in the implementation of such removal or containment.

10.3.2 Delete sub-sections 10.3.2, 10.3.3, and 10.3.4.

10.3.3 In the first sentence insert the terms: "the OPM, MSBA," after "Architect's consultants".

10.3.5 In the first sentence replace "the Owner" with "and hold harmless the Owner, the Architect, the OPM and each of their consultants"

Delete the remainder of the sentence starting after "obligations under" and replace as follows:

Article 10 or for any violation of applicable law related to the Contractor's noncompliance with the provisions of this Article 10.

10.3.6 Delete sub-section 10.3.6.

10.3.7 Add new sub-section 10.3.7 as follows:

§ 10.3.7 The parties anticipate that certain hazardous substances and/or materials may be discovered at the site. When such conditions are set forth in the Contract Documents, the Contractor acknowledges that such conditions have been considered in establishing the Contract Time and Contract Sum. No extension of the Contract Time or increase in the Contract Sum shall be claimed or allowed with respect to any hazardous substances or materials located at the site which were disclosed in the Contract Documents. The Contractor shall strictly comply with all laws, regulations, rules, orders, ordinances and the like related to the excavation, storage, removal and disposal of any such hazardous substances or materials.

ARTICLE 11 INSURANCE AND BONDS

11.1.1 Add to the end of the sub-section the following:

The Contractor shall, before commencing performance of the Contract, provide by insurance for the payment of compensation and the furnishing of other benefits under M.G.L. c.152 to all persons to be employed under the Contract, and the Contractor shall continue such insurance in full force and effect during the term of the Contract. Sufficient proof of compliance with this Subsection must be furnished at the time of execution of this Contract. Failure to provide and continue in force such insurance as aforesaid shall be deemed a material breach of the Contract and shall operate as an immediate termination thereof. No cancellation of such insurance, whether by the insurer or by the insured, shall be valid unless written notice thereof is given by the party proposing cancellation to the other party and to the Owner at least fifteen days prior to the intended effective date thereof, which date shall be expressed in said notice.

11.1.1.1 -11.1.1.6 Add new sub-sections 11.1.1.1 to 11.1.1.6 as follows

11.1.1.1 Contractor's Commercial General Liability.

A. The Contractor shall purchase and maintain general liability coverage on the ISO form CG 00 01 or equivalent, including products and completed operations, on an occurrence basis. The form must be amended to state that the aggregate limit applies on a per location/project basis. The policy shall provide the following minimum coverage to protect the Contractor from claims with respect to the operations performed by Contractor and any employee, subcontractor, or supplier, or by anyone for whose acts they may be liable:

Bodily Injury &	$1,000,000 each occurrence, each person
Property Damage	$3,000,000 general aggregate annually
Products & Completed Operations	$1,000,000 annual aggregate
Personal & Advertising Injury	$1,000,000 each occurrence
Medical Expenses	$5,000

B. This policy shall include coverage relating to explosion, collapse, and underground property damage.

C. This policy shall include contractual liability coverage.

D. The completed operations coverage shall be maintained for a period of three (3) years after Substantial Completion and acceptance by the Owner. The Contractor shall provide renewal certificates of insurance to the Owner as evidence that this coverage is being maintained.

E. If the Work includes work to be performed within fifty (50) feet of a railroad, any exclusion for liability assumed under contract for work within fifty (50) feet of a railroad shall be deleted.

F. This policy shall include the Owner, the Architect, the OPM, the MSBA, the consultant of each, and anyone else requested by the Owner as additional insureds for claims caused in whole or in part by the Contractor's negligent acts or omissions, via endorsements CG 20 10 or ongoing operations and CG 20 37 for completed operations. This policy shall be primary and non-contributory with respect to any other insurance available to additional insureds.

G. The policy shall include endorsement CG 24 04, a Waiver of Subrogation in favor of the Owner and the MSBA.

11.1.1.2 Automobile Liability.

A. The Contractor shall purchase and maintain the following minimum coverage with respect to the operations of any owned, non-owned, and hired vehicles including trailers used in the performance of the work:

Bodily Injury & Property Damage $1,000,000 each accident, each person

B. The policy shall include a CA 99 48 Broadened Pollution Endorsement. If specified in Section 8 below, the Contractor, if hauling contaminants and/or pollutants, must adhere to Sections 29 and 30 of the Motor Carrier Act of 1980, which shall include coverage Form MCS-90.

C. The policy shall name the Owner and the MSBA as additional insureds.

D. The policy shall contain a Waiver of Subrogation in favor of the Owner and the Authority.

11.1.1.3 Contractor's Pollution Liability.

The Contractor shall purchase and maintain coverage for bodily injury and property damage resulting from liability arising out of pollution related exposures such as asbestos abatement, lead paint abatement, tank removal, removal of contaminated soil, etc. The insurance policy shall cover the liability of the Contractor during the process of removal, storage, transport and disposal of hazardous waste and contaminated soil and/or asbestos abatement. The policy shall include coverage for on-Site and off-Site bodily injury and loss of, damage to, or loss of use of property, directly or indirectly arising out of the discharge, dispersal, release or escape of smoke, vapors, soot, fumes, acids, alkalis, toxic chemicals, liquids or gas, waste materials or other irritants, contaminants or pollutants into or upon the land, the atmosphere or any water course or body of water, whether it be gradual or sudden and accidental. The policy shall also include defense and clean-up costs. The Owner, the OPM, the Architect, the MSBA, and the consultants of each shall be named as additional insureds and coverage must be on an occurrence basis. The amount of coverage shall be as follows:

Limit of liability	$1,000,000 per occurrence
	$3,000,000 aggregate

11.1.1.4 Worker's Compensation.

The Contractor shall, before commencing performance of the Contract, provide by insurance for the payment of compensation and the furnishing of other benefits under M.G.L. c.152 to all persons to be employed under the Contract, and the Contractor shall continue such insurance in full force and effect during the term of the Contract. Sufficient proof of compliance with this Sub-section must be furnished at the time of execution of this Contract. Failure to provide and continue in force such insurance as aforesaid shall be deemed a material breach of the Contract and shall operate as an immediate termination thereof. Cancellation of such insurance, whether by the insurer or by the insured, shall be valid unless written notice thereof is given by the party proposing cancellation to the other party and to the Owner at least fifteen days prior to the intended effective date thereof, which date shall be expressed in said notice:

The Contractor shall provide the following coverage in accordance with M.G.L. c. 149 §34S and c. 152, as amended:

Worker's Compensation	Statutory limits
Employer's Liability	$ 500,000 each accident
	$ 500,000 disease per employee
	$ 500,000 disease policy aggregate

The policy shall contain a Waiver of Subrogation in favor of the Owner and the MSBA.

11.1.1.5 Builder's Risk/ Installation Floater/Stored Materials.
The Contractor shall purchase and maintain coverage against loss or damage to the Work included in this Contract. Such coverage shall be on an “all risks” or equivalent form for loss or damage that occurs during the term of the Project. The General Contractor will be responsible for the payment of any deductible under such coverage. Such insurance shall cover the interests of the Owner, the Contractor, Subcontractors and Sub-subcontractors on the Project, as their interests may appear.

The Contractor shall purchase and maintain coverage against loss or damage to the Work in accordance with the following requirements:

A. The Contractor shall purchase and maintain coverage against loss or damage on all Work included in this Contract in an amount equal to the Contract Price. Such coverage shall be written on an all risks basis or equivalent form and shall include, without limitation, insurance against perils of fire (with extended coverage) and physical loss or damage including, without duplication of coverage, theft, vandalism, malicious mischief, terrorism (“certified” and “non-certified”), collapse, earthquake, flood (if the project is not in an "A" or a "V" flood Zone), windstorm, falsework, testing and startup, temporary buildings and debris removal including demolition occasioned by enforcement of any applicable legal requirements, and shall cover reasonable compensation for Architect's and Contractor's services and expenses required as a result of such insured loss. Unless otherwise specified in this Contract, the limits for earthquake and flood shall be the lesser of the Contract Price or $10,000,000. This policy and/or installation floater shall include transportation and Stored Materials coverage in an amount equal to the value of the stored materials as required in **C**. below.

B. When Work will be completed on existing buildings owned by the Owner, the Contractor shall provide an installation floater, in the full amount of the Contract Price. Such coverage shall be written on an all risks basis or equivalent form and shall include, without limitation, insurance against perils of fire (with extended coverage) and physical loss or damage including, without duplication of coverage, theft, vandalism, malicious mischief, collapse, earthquake, flood (if the project is not in an "A” or a "V" flood Zone), windstorm, falsework, testing and startup, temporary buildings and debris removal including demolition occasioned by enforcement of any applicable legal requirements, and shall cover reasonable compensation for Architect's and Contractor's services and expenses required as a result of such insured loss. Unless otherwise specified in this Contract, the limits for earthquake and flood shall be the lesser of the Contract Price or

$10,000,000. This policy and/or installation floater shall include transportation and Stored Materials coverage in an amount equal to the value of the stored materials as required in **C**. below.

C. The Contractor shall maintain insurance on delivered and/or stored material designated to be incorporated in the Work against fire, theft or other hazards. Any loss or damage of whatever nature to such material while stored at an off Site location shall be forthwith replaced by the Contractor at no expense to the Owner or the Authority.

D. The policy or policies shall specifically state that they are for the benefit of and payable to the Authority, the Owner, the Contractor, and all persons furnishing labor or labor and materials for the Contract Work, as their interests may appear. The policy or policies shall list the Authority, the Owner, the Contractor, and Subcontractors of any tier as named insureds.

E. Coverage shall include any costs for work performed by the Designer or any consultant as the result of a loss experienced during the term of this Contract.

F. Coverage shall include permission for temporary occupancy and a Waiver of Subrogation in favor of the Owner and the MSBA.

G. Coverage shall be maintained until final acceptance by the Owner of the Work and final payment has been made.

H. A loss under the property insurance shall be adjusted by the Contractor as fiduciary and made payable to the Contractor as fiduciary for the insureds. The Contractor shall pay the subcontractors their just shares of insurance proceeds received by the Contractor and shall require subcontractors to make payments to their sub-subcontractors in similar manner.

11.1.1.6 Umbrella Coverage

The Contractor shall provide Umbrella Coverage in a form at least as broad as primary coverages required by Sections 2, 3, 4 and 5 of this Article in the following amount unless a higher amount is specified in Section 8 below in which case the Contractor shall provide the higher amount:

Contract Price:	Limit of Liability:
$10,000,001 and over	$25,000,000 per occurrence

11.1.2 Delete sub-section 11.1.2 and replace as follows:

§ 11.1.2 The insurance required by Section 11.1.1 shall include all major divisions of coverage, and shall be on a comprehensive general basis including Premises and Operations (including X-C-U), Owner's and Contractor's Protective, Products and Completed Operations, and Owned, Non-owned, and Hired Motor Vehicles. Such insurance shall be written for not less than any limits of liability required by law or those set forth in the Contract Documents, whichever is greater.

All insurance shall be written on an occurrence basis, unless the Owner approves in writing coverage on a claims-made basis. Coverages, whether written on an occurrence or claims-made basis, shall be maintained without interruption from date of commencement of the Work until date of final payment and any further period during which coverage is required to be maintained after final payment by the Contract Documents. The Owner, the OPM, the Architect and the MSBA shall be named an Additional Insured on all policies.

Coverage for such liability insurance shall be provided by a company or companies reasonably acceptable to the Owner and authorized to do business in Massachusetts. Contractor shall furnish to Owner written confirmation as to the insurance carrier's most current financial ratings prior to commencing work.

11.1.3 Add to the end of the sub-section as follows:

These certificates shall set forth evidence of all coverage required by Sections 11.1.1 and 11.1.2. The Contractor shall furnish to the Owner copies of any endorsements that are subsequently issued amending limits of coverage.

11.1.3.1 Add new sub-sections 11.1.3.1 and 11.1.3.2 as follows:
-11.1.3.2

11.1.3.1 The Contractor shall be responsible for having acceptable insurance coverage provided by or on behalf of all Subcontractors, with such insurance to be similar to that required of the Contractor under the Agreement and these General Conditions. The Contractor shall not allow any Subcontractor to commence Work on the Project prior to the Contractor’s receipt of certificates of insurance that are acceptable in form and limits to the Owner; the Owner shall have no obligation to pay the Contractor for any Work performed by a Subcontractor who has not supplied acceptable insurance certificates prior to starting its Work. The Owner shall be named an additional insured on all such certificates.

11.1.3.2 All insurance policies shall contain provisions or endorsements necessary to assure coverage of claims by one insured against another. All required insurance policies are to be endorsed to state that the Contractor's policies shall be primary to all other insurance available to the Owner and other specified additional insureds for liability arising out of or resulting from the Contractor's operations under the Contract, whether such operations be by the Contractor or by a Subcontractor or by anyone directly or indirectly employed by any of them or by anyone for whose acts any of them may be liable.

11.1.4 Insert "Owner's Project Manager" after (1) the Owner); insert "and the MSBA" after "the Architect's consultants"; and insert "and the MSBA" after "(2) the Owner".

11.2 Delete section 11.2 and replace as follows:

§ 11.2 OWNER'S LIABILITY INSURANCE
The Contractor shall procure and pay for an Owner's policy of Owner's protective liability insurance insuring the Owner and its officers, employees and agents against claims which may arise from operations under the Contract or relating thereto.

11.3.1 Delete sub-section 11.3.1 and replace as follows:

§ 11.3.1 The Contractor shall purchase and maintain property insurance upon the entire Work at the site to the full insurable value thereof. Coverage for such liability insurance shall be provided by a company or companies reasonably acceptable to the Owner. Contractor shall furnish to Owner written confirmation as to the insurance carrier's most current financial ratings prior to commencing work. Such insurance shall include the interests of the Owner, the Contractor, Subcontractors and Sub-subcontractors in the work and shall insure against the perils of fire and extended coverage and shall include "all risks" insurance for physical loss or damage including without duplication, theft, vandalism and malicious mischief. This insurance shall also cover portions of the Work stored off the site or in transit. If this insurance is written with stipulated amounts deductible, the Owner shall not be responsible for any difference between the payments made by the insurance carrier and the claim. The policy shall contain a provision that coverages afforded under policies will not be canceled or allowed to expire until at least 30 days' written notice has been given to the Owner. The Owner shall be named insured within the policy.

11.3.1.1 Delete sub-sections 11.3.1.1, 11.3.1.2, 11.3.1.3, 11.3.1.4, and 11.3.1.5. -11.3.1.5

11.3.2 Delete sub-sections 11.3.2, 11.3.3, 11.3.4, 11.3.5, 11.3.6, and 11.3.7. -11.3.7

11.3.8 Delete the first sentence.

11.3.9 Delete sub-sections 11.3.9 and 11.3.10. -11.3.10

11.3.11 Add new sub-section 11.3.11 as follows:

> § 11.3.11 The Owner shall have the power to adjust and settle with its insurers any loss for which it has obtained insurance.
>
> Upon the occurrence of an insured loss, the Owner and the Contractor shall cooperate with each other and with each other's insurer in the submission of claims and related information and the distribution of any insurance proceeds. If after such a loss no other special agreement is made, replacement of damaged work shall be covered by an appropriate change order.

11.4.1 Delete "Owner shall have the right to require the".

Delete "to" after "Contractor" and replace with "shall".

Delete the end of the sentence starting after "obligations arising thereunder" and replace as follows:

> , each in the amount of 100% of the Contract Price, and each by a surety company qualified to do business under the laws of the Commonwealth of Massachusetts and acceptable to the Owner. The attorney-in-fact who signs the bonds on behalf of the surety, must affix to each bond a certified and current copy of the power of attorney. The Performance and Payment Bonds shall be written in a form satisfactory to the Owner. Such bonds shall remain in effect for the entire duration of the Contractor's warranty obligations.

ARTICLE 12 UNCOVERING AND CORRECTION OF WORK

12.2.1 In the first sentence insert "Owner or" after "the Architect or".

In the second sentence insert "and OPM's" after "Architect's".

Add to the end of the sub-section as follows:

The Contractor shall bear the cost of any loss or damages to the Owner resulting from such failure or defect.

12.2.2.1 Delete the third sentence.

Add to the end of the sub-section as follows:

If the correction or repair of any of the Work is required to avoid impacts to the maintenance, operation or safety of any portion of the Project site or the Owner's property, the Owner reserves the right to undertake the repairs prior to notifying the Contractor or without waiting for the Contractor to respond, without waiving the Owner's rights under the warranties and the Owner's right to correct work under Section 2.4.

ARTICLE 13 MISCELLANEOUS PROVISIONS

13.1 Delete the end of the sentence following the words "by the law of the", and insert the words "Commonwealth of Massachusetts" at the end of the sentence as revised.

To the end of the section add the following:

"All applicable Federal, state and local laws, rules and regulations of all authorities having jurisdiction over the bidding, awarding and construction of the Work shall apply to the Contract throughout, and they will be deemed to be included in the Contract the same as though written out in full.

13.2.1 In the second sentence delete "Except as provided in Section 13.2.2".

13.2.2 Delete sub-section 13.2.2.

13.4.3 Add new sub-section 13.4.3 as follows:

§ 13.4.3 The Owner's rights and the Contractor's obligations under Section 3.18, Article 12 and any other provisions of the Contract Documents that contemplate continuing rights and obligations, respectively, shall survive expiration of the Contract Time and termination of this Agreement.

13.5.1 In the last sentence insert "and OPM" after both instances of "Architect".

13.5.2 In the first sentence insert "OPM after "Architect".

13.5.4 Delete sub-section 13.5.4 and replace as follows:

§ 13.5.4 The Contractor shall obtain and deliver promptly to the Architect any occupancy permit and any certificates of final inspection of any part of the Contractor's work and operating permits for any mechanical apparatus, such as elevators, escalators, boilers, air compressors, etc., which may be required by law to permit full use and occupancy of the premises by the Owner. Receipt of such permits or certificates by the Architect shall be a condition precedent to Substantial Completion of the Work.

13.7 Delete section 13.7.

13.7.1 Add new sub-section 13.7.1 as follows:

§ 13.7.1 It is expressly agreed that the obligations of the Contractor hereunder arise out of contractual duties, and that the failure of the Contractor to comply with the requirements of the Contract Documents shall constitute a breach of contract, not a tort, for the purpose of applicable statutes of limitation and repose. Any cause of action which the Owner may have on account of such failure shall be deemed to accrue only when the Owner has obtained actual knowledge of such failure, not before.

13.8 Add new section 13.8 as follows:

§ 13.8 LIMITATION OF LIABILITY

§ 13.8.1 The Owner shall be liable, if ever, only to the extent of its interest in the Project; and no officer, director, partner, agent or employee of the Owner shall ever be personally or individually liable with respect to this Contract or the Work. Each Subcontract shall include the foregoing limitation, which shall be effective if the Owner ever succeeds to the Contractor's rights and obligations under a Subcontract.

13.9 Add new section 13.9 as follows:

§ 13.9 DEFENSE OF SUITS

§ 13.9.1 The Contractor shall be responsible for, shall defend and pay all costs, attorneys' fees and liabilities both direct and indirect as a result of suits arising out of this Contract.

§ 13.9.2 Neither final acceptance nor occupation of the premises by the Owner shall relieve the Contractor of responsibility for all claims for labor, materials, and equipment arising out of this Contract.

§ 13.9.3 The Contractor shall indemnify and hold harmless the Owner and the Architect, the OPM, the MSBA and their agents and employees from and against all claims, damages, losses, and expenses including attorneys' fees arising out of or resulting from the performance of the work.

13.10 Add new sections 13.10 to 13.16 as follows:
-13.16

§ 13.10 Foreign Corporations – If the Contractor is a foreign corporation, it shall comply with M.G.L. c.181, §§ 3, 4 and 5 (and other applicable provisions of M.G.L. c.181), and M.G.L. c.30, § 39L.

§ 13.11 Certification of Tax Compliance – By entering into a Contract with the Owner, the Contractor certifies under the penalties of perjury, pursuant to M.G.L. Chapter 62C, Cetion 49A(b), that it has complied with all laws of the Commonwealth of Massachusetts relating to taxes, to the reporting of employees and Contractors, and to the withholding and remitting of child support.

§ 13.12 Conflict of Interest – The Contractor understands that the Massachusetts Conflict of Interest Law, Chapter 268A of the Massachusetts General Laws, applies to the Contractor with respect to the services required to be provided under this contract. The Contractor and its officers, employees, agents, Subcontractors and affiliated agencies shall not participate in any activity which constitutes a violation of the Massachusetts Conflict of Interest Law or which creates an appearance of a violation of the Massachusetts Conflict of Interest Law.

§ 13.13 International Boycott – The Contractor shall not participate in or cooperate with an international boycott, as defined in Section 999 (b)(3) and (4) of the Internal Revenue Code, as amended, or engage in conduct declared to be unlawful by Section 2 of Chapter 151E of the Massachusetts General Laws.

§ 13.14 Non-Collusion – By entering into this Contract with the Owner, the Contractor certifies under penalties of perjury that its bid has been made and submitted in good faith and without collusion or fraud with any person. As used in this certification, the word “person” shall mean any natural person, business, partnership, corporation, union, committee, club, or other organization, entity, or group of individuals.

§ 13.15 Independent Contractor Status – The Contractor shall provide services under any Contract with the Owner as an independent contractor and not as an employee of the Owner. No employee, agent or representative of the Contractor shall be entitled to receive any benefits of employment with the Owner, including without limitation salary, overtime, vacation pay, holiday pay, sick leave, health insurance, life insurance, pension, or deferred compensation.

§ 13.16 All contractual requirements required by law and Executive Order shall be deemed to be included in this contract as if fully set forth herein.

ARTICLE 14 TERMINATION OR SUSPENSION OF THE CONTRACT

14.1.1 Insert in the beginning of the first sentence as follows:

Provided that the Contractor is not in breach of any of its obligations under the Contract,

Delete sub-headings .1, .2, and .4.

Add to the end of sub-heading .3 as follows:

or Owner fails for 30 days to pay Contractor any sum finally determined to be due, whichever is later.

14.1.2 Delete sub-section 14.1.2.

14.1.3 Delete sub-section 14.1.3 and replace as follows:

§ 14.1.3 If one of the above reasons exists, the Contractor may, upon seven days written notice to the Owner and Architect and unless Owner or Architect do not remedy such suspension or failure within that time, terminate the Contract and recover from the Owner payment for Work properly executed and for all materials or equipment not incorporated in the Work, but delivered and suitably stored at the site. The payment for materials or equipment stored at the site shall be conditioned upon submission by the Contractor of bills of sale or such other evidence as is satisfactory to the Owner to establish the Owner's title to such material or equipment or otherwise protect the Owner's interest.

In lieu of terminating the Contract as aforesaid, Contractor may, seven days after written notice to the Owner and Architect and unless Owner and Architect do not remedy such suspension or failure within that time, stop the Work until payment is made of all such amounts due Contractor. The provisions of this paragraph are not intended to preclude Contractor from submitting a Claim for an adjustment in Contract Sum or Contract Time or otherwise for expenses or damage directly attributable to Contractor's stopping the Work as permitted by this paragraph.

14.1.4 Delete sub-section 14.1.4.

14.2.1 Delete "repeatedly" from the beginning of sub-headings .1 and .3.

Insert new sub-headings .4 and .5 after sub-heading .3 as follows:

.4 becomes the subject of a voluntary petition in bankruptcy or any voluntary proceeding related to insolvency, receivership, liquidation or comparable proceeding or any assignment for the benefit of creditors or becomes the subject of an involuntary petition in bankruptcy or any involuntary proceeding related to insolvency, receivership, liquidation or comparable proceeding or any assignment for the benefit of creditors.

.5 submits three successive Applications for Payment, each of which indicate that the actual Work completed is less than 90 percent of the values estimated in the construction schedule (submitted by the Contractor pursuant to Section 3.10.1) to be completed by the respective dates.

14.2.2 In the first sentence delete ",upon certification by the Initial Decision Maker that sufficient cause exists to justify such action,".

Delete the second sentence of sub-heading .3.

14.2.4 In the first sentence:

Insert "all costs and losses incurred by the Owner on account of the Contractor's failure to comply with the Contract Documents and" after "the Work, including".

Insert "and Owner's Project Manager's" after "for the Architect's".

Delete the last sentence of the sub-section and replace as follows:

The Owner shall be entitled to hold all amounts due the Contractor at the date of termination until all of the Owner's damages have been established, and to apply such amounts to such damages.

14.3.2 Insert ", subject to compliance with the conditions of Section 8.3." at the end of the first sentence.

Delete the second sentence.

14.4.2 In sub-heading .3 delete "and" after "all existing contracts" and replace with "except for subcontracts, if any, that Owner elects to assume, terminate all".

14.4.3 Delete sub-section 14.4.3 and replace as follows:

§ 14.4.3 In the event that the Contract is terminated for the Owner's convenience, the Contractor shall be reimbursed in accordance with the Contract Documents for all Work properly performed up to the termination date, and for all materials or equipment not incorporated in the Work, but delivered and suitably stored at the site. Payment for materials or equipment stored at the site shall be conditioned upon submission by the Contractor of bills of sale or such other evidence as is satisfactory to the Owner to establish the Owner's title to such material or equipment or otherwise protect the Owner's interest. The Contractor shall not be entitled to payment for overhead and profit on the Work not executed.

ARTICLE 15 CLAIMS AND DISPUTES

15.1.1 Delete sub-section 15.1.1 and replace as follows:

§ 15.1.1 DEFINITION
The word "Claim" shall mean a written demand by the Contractor for an increase in the Contract Time or the Contract Sum. The Contractor is responsible for substantiating its Claims. The word "Claim" shall not include claims by the Owner. The Owner may withhold from the Contractor the value of any claims against the Contractor in accordance with Massachusetts General Laws, including, but not limited to, Sections 39G and 39K of Chapter 30.

15.1.2 Delete sub-section 15.1.2 and replace as follows:

§ 15.1.2 NOTICE OF CLAIMS
Contractor must initiate Claims within fourteen (14) calendar days after occurrence of the event giving rise to such Claim by written notice to the Architect and the Owner. Such written notice must (1) be signed by the Contractor; (2) conspicuously identify on its face that the notice serves as a notice of claim; (3) explain in sufficient detail the basis of the Claim; (4) identify the date of the event giving rise to such Claim; and (5) state the exact dollar amount of the increase in the Contract Sum being requested, if any, and the number of days extension to the Contract Time sought, if any.

15.1.3 Add after the word “Claim” as appearing in the first sentence as follows:

or any other dispute hereunder

Delete “Section 9.7 and” after “as provided in”.

Delete the final sentence.

15.1.4 Delete sub-section 15.1.4 and replace with the following:

§ 15.1.4 Claims for Additional Cost
If the Contractor believes that it has incurred or will incur additional costs as a result of any acts or omissions of the Owner or the Architect, including any interpretations, instructions or orders, whether oral, written, by Drawings, or otherwise, or as a result of any other event, circumstance or occurrence, the Contractor shall promptly (and in any event within the time period specified in Subsection 15.1.2) so notify the Architect and the Owner in writing of such Claim as provided in Subsection 15.1.2 and shall not proceed with the Work relating to such Claim until the Contractor has received a further written order to proceed except, as provided in Section 10.4, in the case of an emergency affecting life or property. No Claim by the Contractor on account of such interpretations, instructions or orders, or other acts, omissions, events, circumstances or occurrences shall be valid unless the Contractor has so notified the Architect and the Owner, before proceeding, and has received a further written order to proceed.

15.1.5.1 In the second sentence delete “of cost and” after “include an estimate”.

15.1.5.2 Delete sub-section 15.1.5.2.

15.1.5.3 Add new sub-sections 15.1.5.3 to 15.1.5.4 as follows:
-15.1.5.4

§ 15.1.5.3 The Contractor shall give prompt written notice to the Architect and the Owner of any cause which will result (or has resulted) in delay for which the Contractor claims or intends to claim an extension of the Contract Time, including those causes which the Owner or the Architect is responsible for or has knowledge of, such as any acts or omissions of the Owner or the Architect, including interpretations, instructions or orders, whether oral, written, by Drawings or otherwise, or any other event, circumstance or occurrence. Such notice shall be given as soon as practicable after the occurrence of the event or circumstance giving rise to the delay, and in any event not later than 21 days after such event, circumstance or occurrence. Such written notice shall (1) explicitly state

that a time extension is claimed; (2) state in detail the circumstances which form the basis of the delay; and (3) describe as fully as practicable at the time the date of commencement and duration or expected duration of the delay and its effect on the schedule for the various parts of the Work. The Contractor shall provide such supporting documentation as the Owner or Architect may require, including, where appropriate, a time impact analysis or a revised construction schedule indicating all of the activities affected by the circumstances which form the basis for the Claim. The submission of such written notice within the time period provided above shall be a condition precedent to any extension of the Contract Time, otherwise the Claim shall be waived. In addition, if the Contractor fails (other than for reasons beyond the Contractor's control) to give notice of a delay promptly following the occurrence of the event or circumstance giving rise to the delay, and if such failure to promptly give notice causes damage or prejudice to the Owner by affecting the Owner's ability to mitigate such delay or the costs or other consequences arising from such event, circumstance or occurrence or the delay resulting therefrom, then the Contractor shall be responsible for the costs or delays incurred as a result of such failure of the Contractor to provide prompt notice, notwithstanding that the Contractor submits notice within such 21-day period.

§ 15.1.5.4 Whenever the Contractor claims an extension of the Contract Time, only the unavoidable delay caused to completion of the Work as a whole shall be considered in measuring or evaluating the extent of the delay. If, for example, remaining work can be re-sequenced, or extra work can be (or could have been) performed along with the regular work called for by the Contract Documents so as to eliminate a delay in the progress or completion of the Work or some part thereof, without causing necessary delay to such regular work, no Claim for extension of the Contract Time shall be granted. The Contractor shall have the burden of demonstrating the effect of the claimed delay on the Contract Time. In any event, even though a cause of delay meets all of the above conditions, any extension shall be granted only to the extent that the effect of such cause cannot be (or could not have been) avoided or mitigated by the exercise of all reasonable precautions, efforts and measures (including planning, scheduling and rescheduling), whether before or after the occurrence of the cause of delay. No extension shall be granted for any delay which, in whole or in part, results from or arises out of the act or omission of the Contractor or its Subcontractors or others performing the Work. Any extension of the Contract Time allowed hereunder shall be net of any contingency or “float” time included in the Progress Schedule.

As soon as practicable after giving notice of a Claim, the Contractor shall submit to the Owner and the Architect a Contractor Change Request as provided in Article 7. The Contractor understands and agrees that the requirements of Section 15.1 are to be strictly adhered to and that none of the requirements of the Contract Documents relating to Claims shall be waived by the Owner by course of dealing, orally or informally, and that neither the Architect nor any other representative of the Owner is authorized to waive any such requirements.

15.1.6 Delete sub-section 15.1.6.

15.2.1 In the third sentence:

Delete "mediation" after "condition precedent to" and replace with "litigation".

Delete the end of the sentence beginning after "payment is due".

15.2.2 Delete sub-section 15.2.2 and replace as follows:

§ 15.2.2 The Initial Decision Maker will review Claims and within 30 days of the receipt of the Claim take one or more of the following actions: (1) request additional supporting data from the Contractor; (2) notify the Contractor that the Initial Decision Maker requires additional time to resolve the Claim; and/or (3) reject the Claim in whole or in part.

15.2.3 Delete the last sentence.

15.2.4 Delete sub-section 15.2.4 and replace as follows:

§ 15.2.4 If the Architect requests the Contractor to furnish additional supporting data in connection with a Claim, the Contractor shall provide such data within ten (10) calendar days of such request. If the Contractor is of the opinion that it is impossible to provide such data within such time, the Contractor shall notify the Architect of such opinion in writing within such ten-day period. If the Architect determines that it is impossible for such data to be provided within such ten-day period through no fault of the Contractor, the Contractor shall provide such data within 30 calendar days of the Architect's request, unless the Architect fixes another date, in which case the data must be submitted by the date so fixed. Failure of the Contractor to provide such data within the time prescribed herein shall result in the irrevocable waiver of the Claim.

15.2.5 Delete the last sentence and replace as follows:

> The rejection of a claim by the Architect and any decisions of the Owner with respect to the same, and the interpretations by the Architect of the plans, drawings and specifications, shall be final and binding on the Contractor in accordance with Section 39J of Chapter 30 of the Massachusetts General Laws.

15.2.6 Delete sub-section 15.2.6 in its entirety.

15.2.7 Delete the capitalized word, "Claim," and replace with lower-case word, "claim," in the first and second sentences.

15.2.8 Delete sub-section 15.2.8.

15.3 Delete sections 15.3 and 15.4 in their entirety.
-15.4

16. Add Article 16 as follows:

16 CONTRACTOR'S ACCOUNTING METHOD REQUIREMENTS

§ 16.1 The word defined herein shall have the meaning stated below whenever they appear in this Article 16:

§ 16.1.1 "Contractor" means any person, corporation, partnership, joint venture, sole proprietorship, or other entity awarded a Contract as defined in Subsection 16.1.2.

§ 16.1.2 "Contract" means any contract awarded or executed pursuant to M.G.L. c.7, §38A1/2 - 380, inclusive, and any contract awarded or executed pursuant to M.G.L. c. 25A, §1 1C, M.G.L. c. 30, §39M, or M.G.L. c.149, §44A-44H, inclusive, which is for an amount or estimated amount that exceeds the dollar amount set forth in M.G.L. c.30, §39R.

§ 16.1.3 "Records" means books of original entry, accounts, checks, bank statements and all other banking documents, correspondence, memoranda, invoices, computer printouts, tapes, discs, papers and other documents or transcribed information of any type, whether expressed in ordinary or machine language.

§ 16.1.4 "Independent Certified Public Accountant" means a person duly registered in good standing and entitled to practice as a certified public account under the laws of the place of his residence or principal office and who is in fact independent. In determining whether an accountant is independent with respect to a particular person, appropriate consideration should be given to all relationships between the accountant and that person or any affiliate thereof. Determination of an accountant's independence shall not be confined to the relationships existing in connection with the filing of reports with Owner.

§ 16.1.5 "Audit," when used in regard to financial statements, means an examination of records by an independent certified public accountant in accordance with generally accepted accounting principles and auditing standards for the purpose of expressing a CERTIFIED opinion thereon, or, in the alternative, a qualified opinion or a declination to express an opinion for stated reasons.

§ 16.1.6 "Accountant's Report," when used in regard to financial statements, means a document in which an independent certified public accountant indicates the scope of the audit which he has made and sets forth his opinion regarding the financial statements taken as a whole with a listing of noted exceptions and qualifications, or an assertion to the effect that an overall opinion cannot be expressed. When an overall opinion cannot be expressed the reason therefor shall be stated. An accountant's report shall include as a part thereof a signed statement by the responsible corporate officer attesting that management has fully disclosed all material facts to the independent certified public accountant, and that the audited financial statement is a true and complete statement of the financial condition of the Contractor.

§ 16.1.7 "Management," when used herein, means the chief executive officers, partners, principals, or other person or persons primarily responsible for the financial and operational policies and practices of the Contractor.

§ 16.1.8 Accounting terms, unless otherwise defined herein, shall have a meaning in accordance with generally accepted accounting principles and auditing standards.

§ 16.2 Subsection 16.1.2 hereof notwithstanding:

§ 16.2.1 The Contractor shall make, and keep for at least six years after final payment, books, records, and accounts which in reasonable detail accurately and fairly reflect the transactions and dispositions of the Contractor.

§ 16.2.2 Until the expiration of six years after final payment, the Owner and office of inspector general shall have the right to examine any books, documents, papers or records of the Contractor or of his Subcontractors that directly pertain to, and involve transactions relating to, the Contractor or his/her Subcontractors.

§ 16.2.3 If the agreement is a contract as defined herein, the Contractor shall describe any change in the method of maintaining records or recording transactions which materially affect any statements filed with the Owner, including in his description the date of the change and reasons therefor, and shall accompany said description with a letter from the Contractor's independent certified public accountant approving or otherwise commenting on the changes.

§ 16.2.4 If the agreement is a contract as defined herein, the Contractor has filed a statement of management on internal accounting controls as set forth in Section 16.3 below prior to the execution of the contract.

§ 16.2.5 If the agreement is a contract as defined herein, the Contractor has filed prior to the execution of the contracts and will continue to file annually, an audited financial statement for the most recent completed fiscal year as set forth in Section 16.5 below.

§ 16.3 Every Contractor awarded a contract shall file with the Owner a statement of management as to whether the system of internal accounting controls of the Contractor and its subsidiaries reasonably assures that:

.1 transactions are executed in accordance with management's general and specific authorization;

.2 transactions are recorded as necessary:

(i) to permit preparation of financial statements in conformity with generally accepted accounting principles, and

(ii) to maintain accountability for assets;

.3 access to assets is permitted only in accordance with management's general or specific authorization; and

.4 the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action was taken with respect to any difference.

§ 16.4 Every Contractor awarded a contract shall also file with the Owner a statement prepared and signed by an independent certified public accountant, stating that he has examined the statement of management on internal accounting controls, and expressing an opinion as to

.1 whether the representations of management in response to this Section and Section 16.2 above are consistent with the result of management's evaluation of the system of internal accounting controls; and

.2 whether such representations of management are, in addition, reasonable with respect to transactions and assets in amounts which would be material when measured in relation to the applicant's financial statements.

§ 16.5 Every Contractor awarded a contract by the Commonwealth or by any political subdivision thereof shall annually file with the Division of Capital Asset Management and Maintenance during the term of the contract a financial statement prepared by an independent certified public accountant on the basis of an audit by such accountant. The final statement filed shall include the date of final payment. All statements shall be accompanied by an accountant's report.

17. Add Article 17 as follows:

17 NON-DISCRIMINATION AND AFFIRMATIVE ACTION REQUIREMENTS

§ 17.1 Refer to SECTION 00100-INSTRUCTIONS TO BIDDERS, Article 3 and Appendix A for contractual requirements.

18. Add Article 18 as follows:

18 EQUAL MBE AND WBE GOALS AND PARTICIPATION

§ 18.1 Refer to SECTION 00100-INSTRUCTIONS TO BIDDERS, Article 4 and Appendix B for contractual requirements.

423687v2/KOPE/0068

Part B
Specifications

Division 1
General Requirements

SECTION 011000

SUMMARY OF WORK

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

C. The General Contractor is responsible for the work of this Section unless otherwise noted herein.

1.02 CONTRACT CONDITIONS SPECIFICALLY REQUIRED BY LAW

A. This Contract is subject to all State and local laws, and all amendments thereto, and where any requirements contained herein do not conform to such statutes governing that construction work of this Contract, the statutes shall govern.

B. Special attention shall be given to the requirements of Chapter 30, Section 9 (1), of the General Laws of the Commonwealth of Massachusetts, and all amendments thereto, concerning conformity of work with the Contract Documents; deviations; certificates; penalties; and the provisions contained herein are hereby made a part of this Contract as if set forth in full herein.

C. Every employee in public work shall lodge, board, and trade where and with whom he elects; and no person or his agents or employees under Contract with the Commonwealth, a county, city, or town, or with a department, board, commission, or officer acting therefor for the doing of public work shall directly or indirectly require as a condition of employment there in that the employee shall lodge, board, or trade at a particular place or with a particular person, and compliance with this provision of law is a condition of this Contract.

D. The General Contractor shall, before commencing performance of this Contract, provide by insurance for the payment of compensation and furnishing of other benefits under the General Laws, Chapter 152, to all persons to be employed under this Contract, and the General Contractor shall continue such insurance in full force and effect during the term of this Contract.

1.03 WORK UNDER THIS CONTRACT

A. The work to be performed under this Contract, NEW AMESBURY ELEMENTARY SCHOOL, is as follows:

1. Furnish all plant, labor, equipment, appliances and materials and perform all operations required for the construction of the NEW AMESBURY ELEMENTARY SCHOOL, Amesbury, MA, including all designated site development scope of work.

B. The work described by:

1. These Specifications, as enumerated in the "Table of Contents".
2. Plans as numbered on List of Drawings.
3. Addenda issued during the bidding period which are hereby made a part of the Specifications.
4. The printed form of Contract.

C. The distribution of work in these Specifications.

1. It is intended to be described under the appropriate trade.
2. May be redistributed, except as directed herein, provided no controversy will arise among the trades and progress will not be delayed.

D. The committing of nuisances on the land of the Project and adjacent property shall be rigorously prohibited and adequate steps taken to prevent it.

1.04 OFF-SITE REMOVAL OF SOILS

A. Topsoil and excavated soils from the limit of work areas not scheduled to be used on site shall be removed from site and disposed. Refer to SECTION 312000-EARTHWORK for quantities and protocol.

B. Refer to the “Transportation Routes for Construction Vehicles” map appended to SECTION 013100-PROJECT PROCEDURES.

1.05 WORK TO BE PERFORMED UNDER SEPARATE CONTRACTS

A. Telecommunications system.

B. Computer networking.

C. Furnishings and equipment.

1.06 EQUIPMENT

A. Equipment noted N.I.C. (Not In Contract) on the drawings will be purchased by the Owner under a separate contract and will be delivered to the building and installed by the equipment supplier. Movable equipment and furniture purchased by the Owner will be received and placed in position by the Owner or the Owner’s installer.

1.07 ITEMS PROVIDED BY THE OWNER

A. The following items are to be furnished by the Owner for installation under the designated SECTIONS:

1. Liquid soap dispensers, hand sanitizer dispensers, toilet tissue dispensers and paper towel dispensers: SECTION 062000-FINISH CARPENTRY.

1.08 COORDINATION, COOPERATION, AND GIVING INFORMATION

A. The General Contractor shall give full cooperation to all Subcontractors and shall furnish all information necessary to permit the Work to be installed satisfactorily and with the least possible interference or delay.

B. Structural material shall not be relocated, altered, or changed in any way to accommodate the work.

C. Obtain detailed information from the manufacturer of all equipment to be furnished and provided as to method of installing. At the start of construction check all Contract Documents including all Drawings and all sections of the specifications for equipment requiring electrical connections and service and verify electrical characteristics of equipment prior to roughing.

D. The General Contractor shall coordinate the exchange of shop drawings between Subcontractors.

E. The General Contractor shall transmit to the Subcontractors, as soon as possible after approval, two copies of approved shop drawings of equipment which require connections, or such equipment as specified under other sections of the specifications.

F. Equipment and systems shall not be installed without first coordinating the location and installation of equipment and systems with the Contractor and all other Subcontractors. Notify the General Contractor of congested and problem areas prior to installation of Work or preparation of shop drawings and do not proceed with the installation in problem areas until instructed by the General Contractor. Any material installed or Work performed in violation of this requirement shall be readjusted and corrected without charge.

G. When additional work, change to the work, or a revision or modification of the Work is authorized, provide the required additional material, equipment, personnel and workmen to prevent delays in the Work and to complete the Work within the time limit of the Contract.

H. For additional information refer to the General Conditions of the Contract.

1.09 CUTTING, CORING AND PATCHING

A. All necessary cutting, drilling, grouting and patching to fit together properly the several parts of the work shall be performed by the General Contractor, except as may be specifically noted otherwise under any particular sub-trade section of the specifications.

1.10 CONSTRUCTION PHASING/SIMULTANEOUS OCCUPANCY

A. The existing Cashman Elementary School will remain in use by the Owner during and after the construction of the new Amesbury Elementary School. All work in the Cashman Elementary School and at the portions of the site reserved for Cashman School use as shown on the Phasing Drawings shall be coordinated to minimize disruption to school operations.

1. All existing systems, security and means of egress must be maintained. If such systems, security and egress elements require disruption because of construction, temporary alternative systems in full compliance with all relevant codes must be provided, at no additional cost to the Owner, to insure the continuing function of school's operations.

B. Attention is called to the fact that this facility is a public school, and all necessary precautions shall be taken to ensure the continuous safety of the staff, students and visitors occupying the facility during all phases of the work.

C. Refer to the Phasing Plan Drawings and other Contract Documents for information concerning phasing:

1. All work in and around the Cashman Elementary School must be completed during summer vacation and school break periods. The work performed in Phase 2 and Phase 4, corresponding to the Cashman Elementary School summer vacation 2021 and 2022, must be commenced after the final day of classes in June and be completed, including all required permits for occupancy and other inspections, prior to the start of school in August. Full beneficial use of the Cashman Elementary School, entry drive, parking lot, service area and pedestrian walkways is required during Phases 1, 3 and 5 as shown on the Phasing Drawings.

2. Summer Phase Substantial Completion requirements:

Portion of the Work	Substantial Completion Date
Phase 2: Any and all work commenced in Phase 2 affecting the full operation of the Cashman Elementary School including: the entry drive, roads, parking lot, service area and pedestrian walkways and temporary patching of same.	August 23, 2021
Phase 4: All work indicated on Phasing Drawing G.0.07 (Phase 4) and work indicated on G.0.05 (Phase 2) deferred to Phase 4, required for the full operation of the Cashman Elementary School including: the entry drive, parking lot, service area and pedestrian walkways.	August 21, 2022

D. The General Contractor shall submit to the Owner a Construction Progress Schedule showing the project phases for approval. Refer to SECTION 013310-PROGRESS SCHEDULE.

E. For additional information refer to the Owner and General Contractor Agreement and the General Conditions of the Contract.

1.11 CERTIFIED WELDERS

A. Structural welds shall be made only by operators who have been qualified by tests, as prescribed in the "Standard Qualification Procedure" of the American Welding Society, to perform the type of work required.

B. Pipe welds shall be made only by operators who have been qualified by the National Certified Pipe Welding Bureau and the operator's qualification record shall be submitted to the Architect before any work is performed.

C. Shop welding shall be in accordance with the "Code for Welding in Building Construction."

1.12 EXAMINATION OF SITE AND DOCUMENTS

A. All trade bidders shall visit the site and examine all Contract Documents before submitting a bid. Inspect and be thoroughly familiar with same and conditions under which work will be carried out. Neither the Owner nor the Architect will be responsible for errors, omissions and/or charges for extra work arising from General Contractor or Subcontractor's failure to familiarize themselves with Contract Documents or existing conditions. By submitting a bid, the trade bidder agrees and warrants that he has examined the site and the Construction Documents, that he is familiar with the conditions and requirements of both and where they require, in any part of the work, a given result to be produced that the Contract Documents are adequate and that he will produce the required result.

B. **A non-mandatory Pre-Bid Conference has been scheduled for Thursday, March 18, 2021 at 3:00 PM at the Cashman School parking lot near the service entry at 193 Lions Mouth Road – held at the site. Note: Attendees must follow proper COVID-19 protocols. Wearing a mask is mandatory.**

1.13 EXISTING UTILITIES

A. Existing active utility lines indicated on the Drawing, including without limitation, cables, ducts, conduits, and piping shall, if damaged, be immediately repaired, inspected by the utility company, protected and maintained in use at no additional cost to the Owner.

B. The General Contractor shall notify the Owner in writing ten days in advance of the proposed time for shutting down or interrupting any utilities, services, or facilities which may affect the operation of other buildings, services, or facilities of the Owner. Unless otherwise authorized by the Owner, he shall schedule and coordinate his work that such interruption will occur on weekends, holidays, or before or after the normal working day of the Owner's facilities. In no case shall any shutdown or interruption of any utilities, services, or facilities be made without the approval and authorization of the Owner.

C. In the event that an active utility line is encountered which is not indicated on the drawings, immediately notify the utility company and the Architect of the exact location, size and type of utility line encountered. Such utility line, if damaged, shall be immediately repaired, inspected by the Utility Company, protected and maintained in use by the General Contractor. If the Architect determines that such line be relocated, abandoned, cut and capped, or other wise altered, the General Contractor shall consult the Utility Company and has the applicable site subcontractor perform required work. The Contract price will be adjusted in accordance with the terms of the Owner and General Contractor Agreement.

D. The Owner will cooperate fully, at the General Contractor's request in assisting the General Contractor and their site subcontractor in locating and identifying underground utilities.

E. The General Contractor must notify "Dig-Safe" of contemplated excavation, demolition, or explosive work in public or private ways, and any Utility Company Right of Way or Easement. They are located in Wilmington, MA, telephone number 811 or 1-888-344-7233.

1. This notification must be made at least 72 hours prior to the work, but not more than sixty days before the contemplated work. Such notice shall set forth the name of the street or the route number of said way and an accurate description of the location and nature of the proposed work.
2. The Owner requires that the notification be sent to "Dig-Safe" by Certified Mail.
3. "Dig-Safe" is required to respond to the notice within 72 hours from the time said notice is received by designating at the locus the location of pipes, mains, wires or conduits.
4. The General Contractor shall not commence work until "Dig-Safe" has responded as noted above. The work shall then be performed in such a manner, and with reasonable precautions taken to avoid damage to utilities under the surface in said areas of work.

1.14 OWNER RIGHT TO PERFORM WORK AND TO AWARD SEPARATE CONTRACTS

A. The Owner reserves the right to perform work related to the Project with its own forces and to award separate contracts in connection with other portions of the Project or other work on the premises under these or similar Conditions of the Contract. If the General Contractor claims that delay or additional cost is involved because of such action by the Owner, he shall make such claim as provided elsewhere in the Contract Documents.

B. When separate contracts are awarded for different portions of the Project or other work on the premises, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner/Contractor Agreement.

C. The Owner will provide for the coordination of the work of its own forces and of each separate contractor with the Work of the General Contractor, who shall cooperate therewith as provided under article below entitled MUTUAL RESPONSIBILITY.

1.15 MUTUAL RESPONSIBILITY

A. The General Contractor shall afford the Owner and separate contractors/vendors reasonable opportunity for the introduction and storage of their materials and equipment and the execution of their work and shall connect and coordinate his Work with theirs in accordance with the Contract Documents.

B. It is the intent of the Owner to award separate contracts for the work noted in paragraph 1.04:

1. Wiring and related equipment for various systems shall involve spaces within the building.

2. Furnishings and equipment items are to be installed in the building the final weeks of the construction period.

C. With regard to the separate contracts noted in paragraph B above, it is intended that all wiring by run concealed in partitions, ceilings, and similar items as regards to insuring a complete installation. Accordingly, the General Contractor shall give the Owner a minimum of 60 calendar day notice relative to the time that these areas will be ready for work by the separate contractors and coordinate these working schedules to accommodate the work of these separate contractors.

D. In order for the General Contractor to sufficiently coordinate this work and give proper notice to the Owner, the Owner, upon request, will give the General Contractor a detailed scope of work for these separate contracts including time schedules involved within 120 days of the Notice to Proceed.

E. Any specific provisions for these separate Contractors other than as noted above, are indicated on the contract drawings or in other SECTIONS of this specification.

1.16 ON-SITE OWNER'S REPRESENTATIVE AND OWNER'S PROJECT MANAGER (OPM)

A. An on-site Owner's representative shall be engaged by the Owner through the open representative. The representative shall represent the Owner and the Architect, and the representative will keep close watch over the progress of the work, but he shall have no authority to speak for or in any manner bind the Owner or the Architect.

B. The Owner designates the Owner's Project Manager (at times referred to in the Contract Documents as the "OPM"), to represent the Owner during the progress of the Project. The Owner's Project Manager shall report to and advise the Owner in accordance with the agreement between those parties. The Owner's Project Manager shall not, by undertaking to represent the Owner, incur any obligation to the General Contractor, and nothing stated herein shall act to create any contractual relationship between the General Contractor and the Owner's Project Manager. The Owner's Project Manager shall not have the authority to direct changes in the Work, or to agree to an adjustment of the Contract Time or the Contract Sum.

1.17 TESTS AND INSPECTIONS

A. The General Contractor shall coordinate and provide access for such tests and inspections of workmanship and materials as may be required by the Building Code, State or municipal laws, or as called for under the various SECTIONS of the Specifications.

B. All expense attached to such tests and inspections, unless otherwise specified under the various SECTIONS of the Specifications shall be borne by the applicable subcontractor, who shall furnish all labor, tools, instruments, water, temporary power and light, construction and equipment necessary for these tests and inspections. Records of all tests and inspections shall be furnished to the Architect. The General Contractor's applicable Subcontractor's shall remove all temporary work, materials, and equipment upon completion of test and inspections.

C. Where in the various SECTIONS of the Specifications, inspection and testing of materials, processes, and the like is called for, the selection of bureaus, laboratories, and/or agencies for such inspection and testing shall be subject to approval of the Architect.

D. Should any material or work be found, after testing or inspection, to be defective or inferior, such material and/or work shall be removed and replaced with new sound materials and/or work as approved by the Architect. The removal and replacement herein called for shall be at the applicable subcontractor's expense.

1.18 MATERIALS AND WORKMANSHIP

A. All materials required for the performance of this Contract shall be new and of best quality of kinds specified, all subject to the approval of the Architect. The use of old or second-hand materials is strictly forbidden except if called for in the CONTRACT DOCUMENTS. The General Contractor shall, if required by the Architect, furnish satisfactory evidence as to the kind and quality of material and workmanship. Materials shall be used in accordance with the manufacturer's printed instruction unless otherwise specified. Upon request of the Architect to the General Contractor, the manufacturer's representative shall go to the site and instruct the mechanics in the use of the materials or shall supervise their use.

B. For the execution of the work to be performed under this Contract and for the manufacturer or transportation of any of the materials or appliances to be used or installed, the General Contractor shall employ only such labor throughout as will not interfere with the speedy and uninterrupted completion of the building. All work shall be done by mechanics skilled in their trade.

C. All materials shall be ordered, manufactured, and delivered at such times and in such manner as tol insure the speedy and uninterrupted progress of the work, the least obstruction to the premises; and such materials shall be so distributed as to cause no overloading at any point. If any material so stored obstructs the progress of any portion of the various parts of the work, they shall be moved from place to place or from the premises, as the Architect may direct, at the expense of the Subcontractor involved.

D. Before making any shipment of materials to the building, the General Contractor shall ascertain whether the building is in a condition to receive the shipment. Where this provision is neglected, and material is delivered to the building when the latter is not in condition to receive it, such materials shall be stored elsewhere at the expense of the Subcontractor involved.

E. After signing of the Contract, the substitution will not be permitted of any materials or method of construction, unless otherwise approved by the Architect.

1. Should the specified materials or construction not be available through reasons beyond the control of the General Contractor, the question shall be immediately referred to the Architect for decision before proceeding with the work.

F. The General Contractor and his Subcontractors shall carry on the work with the greatest reasonable speed, consistent with first-class workmanship, and without interfering with or delaying the work of others.

G. Any materials delivered, or work performed, contrary to the CONTRACT DOCUMENTS and approved shop drawings, shall be removed by the General Contractor or the Subcontractor at fault, at his own expense, and the same shall be replaced with other materials or work satisfactory to the Architect. The General Contractor or Subcontractor at fault shall also assume the cost of replacing the work which may be disturbed while making good the defective work.

H. The Architect, however, reserves the right to allow such defective materials or workmanship to stand, in which case an amount equal to the difference in value between the work and material provided and that specified shall be deducted form the amount due or to become due under the Contract. If a suitable mutually agreeable credit cannot be worked out defective material or workmanship shall be replaced.

I. Any specified materials or work shown on the Drawings which the General Contractor cannot guarantee against defects shall be called to the attention of the Architect in writing before installation in the building. Installation without such notice shall bind the General Contractor to his full guarantee.

1.19 GLASS BREAKAGE

A. The General Contractor shall be responsible for all breakage of glass, from the time construction operations commence until the project is occupied by the Owner. The General Contractor shall replace all broken glass and deliver the building with all glazing intact, labels removed, and clean.

1.20 TIMES FOR COMPLETION AND LIQUIDATED DAMAGES

A. Refer to the Owner-General Contractor Agreement **and the General Conditions of the Contract.**

B. Liquidated damages apply for the Substantial Completion of the entire Work and the Substantial Completion of the Interim Summer Phase Work (Phase 2 and Phase 4, corresponding to school summer vacations 2021 and 2022) required for the full operation of the Cashman Elementary School. (See Paragraph 1.10.E.1).

1.21 WAGE RATES

A. There shall be paid each laborer or mechanic of the General Contractor or Subcontractor engaged in work on the project under this Contract in the trades of occupations listed in SECTION 018300-PREVAILING WAGE RATES, not less than the hourly wage rate as stated therein and list opposite the same, regardless of any contractual relationship which may be alleged to existing between the General Contractor or any Subcontractor and such laborers and mechanics.

1.22 MANUFACTURER PREFERENCE

A. Attention is directed to the provisions of General Laws of Massachusetts (Ter. Ed.), Chapter 7, Section 22, Paragraph 17, which states as follows: "A preference in the purchase of supplies and materials, other considerations begin equal, in favor, first, of... supplies and materials and materials manufactured and sold within the Commonwealth; second, to supplies materials manufactured and sold elsewhere within the United States."

1.23 COMPENSATION PAID TO POLICE OFFICERS

A. The General Contractor shall pay to any police officers employed by him the prevailing wage rate paid to regular police officers in the City. Such police officers shall be covered by Workmen's Compensation Insurance and Employer's Liability Insurance by the General Contractor.

B. For additional information refer to the Agreement and General Conditions Between Owner and General Contractor.

1.24 BUILDING PERMIT

A. The City of Amesbury **waives the fees for all permits required by the City** in conjunction with the work of this project. Nonetheless, it is the responsibility of each Trade to apply for and obtain the necessary permits for the execution of the work.

B. NPDES Permit: The General Contractor shall be responsible for preparing and submitting and securing a NPDES (National Pollutant Discharge Elimination System) permit from EPA and DEP. This involves preparing a Pollution Prevention Plan.

1. At least 48 hours prior to any work or equipment going on site, an EPA NPDES Notice of Intent form must be postmarked and sent to the U.S. EPA at Storm Water Notice of Intent (4203), 401 M Street S.W., Washington, D.C. 20460.

2. A copy of the Pollution Prevention Plan must be kept on the site at all times.

3. Once the work of this contract is complete, and all disturbed soil is stabilized or revegetated the contractor shall file a Notice of Termination with the EPS.

4. The necessary forms and other information necessary to complete this work can be obtained from the Regional EPA Office.

5. The General Contractor shall likewise secure a NOI from the DEP for NPDES. The General Contractor must secure this permit prior to starting any sitework. The Owner's Representative will supply these forms to the General Contractor.

1.25 SALES TAX EXEMPTION

A. All materials and items which will be incorporated into the project, and which will become the property of the Owner upon completion of said project, will be exempt from the Massachusetts Sales Tax. The Owner will provide to the General Contractor the Sales Tax Exemption Number, applicable for the project, and said number shall be included when ordering materials for the project.

B. For additional information refer to the General Conditions of the Contract, Article IV, Item 17 for additional information.

1.26 MANDATORY CRIMINAL RECORD (CORI) CHECKS

A. Section 2 of Chapter 385 of the Act of 2002 amends M.G.L. c.71 § 38R to require that all schools conduct criminal background checks on current and prospective employees, volunteers and school transportation providers. Further, the law stipulated that schools may also perform CORI checks on subcontractor or laborers commissioned to do work on school ground who may have direct and unmonitored contact with children.

B. CORI PROCEDURE FOR CONTRACTORS AND THEIR LABORERS

1. Effective immediately, all contractors shall submit CORI request forms for their laborers who will be on Amesbury school property.

2. Each contractor shall identify the manager who will verify each CORI request form in person. Verification shall include confirmation of the following information for approval by the City.

a. Name on driver's license matches name on CORI request.

b. DOB on driver's license matches DOB on CORI request.

c. Signature on driver's license matches the person submitting the CORI request.

d. Photo on driver's license matches the person submitting the CORI request.

e. SSN on CORI request matches SSN in contractor's payroll records.

3. The Contractor shall then submit the bundled applications, verified by the approved manager, to Amesbury Public Schools for processing through the APS Office of the Superintendent (hereafter APSOS), 5 Highland Street, Amesbury, MA 01913.

4. APSOS will inform the Contractor of the names of those contractors and their laborers who are approved to work on the APS school property.

5. The Contractor will maintain an approved list at the job site. The approved list will include the laborer's name and driver's license number. The City's project manager assigned to each school work site and the General Contractor shall be responsible for visually verifying a contractor's and/or laborer's driver's license to ensure that said contractor's and/or laborer's information matches the information on the approved list.

6. All costs associated with the procedures are the responsibility of each applicable subcontractor/vendor.

C. Once Public Facilities receives confirmation that a person's CORI has been successfully performed and is in compliance with State and City criteria, that person may access the site.

D. Refer to Attachment A to this Section for the CORI Request Form.

E. All costs associated with the procedures are the responsibility of each applicable subcontractor / vendor.

F. Refer to the General Conditions of the Contract, Article IV, Item 8 for additional information.

1.27 SPECIAL PROVISION ON SCHOOL PROPERTY

A. Prior to beginning Work of the Contract, the General Contractor shall meet with the Owner, Project Manager, and Architect to determine procedures regarding site conditions, hours of operations, truck routes and any other restrictions regarding the use of the site areas surrounding the construction.

B. During all times when school buses are entering or leaving the school sites, the General Contractor shall not allow the use of any heavy trucks, operable heavy equipment, and the like within 10 yards of roadways, paved areas, entrance and exit routes used by school buses.

C. The General Contractor shall keep all public and private access roads and walks clear of any obstruction, including debris caused by this work during the entire term of the Contract. Access roads and fire lanes on and about the site, and around the existing building, shall be kept open and free at all times for building egress, movement of vehicular traffic and passage of emergency vehicles.

1. Parking for worker's vehicles shall be only within a designated area within the construction fencing.

1.28 SPECIAL CONTROLS

A. No trades worker, construction supervisor or any other of the General Contractor's personnel (or subcontractors) shall speak with any student or other young person in the school, at any time, for any reason. The ONLY exception will be in matters of an immediate threat to life safety.

B. The following are special provisions concerning Worker Conduct for this project:

1. All workers on the project are required to conduct themselves in a professional manner. Abusive or obscene language or gestures will not be tolerated. Soliciting or harassing students, faculty or staff for any reason is prohibited.

2. Use of any tobacco products, alcohol or drugs on School property is prohibited. Violators will be subject to arrest; no warning will be issued.

3. Workers shall wear shirts at all times, with no offensive text or images.

C. Loud and/or abusive language – Due to the work being performed within an operating school, the General Contractor's and Subcontractors' personnel shall exercise caution to refrain from loud and/or abusive language.

D. The Owner reserves the right to have any worker barred from the construction site for violation of these rules.

1.29 SCHOOL CALENDARS

A. Following this Section are Attachment B (school calendar for school year 2020-2021). The calendar is provided for the Contractor's information only. The 2021-22 and 2022-2023 school year calendars will be issued to the General Contractor when available. The calendars are subject to change by the School Committee.

1.30 COVID-19

A. The General Contractor shall be solely responsible for the implementation of and adherence to all applicable regulations and guidelines from federal, state and local authorities, in place at the time the bid is submitted, in the performance of the work of this contract which pertain to the COVID-19 pandemic, all costs for which shall be included in the Contract Price.

Request Form and Application

AMESBURY PUBLIC SCHOOLS

5 Highland St., Amesbury, MA 01913

CRIMINAL OFFENDER RECORD INFORMATION (CORI) ACKNOWLEDGEMENT FORM

The Amesbury Public Schools is registered under the provisions of M.G.L. c. 6, § 172 to receive CORI for the purpose of screening current and otherwise qualified prospective employees, subcontractors, volunteers, license applicants, current licensees, and applicants for the rental or lease of housing.

As a prospective or current employee, subcontractor, volunteer, license applicant, current licensee, or applicant for the rental or lease of housing, I understand that a CORI check will be submitted for my personal information to the DCJIS. I hereby acknowledge and provide permission to the Amesbury Public Schools to submit a CORI check for my information to the DCJIS. This authorization is valid for one year from the date of my signature. I may withdraw this authorization at any time by providing the Amesbury Public Schools with written notice of my intent to withdraw consent to a CORI check.

The Amesbury Public Schools may conduct subsequent CORI checks within one year of the date this Form was signed by me provided, however, that the Amesbury Public Schools must first provide me with written notice of this check.

By signing below, I provide my consent to a CORI check and acknowledge that the information provided on this Acknowledgement Form is true and accurate.

SECTION 012200

UNIT PRICES

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 UNIT PRICES

A. The predetermined Unit Prices for items of work set forth in the Schedule of Unit Prices attached to this Section shall be used to determine adjustments to the Contract Sum when changes in the work involving said items are made in accordance with the Contract Documents.

B. **Unit Prices listed under ADDITIONS have been computed at net cost plus overhead, profit and all other charges.** Unit Prices listed under DEDUCTIONS have been computed at net cost alone. Unit Prices shall apply until the date of Substantial Completion established at the time of Contract signing. If the date of Substantial Completion has been modified by Change Order, Unit Prices may be adjusted at the discretion of the Owner by Change Order.

C. **Unit Prices for excavation include the costs of sheeting and bracing, pumping and dewatering and all other costs in connection therewith**.

D. All materials, methods of installation, and definitions of terms set forth under the various Unit Price items in the Schedule of Unit Prices shall be as indicated in the Contract Documents.

1.03 APPLICABILITY OF UNIT PRICES

A. The payment lines shall be as indicated in the Contract Documents.

B. Prior to commencing removal or placement of materials set forth in the Schedule of Unit Prices, the General Contractor shall notify the Architect in sufficient time to permit **in-place measurements** to be taken on behalf of the Owner. Only quantities which have been approved in writing by the Architect will be considered in the determination of adjustments to the Contract Sum.

C. Performance of work which is not required under the Contract Documents or which is not authorized by Change Order, whether or not such work items are set forth hereunder as a Unit Price item, shall not be considered cause for any extra payment on account of the Contract. The Contractor will be held fully responsible for such unauthorized work, including the performance of all corrective measures required by the Architect.

SECTION 012200

SCHEDULE OF UNIT PRICES

		Additions	Deductions
1.	General excavation by machine. Material left on site as directed.	$ 7.50/CY	$ 6.00/CY
2.	General excavation by machine. Material removed from site.	17.00/CY	13.60/CY
3.	Trench excavation by machine. Material left on site as directed.	12.00/CY	9.60/CY
4.	Trench excavation by machine. Material removed from site.	22.00/CY	17.60/CY
5.	Hand excavation to 6' depth. Material left on site as directed.	75.00/CY	60.00/CY
6.	Hand excavation to 6' depth. Material removed from site.	85.00/CY	68.00/CY
7.	Hand excavation per each foot of additional depth below 6'. (Add to items 5 and 6)	100.00/CY	80.00/CY
8.	Rock excavation encountered in general excavation using explosives. Material left on site as directed.	80.00/CY	72.00/CY
9.	Rock excavation encountered in general excavation using explosives. Material removed from site.	100.00/CY	80.00/CY
10.	Rock excavation encountered in trenches and piers using explosives. Material left on site as directed.	105.00/CY	84.00/CY
11.	Rock excavation encountered in trenches and piers using explosives. Material removed from site.	115.00/CY	92.00/CY
12.	Rock excavation encountered in general excavation using non-blasting methods. Material left on site as directed.	90.00/CY	72.00/CY
13.	Rock excavation encountered in general excavation using non-blasting methods. Material removed from site.	100.00/CY	80.00/CY

		Additions	Deductions
14.	Rock excavation encountered in trenches and piers using non-blasting methods. Material left on site as directed.	$105.00/CY	$84.00/CY
15.	Rock excavation encountered in trenches and piers using non-blasting methods. Material removed from site.	115.00/CY	92.00/CY
16.	Removal of boulders over 2 Cu.Yd. encountered in general excavation. Material left on site as directed.	66.00/CY	52.80/CY
17.	Removal of boulders over 2 Cu.Yd. encountered in general excavation. Material removed from site.	86.00/CY	68.80/CY
18.	Removal of boulders over 1 Cu.Yd. encountered in trench excavation. Material left on site as directed.	66.00/CY	52.80/CY
19.	Removal of boulders over 1 Cu.Yd. encountered in trench excavation. Material removed from site.	86.00/CY	68.80/CY
20.	Dense graded crushed stone or gravel, in place, compacted as specified.	26.00/CY	20.00/CY
21.	Structural fill (sand-gravel, gravel borrow), in place, compacted as specified.	36.00/CY	14.40/CY
22.	Drainage fill/crushed stone, in place, compacted	29.00/CY	28.80/CY
23.	Common fill (ordinary borrow), in place, compacted as specified.	18.00/CY	14.40/CY
24.	Granular Fill (aka Free Draining Granular Borrow)	38.00/CY	30.40/CY
25.	Sand fill around pipes in trenches, in place, as specified.	$31.00/CY	$24.80/CY
26.	3000 psi concrete, in place, not including forms and reinforcing.	$214.00/CY	$171.20/CY
27.	4000 psi concrete, in place, not including forms and reinforcing.	$217.00/CY	173.60/CY

		Additions	Deductions
28.	5000 psi (site) concrete, in place, not including forms and reinforcing.	$235.00/CY	$188.00/CY
29.	Form work for footings and foundation walls as per contact area including stripping.	$15.00/SF	$12.00/SF
30.	Reinforcing steel, in place including accessories.	1.25/LB	1.00/LB
31.	Bituminous binder course pavement in place	13.75/SY	11.00/SY
32.	Bituminous curbing installed	4.50/LF	3.60/LF
33.	Removal & disposal of buried asbestos-containing pipe and fitting insulation, including required hand excavation	50.00/LF	40.00/LF
~~34.~~	~~Loading, Transporting and disposal of petroleum/hazardous materials Impacted soil.~~		
	~~a. natural soil below RCS-1~~	~~51.20/ton~~	~~41.00/ton~~

35.	**Imported Amended Lawn and Planting Topsoil**	**$32.00/CY**	**$25.60/CY**

END OF SECTION

SECTION 012300

ALTERNATES

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SCOPE OF WORK

A. The schedule attached to this SECTION lists all the Alternates which appear in the Contract Documents, and the Sections of the Specifications which are affected by each Alternate. Consult the individual Section for detailed requirements of each Alternate.

1.03 GENERAL INSTRUCTIONS

A. Each Sub-Bidder shall be held fully responsible for examining the scope of the Alternates generally defined herein and for recognizing any modifications to his work caused by any Alternate whether or not his particular trade SECTION is mentioned therein.

B. Filed Sub-Bidders shall enter only the amount of addition or subtraction necessitated by the scope of the Alternate which pertains to the work of his trade in the FORM FOR FILED SUB-BID. In the event an alternate does not involve a change in the amount of the base bid, the Bidder shall do indicate by using the words **"No Change"**, "**Zero"**, **"N.C."** or otherwise clearly indicating there no change in the **Base Bid** in the space provided for that alternate. If the space is left blank, it is assumed that there is no change for that alternate.

C. All SECTIONS of work which are affected by the Alternates but which are not designated as Trade Sub-Bid Sections will be considered work to be performed by the General Contractor.

D. The work of the various trades to be performed under Alternates shall be in strict accordance with the requirements of the particular trade SECTION of the SPECIFICATIONS.

E. Bid prices for each Alternate shall include overhead, profit, and all other expense incidental to the Work under each Alternate.

1.04 LIST OF ALTERNATES

A. **ALTERNATE NO. 1 (ADD)**

1. Install conduit for additional EV Charging Station at the designated handicapped parking places as shown on the Drawings and as specified in SECTION:

   260001-ELECTRICAL.

B. **ALTERNATE NO. 2 (ADD)**

1. Provide electrical infrastructure and capacity for future conversion to all electric kitchen as shown on the Drawings and as specified in SECTION:

   260001-ELECTRICAL

C. **ALTERNATE NO. 3 (ADD)**

1. Provide and install warewash equipment, Food Service Item 81, at RECYCLE ROOM of the New Amesbury Elementary School, consisting of ventless warewasher and conveyor; electrical and plumbing connections as shown on the Drawings and as specified in SECTIONS:

   114000-FOODSERVICE EQUIPMENT
   220001-PLUMBING
   260001-ELECTRICAL

END OF SECTION

SECTION 012500

SUBSTITUTION PROCEDURES

PART 1 GENERAL

1.01 RELATED DOCUMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

1.02 SUMMARY

A. This Section includes procedural requirements for substitutions of product submittals for the following Section of work:

1. SECTION 012300 - ALTERNATES for products selected as an alternate.
2. SECTION 012600-CONTRACT MODIFICATION PROCEDURES for submittal requirements for products by specified manufacturers, and for “approved equal” products. if applicable.
3. Divisions 02 through 33 for specific requirements and limitations for substitutions under each Section.

B. The intent of this Section is for the General Contractor or Subcontractor to document all submittals in a side-by-side comparison and any deviation from the specified product including performance data and other specified compliance such as, but not limited to, LEEDv4-S.

1.03 DEFINITIONS

A. Substitutions: Changes in products, materials, equipment, systems from those required by the Contract Documents and proposed by the General Contractor or Subcontractor.

B. All side-by-side comparisons shall be based upon the Basis for Design manufacturer/product.

1.04 ACTION SUBMITTALS

A. Substitution Requests: Submit three copies of each request for consideration. Identify product or fabrication or installation method to be replaced. Include Specification Section number and title and Drawing numbers and titles.

1. Substitution Request Form: Use facsimile of the form attached to this Section as “Attachment A – Substitute Request Form” (pages 2 of 2.)
2. Documentation: Show compliance with requirements for substitutions and the following:

a. Statement indicating why specified product or fabrication or installation cannot be provided, if applicable.

b. Coordination information, including a list of changes or revisions needed to other parts of the Work, and to construction performed by Owner and separate contractors that will be necessary to accommodate proposed substitution.

c. Detailed comparison of significant qualities of proposed substitution with those of the Work specified. Include annotated copy of applicable Specification Section. Significant qualities may include attributes such as performance, weight, size, durability, visual effect, available colors and finishes, sustainable design characteristics, warranties, and specific features and requirements indicated. Indicate deviations, if any, from the Work specified.

d. Product Data, including drawings and descriptions of products and fabrication and installation procedures.

e. Samples, where applicable or requested.

f. Certificates and qualification data, where applicable or requested.

g. List of similar installations for completed projects with project names and addresses and names and addresses of architects and owners.

h. Material test reports from a qualified testing agency indicating and interpreting test results for compliance with requirements indicated.

i. Research reports evidencing compliance with building code in effect for Project, from ICC-ES.

j. Detailed comparison of General Contractor's Construction Schedule using proposed substitution with products specified for the Work, including effect on the overall Contract Time. If specified product or method of construction cannot be provided within the Contract Time, include letter from manufacturer, on manufacturer's letterhead, stating date of receipt of purchase order, lack of availability, or delays in delivery.

k. Cost information, including a proposal of change, if any, in the Contract Sum.

l. General Contractor's certification that proposed substitution complies with requirements in the Contract Documents except as indicated in substitution request, is compatible with related materials, and is appropriate for applications indicated.

m. General Contractor's waiver of rights to additional payment or time that may subsequently become necessary because of failure of proposed substitution to produce indicated results.

3. Architect's Action: If necessary, Architect will request additional information or documentation for evaluation within seven days of receipt of a request for substitution. Architect will notify the General Contractor of acceptance or rejection of proposed substitution within 15 days of receipt of request, or seven days of receipt of additional information or documentation, whichever is later.

    a. When the General Contractor requests a substitution, the Architect requires more time to review the submittal in order to evaluate the proposed substitution and need not respond within the time established for review of submittals under Division 01 Section "Submittal Procedures." On major items of work, submit requests for substitutions in a timely fashion, well in advance of the time at which the product has to be ordered, allowing sufficient time for Architect's review**.**

    b. Forms of Acceptance: Change Order, Construction Change Directive, or Architect's Supplemental Instructions for minor changes in the Work.

1.05 QUALITY ASSURANCE

A. Compatibility of Substitutions: Investigate and document compatibility of proposed substitution with related products and materials. Engage qualified testing agency to perform compatibility tests recommended by manufacturers.

1.06 PROCEDURES

A. Coordination: Modify or adjust affected work as necessary to integrate work of the approved substitutions.

1.07 SUBSTITUTIONS

A. The Owner and the Architect will consider substitutions only after the Contract has been executed, not during bidding, and only when one of the following conditions applies:

    1. The substitution is proposed for cause (sole determination of the Architect).

    2. The substitution will provide a clear benefit to the Owner, such as the same performance and quality at a lower cost, or better performance and quality at the same cost, or an improved construction schedule.

    3. The proposed substitution is an "equal" as defined by M.G.L. Ch. 30, s. 39M(b).

B. General Contractor's Representation: By making a request for a substitution, the General Contractor makes the following representation:

    1. General Contractor has investigated the proposed substitution and determined that it is equal or superior to the specified product, material or item.

2. Cost data presented is complete and includes all adjustments to the Contract Sum for the substitution and for associated changes to other Work, and the General Contractor will make no claims for additional costs related to the substitution which subsequently become apparent.

3. General Contractor shall coordinate the installation of the accepted substitution, making such changes as may be required in other portions of the Work.

4. Same warranty will be furnished for proposed substitution as for specified product.

5. Same maintenance service and source of replacement parts if available.

6. Proposed substitution will have no adverse effect on other trades and shall not affect or delay progress schedule.

7. Proposed substitution does not affect dimensions and functional clearances.

8. Coordination, installation, and changes in the Work as necessary for accepted substitution will be correct in all respects.

C. General: Where specifications name manufacturers, or name products and manufacturers, whether or not the words "or equal" appear in the specifications or are construed to be included in the specifications by virtue of statutory requirements applicable to public work, proposal of an unnamed product or a product by an unnamed manufacturer shall be in accordance with these requirements for product substitutions.

D. Substitutions: Submit requests for substitution not later than 60 days prior to time required for preparation and review of related submittals.

1. Requests received less than the indicated number of days from the General Contractor's scheduled submittal date may be rejected without review by the Architect.

2. Conditions: Architect will consider the General Contractor's request for substitution when the following conditions are satisfied. If the following conditions are not satisfied, Architect will return requests without action, except to record noncompliance with these requirements:

    a. Requested substitution does not require extensive revisions to the Contract Documents.

    b. Requested substitution is consistent with the Contract Documents and will produce indicated results.

    c. Requested substitution provides sustainable design characteristics that specified product provided for achieving LEEDv4-S prerequisites and credits.

    d. Substitution request is fully documented and properly submitted.

e. Requested substitution will not adversely affect General Contractor's construction schedule.

f. Requested substitution has received necessary approvals of authorities having jurisdiction.

g. Requested substitution is compatible with other portions of the Work.

h. Requested substitution has been coordinated with other portions of the Work.

i. Requested substitution provides specified warranty.

j. If requested substitution involves more than one contractor, requested substitution has been coordinated with other portions of the Work, is uniform and consistent, is compatible with other products, and is acceptable to all contractors involved.

E. Proposed substitutions that may have an adverse effect on LEEDv4-S point totals for the School will not be considered.

1. All proposed substitutions shall be accompanied by an substitution request form signed by the manufacturer, supplier and General Contractor and Subcontractor, if applicable, stating that such proposed substitution does not affect the LEEDv4-S point total for the School.

SECTION 012600

CONTRACT MODIFICATION PROCEDURES

PART 1 GENERAL

1.01 RELATED DOCUMENTS

A. Procurement and Contracting Requirements and other Division 01 General Requirements apply to this Section.

1.02 SUMMARY

A. This Section includes administrative and procedural requirements for handling and processing Contract modifications.

B. Related Requirements:

1. SECTION 013320 - CONSTRUCTION PROGRESS DOCUMENTATION for information required to justify changes to Contract Time.

1.03 MINOR CHANGES IN THE WORK

A. The Architect will issue supplemental instructions authorizing minor changes in the Work, not involving adjustment to the Contract Sum or the Contract Time, by a field order.

1.04 OWNER-INITIATED PROPOSAL REQUESTS

A. Owner-Initiated Proposal Requests: Architect will issue a detailed description of proposed changes in the Work that may require adjustment to the Contract Sum or the Contract Time. If required, the description will include supplemental or revised Drawings and Specifications.

1. Proposal Requests issued by Architect are not instructions either to stop work in progress or to execute the proposed change.
2. Within 14 days after receipt of Proposal Request, submit a Change Order Request estimating cost adjustments to the Contract Sum and the Contract Time necessary to execute the change.
3. Include supporting data.

1.05 CONTRACTOR-INITIATED PROPOSALS

A. General Contractor Initiated Proposals: If latent or changed conditions require modifications to the Contract, the General Contractor may initiate a claim by submitting a Change Order Request to Architect.

1. Include a statement outlining reasons for the change and the effect of the change on the Work. Provide a complete description of the proposed change. Indicate the effect of the proposed change on the Contract Sum and the Contract Time.

B. Supporting Data: Provide the following information with each Change Order Request:

1. Rationale for Change Order Request – Refer to the *General Conditions of the Contract* for additional information.
2. Include a detailed list of quantities of products required or eliminated and unit costs, with total amount of purchases and credits to be made. If requested, furnish survey data to substantiate quantities.
3. Indicate applicable taxes, delivery charges, equipment rental, and amounts of trade discounts.
4. Include costs of labor directly attributable to the change. Prior to submission of any change order request, the General Contractor and each subcontractor shall submit the Request for Approval of Wages and Rates for Change Order Pricing (Attachment A).
5. For changes requesting an extension of Contract Time, include an analysis of CPM schedule showing how proposed change affects the critical path in accordance with the General Conditions, and with Division 01 Section "Construction Progress Documentation." Analysis shall include, but not be limited to, changes in activity duration, start and finish times, activity relationship, and available float.
6. Include entire Work required in association with the change in Change Order Request, including all costs sought by the General Contractor to perform the proposed change.
7. Submit statement and breakdown for each change substantiating labor burden for the General Contractor and each subcontractor. The labor burden shall not exceed 30%, unless documentation acceptable to the Owner is provided to substantiate a greater value.
8. Provide bona fide prices based on actual wages and material costs. Substantiate costs of materials by providing prices from material suppliers on their letterhead. Where requested, furnish survey data to substantiate quantities.
9. Itemize work which is to be performed by employees of the General Contractor. Include number of labor hours and hourly rate for each class of labor.
10. For work which is to be performed by subcontractors, provide pricing proposals on letterhead of proposed subcontractor. Subcontractor pricing proposals shall include same supporting data required of the General Contractor specified in this Section.
11. Include cost of general conditions, superintendence, overhead and profit in the percentage mark-up described in General Conditions of the Contract. No separate or additional amount for General Conditions work, superintendence, overhead or profit will be approved.

12. The cost of tools and small tools, known as "tools of the trade," will not be charged to the Owner nor otherwise included in the cost of the proposed change.

13. Prices shall remain valid for a minimum of 90 days from the date of the initial pricing approval to execution of the Change Order by the Owner.

14. Travel time and mileage to and from the site is overhead.

C. Change Order Request Form: Use attached forms (Attachment B), equivalent Construction Specification Institute (CSI) forms (Forms 13.6A, C and D), or substantially similar forms acceptable to the Architect. Form shall include worksheet summary and worksheet details.

1.06 CONSIDERATION OF PROPOSALS

A. Consideration and Acceptance of Price Proposal:

1. Incomplete Change Order Requests, and Change Order Requests that are not in compliance with the requirements of this Section, will be returned to the General Contractor without review. Such proposals shall be revised by the General Contractor and returned to the Architect within the same time period specified above for submittal of proposals; there shall be no extension of time for such resubmittals.

a. Change Order Requests that contain errors of fact or mathematical errors will be considered incomplete and non-compliant and may, at the Architect's discretion, be returned under this provision.

2. The Architect will review and act on Change Order Requests within 21 days of receipt. The Architect's review, at the discretion of the Architect, may include consideration of costs listed in Means "Construction Cost Data" or a similar database, and on conversations with local manufacturers and suppliers.

3. **Within 10 calendar days after receipt of the Architect's review comments, make requested revisions and resubmit.**

4. The Architect will promptly notify the General Contractor whether the pricing is accepted or will direct the General Contractor to make additional changes.

5. When the General Contractor’s proposal is approved by the Architect, the Architect will prepare a Change Order for execution by the Owner, the Architect, and the General Contractor.

B. No extensions of Contract Time nor increase in the Contract Sum will be considered if the additional time or additional cost is a consequence of the General Contractor’s failure to submit an estimate within the specified time, regardless of whether the proposal request or change order request was initiated by the Owner or the General Contractor.

1.07 ADMINISTRATIVE CHANGE ORDERS

A. Unit Price Adjustment: Refer to SECTION 012200-UNIT PRICES for administrative procedures for preparation of Change Order Proposal for adjusting the Contract Sum to reflect measured scope of unit price work.

1.08 CHANGE ORDER PROCEDURES

A. Upon the Owner's approval of a Change Order Request, the Architect will issue a Change Order for signatures of the Owner and General Contractor, as provided in the General Conditions of the Contract.

B. Approval Process: After preparation of the Change Order, subsequent execution and approval procedures will be as follows:

1. The General Contractor will sign the Change Order.
2. The Architect will present the Change Order with the General Contractor’s signature to the City for approval and the Owner’s signatures.
3. A copy of the fully executed Change Order signed by the Owner will be distributed to signatories for record.

1.09 CONSTRUCTION CHANGE DIRECTIVE (CCD)

A. Construction Change Directive: Architect may issue a Construction Change Directive. Construction Change Directive instructs General Contractor to proceed with a change in the Work, for subsequent inclusion in a Change Order.

1. Construction Change Directive contains a complete description of change in the Work. It also designates method to be followed to determine change in the Contract Sum or the Contract Time.

B. Documentation: Maintain detailed records on a time and material basis of work required by the Construction Change Directive.

1. At the beginning of each day in which time and material work is to be performed, notify the Owner's on-site project representative where and what type of work is to be performed. At the end of each workday in which time and material work is performed, present to the Owner's project representative for signing an itemized accounting of actual time spent and materials used on the change.
    a. Costs submitted without the signed verification of the project representative will not be approved.
    b. Signature of project representative does not constitute approval of the proposed change. Final approval of proposed change is predicated upon review of the complete Proposal Request with documentation by Architect
2. After completion of change, submit a Change Order Request with supporting documents as indicated.

1.10 CHANGE LOG

A. Maintain log at project site indicating each Proposal Request, Change Order Request, Construction Change Directive and Change Order. Indicate item number, date submitted and current status for each. Provide log for review by Architect, Project Manager, or Owner at project progress meetings and other times when requested.

Attachment A

Request for Approval of Wages and Rates for Change Order Pricing

PROJECT NAME | PROJECT NO. | GC:

REQUEST FOR APPROVAL OF WAGES AND RATES FOR CHANGE ORDER PRICING

NAME OF SUBCONTRACTOR:

This form must be completed, submitted and approved prior to the submission of any change order price proposals. Complete the below for every Trade and Classification that is likely to work on the project. If any contractor seeks to utilize a total hourly wage rate (wages plus benefits) for change order pricing that is in excess of the applicable published prevailing wage rate, then this form must be completed, submitted (with backup documentation - i.e. union agreement) and approved prior to the submission of any change order price proposals. The information supplied below must be consistent with certified payroll submissions.

DIRECT LABOR COSTS

			SUBCONTRACTOR PROPOSED RATES FOR APPROVAL							
A	B	C	D	E	F	G	H	I	J	K
Trade Description (e.g, Carpenter, Pipefitter, Electrician, etc.)	Classification (Foreman, Journeyman, Apprentice)	Prevailing Wage Rate (Per Contract Specifications)	Hourly Base Wage Rate	Health & Welfare	Pension Annuity	Supple-mental Unemp	Other Allowable Benefits	Base Wages (subject to ins/taxes)	Total Hourly Labor Cost	Excess Fringes
								$ -	$ -	$ -
								$ -	$ -	$ -
								$ -	$ -	$ -
								$ -	$ -	$ -
								$ -	$ -	$ -
								$ -	$ -	$ -
								$ -	$ -	$ -
								$ -	$ -	$ -

INSURANCE AND TAXES RATES

Item Description	Rate Per Base Wage Cost
Workmen's Compensation Insurance	
State Unemployment	
Federal FICA	
General Liability Insurance	

	L	0.00%
Proposed Insurance and Taxes Rate	Default Rate	30.00%

APPROVAL

Owner Authorized Representative

GC Authorized Representative

NOTES:

- Contractor may utilize a rate of 30% for insurance/taxes without providing documentation. **If a rate in excess of 30% is requested, documentation must be provided and only the four items listed above may be included.'**
- Attach all relevant supporting documentation such as union wage rate sheets, insurance carrier verification letters, workers compensation rate tables, etc.
- Excess fringes are those fringes required to be paid per union contract which exceed the contract prevailing wage. DCAM will reimburse these costs, once approved, as cost only (i.e., no markups allowed). Not all excess fringe benefits are reimbursable by DCAM. If any dollar value is claimed under column H, provide all necessary supporting documentation. Note that the following benefits are explicitly not allowed: Union Dues, Vacation Funds, Uniforms.

SECTION 012900

PAYMENT PROCEDURES

PART 1 - GENERAL

1.01 RELATED DOCUMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Procurement and Contracting Requirements are hereby made a part of this SECTION.

1.02 SUMMARY

A. The work included under this SECTION is:

1. Schedules of Values.
2. Projected Applications for Payment Report.
3. Applications for Payment.

1.03 RELATED WORK SPECIFIED ELSEWHERE

A. The following related work is specified under the following SECTIONS:

1. SECTION 012200 - UNIT PRICES for administrative requirements governing the use of unit prices.
2. SECTION 013320 - CONSTRUCTION PROGRESS DOCUMENTATION for administrative requirements governing the preparation and submittal of the General Contractor's construction schedule.
3. SECTION 013300 - SUBMITTALS for administrative requirements governing the preparation and submittal of the submittal schedule.
4. SECTION 013300 - SUBMITTALS for administrative requirements governing submittal of cost breakdown information required for LEEDv4-S documentation.

1.04 SCHEDULE OF VALUES

A. Coordination: Coordinate preparation of the schedule of values with preparation of General Contractor's construction schedule.

1. Coordinate line items in the schedule of values with other required administrative forms and schedules, including the following:
   a. Application for Payment forms with continuation sheets.
   b. Submittal schedule.

c. Items required to be indicated as separate activities in General Contractor's construction schedule.

B. Format and Content: The General Contractor shall provide Schedules of Values shall equal the total Contract Sum. Use the Project Manual table of contents as a guide to establish line items for the schedule of values. Provide at least one line item for each Specification Section.

1. Identification: Include the following Project identification on the schedule of values:

   a. Project name and location.

   b. Name of Architect.

   c. Architect's project number.

   d. General Contractor's name and address.

   e. Date of submittal.

2. Arrange schedule of values consistent with format of AIA Document G703.

3. Arrange the schedule of values in tabular form with separate columns to indicate the following for each item listed:

   a. Related Specification Section or Division.

   b. Description of the Work.

   c. Name of subcontractor.

   d. Dollar value of the following, as a percentage of the Contract Sum to nearest one-hundredth percent, adjusted to total 100 percent.

      1) Labor.

      2) Materials.

      3) Equipment.

4. Provide a breakdown of the Contract Sum in enough detail to facilitate continued evaluation of Applications for Payment and progress reports. Coordinate with the Project Manual table of contents.

   a. No single line item shall exceed $25,000.

   b. Include separate line items under General Contractor and subcontracts for LEEDv4-S documentation and submittal requirements in each section of the work with such requirements.

   c. Include separate line items for sitework and each major area, floor, or wing of building or building. Include subschedule by phase for each major element of Work.

5. Provide a separate line item in the schedule of values for each part of the Work where Applications for Payment may include materials or equipment purchased or fabricated and stored, but not yet installed.

    a. Differentiate between items stored on-site and items stored off-site. If required, include evidence of insurance.

6. Show cost of temporary facilities and other major cost items that are not direct cost of actual work-in-place as separate line items. Include the following:

    a. Bonds.

    b. Insurance premiums.

    c. Project mobilization.

    d. Project demobilization.

    e. Construction fence erection and maintenance. Temporary utilities.

    f. Temporary water.

    g. Waste removal.

    h. Temporary heat and enclosure.

    i. Construction indoor air quality (IAQ) management.

    j. Temporary signage.

    k. General Contractor’s Project Manager.

    l. General Contractor’s Assistant Project Manager.

    m. Superintendent.

    n. Assistant Superintendent.

    o. Field offices, initial installation, rental, maintenance and removal.

    p. Temporary toilets.

    q. General Contractor’s Construction Schedule and monthly construction schedule updates.

    r. Superintendent's daily reports.

    s. Coordination drawings.

    t. Progress photographs.

    u. Daily clean-up.

    v. Cleaning at the time of Substantial Completion of each portion of the Work.

    w. Submission and approval of bound warranties.

    x. Final Cleaning by portion of the Work.

    y. LEED documentation schedule

7. Schedule Updating: Update and resubmit the schedule of values before the next Applications for Payment when Change Orders or Construction Change Directives result in a change in the Contract Sum.

1.05 APPLICATIONS FOR PAYMENT

A. Applications for Payment shall be prepared for the School based upon their respective Schedule of Values. Each Application for Payment shall be consistent with previous applications and payments as certified by Architect and paid for by Owner.

1. Initial Application for Payment, Application for Payment at time of Substantial Completion and final Application for Payment involve additional requirements.

B. Payment Application Times: Applications for Payment shall be submitted to the Architect by the last day of the month. The period covered by each Application for Payment is one month, ending on the last day of the month.

1. At least 7 calendar days before submitting the Application for Payment, prepare and submit to Architect a draft Application for Payment reflecting anticipated percentages completed for each activity. The Architect and Owner's Project Manager will review and transmit comments to the General Contractor. Make changes or adjustments to the percentages of completion reported in the Application for Payment to reconcile with the assessment of the actual progress of the Work as determined by the Architect and Owner's Project Manager, sign the Application, and submit it for payment.

a. Make changes or adjustments required by the Architect and Owner's Project Manager and submit the Application for Payment in a form that will be approved by the Architect in order to receive Payment for the amount not in dispute. If the General Contractor disagrees with the percentages accepted by Architect and Owner's Project Manager, General Contractor may, in a separate letter or accounting, identify disparities and explain reasons for disagreement and transmit to Architect.

C. Application for Payment Forms: Use AIA Document G702 and AIA Document G703 as form for Applications for Payment.

D. Application Preparation: Complete every entry on form. Notarize and execute by a person authorized to sign legal documents on behalf of the General Contractor. Architect will return incomplete applications without action.

1. Entries shall match data on the schedule of values.

2. Include amounts for work completed following previous Application for Payment, whether or not payment has been received. Include only amounts for work completed at time of Application for Payment.

3. Amounts of Change Orders executed (signed by all parties) before last day of construction period covered by the Application may be included, to the extent work under that Change Order was performed during the period covered by the Application for Payment. Do not include amounts of Construction Change Directives until they have been included in an executed Change Order; do not include amounts for Change Orders which have been issued but not executed.

4. Indicate separate amounts for work being carried out under Owner-requested project acceleration.

E. Stored Materials: Include in Application for Payment amounts applied for materials or equipment purchased or fabricated and stored, but not yet installed. Differentiate between items stored on-site and items stored off-site.

1. Provide certificate of insurance, evidence of transfer of title to Owner, and consent of surety to payment, for stored materials.

2. Provide supporting documentation that verifies amount requested, such as paid invoices. Match amount requested with amounts indicated on documentation; do not include overhead and profit on stored materials.

3. Provide summary documentation for stored materials indicating the following:

   a. Materials previously stored and included in previous Applications for Payment.

   b. Work completed for this Application utilizing previously stored materials.

   c. Additional materials stored with this Application.

   d. Total materials remaining stored, including materials with this Application.

   e. Provide detailed inventory of materials sufficient to reorder materials precisely.

   f. Provide Right of Entry into storage facility.

4. Materials Stored Off Project Site:

   a. Provide transportation and housing costs for Architect or Owner's Representative to storage location to verify stored materials.

   b. Payment will not be made for materials stored outside of the continental United States.

F. Transmittal: Submit four signed and notarized original copies of each Application for Payment to Architect by a method ensuring receipt within 24 hours. Attach waivers of lien and similar required attachments to one copy.

1. Transmit each copy with a transmittal form listing attachments and recording appropriate information about application.

G. Attachments: With each Application for Payment, submit the following documentation.

1. Certification of receipt of payment from subcontractors, sub-subcontractors and suppliers for the construction period covered by the previous Application for Payment, in accordance with Paragraph 9.3.4 of the General Conditions. Submit these certifications in a form acceptable to the Owner.
2. Record Documents: Written statement that the General Contractor has checked the project Record Drawings and that they are current for each trade, and in compliance with SECTION 017839 - PROJECT RECORD DOCUMENTS.
3. Construction photographs taken no more than 10 days prior to the date of the Application for Payment.
4. Updated the General Contractor's Construction Schedule.
5. General Contractor's Daily Reports for the previous month.
6. Wage rate report for previous Application for Payment period, correct, and in statutory form approved by the Owner, "Wage Rate Requirements" including workforce participation goals tracking information.
7. General Contractor's Progress Payment Report on Minority/Women Business Enterprises Participation (attached as Appendix to the General Conditions of the Contract).
8. Monthly indoor air quality test reports as required by SECTION 018119-INDOOR AIR QUALITY MANAGEMENT PLAN.
9. LEEDv4-S Tracking Log.
10. Current LEEDv4-S Sustainable Materials Worksheet.

H. Initial Application for Payment: Administrative actions and submittals that must precede or coincide with submittal of first Application for Payment include the following:

1. List of subcontractors.
2. List of General Contractor's principal consultants.
3. List of General Contractor's staff assignments, including emergency contact information.
4. Schedule of Values.
5. Material status report listing outstanding long-lead items with status of delivery noted. "Long lead" shall mean more than 6 weeks for fabrication and delivery.
6. Sustainability submittal for LEEDv4-S for project materials cost data, according to SECTION 013300 - SUBMITTALS.

7. General Contractor's construction schedule (preliminary if not final), according to SECTION 013320 - CONSTRUCTION PROGRESS DOCUMENTATION.
8. Action plan for LEEDv4-S.
9. Submittal schedule (preliminary if not final).
10. Copies of building permits.
11. Copies of authorizations and licenses from authorities having jurisdiction for performance of the Work.
12. Initial progress report.
13. Report of preconstruction conference.
14. Site utilization plan, in accordance with SECTION 015000 - TEMPORARY FACILITIES AND CONTROLS.
15. Full installation of Owner's Project Manager's Office trailer in accordance with SECTION 015000 - TEMPORARY FACILITIES AND CONTROLS.

I. Second Application for Payment: Provide the following additional start-up information.

1. General Contractor's weather protection plan, in accordance with SECTION 015000 - TEMPORARY FACILITIES AND CONTROLS.
2. General Contractor's plan for temporary heating during the months of November through March, in accordance with SECTION 015000 - TEMPORARY FACILITIES AND CONTROLS
3. Completel CPM schedule, approved by the Architect.
4. General Contractor's waste management plan required by SECTION 017419 - CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL.

J. Application for Payment at Substantial Completion: After the Architect issues the Certificate of Substantial Completion, submit an Application for Payment showing 100 percent completion for portion of the Work claimed as substantially complete.

1. Include documentation supporting claim that the Work is substantially complete and a statement showing an accounting of changes to the Contract Sum.
2. This application shall reflect Certificates of Substantial Completion issued previously for Owner occupancy of designated portions of the Work.
3. Warranties.

K. Final Payment Application: After completing project closeout requirements, submit final Application for Payment with releases and supporting documentation not previously submitted and accepted, including, but not limited, to the following:

1. Evidence of completion of Project closeout requirements.
2. Insurance certificates for products and completed operations where required and proof that taxes, fees, and similar obligations were paid.
3. Updated final statement, accounting for final changes to the Contract Sum.
4. AIA Document G706, "General Contractor's Affidavit of Payment of Debts and Claims."
5. MA Document 0706A, "General Contractor's Affidavit of Release of Liens."
6. MA Document G707, "Consent of Surety to Final Payment."
7. Evidence that claims have been settled.
8. Final meter readings for utilities, a measured record of stored fuel, and similar data as of date of Substantial Completion or when Owner took possession of and assumed responsibility for corresponding elements of the Work.
9. Final liquidated damages settlement statement.

END OF SECTION

SECTION 013100

PROJECT PROCEDURES

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 WORK SEQUENCE

A. Conform to requirements of the Orders of Conditions, SECTION 013500 with particular attention called to the following:

1. Not less than 30 days prior to beginning earthwork operations, the General Contractor shall submit the Stormwater Pollution Prevention Plan (SWPPP) to the Conservation Commission for approval.
2. Construct temporary drainage and siltation controls as shown on the drawings.
3. Construct Flood Compensation Area before placing any fill materials.

1.03 CONTRACTOR USE OF SITE

A. Use of the Site:

1. Confine operations to areas within the contract Limit of Work line as indicated on the Drawings.
2. Portions of the site beyond area in which construction operations is indicated are not to be disturbed.

B. Site Access:

1. The hours of on-site operations are from 7:00 AM to 6:00 PM Monday through Friday and 7:00 AM to 12:00 PM noon on Saturdays. Construction vehicles and equipment shall not be started before 7:00 AM.
   a. The work day may be extended to a full day on Saturdays with prior approval of the Building Inspector. No construction or activity whatsoever (except for interior finishing) shall take place on Sundays.
2. Comply with the City of Amesbury requirements for the transportation to and from the site.
3. Schedule deliveries to minimize space and time requirements for storage of materials and equipment on site.

4. Keep the driveways and parking areas serving the existing building clear at all times. Do not use these areas for storage of materials.

5. Keep adjacent sidewalks clear for continued use by the public.

6. Refer to the map in "Attachment A – Transportation Routes for Construction Vehicles" appended to this Section. Note that:

   a. Construction vehicles shall not queue up on city streets.

   b. Construction vehicle traffic is forbidden through downtown Amesbury on Friend Street, Market Street, Main Street, Sparhawk Street and all residential side streets.

C. The General Contractor shall control dust on site and shall keep roadways clean of dirt and debris from construction operations. Refer to SECTION 015000 – TEMPORARY FACILITIES AND CONTROLS.

1.04 OWNER OCCUPANCY

A. Owner Occupancy:

1. Cooperate fully with the Owner's Representative during construction operations to minimize conflicts and to facilitate Owner's operations at and around the existing Cashman Elementary School.

2. Perform the Work so as not to interfere with the Owner's operations.

B. Installation Sequencing:

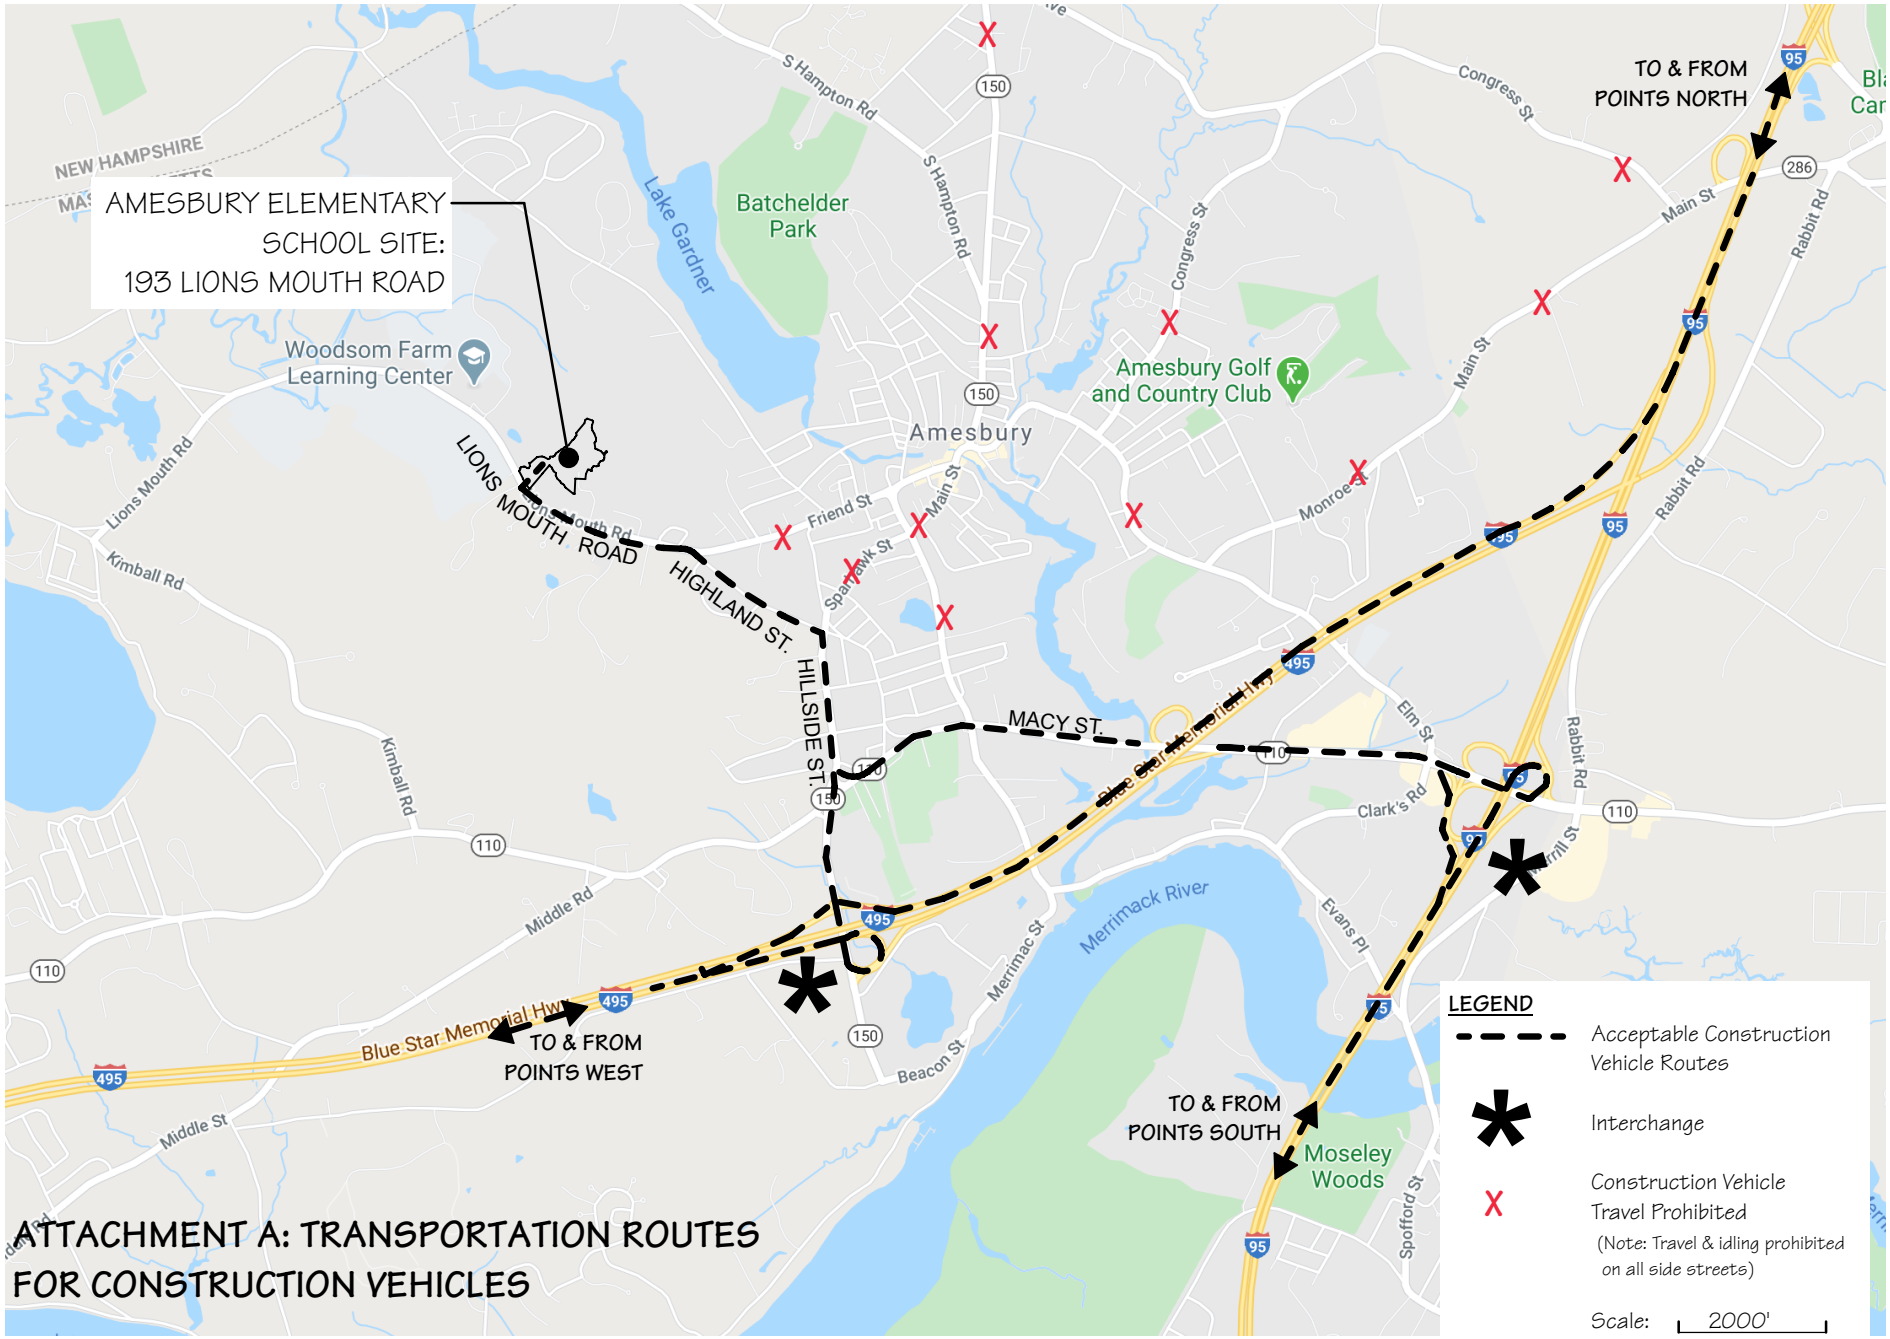
1. Examine materials and installations performed by others before starting next stage or adjacent work.

2. Notify Architect immediately of unsatisfactory conditions which hinder or restrict correct installation of next stage or adjacent work.

3. Start of next stage or adjacent work will be construed as acceptance of previous or adjacent work.

4. Any work requiring subsequent removal or replacement due to unsatisfactory or defective work shall be at the General Contractor's expense.

C. Contract Document Review:



1. Before execution of work, the General Contractor shall review all Drawings and Specifications and shall immediately report all errors, discrepancies, and/or omissions discovered to the Architect, in writing, with one set of Contract Documents marked in red pencil, clearly indicating the discrepancies.

2. Omissions from the Drawings and/or the Specifications or the misdescription of details of Work which are manifestly necessary to carry out the intent of the Drawings and Specifications, or are customarily performed, shall not relieve the General Contractor from performing such omitted or misdescribed details of the Work; but shall be performed as if fully and correctly set forth and described in the Drawings and Specifications, using the most appropriate method, with final approval issued by the Architect to alleviate conflicts of scheduling, Drawings, Details, and/or Specifications.

END OF SECTION

ATTACHMENT A

Construction Vehicle Transportation Routes

ATTACHMENT A: TRANSPORTATION ROUTES FOR CONSTRUCTION VEHICLES

SECTION 013200

PROJECT MEETINGS

PART 1 GENERAL

1.01 PRE-CONSTRUCTION MEETING

A. Prior to the start of construction there will be a project meeting to discuss methods of construction and completion of the project.

B. Representatives of the following shall be required to attend this meeting:

1. Owner
2. Owner's Project Manager
3. Architect
4. General Contractor
5. Applicable Municipal Agencies

C. General Contractor shall make specified Pre-Construction submissions including the following, if not already submitted:

1. Type list of sub-contractors, with addresses and telephone numbers, and name of principal contract.
2. Certificates of insurance.
3. Performance and labor and material payment bonds.
4. Construction Schedule.
5. Schedule of Values.

D. Agenda will include the following items:

1. Tentative construction schedule.
2. Critical work sequencing and long-lead items.
3. Major equipment deliveries and priorities.
4. Designation of responsible personnel.
5. Submittal of shop drawings, project data, and samples.
6. Processing applications for payment.
7. Procedures for maintenance of record documents.
8. Procedure for field changes, RFIs, change estimates, change orders, and other CA documents.

9. Use of premises and existing buildings.
10. Location and maintenance of temporary storage buildings, field offices, and other temporary structures.
11. Lines of communication.
12. Work restrictions and working hours.
13. Owner's occupancy requirements.
14. Responsibility for temporary facilities and controls.
15. Procedures for disruptions and shutdowns.
16. Parking availability.
17. Equipment deliveries and priorities.
18. Site security procedures.

1.02 PROGRESS MEETINGS

A. Attend weekly meetings at the site of the work during the course of the Contract. The dates of such meetings shall be as mutually agreed upon between the General Contractor, the Architect, and the Owner's Project Manager.

B. Project meetings shall be chaired by the Owner's Project Manager. The agenda will include the following:

1. Review approved minutes of previous meeting; insert corrections and comments.
2. Review work progress since last meeting.
3. Note field observations, problems, and decisions.
4. Identify problems which impede planned progress.
5. Plan progress during next work period.
6. Include 2-week look-ahead/look-back schedule for discussion at each meeting.
7. Review submittal logs and schedules; expedite to maintain schedule.
8. Deliveries.
9. Access.
10. Site utilization.
11. Temporary facilities and controls, including stormwater controls.
12. Cleanliness of city streets and dust control.
13. Maintenance of quality and work standards.
14. Field observations.
15. Status of RFIs.

16. Status of Proposal Requests, Proposed Change Orders, Construction Change Directives and Change Orders.

17. Pending charges, claims and disputes.

18. Documentation of information for payment requests.

19. Review changes proposed by Owner for effect on construction schedule and completion date.

20. Complete other current business.

D. Minutes: Entity responsible for conducting the meeting will record and distribute the meeting minutes to each party present and to parties requiring information.

END OF SECTION

SECTION 013300

SUBMITTALS

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 ELECTRONIC DOCUMENT PROCEDURES REQUIREMENTS

A. Summary:

1. All documents including but not limited to shop drawing and product data submittals, RFI's, PR's, PCO's, reports, and other CA forms shall be transmitted to Architect and Owner's Project Manager in electronic (PDF) format using Submittal Exchange, BIM 360, Procore, EADOC or an equal web based service acceptable to the Architect designed specifically for transmitting submittals between construction team members with user-definable alerts and email notifications.
2. The intent of electronic submittals is to expedite the construction process by reducing paperwork, improving information flow, and decreasing turnaround time.
3. The electronic document process is not intended for color samples, color charts, or physical material samples.

B. Procedures for Documents and Submittals:

1. Document Preparation - The General Contractor may use any or all of the following options:
    a. Subcontractors and Suppliers provide electronic (PDF) documents to the General Contractor via Submittal Exchange's website.
    b. Subcontractors and Suppliers provide paper documents to the General Contractor (subject to approval of the General Contractor) who electronically scans and converts to PDF format.
    c. Subcontractors and Suppliers provide paper documents to Scanning Service which electronically scans and converts to PDF format.

2. The General Contractor shall review and **apply electronic stamp certifying that the submittal complies with the requirements of the Contract Documents** including verification of manufacturer / product, dimensions and coordination of information with other parts of the work.

3. The General Contractor shall transmit each submittal or document to Architect using Submittal Exchange's website service.

4. Architect / Engineer review comments will be made available on the Submittal Exchange website for downloading. The General Contractor will receive email notice of completed review.

5. The General Contractor shall provide one (1) hard (paper) copy of all approved submittals to both the Superintendent and the OPM Field Representative for use at the site. Submittals shall be provided weekly at the regularly scheduled job meeting.

6. Distribution of reviewed submittals to subcontractors and suppliers is the responsibility of the General Contractor.

7. Submit paper copies of reviewed submittals or documents at project closeout for record purposes in accordance with Section 017700 – PROJECT CLOSEOUT.

C. Additional Requirements:

1. **The cost of website submittal service vendor shall be paid in full by the General Contractor and included in his Contract Price.**

2. Training is available regarding use of website and PDF submittals.

3. Internet Service and Equipment Requirements:

a. Email address and Internet access at the General Contractor's main office.

b. Adobe Acrobat (www.adobe.com), Bluebeam PDF Revu (www.bluebeam.com), or other similar PDF review software for applying electronic stamps and comments.

1.03 SHOP DRAWINGS, PRODUCT DATA, SAMPLES, AND ADDITIONAL REQUIRED SUBMITTALS

A. Related Documents

1. Consult the individual Sections of the Specifications for the specific submittals required under those Sections and for further details and descriptions of the requirements.

2. Refer to the General Conditions for the General Contractor's responsibilities in the reviewing, approving and submittal of shop drawings, product data and samples.

B. General Procedures for Submittals

1. The General Contractor shall transmit each submittal to the Architect sufficiently in advance of performing related work or other applicable activities, so that the installation will not be delayed by processing times, including disapproval and re-submittal (if required), coordination with other submittals, testing, purchasing, fabrication, delivery and similar sequenced activities. No extension of time will be authorized because of the General Contractor's failure to transmit submittals to the Architect sufficiently in advance of the work.

2. The General Contractor shall transmit each submittal in a sequence which will not result in the approval having to be later modified or rescinded by reason of a subsequent submittal which should have been processed earlier or concurrently for coordination.

3. Only submittals received from and bearing the stamp of approval by the General Contractor will be considered by the Architect. Submittals shall be accompanied by a transmittal notice stating name of project, date of submittal, "To", "From", (General Contractor, Subcontractor, Installer, Manufacturer, Supplier), Specification Section and paragraph number, or Drawing Number to which the submittal refers, purpose of submittal (first submittal, re-submittal), description, remarks, distribution record, signature of transmitter.

4. On the transmittal, or on a separate sheet attached to the transmittal, the General Contractor shall direct attention to any deviations including minor limitations and variations, from the requirements of the Contract Documents. Deviation shall be highlighted on the submittals.

5. All costs for printing, preparing, packaging, submitting, resubmitting and mailing or delivering submittals specified in this Section shall be included in the General Contractor's Contract Price.

C. Architect's Action

The Architect will review the General Contractor's submittal and return them with one of the following actions recorded thereon by appropriate markings:

1. Final Unrestricted Release: Where marked "Approved as Submitted" or "Revised, no exceptions taken" the work covered by the submittal may proceed provided it complies with the requirements of the Contract Documents. Acceptance of the work will depend upon that compliance.

2. Final-But-Restricted Release: When marked "Approved as Noted", “Approved with comments”, “Reviewed - Make corrections noted”, “Reviewed - Note markings/comments attached,” the work covered by the submittal may proceed provided it complies with the Architect's notations or corrections on the submittal, and complies with the requirements of the Contract Documents. Acceptance of the work will depend upon these compliances.

3. Returned for Resubmittal: When marked “Revise and Resubmit,” or "Not Approved," the work covered by the submittal (purchasing, fabrication, delivery or other activity) should not proceed. The submittal should be revised or a new submittal resubmitted without delay, in accordance with the Architect's notations stating the reasons for returning the submittal.

4. No claim for extension of time shall be allowed on account of failure of the Architect to return shop drawings or samples until 15 working days after receipt by the Architect by registered or certified mail of written demand for such, and not then unless such claim be reasonable. Refer to General Conditions.

D. Submission of Shop Drawings

1. Shop Drawings shall be complete, give all information necessary or requested in the individual Sections of the Specifications, and also show adjoining work and details of connection thereto.

2. Shop Drawings shall be for whole systems. Partial submissions will not be accepted.

3. The Architect reserves the right to review and approve Shop Drawings only after approval of related Product Data and Samples.

4. Shop Drawings shall be properly identified and contain name of Project, name of firm submitting the Shop Drawings, Shop Drawing number, date of Shop Drawing and of revisions. The General Contractor’s stamp of approval and sufficient spaces near the title block for the Architect's stamp.

5. The General Contractor shall submit to the Architect one electronic copy of each Shop Drawing. Each submittal shall be accompanied by transmittal notice.

6. When the submittal is electronically returned by the Architect with stamp "Revise and Resubmit" or "Not Approved" the General Contractor shall correct the original drawing or prepare a new drawing and resubmit an electronic copy thereof to the Architect for approval. This procedure shall be repeated until the Architect's approval is obtained. Unless written notice has been given, the Architect's approval of a resubmitted shop drawing, product data, sample, of similar submittal shall not constitute approval of any changes not requested on the prior submittal.

7. When the submittal is electronically returned by the Architect with the stamp "Approved as Submitted" or “Revised, no exceptions taken” or "Approved as Noted", “Approved with comments”, “Reviewed - Make corrections noted”, “Reviewed - Note markings/comments attached,” the General Contractor shall provide and distribute such number of prints thereof necessary for his own and his subcontractors' use.

E. Submission of Product Data

1. The General Contractor shall submit to the Architect electronically copies of Product Data. All such data shall be as specified in the applicable SECTION and as specified herein. Identification of the specific material or equipment being submitted shall be clearly made in ink. Data of general nature will not be accepted.
2. Product Data shall include complete information of materials, dimensions, recommended applications, available options, complete color range (where product is exposed to view), name and address of manufacturer, installation instructions and any other data necessary to determine acceptability of the product and compliance with the Contract Documents.
3. Product Data shall be accompanied by transmittal notice. The General Contractor’s stamp of approval shall appear on the printed information itself, in a location which will not mar legibility.
4. Product Data electronically returned by the Architect with the stamp "Not Approved," shall be resubmitted until the Architect's approval is obtained.
5. When the Product Data are acceptable, the Architect will stamp them "Approved as Submitted" or “Revised, no exceptions taken” or "Approved as Noted", “Approved with comments”, “Reviewed - Make corrections noted”, “Reviewed - Note markings/comments attached,” and return electronically to the General Contractor. The General Contractor shall provide and distribute such number of additional copies for his own and his subcontractors' use.

F. Submission of Samples

1. Unless otherwise specified in the individual Section, the General Contractor shall submit two specimens of each sample.
2. Samples shall be of adequate size to permit proper evaluation of materials.
3. Samples which can be conveniently mailed shall be sent directly to the Architect, accompanied by transmittal notice. On the transmittal notice the General Contractor shall stamp his approval of Samples submitted.

4. All other Samples shall be delivered at the field office of the Project Representative with Sample identification tag attached and properly filled in. Transmittal notice of Samples so delivered with the General Contractor's stamp of approval, shall be mailed to the Architect.

5. If Sample is rejected by the Architect, a new sample all be resubmitted in the manner specified herein above. This procedure shall be repeated until sample is approved in writing by the Architect.

6. Samples will not be returned unless return is requested at the time of submission. The right is reserved to require submission of samples whether or not particular mention thereof is made in the Specifications.

1.04 SUBMITTAL SCHEDULE

A. The General Contractor shall submit within fifteen (15) days of the award of the contract a Submittal Schedule in the form of a Bar Graph. The General Contractor shall update the Submittal Schedule weekly and submit with each requisition for payment. The Submittal Schedule shall identify by date by which the submittals are required under each section of the specification.

B. The Submittal Schedule shall relate to the orderly progress of work with critical dates indicated for review to maintain delivery of materials.

C. Failure of the General Contractor adhering to the agreed upon Submittal Schedule, may be considered by the Architect in reviewing the progress of the work, for processing of approving payment applications, or evaluating claims for delay or additional costs.

D. The Submittal Schedule shall be updated weekly and tracked using computerized tracking software.

1.05 DOCUMENTS AND SAMPLES AT THE SITE

A. The General Contractor shall maintain at the site for the Owner one record copy of all drawings, specifications, addenda, change orders and other modifications, in good order and marked currently to record all changes made during construction, and approved shop drawings, product data and samples. These shall be available to the Architect and shall be delivered to him for the Owner upon completion of the work.

1.06 PROGRESS SCHEDULE / CASH FLOW

A. At least 10 working days prior to the first Application for Payment, the General Contractor shall submit to the Architect a progress schedule showing the percentage completion to be obtained and the total dollar value to be completed as of the first of each month until Substantial Completion, for each class of work included in the Schedule of Values.

B. Refer to SECTION 013320-CONSTRUCTION PROGRESS DOCUMENTATION for other requirements.

1.07 SCHEDULE OF VALUES

A. Prior to the first request for payment the General Contractor shall submit to the Architect and the Owner a Schedule of Values of the various portion of the work including quantities when requested, aggregating the total contract sum and divided so as to facilitate payments for work under each SECTION. The Schedule shall be prepared in such form as specified or as the Architect or the Owner may approve, and it shall include data to substantiate its accuracy. Each item in the Schedule of Values shall be used as a basis for review and approval of the General Contractor's requests for payment.

1. The Schedule of Values shall be broken down with as a minimum both labor and material line items and of sufficient detail to be able to properly and accurately review as determined by the Architect.
2. A separate line item shall be provided for record drawings, closeout documents and training.
3. A separate line item shall be provided for LEEDv4-S submittals and documentation.
4. A separate line item shall be provided for dust control.

1.08 COORDINATION DRAWINGS

A. Prior to the fabrication and installation of underground and under slab utilities, mechanical and electrical systems, the General Contractor shall coordinate the preparation and distribution of coordination drawings as follows:

1. The HVAC subcontractor shall prepare electronic copies of drawings showing HVAC ductwork, piping and equipment with respect to structure, ceiling heights, and other similar constraints as well as the location of major items of plumbing, electrical and fire protection equipment.
2. The General Contractor shall route the electronic drawings to the plumbing, fire protection and electrical subcontractors, who shall add the work of their respective trades. The General Contractor shall add any items of work by other sections that must be coordinated with the mechanical and electrical work.
3. The General Contractor shall coordinate with the respective subcontractors the location, elevation, and routing of all piping, conduits and equipment within ceiling and chase construction, and in mechanical rooms.
4. The General Contractor shall coordinate with the respective Trades the points of supports of equipment and devices mounted at the underside of the deck and beams showing all required unistrut channels and beam clamps.

5. Note that CADD disks shall be obtained from the engineers for the purpose of preparing record drawings (refer to SECTION 017839-PROJECT RECORD DOCUMENTS) and these CADD files may be used for the preparation of the coordination drawings.

B. Coordination drawings (5 prints each) shall be submitted to the architect for review. Areas of unresolved conflict shall be highlighted.

C. Uncoordinated plumbing, fire protection, HVAC and electrical items that interfere with the work of other trades, structure, hung ceilings and other finished construction shall be relocated at no cost to the owner.

D. Refer to SECTION 210001-FIRE PROTECTION, SECTION 220001-PLUMBING, SECTION 230001-HVAC and SECTION 260001-ELECTRICAL for additional coordination requirements.

1.10 REQUESTS FOR INFORMATION ("RFI")

A. The General Contractor may submit requests for information to the Architect to help facilitate the General Contractor's performance of the Contract. Prior to submitting each request for information, the General Contractor shall first carefully study and compare the Contract Documents, field conditions, other Owner provided information, Subcontractor prepared Coordination Drawings, and prior Project correspondence and documentation to determine that the information to be requested is not reasonably obtainable from such sources.

B. Each request for information shall be submitted to the Architect, in writing, on such form and with such accompanying information as the Architect may require for such purpose. Each request for information shall identify the specific sources which were reviewed by the General Contractor in its efforts to determine that information requested, and a statement to the effect that the information being requested could not be determined from such sources.

C. The General Contractor shall submit each request for information sufficiently in advance of the date by which such information is required in order to allow the Architect sufficient time, in the Architect's professional judgment, to permit adequate review and response and to permit the General Contractor compliance with the latest construction schedule.

D. Upon receipt of the Architect's RFI Response without an acknowledgement that a Proposal Request is to follow, and the General Contractor believes the RFI response results in a change in Contract Sum or Contract Time, the General Contractor shall notify the Architect immediately in writing. No work shall proceed without the Architect's written approval. Refer to the *General Conditions of the Contrac*t.

E. The General Contractor shall maintain a log at the Project site that sequentially numbers and lists each request for information. This log shall also contain the Drawing(s) reference and Specification section to which the request pertains, the date of the request, to whom the request was made, by whom the request was made, the nature of the request, and the Architect's resolution thereof. This log shall be reviewed at each Project meeting and the resolution of requests for information shall be made part of the minutes of such meetings.

F. The Architect may return to the General Contractor any request for information that does not meet the above criteria with that requests' deficiencies noted instead of providing a detailed response.

1.11 SAMPLE CLASSROOM

A. Prior to completing interior finishes in classrooms, the General Contractor and all applicable subcontractors shall complete a typical classroom as designated by the Architect for review and approval. The sample classroom shall include, as a minimum, the following:

1. Gypsum wallboard, including finish painting.
2. Ceiling grid and acoustical tile system, complete with tiles, light fixtures and register/diffusers.
3. Floor finishes in accordance with the finish schedule and approved color schedule.
4. Any specified wall soffits, including light fixtures, as may be specified.
5. Sufficient temporary power to satisfactorily provide electrical source for all specified lighting in room.
6. Typical window installation.

B. Samples may be built in place as final work and may be asked for by Architect out sequence with the normal progress of the work so the Architect can establish a benchmark for the balance of the work to follow.

1.11 LEEDv4-S SUBMITTALS

A. LEEDv4-S submittals are in addition to other submittals. If submitted item is identical to that submitted to comply with other requirements, ***submit duplicate copies as a separate submittal to verify compliance*** with indicated LEED requirements.

1. ***Only*** submit those elements of the general submittals that pertain directly to LEEDv4-S credit. LEEDv4-S submittals that contain material that is irrelevant to the credit requirements will be rejected.

2. LEEDv4-S submittals must be accompanied by a completed Materials Credit Documentation LEEDv4 MATERIALS REPORTING FORM.

3. Refer to SECTION 018113 - SUSTAINABLE DESIGN REQUIREMENTS for complete LEED Requirements.

END OF SECTION

SECTION 013320

CONSTRUCTION PROGRESS DOCUMENTATION

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SUMMARY

A. Section includes administrative and procedural requirements for documenting the progress of construction during performance of the Work, including the following:

1. Startup construction schedule.
2. General Contractor's construction schedule.
3. Daily construction reports.
4. Material location reports.
5. Site condition reports.
6. Special reports.

B. Related Requirements:

1. SECTION 013300-SUBMITTALS for submitting schedules and reports.

1.03 DEFINITIONS

A. Activity: A discrete part of a project that can be identified for planning, scheduling, monitoring, and controlling the construction project. Activities included in a construction schedule consume time and resources.

1. Critical Activity: An activity on the critical path that must start and finish on the planned early start and finish times.
2. Predecessor Activity: An activity that precedes another activity in the network.
3. Successor Activity: An activity that follows another activity in the network.

B. CPM: Critical path method, which is a method of planning and scheduling a construction project where activities are arranged based on activity relationships. Network calculations determine when activities can be performed and the critical path of the Project.

C. Critical Path: The longest connected chain of interdependent activities through the network schedule that establishes the minimum overall Project duration and contains no float

D. Event: The starting or ending point of an activity.

E. Float: The measure of leeway in starting and completing an activity.

1. Float time is not for the exclusive use or benefit of either Owner or General Contractor, but is a jointly owned, expiring Project resource available to both parties as needed to meet schedule milestones and Contract completion date.
2. Free float is the amount of time an activity can be delayed without adversely affecting the early start of the successor activity.
3. Total float is the measure of leeway in starting or completing an activity without adversely affecting the planned Project completion date.

F. Resource Loading: The allocation of manpower and equipment necessary for the completion of an activity as scheduled.

1.04 INFORMATIONAL SUBMITTALS

A. Format for Submittals: Submit required submittals in the following format:

1. Working electronic copy of schedule file.
2. Disk electronic file in Primavera P6.
3. Five paper copies.

B. Startup construction schedule.

1. The Architect will not approve Construction Schedule. Submittal of schedule shall not relieve the General Contractor of responsibility for timing, planning and scheduling Work, nor impose any duty on the Architect or Owner with respect to the timing, planning or scheduling of the Work.

C. Startup Network Diagram: Of size required to display entire network for entire construction period. Show logic ties for activities.

D. General Contractor Construction Schedule: Submit 11 by 17 inch color copies displaying entire schedule for entire construction period.

1. Submit a working electronic copy of schedule in both PDF and native file format, using software indicated, and labeled to comply with requirements for submittals. Include type of schedule (initial or updated) and date on label.

E. CPM Reports: Concurrent with CPM Schedule, submit each of the following reports. Format for each activity in reports shall contain activity number, activity description, original duration, remaining duration, early start date, early finish date, late start date, late finish date, and total float in calendar days.

1. Activity Report: List of all activities sorted by activity number and then early start date, or actual start date if known.
2. Logic Report: List of preceding and succeeding activities for all activities, sorted in ascending order by activity number and then early start date, or actual start date if known.
3. Total Float Report: List of all activities sorted in ascending order of total float.

F. Construction Schedule Updating Reports: Submit with Applications for Payment in both PDF and native file format.

G. Three Week Look-Ahead: Submit weekly, by the end of the day prior to weekly job meetings.

H. Look-Ahead and Look-Back Gantt Charts: Submit at monthly intervals.

I. Daily Construction Reports: Submit at weekly to Owner's on-site clerk of the Works, and at monthly intervals to Architect.

J. Field Condition Reports: Submit at time of discovery of differing conditions.

K. Special Reports: Submit at time of unusual event.

L. Qualification Data: For scheduling consultant.

1.05 QUALITY ASSURANCE

A. Prescheduling Conference: Conduct conference at Project site to comply with requirements in Section 013200 Project Meetings. Review methods and procedures related to the preliminary construction schedule and General Contractor’s construction schedule, including, but not limited to, the following:

1. Review software limitations and content and format for reports.
2. Verify availability of qualified personnel needed to develop and update schedule.

3. Discuss constraints, including phasing, work stages, area separations and partial Owner occupancy.

4. Review delivery dates for Owner-furnished products.

5. Review schedule for work of Owner's separate contracts.

6. Review time required for review of submittals and resubmittals.

7. Review requirements for tests and inspections by independent testing and inspecting agencies.

8. Review time required for Project closeout and Owner startup procedures, including commissioning activities.

9. Review and finalize list of construction activities to be included in schedule.

10. Review submittal requirements and procedures.

11. Review procedures for updating schedule.

1.06 COORDINATION

A. Coordinate preparation and processing of schedules and reports with performance of construction activities and with scheduling and reporting of separate contractors.

B. Coordinate General Contractor’s construction schedule with the list of subcontracts, submittal schedule, progress reports, and other required schedules and reports.

1. Secure time commitments for performing critical elements of the Work from entities involved.

2. Coordinate each construction activity in the network with other activities and schedule them in proper sequence.

PART 2 PRODUCTS

2.01 GENERAL CONTRACTOR'S CONSTRUCTION SCHEDULE - GENERAL

A. Time Frame: Extend schedule from date established for commencement of the Work to date of final completion.

1. Contract completion date shall not be changed by submission of a schedule that shows an early completion date, unless specifically authorized by Change Order.
2. Extend schedule to include maintenance-related work which extends beyond completion of contract, including maintenance of plantings, post-occupancy adjustments to door hardware, and elevator maintenance.

B. Activities: Treat each wing, and story, each major area of the site, and phase as a separate numbered activity for each main element of the Work. Comply with the following:

1. Activity Duration: Define activities so no activity is longer than 20 days, unless specifically allowed by Architect.
2. Procurement Activities: Include procurement process activities for the following long lead items and major items, requiring a cycle of more than 60 days, as separate activities in schedule. Procurement cycle activities include, but are not limited to, submittals, approvals, purchasing, fabrication, and delivery.
3. Submittal Review Time: Include review and resubmittal times indicated in Division 01 Section "Submittal Procedures" in schedule. Coordinate submittal review times in General Contractor's construction schedule with submittal schedule.
4. Startup and Testing Time: Include not less than 15 days for startup and testing.
5. Substantial Completion: Indicate completion in advance of date established for Substantial Completion and allow time for Architect's administrative procedures necessary for certification of Substantial Completion.
6. Punch List and Final Completion: Include not more than 30 days for completion of punch list items and final completion.

C. Constraints: Include constraints and work restrictions indicated in the Contract Documents and as follows in schedule and show how the sequence of the Work is affected.

1. Phasing: Arrange list of activities on schedule by phase.
2. Work under More Than One Contract: Include a separate activity for each contract.

3. Work by Owner: Include a separate activity for each portion of the Work performed by Owner.

4. Owner-Furnished Products: Include a separate activity for each product. Include delivery as directed by the Owner." Delivery dates indicated stipulate the earliest possible delivery date.

5. Work Restrictions: Show the effect of the following items on the schedule:

    a. Coordination with existing construction.

    b. Limitations of continued occupancies.

    c. Uninterruptible services.

    d. Partial occupancy before Substantial Completion.

    e. Use of premises restrictions.

    f. Provisions for future construction.

    g. Seasonal variations.

    h. Environmental control.

6. Work Stages: Indicate important stages of construction for each major portion of the Work, including, but not limited to, the following:

    a. Submittals.

    b. Mockups.

    c. Fabrication.

    d. Sample testing.

    e. Deliveries.

    f. Installation.

    g. Tests and inspections.

    h. Adjusting.

    i. Curing.

    j. Startup and placement into final use and operation.

    k. Commissioning.

7. Construction Areas: Identify each major area of construction for each major portion of the Work. Indicate where each construction activity within a major area must be sequenced or integrated with other construction activities to provide for the following:

    a. Structural completion.

    b. Temporary enclosure and space conditioning.

    c. Permanent space enclosure.

    d. Completion of mechanical installation.

e. Completion of electrical installation.

f. Substantial Completion.

D. Milestones: Include milestones indicated in the Contract Documents in schedule, including, but not limited to, the Notice to Proceed, Substantial Completion of each phase, final completion, commissioning and building flush out.

E. Computer Scheduling Software: Prepare schedules using current version of P6 for Windows operating system.

2.02 STARTUP CONSTRUCTION SCHEDULE

A. Bar-Chart Schedule: Submit startup horizontal bar-chart-type construction schedule within 15 calendar days of date established for the Notice to Proceed.

B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line. Outline significant construction activities for first 90 days of construction. Include skeleton diagram for the remainder of the Work. Include the following in skeleton diagram:

1. Milestone dates.

2. An illustration of a feasible schedule for completion of the entire Work within Contract Time.

2.03 GENERAL CONTRACTOR'S CONSTRUCTION SCHEDULE (CPM SCHEDULE)

A. General: Prepare network diagrams using AON (activity-on-node) format.

B. CPM Schedule: Prepare General Contractor's construction schedule using a time-scaled CPM network analysis diagram for the Work.

1. Develop network diagram in sufficient time to submit CPM schedule so it can be accepted for use no later than 90 days after date established for the Notice to Proceed.

a. Failure to include any work item required for performance of this Contract shall not excuse the General Contractor from completing all work within applicable completion dates, regardless of Architect's approval of the schedule.

2. Conduct educational workshops to train and inform key Project personnel, including subcontractors' personnel, in proper methods of providing data and using CPM schedule information.

3. Establish procedures for monitoring and updating CPM schedule and for reporting progress. Coordinate procedures with progress meeting and payment request dates.

4. Use "one workday" as the unit of time for individual activities. Indicate nonworking days and holidays incorporated into the schedule in order to correlate with Contract Time.

C. CPM Schedule Preparation: Prepare a list of all activities required to complete the Work. Using the startup construction schedule, prepare a skeleton network to identify probable critical paths.

1. Activities: Indicate the estimated time duration, sequence requirements, and relationship of each activity in relation to other activities. Include estimated time frames for the following activities:
    a. Preparation and processing of submittals.
    b. Mobilization and demobilization.
    c. Delivery.
    d. Fabrication.
    e. Utility interruptions.
    f. Installation.
    g. Work by Owner that may affect or be affected by the General Contractor's activities.
    h. Testing and commissioning.
    i. Punch list and final completion.
    j. Activities occurring following final completion.
2. Critical Path Activities: Identify critical path activities, including those for interim completion dates. Scheduled start and completion dates shall be consistent with Contract milestone dates.
3. Processing: Process data to produce output data on a computer-drawn, time-scaled network. Revise data, reorganize activity sequences, and reproduce as often as necessary to produce the CPM schedule within the limitations of the Contract Time.
4. Format: Mark the critical path. Locate the critical path near center of network; locate paths with most float near the edges.
    a. Subnetworks on separate sheets are permissible for activities clearly off the critical path.

D. Contract Modifications: For each proposed contract modification and concurrent with its submission, prepare a time-impact analysis using a network fragment to demonstrate the effect of the proposed change on the overall project schedule.

E. Initial Issue of Schedule: Prepare initial network diagram from a sorted activity list indicating straight "early start-total float." Identify critical activities. Prepare tabulated reports showing the following:

1. General Contractor or subcontractor and the Work or activity.
2. Description of activity.
3. Main events of activity.
4. Immediate preceding and succeeding activities.
5. Early and late start dates.
6. Early and late finish dates.
7. Activity duration in workdays.
8. Total float or slack time.
9. Average size of workforce.

F. Schedule Updating: Concurrent with making revisions to schedule, prepare tabulated reports showing the following:

1. Identification of activities that have changed.
2. Changes in early and late start dates.
3. Changes in early and late finish dates.
4. Changes in activity durations in workdays.
5. Changes in the critical path.
6. Changes in total float or slack time.
7. Changes in the Contract Time.

2.04 RECOVERY SCHEDULE

A. Furnish sufficient forces, offices, facilities and equipment at no cost to the Owner, and work such hours as necessary, within any local restrictions or agreements incorporated into the Contract, to ensure the prosecution of the work in accordance with the current schedule.

B. When periodic update indicates the Work is 21 or more calendar days behind the current approved schedule, submit a separate recovery schedule indicating means by which the General Contractor intends to regain compliance with the schedule.

1. Provide revised schedule at no additional cost to Owner, unless the Owner is solely responsible for the event or occurrence which has caused the schedule slippage.

a. Provisions to recover schedule may include increasing hours of work, number of shifts, number of workers or quantity of equipment; or working overtime, Saturdays, Sundays or holidays. Work outside of agreed working hours may be granted, provided the General Contractor gives reasonable notice to the Owner.

b. Indicate changes to working hours, working days, crew sizes, and equipment required to achieve compliance, and date by which recovery will be accomplished.

c. Include detailed narrative for remaining work based on most recent schedule.

d. Conform to detailed requirements for the General Contractor's construction schedule.

e. Schedule shall represent the General Contractor's current work sequence plan and shall forecast completion of remaining work within remaining contract duration.

2.05 SCHEDULE PROGRESS REPORTS

A. Two-Week Look Ahead: Prepare list of anticipated tasks to be completed during the next two-week period. Identify trade, area of Work, and task duration. Identify issues that may adversely affect task completion.

B. Monthly Report: Evaluate the status of the work as of the date of the pencil requisition of each month to show actual progress and to identify problem areas. Update construction schedule and print schedule summary in Gantt Chart format. Include Change Orders and Construction Change Directives in updated schedule. Prepare written narrative reporting on the progress of the Work as shown in the Gantt Chart Schedule.

C. Look-Ahead Gantt Chart: Show activities extracted from the current CPM Construction Schedule. Display each activity to be performed during the coming month, with one line for each activity and one column for each calendar day.

1. Provide two bars for each activity. Use top bar to show duration and Early Start/Late Start dates as shown in current CPM schedule. Leave bottom bar blank, to be marked up during the course of the month to show actual work completed.

2. Display in red activities which are on the critical path.

3. Prepare and attach written description of the resources and personnel intended to be utilized per day during the period covered, and the percentage completion and total dollar value of each activity to be completed or partially completed up to first day of the following Gantt Chart period.

D. Look Back Gantt Chart: Show activities extracted from the current approved CPM construction schedule. Display only activities performed during previous month with one line for each activity and one column for each calendar day.

1. Provide 2 bars for each activity. Use top bar to show the duration and Early Start/Late Start dates as shown in current approved CPM schedule. Mark up bottom bar to show actual achievement for each activity. If an activity is not completed in the period covered by one Gantt Chart, but continues into the next month, include percentage completed at the beginning and at the end of the period covered by each chart.
2. Display in red activities which are on the critical path.

2.06 REPORTS

A. Daily Construction Reports: Prepare a daily construction report recording the following information concerning events at Project site:

1. List of subcontractors at Project site.
2. List of separate contractors at Project site.
3. Approximate count of personnel at Project site.
4. Equipment at Project site.
5. Material deliveries.
6. High and low temperatures and general weather conditions, including presence of rain or snow.
7. Accidents.
8. Meetings.
9. Unusual events (refer to special reports).
10. Stoppages, delays, shortages, and losses.
11. Emergency procedures.
12. Orders and requests of authorities having jurisdiction.
13. Construction Change Directives received and implemented.
14. Services connected and disconnected.
15. Equipment or system tests and startups.
16. Partial completions and occupancies.
17. Substantial Completions authorized.

B. Site Condition Reports: Immediately on discovery of a difference between field conditions and the Contract Documents, prepare and submit a detailed report. Submit with a Request for Information. Include a detailed description of the differing conditions, together with recommendations for changing the Contract Documents.

2.07 SPECIAL REPORTS

A. General: Submit special reports directly to Owner's project Manager within one day of an occurrence. Distribute copies of report to parties affected by the occurrence.

B. Reporting Unusual Events: When an event of an unusual and significant nature occurs at Project site, whether or not related directly to the Work, prepare and submit a special report. List chain of events, persons participating, response by the General Contractor’s personnel, evaluation of results or effects, and similar pertinent information. Advise Owner in advance when these events are known or predictable.

PART 3 EXECUTION

3.01 GENERAL CONTRACTOR'S CONSTRUCTION SCHEDULE

A. Utilization of Float Time: Float time is to be expended judiciously, for the benefit of the Project as a whole, and not for the convenience of the General Contractor or the Owner. Neither the General Contractor nor the Owner "owns" the project float time; the float time belongs to the Project.

1. Begin each activity promptly upon the completion of previous activities on which it depends. If the General Contractor completes activity on the scheduled "early finish date" or sooner, the General Contractor shall not expend the "float time" for that activity (if any) but rather reserve it as a safeguard against possible impediments or delays which may occur later in the progress of the Work.

B. General Contractor's Construction Schedule Updating: At monthly intervals, update schedule to reflect actual construction progress and activities. Issue schedule one week before each regularly scheduled progress meeting.

1. Revise schedule immediately after each meeting or other activity where revisions have been recognized or made. Issue updated schedule concurrently with the report of each such meeting.
2. Include a report with updated schedule that indicates every change, including, but not limited to, changes in logic, durations, actual starts and finishes, and activity durations.
3. As the Work progresses, indicate final completion percentage for each activity.

C. Distribution: Distribute copies of approved schedule to Architect, Project Manager (4 copies and 1 copy of the data disk), separate contractors, testing and inspecting agencies, and other parties identified by the General Contractor with a need-to-know schedule responsibility.

1. Post copies in Project meeting rooms and temporary field offices.
2. When revisions are made, distribute updated schedules to the same parties and post in the same locations. Delete parties from distribution when they have completed their assigned portion of the Work and are no longer involved in performance of construction activities.

END OF SECTION

SECTION 013500

ORDER OF CONDITIONS

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 ORDER OF CONDITIONS

A. The **New Amesbury Elementary School** is a project subject to the regulations of the **City of Amesbury's Conservation Commission** (DEP File No. 002-1260). A copy of the Order of Conditions annotated with the respective responsibilities of the General Contractor, Owner and Design Team is attached to this SECTION (see ATTACHMENT A).

B. It shall be the responsibility of the General Contractor to be familiar with the Order of Conditions and to perform the specified work of this Contract in compliance with the requirements stipulated therein. The General Contractor is responsible to complete the work and to obtain the City of Amesbury's Conservation Commission acceptance for all work included under the Order of Conditions.

C. Upon completion of the work**, the General Contractor shall obtain from the Conservation Commission a signed Certificate of Compliance**, which certifies that the work regulated by the respective agencies have been satisfactorily completed.

D. The City will record the Certificates of Compliance with the Essex County Registry of Deeds.

1.03 PLANNING BOARD DECISION

A. The **New Amesbury Elementary School** is a project subject to the regulations of the **City of Amesbury's Planning Board**. A copy of the Board's decision, dated February 8, 2021, annotated with the respective responsibilities of the General Contractor, Owner and Design Team is attached to this SECTION (see ATTACHMENT B).

B. It shall be the responsibility of the General Contractor to be familiar with the Planning Board Decision and to perform the specified work of this Contract in compliance with the requirements stipulated therein.

g. Date

B. Findings

1. Findings pursuant to the Massachusetts Wetlands Protection Act:

Following the review of the above-referenced Notice of Intent and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the Wetlands Protection Act (the Act). Check all that apply:

a. ☒ Public Water Supply
b. ☒ Land Containing Shellfish
c. ☒ Prevention of Pollution
d. ☐ Private Water Supply
e. ☒ Fisheries
f. ☒ Protection of Wildlife Habitat
g. ☒ Groundwater Supply
h. ☒ Storm Damage Prevention
i. ☒ Flood Control

2. This Commission hereby finds the project, as proposed, is: (check one of the following boxes)

Approved subject to:

a. ☒ the following conditions which are necessary in accordance with the performance standards set forth in the wetlands regulations. This Commission orders that all work shall be performed in accordance with the Notice of Intent referenced above, the following General Conditions, and any other special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall control.

B. Findings (cont.)

Denied because:

b. ☐ the proposed work cannot be conditioned to meet the performance standards set forth in the wetland regulations. Therefore, work on this project may not go forward unless and until a new Notice of Intent is submitted which provides measures which are adequate to protect the interests of the Act, and a final Order of Conditions is issued. **A description of the performance standards which the proposed work cannot meet is attached to this Order.**

c. ☐ the information submitted by the applicant is not sufficient to describe the site, the work, or the effect of the work on the interests identified in the Wetlands Protection Act. Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides sufficient information and includes measures which are adequate to protect the Act's interests, and a final Order of Conditions is issued. **A description of the specific information which is lacking and why it is necessary is attached to this Order as per 310 CMR 10.05(6)(c).**

3. ☒ Buffer Zone Impacts: Shortest distance between limit of project disturbance and the wetland resource area specified in 310 CMR 10.02(1)(a) — 1 ft. restoratio

Inland Resource Area Impacts: Check all that apply below. (For Approvals Only)

Resource Area	Proposed Alteration	Permitted Alteration	Proposed Replacement	Permitted Replacement
4. ☐ Bank	a. linear feet	b. linear feet	c. linear feet	d. linear feet
5. ☒ Bordering Vegetated Wetland	0 a. square feet	0 b. square feet	n/a c. square feet	n/a d. square feet
6. ☐ Land Under Waterbodies and Waterways	a. square feet	b. square feet	c. square feet	d. square feet
	e. c/y dredged	f. c/y dredged		
7. ☐ Bordering Land Subject to Flooding	a. square feet	b. square feet	c. square feet	d. square feet
Cubic Feet Flood Storage	e. cubic feet	f. cubic feet	g. cubic feet	h. cubic feet
8. ☐ Isolated Land Subject to Flooding	a. square feet	b. square feet		
Cubic Feet Flood Storage	c. cubic feet	d. cubic feet	e. cubic feet	f. cubic feet
9. ☐ Riverfront Area	a. total sq. feet	b. total sq. feet		
Sq ft within 100 ft	c. square feet	d. square feet	e. square feet	f. square feet
Sq ft between 100-200 ft	g. square feet	h. square feet	i. square feet	j. square feet

B. Findings (cont.)

Coastal Resource Area Impacts: Check all that apply below. (For Approvals Only)

	Proposed Alteration	Permitted Alteration	Proposed Replacement	Permitted Replacement
10. ☐ Designated Port Areas	Indicate size under Land Under the Ocean, below			
11. ☐ Land Under the Ocean	a. square feet	b. square feet		
	c. c/y dredged	d. c/y dredged		
12. ☐ Barrier Beaches	Indicate size under Coastal Beaches and/or Coastal Dunes below			
13. ☐ Coastal Beaches	a. square feet	b. square feet	c. nourishment cu yd	d. nourishment cu yd
14. ☐ Coastal Dunes	a. square feet	b. square feet	c. nourishment cu yd	d. nourishment cu yd
15. ☐ Coastal Banks	a. linear feet	b. linear feet		
16. ☐ Rocky Intertidal Shores	a. square feet	b. square feet		
17. ☐ Salt Marshes	a. square feet	b. square feet	c. square feet	d. square feet
18. ☐ Land Under Salt Ponds	a. square feet	b. square feet		
	c. c/y dredged	d. c/y dredged		
19. ☐ Land Containing Shellfish	a. square feet	b. square feet	c. square feet	d. square feet
20. ☐ Fish Runs	Indicate size under Coastal Banks, Inland Bank, Land Under the Ocean, and/or inland Land Under Waterbodies and Waterways, above			
	a. c/y dredged	b. c/y dredged		
21. ☐ Land Subject to Coastal Storm Flowage	a. square feet	b. square feet		

B. Findings (cont.)

* **#22.** If the project is for the purpose of restoring or enhancing a wetland resource area in addition to the square footage that has been entered in Section B.5.c (BVW) or B.17.c (Salt Marsh) above, please enter the additional amount here.

22. ☐ Restoration/Enhancement *:

a. square feet of BVW | b. square feet of salt marsh

23. ☐ Stream Crossing(s):

a. number of new stream crossings | b. number of replacement stream crossings

C. General Conditions Under Massachusetts Wetlands Protection Act

The following conditions are only applicable to Approved projects.

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
   a. the work is a maintenance dredging project as provided for in the Act; or
   b. the time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order.
6. If this Order constitutes an Amended Order of Conditions, this Amended Order of Conditions does not extend the issuance date of the original Final Order of Conditions and the Order will expire on unless extended in writing by the Department.

ALL

7. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.
8. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

Owner

9. No work shall be undertaken until the Order has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon which the proposed work is done. The recording information shall be submitted to the Conservation Commission on the form at the end of this Order, which form must be stamped by the Registry of Deeds, prior to the commencement of work.

GC

10. A sign shall be displayed at the site not less then two square feet or more than three square feet in size bearing the words,

"Massachusetts Department of Environmental Protection" [or, "MassDEP"]

"File Number 002-1260 "

Civil

11. Where the Department of Environmental Protection is requested to issue a Superseding Order, the Conservation Commission shall be a party to all agency proceedings and hearings before MassDEP.

ALL

12. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance (WPA Form 8A) to the Conservation Commission.

Arch / Civil

13. The work shall conform to the plans and special conditions referenced in this order.

14. Any change to the plans identified in Condition #13 above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Notice of Intent.

15. The Agent or members of the Conservation Commission and the Department of Environmental Protection shall have the right to enter and inspect the area subject to this Order at reasonable hours to evaluate compliance with the conditions stated in this Order, and may require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.

16. This Order of Conditions shall apply to any successor in interest or successor in control of the property subject to this Order and to any contractor or other person performing work conditioned by this Order.

GC
Civil to check prior to start of work.
Surveyor may need to reset prior to start of work.

17. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until a Certificate of Compliance has been issued by the Conservation Commission.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

GC

18. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.

NOTICE OF STORMWATER CONTROL AND MAINTENANCE REQUIREMENTS

19. **The work associated with this Order (the "Project") is** (1) ☒ **is not** (2) ☐ **subject to the Massachusetts Stormwater Standards. If the work is subject to the Stormwater Standards, then the project is subject to the following conditions:**

GC

a) All work, including site preparation, land disturbance, construction and redevelopment, shall be implemented in accordance with the construction period pollution prevention and erosion and sedimentation control plan and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Construction General Permit as required by Stormwater Condition 8. Construction period erosion, sedimentation and pollution control measures and best management practices (BMPs) shall remain in place until the site is fully stabilized.

b) No stormwater runoff may be discharged to the post-construction stormwater BMPs unless and until a Registered Professional Engineer provides a Certification that:

GC & Civil

i. all construction period BMPs have been removed or will be removed by a date certain specified in the Certification. For any construction period BMPs intended to be converted to post construction operation for stormwater attenuation, recharge, and/or treatment, the conversion is allowed by the MassDEP Stormwater Handbook BMP specifications and that the BMP has been properly cleaned or prepared for post construction operation, including removal of all construction period sediment trapped in inlet and outlet control structures;

GC

ii. as-built final construction BMP plans are included, signed and stamped by a Registered Professional Engineer, certifying the site is fully stabilized;

GC

iii. any illicit discharges to the stormwater management system have been removed, as per the requirements of Stormwater Standard 10;

GC

iv. all post-construction stormwater BMPs are installed in accordance with the plans (including all planting plans) approved by the issuing authority, and have been inspected to ensure that they are not damaged and that they are in proper working condition;

GC

v. any vegetation associated with post-construction BMPs is suitably established to withstand erosion.

Civil reviews and confirms the above under 19.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

c,d,e and f
Owner

c) The landowner is responsible for BMP maintenance until the issuing authority is notified that another party has legally assumed responsibility for BMP maintenance. Prior to requesting a Certificate of Compliance, or Partial Certificate of Compliance, the responsible party (defined in General Condition 18(e)) shall execute and submit to the issuing authority an Operation and Maintenance Compliance Statement ("O&M Statement) for the Stormwater BMPs identifying the party responsible for implementing the stormwater BMP Operation and Maintenance Plan ("O&M Plan") and certifying the following: *i.*) the O&M Plan is complete and will be implemented upon receipt of the Certificate of Compliance, and *ii.*) the future responsible parties shall be notified in writing of their ongoing legal responsibility to operate and maintain the stormwater management BMPs and implement the Stormwater Pollution Prevention Plan.

d) Post-construction pollution prevention and source control shall be implemented in accordance with the long-term pollution prevention plan section of the approved Stormwater Report and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Multi-Sector General Permit.

e) Unless and until another party accepts responsibility, the landowner, or owner of any drainage easement, assumes responsibility for maintaining each BMP. To overcome this presumption, the landowner of the property must submit to the issuing authority a legally binding agreement of record, acceptable to the issuing authority, evidencing that another entity has accepted responsibility for maintaining the BMP, and that the proposed responsible party shall be treated as a permittee for purposes of implementing the requirements of Conditions 18(f) through 18(k) with respect to that BMP. Any failure of the proposed responsible party to implement the requirements of Conditions 18(f) through 18(k) with respect to that BMP shall be a violation of the Order of Conditions or Certificate of Compliance. In the case of stormwater BMPs that are serving more than one lot, the legally binding agreement shall also identify the lots that will be serviced by the stormwater BMPs. A plan and easement deed that grants the responsible party access to perform the required operation and maintenance must be submitted along with the legally binding agreement.

f) The responsible party shall operate and maintain all stormwater BMPs in accordance with the design plans, the O&M Plan, and the requirements of the Massachusetts Stormwater Handbook.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

g to l
Owner

g) The responsible party shall:
1. Maintain an operation and maintenance log for the last three (3) consecutive calendar years of inspections, repairs, maintenance and/or replacement of the stormwater management system or any part thereof, and disposal (for disposal the log shall indicate the type of material and the disposal location);
2. Make the maintenance log available to MassDEP and the Conservation Commission ("Commission") upon request; and
3. Allow members and agents of the MassDEP and the Commission to enter and inspect the site to evaluate and ensure that the responsible party is in compliance with the requirements for each BMP established in the O&M Plan approved by the issuing authority.

h) All sediment or other contaminants removed from stormwater BMPs shall be disposed of in accordance with all applicable federal, state, and local laws and regulations.

i) Illicit discharges to the stormwater management system as defined in 310 CMR 10.04 are prohibited.

j) The stormwater management system approved in the Order of Conditions shall not be changed without the prior written approval of the issuing authority.

k) Areas designated as qualifying pervious areas for the purpose of the Low Impact Site Design Credit (as defined in the MassDEP Stormwater Handbook, Volume 3, Chapter 1, Low Impact Development Site Design Credits) shall not be altered without the prior written approval of the issuing authority.

l) Access for maintenance, repair, and/or replacement of BMPs shall not be withheld. Any fencing constructed around stormwater BMPs shall include access gates and shall be at least six inches above grade to allow for wildlife passage.

Special Conditions (if you need more space for additional conditions, please attach a text document):

See Attachment to Order of Conditions

D. Findings Under Municipal Wetlands Bylaw or Ordinance

1. Is a municipal wetlands bylaw or ordinance applicable? ☒ Yes ☐ No

2. The Amesbury Conservation Commission hereby finds (check one that applies):

   a. ☐ that the proposed work cannot be conditioned to meet the standards set forth in a municipal ordinance or bylaw, specifically:

   _____ (1. Municipal Ordinance or Bylaw) _____ (2. Citation)

   Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides measures which are adequate to meet these standards, and a final Order of Conditions is issued.

   b. ☒ that the following additional conditions are necessary to comply with a municipal ordinance or bylaw:

   Amesbury Wetlands Ordinance (1. Municipal Ordinance or Bylaw) AWO (2. Citation)

3. The Commission orders that all work shall be performed in accordance with the following conditions and with the Notice of Intent referenced above. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, the conditions shall control.

   The special conditions relating to municipal ordinance or bylaw are as follows (if you need more space for additional conditions, attach a text document):

   See Attachment to Order of Conditions

F. Appeals

The applicant, the owner, any person aggrieved by this Order, any owner of land abutting the land subject to this Order, or any ten residents of the city or town in which such land is located, are hereby notified of their right to request the appropriate MassDEP Regional Office to issue a Superseding Order of Conditions. The request must be made by certified mail or hand delivery to the Department, with the appropriate filing fee and a completed Request of Departmental Action Fee Transmittal Form, as provided in 310 CMR 10.03(7) within ten business days from the date of issuance of this Order. A copy of the request shall at the same time be sent by certified mail or hand delivery to the Conservation Commission and to the applicant, if he/she is not the appellant.

Any appellants seeking to appeal the Department's Superseding Order associated with this appeal will be required to demonstrate prior participation in the review of this project. Previous participation in the permit proceeding means the submission of written information to the Conservation Commission prior to the close of the public hearing, requesting a Superseding Order, or providing written information to the Department prior to issuance of a Superseding Order.

The request shall state clearly and concisely the objections to the Order which is being appealed and how the Order does not contribute to the protection of the interests identified in the Massachusetts Wetlands Protection Act (M.G.L. c. 131, § 40), and is inconsistent with the wetlands regulations (310 CMR 10.00). To the extent that the Order is based on a municipal ordinance or bylaw, and not on the Massachusetts Wetlands Protection Act or regulations, the Department has no appellate jurisdiction.

G. Recording Information

Prior to commencement of work, this Order of Conditions must be recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land subject to the Order. In the case of registered land, this Order shall also be noted on the Land Court Certificate of Title of the owner of the land subject to the Order of Conditions. The recording information on this page shall be submitted to the Conservation Commission listed below.

ATTACHMENT TO ORDER OF CONDITIONS

Applicant and	**Mayor Gove**
Property Owner:	**City of Amesbury** **City Hall, 62 Friend Street** **Amesbury, MA 01913**
Project:	**Amesbury Elementary School**
DEP File:	**002-1260**

Pursuant to Massachusetts Wetlands Protection Act (M.G.L. chapter 131, §40) and its implementing regulations (310 CMR, § 10.00) and the Amesbury Wetlands Protection Ordinance and its implementing regulations:

WORK AUTHORIZED: This Order authorizes, pursuant to the Massachusetts Wetlands Protection Act and the Amesbury Wetland Protection Ordinance, the construction of a new 98,195 GSF elementary school building on a ±37.8-acre parcel of land located at 193 Lions Mouth Road and a ±2.5 acre portion of the adjacent City owned Woodsom Farm property. .

The proposed project includes the construction of a new elementary school at the subject site with associated parking lots, driveways, landscaping, play areas, stormwater management facilities, utilities and related infrastructure. This project will also include the redevelopment and upgrading of portions of the existing parking lots, driveways, stormwater management facilities and related site features of the existing Cashman Elementary School. The existing Cashman Elementary School will remain as an integral part of this two-building campus.

The total area of the proposed alterations on the site for this project is 13.8 acres of the total site. The project includes work near certain wetland resource areas under the Massachusetts Wetlands Protection Act and the Amesbury Wetlands Bylaw. The area of site work within the 100-foot Buffer Zone is 1.6 acres. The proposed site work for the project includes the following:

- Construction of a new school building to the northwest of the existing school building.
- The majority of the project will be within the portions of the site that are presently developed for the existing school and facilities.
- Reconfiguration of the access roads and parking areas including a new access / egress drive through a corner of the Woodsom Farm property to Lions Mouth Road.
- Provision of new stormwater management facilities for the new portion of the site to fully meet the current Mass. Stormwater management Regulations. The new stormwater management facilities include a variety of Best Management Practices including bio-retention basins, subsurface rechargers, subsurface detention basins, a porous asphalt parking lot and permeable play surfaces. Pretreatment BMPs include

deep sump catch basins, sediment forebays and proprietary stormwater treatment systems. Stormwater management improvements have been designed to meet the requirements of the Mass Stormwater Management Regulations. The result will be more stormwater recharge on the site than under existing conditions and significant improvements to water quality while not increasing the peak rates of runoff the Wetlands Resource Areas or the City drainage system and meeting the groundwater recharge requirements.

- The stormwater management facilities for the existing school will be significantly upgraded to the extent practicable as a redevelopment. The improvements include deep sump catch basins and proprietary treatment systems to improve water quality, provision of a subsurface detention basin and improvement of an existing stormwater basin for improved detention to correct existing drain system capacity issues.
- Construction of new utilities for the new school (sewer, water, gas, electric and tele-com).
- Construction associated with grading, landscaping, walkways, and site lighting improvements.
- Construction of new outdoor play spaces.
- Installation and management of construction period erosion and sedimentation controls.

The project details are comprehensively described in the "Approved Project Documents" identified n the Appendix.

A construction sequence plan will be developed as part of the pre-construction planning process following project approval, for implementation of the project and the mitigation program. The applicant will provide a draft construction sequence plan prior to the pre-construction meeting (see Condition 20).

CURRENT CONDITIONS: The project site is a City owned property at 193 Lion's Mouth Road in Amesbury, MA containing the existing Cashman Elementary School building and associated driveways, parking areas, play areas, ball fields and utilities. The project site also includes a ±2.5-acre portion of the adjacent City owned Woodsom Farm property. The site has an access drive from Lions Mouth Road at the southern end of the site. Just over half of the property is developed for the existing school facilities and ball fields. The upland areas have a rolling terrain except where leveled for the parking areas and ball fields. The undeveloped area consists of the wooded wetlands along the Northeast side of the site and some adjacent wooded and open field areas. The property is located at the base of Whittier Hill that is northeast of the site. The main wetlands resource areas are located along the entire northeastern side of the property. These include an intermittent stream and associated Bordering Vegetated Wetlands that are in the watershed of the lower Powwow River located approximately one mile east of the site. There are also wetland resource areas on the adjacent Woodsom Farm property that consist of a pond and intermittent stream with associated BVW. Those wetlands are tributary to the main wetland described above and the 100-foot wetland buffer zones of those resource areas extend into the subject project site.

The wetland boundaries and associated 100-foot Buffer Zones under the Mass. Wetlands Protection Act are shown on the project plans. Also included are the 25 foot No Disturbance Buffer and the 50 foot No Build Buffer (under the Amesbury Wetlands Regulations).

The wetland boundaries of the main wetland were delineated by DGT Associates in July and August of 2018. The wetlands on the Woodsom Farm site were originally from the proposed Soccer Field Project that was the subject of the Notice of Intent filed in 2015 under DEP File No. 002-1116. Both the DGT Delineation and the original Woodsom Farm delineation were filed under an ANRAD filing (DEP File No. 002-1218) to formally accept the new delineation and renew the former delineation for the Soccer Field project. The Order of Resource Area Delineation was issued on October 9, 2018.

Since that time, the City has re-delineated the wetland areas on the Woodsom Farm site and submitted a new ANRAD for that site under DEP File No. 002-1249. That wetland delineation was performed by Seekamp Environmental and is presently under review by the Amesbury Conservation Commission. The results of that re-delineation show the wetlands to be closer to the school project site than the previous approved delineation, so to be conservative and to coordinate with that delineation, the current School Project plans shows this new delineation.

The site is shown on the latest FEMA National Flood Insurance Program mapping as being in a Zone X so it is not within a Land Subject to Flooding under the Mass. Wetlands Protection Act. The limits of the Zone X are included on the Existing Condition Plan and are within the BVW area. The FEMA FIRM map is included in Attachment 3

According to the latest Mass. Division of Fisheries and Wildlife - Natural Heritage Program mapping, there are no areas on or near the project site that are designated as Priority Habitat of Rare Species or Estimated Habitat of Rare Wetland Wildlife. Nor are there any Certified or Potential Vernal Pools in the vicinity of the site. Attachment 3 contains a map of the current Mass. GIS Natural Heritage data layers.

I. GENERAL CONDITIONS:

All

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order of Conditions ("Order").
2. Approval of this application does not constitute compliance with any law or regulation other than MGL Chapter 131, Section 40, Wetlands Regulations CMR 10.00 and Amesbury Wetlands Protection Ordinance ("Ordinance") and its implementing regulations ("Regulations") as promulgated by the City of Amesbury Conservation Commission (ACC).
3. This Order shall apply to any successor in interest or successor in control of the property.
4. This Order shall be **recorded by the applicant at the Registry of Deeds** promptly after the expiration of all appeal periods. No work shall be undertaken until the Final Order has been recorded in the Registry of Deeds or the Land Court for the district in

Owner

which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon which the proposed work is to be done. **The recording information shall be submitted to the ACC** on the form at the end of this Order prior to commencement of the work. Any Order not recorded by the applicant before work commences may be recorded by the ACC at the applicant's expense.

5. The work authorized hereunder shall be completed within **five (5) years** from the date of this Order. The applicant shall appear before the ACC in one (1) year from the date of this Order to provide a status report.

6. This Order may be extended by the issuing authority for one or more periods of up to one year each upon application to the issuing authority at least **thirty (30) days** prior to the expiration date of the Order.

OPM Arch GC

7. This Order shall be made part of all construction contracts and subcontracts dealing with the work proposed and approved, and the requirements of this Order shall supersede any conflicting contract requirements. The contractor or contractors responsible for the project's completion shall understand and be notified of the requirements of this Order. Any person performing work on the activity that is the subject of this Order is individually responsible for understanding and complying with the requirements of this Order.

GC

8. Two signs shall be displayed (at 193 Lion's Mouth Road driveway entrance and at the trail access point from the adjacent Woodsom Farm/219 Lion's Mouth Road property) at the site not less than two (2) feet or more than three (3) square feet in size bearing the words,

"MA DEP File Number 002-1260"

GC to Comply

9. The Amesbury Conservation Commission (ACC) reserves the right to impose additional conditions on this project, including but not limited to additional or modified erosion control / siltation controls during construction, if it deems that site conditions warrant such measures to mitigate potential impacts.

GC

10. A copy of this Order and the plan approved in this Order shall be available on site when work within any ACC jurisdictional area is in progress.

Owner

11. If the subject parcel is sold or the development rights are transferred to any other person, the applicant shall be required to submit to the ACC a signed and notarized letter of acknowledgement from the buyer or their assignees stating that they have been provided copies of all permits associated with the proposed project, including this Order, and that they understand their responsibility associated with the construction of this project under those permits, including this Order.

Owner

12. The applicant shall be required to pay in full any outstanding invoices from the Commission's peer review consultants for this project.

13. **Applicant's Environmental Monitor:**

GC all items under 13.

a. Qualifications: The applicant shall designate an "Environmental Monitor," such as a Registered Professional Engineer, Professional Wetland Scientist or other qualified consultant who has relevant experience in wetland impact/assessment and erosion/sedimentation control measures to oversee any emergency placement of controls and regular inspection or replacement of sedimentation control devices. The qualifications of the Applicant's Environmental Monitor shall be submitted to the ACC for approval at least 30 days prior to commencement of any work on the site.

b. Authority: The name and phone number of the Environmental Monitor must be provided to the ACC in the event that this person has to be contacted, due to an emergency at this site, during any 24-hour period, including weekends. **This person shall be given the authority to stop construction should there be unlawful entry into the wetland resources areas and / or for erosion controls purposes.** The Environmental Monitor will be required to inspect all such devices and oversee cleaning and the proper disposal of waste products. Cleaning shall include removal of any entrapped silt.

c. Site Inspections: Consistent with USEPA's NPDES Construction General Permit, the Environmental Monitor shall conduct site inspections on site at least weekly and immediately after rainstorms of 0.5 inches or more during periods of active site work or construction within ACC jurisdictional areas. Less frequent inspections may be conducted to the extent permitted by the USEPA NPDES Construction General Permit and as the ACC or the ACC's Agent may approve during the course of construction based on consideration of the site conditions, the level of site activity, and other relevant factors. During inspections, the Environmental Monitor must (1) visually inspect all sedimentation / erosion control measures and ensure that they are being properly maintained and functioning as intended, and (2) visually inspect all wetland resource areas near or downgradient from site activities for siltation, turbidity, and/or other water quality impacts.

d. Reporting: During periods in which Site Inspections are required, the Environmental Monitor shall submit a written report to the ACC following each inspection (except as the ACC or the ACC's Agent may otherwise approve).

   i. The Environmental Monitor must certify that, to the best of his / her knowledge and belief based on a careful site inspection, all work is being performed in compliance with this Order of Conditions, except any incidents of noncompliance that the Environmental Monitor may identify in the report, for which mitigation and/or corrective actions shall also be identified.

   ii. The reports shall describe what work is anticipated to be complete over the next reporting period (this will update the construction sequence); current conditions of the erosion controls; description of any erosion or sedimentation repair and/or replacement; and any erosion or sedimentation problems and mitigation measures implemented.

iii. Such reports shall continue until the applicant has requested and the ACC or the ACC's Agent has approved in writing either a less frequent reporting schedule or an end of the reporting.

14. **Commission's Environmental Monitor:**

Owner
All Items
under 14

a. Environmental Monitor: At the applicant's expense, the ACC shall designate an environmental monitor to act as the "Commission's Environmental Monitor." The environmental monitor shall provide environmental monitoring expertise for wetlands issues and stormwater issues by a professional engineer and a qualified wetland scientist who have relevant experience in wetland impact / assessment and erosion / sedimentation control measures and stormwater management.

b. Inspections and Reporting: During the Construction Phase of the Project, the Commission's Environmental Monitor shall inspect the Site and report back to the Commission (with copies to the Applicant) as follows:

i. After installation of erosion controls and prior to the Applicant's commencement of site work;

ii. Bi-weekly (or at a reduced frequency if authorized by the ACC or ACC's Agent) during periods of active site work or construction activity within 100 feet of wetland resource areas. For example, inspection frequency may be reduced if the site is stable and shut down due to winter conditions.

iii. As otherwise requested by the ACC's Agent after significant rain events or at other times when active Site work is being conducted that the ACC's Agent believes presents a risk of adverse impacts to resource areas if not properly conducted or managed and warranting review by the Commission's Environmental Monitor.

c. Review of Documents: During the construction phase of the project, the Commission's Stormwater Monitor shall inspect the site and report back to the Commission (with copies to the applicant) on a schedule to be determined and agreed upon at the preconstruction meeting. The Commission's Environmental Monitor shall also review and make recommendations to the ACC or ACC's Agent (with copies to the Applicant) regarding any key project-related documents submitted to the ACC or ACC's Agent by the Applicant pursuant to this Order of Conditions if such review is determined to be warranted and is requested by the ACC or ACC's Agent.

i. The applicant, its general contractors shall notify the Conservation Commission's agent and Stormwater Monitor not less than 48 hours jprior to the construction of its stormwater system.

GC

15. There shall be no pumping of water from wetland resource areas on or adjacent to the site.

OPM
Arch
Owner
All parts of
this condition.

16. Plan Modifications: Any modification to the approved plans shall require review and approval by the ACC. Prior to consideration of any such request, the ACC may require the applicant to have the relevant wetland resource areas re-flagged or the originally approved flagging established. The applicant shall be required to submit the modification request in writing along with all the necessary forms and supporting documents in a timely manner for the ACC's consideration.

Plan modifications requested by the GC will be the responsibility of the GC unless the Owner agrees to accept the responsibility.

a. The ACC may require any significant plan modification request to be reviewed by the Commission's Environmental Monitor, in which case the applicant shall submit the necessary funds to the ACC for the consultant services.

b. The Commission shall also review the request and decide if an Amended Order of Conditions is required pursuant to the Massachusetts Wetlands Protection Act and the Amesbury Wetlands Protection Ordinance. As stated, any change that requires modification of approved plans within the jurisdictional area or changes to the erosion control plan or to the stormwater management system may require an Amended Order of Conditions unless the Commission decides otherwise at its regularly posted public meeting. If the ACC decides that a change is of sufficient magnitude to warrant imposition of additional conditions to ensure adequate protection of the resource area and / or the interests covered under the Ordinance and Regulations and an Amended Order of Conditions, a public hearing shall be required.

c. Any requests for modification or amendment of the Order shall not be considered or reviewed if the Order has expired or there is an outstanding Enforcement Order on the subject parcel – except as the ACC may otherwise explicitly allow.

II. PRE-CONSTRUCTION CONDITIONS:

GC

17. NPDES Permit and SWPPP: Prior to construction the applicant will provide the ACC a copy of the NPDES permit application, SWPPP and supporting documents. Additionally, the applicant will provide a statement from the operator/manager of the SWPPP acknowledging the responsibilities and requirements in the plans and agree to carry out said responsibilities and adhere to Best Management Practices of the plans as a perpetual responsibility and condition.

Arch/ Civil

18. Stormwater Standard 10 – Illicit Discharge Statement: Prior to the preconstruction meeting, the applicant shall provide to the ACC an updated illicit discharge statement as required by MassDEP's Stormwater Standard 10 representing acknowledgement of the final stormwater design.

Arch/ Civil

19. Pollution Prevention and Stormwater O&M Budget: Prior to the preconstruction meeting, the applicant shall provide to the ACC an updated Pollution Prevention and Stormwater Operation and Maintenance Plan that includes all catch basins and an updated estimated operation and maintenance budget.

GC, OPM, Arch.

20. Construction Sequence Plan: The contractor will provide a detailed construction sequence plan for site construction and installation of the stormwater management facilities, erosion and sediment control barriers, and other work within ACC jurisdictional areas, including location of temporary sedimentation basins and measures to ensure preservation of the infiltration surfaces during the sequencing phases, twenty-one (21) days prior to the pre-construction meeting for review and approval by the ACC and/or the ACC's Agent. Work within areas under ACC jurisdiction may not begin prior to approval by ACC or ACC's Agent of the construction sequence plan.

Owner
Arch
OPM

21. Invasive Species Control Program: The applicant will provide a final Invasive Species Control Program thirty (30) days prior to commencement of any invasive species removal activities for review and approval by the ACC; provided, however, that regardless of when such activities are scheduled to begin, the applicant will provide a final Invasive Species Control Program, including a proposed implementation schedule, for review and approval by the ACC within twelve (12) months after issuance of the OoC. The approved program will include the proposed schedule and sequence of mitigation activities and will be updated on an annual basis by March 1st of each year during construction. The updated program will also include the National Wetlands Inventory classification of replacement plants and the control methodology for each invasive plant species.

Owner

22. Erosion Control Bond: The applicant shall be required to post an erosion control bond with the ACC and the amount shall be calculated @ $0.25 per square feet of buffer zone area within the approved limit of work. Such funds shall be sufficient to repair any damages to the wetlands due to soil erosion, stabilization of all soils and the disturbed areas on the site. The applicant shall be exempt from establishing a separate erosion control bond if such a bond is established with the Planning Board approval. The ACC may periodically reduce the bond amount based on completed work and site conditions. Prior to any release of bond amount, the ACC shall require the inspection of work completed. Final release of the bond amount shall be allowed upon completion of all site work, including but not limited to, the stormwater management system, roadway binder course and final stabilization. If the erosion control bond is held by the Planning Board, the ACC shall send a letter to the Planning Board prior to final release of the bond.

Owner

23. Performance Bond: Unless required by the Amesbury Planning Board, the applicant shall post a performance bond in the amount necessary to install and complete the stormwater management system by this Order. The applicant shall submit the necessary legal and financial documents to post the bond. Upon receiving the request from the applicant, the Commission's Environmental Monitor shall review the work to be done and make its recommendation to the Commission. No building permits shall be applied for or issued until the approved performance bond has been established by the applicant. The applicant may periodically request reductions in the bond amount as portions of the work are completed. The final release from the performance bond shall be made after two growing seasons have passed and all the plants in the approved areas have survived and are healthy as confirmed by the Commission's Environmental Monitor and approved by the ACC. Any release of funds shall be made by the Commission upon verification of work by its consultant and/or its Agent.

Arch,
Civil,
Surveyor

GC for
maintenance
after initial installation.

24. Wetlands Flagging: Prior to the pre-construction meeting and commencement of any activity on this site, the boundaries of all wetland resource areas shown on the approved plan shall be identified in the field by flagging in good condition, with readable labelling, spaced at intervals not greater than 25-feet apart. Wetland flags shall be checked and replaced as necessary and maintained until a Certificate of Compliance is issued for the project or any earlier period as the ACC or the ACC's Agent may authorize.

GC

25. Erosion Controls: Prior to the pre-construction meeting and commencement of any activity on this site, all erosion control devices approved under this Order shall be properly installed as shown on the approved plan and as specified in the Construction Sequence Plan (see Condition 20). The ACC and/or its Agent and Commission's Environmental Monitor shall inspect and approve such installation at a pre-construction meeting. The erosion control devices must remain in place and functioning until the ACC or its Agent has authorized their removal. All workers must be instructed not to work beyond this limit.

GC

26. Dust Control Program: Prior to construction, a dust control program shall be developed and provided to the Conservation Agent for its approval prior to the preconstruction meeting. The dust control program shall be implemented as outlined in the ACC-approved program.

OPM
GC
ARCH
Civil and other design team as directed.

27. **Pre-Construction Meeting: Once the above-mentioned pre-construction requirements are complete, the applicant shall contact the Conservation Department prior to site preparation or construction and shall arrange an on-site PRE-CONSTRUCTION MEETING with representatives from the ACC and/or its Agent, the project supervisor, the contractor responsible for work, the engineer, the Applicant's Environmental Monitor and Stormwater Monitor, and the Commission's Environmental Monitor and Stormwater Monitor to ensure all of the Conditions of this Order are understood. Please contact the Amesbury Conservation Department office at (978) 388-8110 ext. 317 at least seventy-two (72) hours prior to any activity to arrange the pre-construction meeting.**

GC

28. Contractors/Subcontractors: All contractors and subcontractors shall be informed of the conditions and provisions of this Order. This Order shall be included in all construction contracts and subcontracts dealing with the work, and shall supersede other contract requirements. Failure to have this OoC present during a site visit shall constitute a violation of the Wetlands Protection Act and the Amesbury Wetlands Ordinance and shall be subject to enforcement action by the ACC in a public meeting.

GC

29. Project Supervisor: Prior to any work being done at the project site, the applicant shall inform the ACC and the Environmental Monitor in writing of the names, addresses, business, mobile and home telephone numbers of both the project supervisor who will be responsible for ensuring on-site compliance with this Order and his/her alternate. The notification shall occur at least 72 hours prior to commencement of work on the site. The 72 hours shall not be over weekends or holidays. The applicant shall also notify the ACC and its Environmental Monitor in writing of any changes.

Owner

30. Recorded Order: A recorded copy of the Order of Conditions shall be presented to the Agent no later that the time of the pre-construction meeting.

III. CONSTRUCTION CONDITIONS:

GC

31. A copy of the recorded Order shall be provided to the Building Inspector at the time of making application for Building Permit along with a set of approved plans.

OPM Owner

32. Prior to making application for building permits, copies of all recorded legal documents pertaining to drainage and utility easements, restrictions on the project site and other conservation restrictions shall be provided to the Commission for their records.

GC

33. Accepted engineering and Best Management Practices for construction standards shall be followed in the conduct of all work. All site improvements shall be installed as per approved plans and engineering details shown on them. Any modifications or deviations from approved plans shall only be made upon approval from the ACC (or, with respect to minor deviations, by the ACC's Agent).

GC

34. Erosion control devices shall be inspected regularly by the applicant; and immediately after 0.5 inches of precipitation. Any entrapped silt shall be removed to an area outside of the buffer zone and wetland resource areas; silt fence, compost filter tubes (or similar) and hay bales shall be replaced as necessary.

GC

35. After proper grading, all disturbed areas shall be brought to final finished grade and stabilized permanently against erosion. This shall be done in the ACC approved manner. Achievement of stabilization is considered to be when the surface shows complete vegetation cover as prescribed in the approved landscape plan. This shall be measured by at least 85% coverage by established vegetation.

GC

36. Bare ground in the Buffer Zone that cannot be permanently stabilized within thirty (30) days shall be stabilized by a temporary cover of rye or other grass should be established following U.S. Natural Resource Conservation Service (NRCS) procedures to prevent erosion and sediment transport. If the season is not appropriate for plant growth, exposed surfaces shall be stabilized by straw, jute netting or other NRCS approved Best Management Practices. Any stabilization materials such as jute netting shall be firmly anchored to prevent them from being washed from slopes by rain, snow melt, or flooding.

GC

37. Subsequent to seeding, disturbed areas will be covered with salt hay mulch, erosion control blanket or netting, or other suitable material in order to provide adequate surface protection until seen germination. Preference should be given to erosion control netting with biodegradable stitching. Netting shall be required on all slopes 4:1 or steeper unless the slope is designated on the approved plans to be covered by other material.

GC

38. Site grading and construction in the Buffer Zone shall be scheduled to avoid periods of high water. Once begun, grading and construction shall move uninterrupted to completion to avoid erosion and siltation to the wetlands.

GC

39. No alteration or activity shall occur beyond the limit or work as defined by the siltation barriers shown on the approved plan.

GC

40. All waste generated by, or associated with, the construction activity shall be contained within the construction area, and away from the resource areas. There shall be no stump dumps, burying of stumps or burying of any material onsite. The applicant shall maintain a dumpster (or other suitable means) at the site for the storage and removal of such construction material off-site. However, no trash dumpsters will be allowed within 100-feet of the Bordering Vegetated (BVW) or riparian bank.

41. Stockpiles:

GC

a. All stockpiles within the ACC jurisdictional areas shall be enclosed by erosion control consisting of hay bales and entrenched silt fence or other barriers as the ACC or the ACC's Agent may approve. For stockpiles located outside of ACC jurisdictional areas, a sediment barrier shall be installed along all downgradient perimeter areas. There shall be no stockpiling outside the approved limit of work and staging/storage and stockpiling areas shall be located further than 50 feet from wetland resource areas, including Riverfront Area, to the extent practicable. Stockpiles shall be set back at least 10 feet from the top-of-slope at any culvert (existing or being installed). Prior to storms predicted to produce 1-inch or more within a 24-hour period, stockpiles must be moved at least 50 feet away from wetland resource areas or have the side of the stockpile facing the wetland resource area(s) stabilized.

b. Stockpiles shall not drain toward wetland resource areas or drainage conveyances or catch basin inlets. If this is not possible, then the side facing such features shall be stabilized.

c. Stockpiles not in active use must be stabilized as soon as practicable, but not more than 14 days after the use of the stockpile ceases temporarily or permanently, unless:

   i. Stabilization by the 14th day is precluded by snow cover or frozen ground, in which case stabilization measures must be initiated as soon as practicable; or

   ii. Use of the stockpile will resume by the 14th day after activities ceased.

GC

42. Equipment, machinery, storage of soils, storage of materials and vehicle storage, washing, and refueling operations shall be situated in an upland area at a distance greater than 100-feet from the BVW and the applicable resource areas during construction. All machinery shall be checked daily for leaking fluids.

GC

43. Cleaning of concrete mixing equipment and/or machinery shall be restricted to upland areas at a distance greater than 100 feet to the BVW, and appropriate discharge control measures shall be implemented, including monitoring of the pH of discharge waters to ensure that the appropriate Massachusetts Surface Water Quality Discharge Standards are met.

GC

44. Unless approved by the Commission for control of invasive species, chemicals, pesticides, herbicides, hazardous materials, etc. shall not be used or stored within 100' of a wetland resource area, including Riverfront Area, with the exception of the use of herbicides as part of the approved Invasive Species Management Plan.

GC

45. Any damage caused as a direct result of this project to any wetland resource areas shall be the responsibility of the applicant to repair, restore and / or replace. Sedimentation or erosion into these areas shall be considered damage to wetland resource areas. If sediment reaches these areas, the Commission and/or its agents shall be contacted and a plan for abatement of the problem and proposed restoration / mitigation measures shall be submitted for approval and implementation. If the applicant fails to address the failure or damage as required by the Commission in a timely manner, it shall be deemed as a violation under the Regulations.

Owner
GC

46. Monitoring by the Environmental Monitor (Applicant's and ACC's), follow-up eradication of invasive species, and any necessary re-plantings as required by this Order shall be continued until a Certificate of Compliance is issued or as otherwise authorized by the ACC or ACC's Agent. The applicant shall provide sufficient funds to ensure this to avoid enforcement action.

IV. AFTER CONSTRUCTION:

Arch
Civil

47. Upon completion of the project and one full growing season has elapsed since final site stabilization has been achieved, the applicant shall submit the following to the Amesbury Conservation Commission to Request for a Certificate of Compliance (COC):

    a. WPA Form 8A- Request for a Certificate of Compliance;

    b. A letter from the applicant requesting the Certificate of Compliance with the following information included:

        i. Name and address of current landowner;

        ii. The name and address of the individual or other entity to whom the COC is to be issued;

        iii. The street address and lot number for the project; and DEP file #

        iv. "As-Built" plans prepared, sign, and stamped by a Registered Professional Civil Engineer (and / or Registered Professional Land Survey) of the Commonwealth, for public record.

GC

GC

48. At the completion of construction but prior to final site stabilization, the applicant will provide an as-built plan subject to the review of both the applicant' environmental monitor and/or the Commission's environmental monitor. The applicant will also provide a letter by the site engineer confirming the work has been completed.

Civil for "site engineer letter".

GC

49. Erosion control devices shall remain in place and functioning properly until all exposed soils have been stabilized with final vegetative cover and the ACC and/or its Agent has authorized their removal.

GC and Civil

50. The Applicant's Environmental Monitor shall also provide a full review of the as-built plans and provide comments and recommendations in support of a Request for Certificate of Compliance and the subsequent issuance of a Certificate of Compliance by the Amesbury Conservation Commission. Deviations, both authorized and unauthorized, shall be fully documented. Unauthorized deviations from the approved plan may result in additional mitigation measures imposed on the applicant by the ACC and/or enforcement action with possible fines. At the ACC's discretion, the ACC may have the Request for Certificate of Compliance reviewed by the Commission's Environmental Monitor, at the applicant's expense.

Owner

51. Prior to issue of Certificate of Compliance, the applicant shall be required to pay in full any outstanding invoices from the Commission's Environmental Monitors and Stormwater Monitors.

Arch / Civil

52. The applicant shall make request for Certificate of Compliance as provided for under Section 7.12 of the Amesbury Wetlands Regulations, as amended.

V. PERPETUAL CONDITIONS:

The following conditions are ongoing and do not expire with the issuance of the Certificate of Compliance – except as the ACC may otherwise specify in its Certificate of Compliance:

Owner

53. The management contract between the City and the site management company shall provide that the dumping of leaves, grass clippings and/or brush is prohibited in buffer zones and in wetland areas into perpetuity. In addition, semiannual reports to the ACCC on the condition of all plantings for a five-year period shall be submitted to the ACC on November 1 and May 1 of each year for a period of five years once construction is concluded. Any plantings not doing well shall be replaced by the applicant. The ACC shall select a per rview consultant to inspect the plantings and provide a written reort to the Acc on a semiannual basis, November 1 and May 1 of each year.

Owner

54. There shall be no storage of soils, material or equipment between the 100 foot buffer and the applicable resource area except within the designated loading/service area of the Amesbury Elementary School in Perpetuity. Equipment refueling shall occur outside the 100-foot buffer zone and/or on impervious surfaces.

Owner

55. The site management agreement between the City and the site manager shall provide that no chemical herbicides, pesticides, and non-organic fertilizers are to be used within ACC jurisdictional areas on the property, including both open space and developed areas, at any time now or in the future and that any contractors providing maintenance services to the site shall be advised of the requirement. The site management agreement may permit the use of chemical deicers, such as low salt/sand

mix or calcium chloride, in the areas shown on the as-built plans that are outside of the 50 foot setback jurisdictional areas.

Owner

56. Fertilizers utilized for landscaping and lawn care within ACC jurisdictional areas shall be slow release, low-nitrogen types (<5%), and shall not be used within 25-feet of a resource area. Unless approved by the Commission for control of invasive species, pesticides and herbicides shall not be used within 100-feet of a wetland resource area. This condition shall survive the Order of Conditions and shall run with the title of the property and noted in the Deed.

Owner

57. Semi-Annual Reports: The applicant and his/her/their successors in ownership shall fill written reports of the inspections, cleaning of the parking areas and stormwater management systems maintenance with the ACC on a semiannual basis, by November 1 and May 1 of each year. In addition, the ACC shall select a peer review consultant to inspect the parking areas and stormwater management systems and provide a written report to the ACC on a semiannual basis, on November 1 and May 1 of each year. These reports shall be required for five years after the completion of construction. After five years of reports have been submitted, the ACC can decide whether further reports or action is warranted.

Owner

58. It is the responsibility of the City to maintain the stormwater management systems as specified in the Operation and Maintenance Plan to ensure that they function properly. This condition shall exist in perpetuity and shall be recorded as such in the Certificate of Compliance. On the sale or change of hands of the property, the applicant shall provide the new owner with a copy of the Operation and Maintenance Plan. At each subsequent sale of the property, the then current owner shall provide a copy of the Operation and Maintenance Plan to the new owner. A copy of the new owner's acknowledgement of receipt of the Operation and Maintenance Plan shall be sent to the ACC. This condition shall exist in perpetuity and shall be recorded as such in the Certificate of Compliance.

Owner

59. The applicant shall comply with all requirements of the Operation and Maintenance Plan filed with the Order of Conditions. The applicant shall maintain and repair all components of the stormwater management system to ensure that the design capacity, the stormwater treatment and pollution abatement capacity, and structural integrity of these facilities are maintained. The applicant shall maintain all stabilized surfaces as designed including maintenance and repair of pavement and maintenance of landscaped areas maintaining a vigorous growth of all plant materials. Catch basins and stormwater treatment units shall be inspected and cleaned and roadways, driveways and sidewalks shall be swept at intervals specified in the Operation and Maintenance Plan (O&M Plan). Snow shall be plowed onto designated areas to encourage infiltration during subsequent thawing periods. Sediments shall be removed from snow storage areas by April 4 of each year. Accumulated sediments shall be removed from sumps and floatable wastes shall be removed from the surface of every catch basin at intervals specified in the operation plan. All drain pipes shall be inspected, and sediment and debris removed at intervals specified in the O&M Plan. Sediments and wastes shall be disposed of in accordance with all applicable federal, state, and local laws. The subsurface infiltration structures shall be inspected and cleaned and checked for proper infiltration at intervals specified in the O&M Plan. The

porous pavement surface shall be inspected and cleaned and checked for proper infiltration as intervals specified in the O&M Plan.

Owner

60. Annual Reports: The applicant and his/her successors in ownership shall file written reports of the inspections, cleaning and stormwater maintenance with the ACC on an annual basis, by November 1st beginning the year the stormwater management system is installed.

Appendix
Statement of Reason and Findings, Documents, and Approved Plans

STATEMENT OF REASON AND FINDINGS

This project proposes construction of the Amesbury Elementary School and associated infrastructure (parking lots, driveways, utilities, stormwater management features, play areas, and landscaping, etc.), and redevelopment of existing infrastructure. The proposed new school would be located on the same site as the existing Cashman Elementary School building and associated playing fields, parking areas, and access drive. The project site is approximately 37.8 acres in size. The existing Cashman Elementary School would remain. The proposed new school building would be built primarily in an area where grassed playing fields currently exist, although some naturally vegetated areas would be impacted. The NOI states that the proposed project site also includes approximately 2.4 acres of the adjacent city owned Woodsom Farm property, where a proposed egress driveway and associated activities are proposed.

The Amesbury Conservation Commission (Commission) engaged the following peer review consultants, who attended Zoom Virtual Workshop Meetings and produced peer review letter reports as follows:

- BSC Group, Inc. - four (4) Peer Review Reports and Attendance at two (2) Zoom Virtual Workshop Meetings:
    - Letter Report dated May 18, 2020
    - Zoom Meeting 1 on July 15, 2020
    - Letter Report dated November 13, 2020
    - Zoom Meeting 2 on November 17, 2020
    - Letter Report dated December 11, 2020
    - Letter Report dated December 17, 2020
- Stantec Consulting Services, Inc – Five (5) Peer Review Reports and Attendance at four (4) Zoom Virtual Workshop Meetings:
    - Letter Report 1 dated April 22, 2020
    - Zoom Meeting 1 on July 15, 2020
    - Letter Report 2 dated November 13, 2020
    - Zoom Meeting 2 on November 17, 2020
    - Letter Report 3 dated December 14, 2020
    - Zoom Meeting 3 on December 14, 2020
    - Letter Report 4 dated January 14, 2021
    - Zoom Meeting 4 on January 21, 2021
    - Letter Report 5 dated February 26, 2021

These documents and meetings attendance are considered the foundation for the Commission's review, findings, statement of reason, conditions and decision.

FINDINGS

1. The Commission finds that areas subject to regulation and review under the Wetlands Protection Act (WPA) and the City of Amesbury Wetland Protection Ordinance (Ch. 460) (Ordinance) and accompanying regulations exist on the

project site and include the following: Bordering Vegetated Wetlands, Inland Bank (associated with an intermittent stream), and Buffer Zones. (Shown on the site plan dated September 25, 2020). The wetland resource area delineation was peer reviewed by BSC Group, Inc. and has been approved by the Commission.

i. The site at the time of its review does not include Priority Habitats of Rare Species, Estimated Habitat of Rare Wildlife, or Potential Vernal Pools or Certified Vernal Pools as documented by the Massachusetts Natural Heritage and Endangered Species Program.

2. The Commission finds that Bordering Vegetated Wetlands and Inland Bank (associated with an intermittent stream) on the project site are significant to the following interests of the WPA and Ordinance: public and private water supplies, ground water supplies, flood control, storm damage prevention, prevention of pollution, and to the protection of fisheries and wildlife habitat.

3. The Commission finds that no impacts to BVW or Inland Banks are proposed other than the allowable maintenance removal of sediment from an existing 18-inch stormwater outfall corrugated metal pipe (CMP) at the parking lot on the southeast side of the Cashman School. Initially, the Applicant had proposed 178 square feet (s.f.) of temporary impacts at this location to remove and replace the CMP outfall, but the Applicant has eliminated these impacts.

4. The Applicant has provided a request for a Waiver (dated September 11, 2020) to the City of Amesbury Wetland Protection Ordinance (Ch. 460) (Ordinance) and accompanying regulations for the following activities:
   - Replacement of an existing 12-inch CMP with a 15-inch CMP to address existing overflow conditions. The new CMP is proposed to be located outside of the BVW and includes a new riprap spreader to prevent erosion. As mitigation for this work in the inner 25-foot Buffer Zone, the Applicant has provided a Buffer Zone mitigation plan which would restore 4,700 s.f. of existing grassy Buffer Zone to native species (trees, shrubs and herbaceous) with wildlife habitat value.
   - In addition, the Applicant proposes pulling the existing parking lot footprint in this area further away from the BVW so that it will no longer be within the 50-foot Buffer Zone.

   The Commission finds that the net effect of these activities is anticipated to improve water quality in the BVW, as well as to enhance wildlife habitat and improve carbon sequestration by vegetation.

5. The Commission finds that as proposed, other than the activities addressed in the Waiver request, the project design is in conformance with Amesbury Wetland Protection Ordinance (Ch. 460) (Ordinance) regulation sections which establish specific setbacks for development:

Section 21.3 Landscaping:

- No lawns or driveways may be constructed within 25 feet of any Resource Area…

Section 21.7 Structures:

- The Commission may at its discretion allow a proposed structure on a wall-type foundation within 100 to 50 feet of the Resource Area…
- No mitigation is sufficient to allow a structure on a wall-type foundation less than 50 feet to a Resource Area…

6. The Commission finds that the Applicant has demonstrated compliance with WPA regulatory performance standards for regulated wetland resource areas by avoiding impacts to BVW and Inland Bank, and by limiting work within the 25-foot "No-Disturb" and 50-foot "No-Build" Buffer Zones as noted above. Much of the work proposed in the outer 50-foot Buffer Zone is in areas that are currently disturbed and degraded, such as grassed playing fields. The only proposed work in BVW is removal of sediment from a stormwater outfall, which is an allowable maintenance activity, and improves conditions by removing fill from the BVW.

7. The Commission finds that Sections 20.0 and 21.0 of the Ordinance specify requirements for activities in the Buffer Zone, prohibiting disturbance within the inner 25 feet and prohibiting building within the inner 50 feet, and that the project is in compliance other than the activities that are addressed in the Ordinance Waiver request. The Commission notes, as stated above, that much of the work proposed in the outer 50-foot Buffer Zone is in areas that are currently disturbed and degraded, such as grassed playing fields.

8. The Commission finds that the proposed project is in compliance with the state and local Buffer Zone regulatory requirements, other than those for which an Ordinance Waiver has been requested.

FINDINGS RELATED TO THE WPA STORMWATER STANDARDS

1. The Commission finds that the Applicant's proposed project activities are in the areas subject to regulation and review under WPA per 310 CMR 10.05(6)(k-q) and the Ordinance and requires the Applicant to provide stormwater management practices to attenuate pollutants and provide set back from the receiving waters and wetlands in accordance with the Stormwater Management Standards.

2. The Commission finds that the Applicant has demonstrated substantial compliance to the Stormwater Management Standards with the supporting stormwater calculations and information by utilizing a combination of three (3) bioretention basins, three (3) recharge chambers systems, three (3) detention basins/chambers systems, two (2) permeable rubber playground surfaces, and one large porous/permeable pavement parking area with accompanying treatment facilities to mitigate stormwater runoff impacts from the proposed project and provide groundwater recharge. Summary calculations and tables

of the systems provided with the final project stormwater report information indicates that overall post development peak runoff rates and total runoff volumes leaving the site will be slightly reduced for all design storms and appropriate treatment of project stormwater flows are provided in accordance with the Stormwater Management Standards and provide protection of the areas subject to regulation under the WPA and Ordinance.

3. The Commission finds that the Applicant has prepared a Long Term Pollution Prevention Plan (LTPPP) for the project in compliance with the Checklist for Stormwater Report noted under Standard 4 and 9. The Commission finds that the Applicant is responsible for implementation of the project LTPPP and documenting the activities under the LTPPP. To ensure protection of the areas subject to regulation under the WPA and Ordinance and compliance with the Stormwater Management Standards, the Commission finds that the Applicant shall implement the LTPPP in perpetuity and provide copies of the maintenance activity documentation of the LTPPP to the Commission on an annual basis.

4. The Commission finds that this project includes redevelopment of a portion of the existing Cashman Elementary School site and the Applicant has demonstrated substantial compliance with Stormwater Management Standards for Redevelopment – Standard 7 - by providing treatment and recharge for the redeveloped pavement areas at the existing school to the extent practicable in accordance with the Stormwater Management Standards. The substantial compliance with Stormwater Management Standards provides additional environmental and ecological benefit to the areas subject to regulation under the WPA and Ordinance associated with the existing Cashman Elementary School site than currently exists.

5. The Commission finds that this project is large and complex. The Commission finds that the Applicant has demonstrated design intent to control construction related impacts including erosion, sedimentation and other pollutants sources during construction and land disturbance activities to prevent impacts to the adjacent resources areas consistent with the Checklist for Stormwater Report for Standard 8, but the specific details of the construction control practices such as sediment traps, construction sequencing of the various site components, etc. are needed. On the provided Checklist under Standard 8 and in the supporting application information, the Applicant indicates that a detailed Construction Period Pollution Prevention Plan (CPPPP) and SWPPP are not provided, but will be prepared by the General Contractor who will be responsible for the management of the construction site and compliance with the NPDES Construction General Permit as allowed under the Checklist for this Standard. The Applicant further notes that a Notice of Intent will be filed with the EPA for coverage under that permit. Due to the complexity of the Applicant's stormwater design and to ensure protection of the areas subject to regulation under the WPA and Ordinance is maintained in compliance with the Stormwater Management Standards, the Commission finds that the Applicant shall prepare and provide the necessary CPPPP and SWPPP documents for review, comment and acceptance by the Commission, which includes a detailed construction sequence for each stormwater system location and that the Applicant shall also obtain the associated Federal, State and Local permits prior to any pre-construction meeting.

6. The Commission finds that the Applicant has prepared a project Stormwater BMP Operation and Maintenance Plan for the numerous stormwater pretreatment and treatment BMP's as part of the LTPPP in substantial compliance to the Stormwater Management Standards under Standard 9 and that the Applicant is responsible for implementation of the Stormwater BMP Operation and Maintenance Plan. The Commission notes, that due to the numerous components and complexity of the Applicant's stormwater system design, reporting of proper maintenance and checking to ensure that each stormwater system component is working properly and effectively is crucial to ensure the stormwater management systems function as designed and protection of the areas subject to regulation under the WPA and Ordinance is maintained. To ensure compliance, the Commission finds that the Applicant shall update the Stormwater BMP Operation and Maintenance Plan to identify all stormwater components proposed for the project and implement the Stormwater BMP Operation and Maintenance Plan in perpetuity with copies of the maintenance activity documentation under the Stormwater BMP Operation and Maintenance Plan provided to the Commission on an annual basis.

7. The Commission finds that the Applicant had initially provided an illicit discharge statement for the project with the Notice of Intent Application with the Checklist for Stormwater Report under Standard 10 and finds that, for the protection of the areas subject to regulation under the WPA and Ordinance, an updated illicit discharge statement for the final project design shall be provided.

DECISION

After careful consideration of the information provided, and of current site conditions, the Commission has determined that the requested Ordinance Waiver is justified, and that sufficient mitigation has been provided for the requested non-compliant activities to result in a net ecological gain relative to existing conditions. In making this decision to grant the Wavier, the Commission notes that in addition to the proposed mitigation and resulting ecological benefits, the proposed non-compliant activities will be located in an area that is currently largely disturbed and degraded already.

The proposed Project meets all requirements of the Wetland Protection Act and its associated regulations and, with the granting of the requested Ordinance Waiver, meets all requirements of the Amesbury Ordinance and associated regulations. Therefore, the Commission votes unanimously to grant the requested Ordinance Waiver, and to approve the project subject to compliance with the Order of Conditions.

STATEMENT OF REASON AND FINDINGS

This project proposes construction of the Amesbury Elementary School and associated infrastructure (parking lots, driveways, utilities, stormwater management features, play areas, and landscaping, etc.), and redevelopment of existing infrastructure. The proposed new school would be located on the same site as the existing Cashman Elementary School building and associated playing fields, parking areas, and access drive. The project site is approximately 37.8 acres in size. The existing Cashman Elementary School would remain. The proposed new school building would be built primarily in an area where grassed playing fields currently exist, although some naturally vegetated areas would be impacted. The NOI states that the proposed project site also includes approximately 2.4 acres of the adjacent city owned Woodsom Farm property, where a proposed egress driveway and associated activities are proposed.

The Amesbury Conservation Commission (Commission) engaged the following peer review consultants, who attended Zoom Virtual Workshop Meetings and produced peer review letter reports as follows:

- BSC Group, Inc. - four (4) Peer Review Reports and Attendance at two (2) Zoom Virtual Workshop Meetings:
    - Letter Report dated May 18, 2020
    - Zoom Meeting 1 on July 15, 2020
    - Letter Report dated November 13, 2020
    - Zoom Meeting 2 on November 17, 2020
    - Letter Report dated December 11, 2020
    - Letter Report dated December 17, 2020
- Stantec Consulting Services, Inc – Five (5) Peer Review Reports and Attendance at four (4) Zoom Virtual Workshop Meetings:
    - Letter Report 1 dated April 22, 2020
    - Zoom Meeting 1 on July 15, 2020
    - Letter Report 2 dated November 13, 2020
    - Zoom Meeting 2 on November 17, 2020
    - Letter Report 3 dated December 14, 2020
    - Zoom Meeting 3 on December 14, 2020
    - Letter Report 4 dated January 14, 2021
    - Zoom Meeting 4 on January 21, 2021
    - Letter Report 5 dated February 26, 2021

These documents and meetings attendance are considered the foundation for the Commission's review, findings, statement of reason, conditions and decision.

FINDINGS

1. The Commission finds that areas subject to regulation and review under the Wetlands Protection Act (WPA) and the City of Amesbury Wetland Protection Ordinance (Ch. 460) (Ordinance) and accompanying regulations exist on the

project site and include the following: Bordering Vegetated Wetlands, Inland Bank (associated with an intermittent stream), and Buffer Zones. (Shown on the site plan dated September 25, 2020). The wetland resource area delineation was peer reviewed by BSC Group, Inc. and has been approved by the Commission.

i. The site at the time of its review does not include Priority Habitats of Rare Species, Estimated Habitat of Rare Wildlife, or Potential Vernal Pools or Certified Vernal Pools as documented by the Massachusetts Natural Heritage and Endangered Species Program.

2. The Commission finds that Bordering Vegetated Wetlands and Inland Bank (associated with an intermittent stream) on the project site are significant to the following interests of the WPA and Ordinance: public and private water supplies, ground water supplies, flood control, storm damage prevention, prevention of pollution, and to the protection of fisheries and wildlife habitat.

3. The Commission finds that no impacts to BVW or Inland Banks are proposed other than the allowable maintenance removal of sediment from an existing 18-inch stormwater outfall corrugated metal pipe (CMP) at the parking lot on the southeast side of the Cashman School. Initially, the Applicant had proposed 178 square feet (s.f.) of temporary impacts at this location to remove and replace the CMP outfall, but the Applicant has eliminated these impacts.

4. The Applicant has provided a request for a Waiver (dated September 11, 2020) to the City of Amesbury Wetland Protection Ordinance (Ch. 460) (Ordinance) and accompanying regulations for the following activities:
   - Replacement of an existing 12-inch CMP with a 15-inch CMP to address existing overflow conditions. The new CMP is proposed to be located outside of the BVW and includes a new riprap spreader to prevent erosion. As mitigation for this work in the inner 25-foot Buffer Zone, the Applicant has provided a Buffer Zone mitigation plan which would restore 4,700 s.f. of existing grassy Buffer Zone to native species (trees, shrubs and herbaceous) with wildlife habitat value.
   - In addition, the Applicant proposes pulling the existing parking lot footprint in this area further away from the BVW so that it will no longer be within the 50-foot Buffer Zone.

   The Commission finds that the net effect of these activities is anticipated to improve water quality in the BVW, as well as to enhance wildlife habitat and improve carbon sequestration by vegetation.

5. The Commission finds that as proposed, other than the activities addressed in the Waiver request, the project design is in conformance with Amesbury Wetland Protection Ordinance (Ch. 460) (Ordinance) regulation sections which establish specific setbacks for development:

Section 21.3 Landscaping:

- No lawns or driveways may be constructed within 25 feet of any Resource Area…

Section 21.7 Structures:

- The Commission may at its discretion allow a proposed structure on a wall-type foundation within 100 to 50 feet of the Resource Area…
- No mitigation is sufficient to allow a structure on a wall-type foundation less than 50 feet to a Resource Area…

6. The Commission finds that the Applicant has demonstrated compliance with WPA regulatory performance standards for regulated wetland resource areas by avoiding impacts to BVW and Inland Bank, and by limiting work within the 25-foot "No-Disturb" and 50-foot "No-Build" Buffer Zones as noted above. Much of the work proposed in the outer 50-foot Buffer Zone is in areas that are currently disturbed and degraded, such as grassed playing fields. The only proposed work in BVW is removal of sediment from a stormwater outfall, which is an allowable maintenance activity, and improves conditions by removing fill from the BVW.

7. The Commission finds that Sections 20.0 and 21.0 of the Ordinance specify requirements for activities in the Buffer Zone, prohibiting disturbance within the inner 25 feet and prohibiting building within the inner 50 feet, and that the project is in compliance other than the activities that are addressed in the Ordinance Waiver request. The Commission notes, as stated above, that much of the work proposed in the outer 50-foot Buffer Zone is in areas that are currently disturbed and degraded, such as grassed playing fields.

8. The Commission finds that the proposed project is in compliance with the state and local Buffer Zone regulatory requirements, other than those for which an Ordinance Waiver has been requested.

FINDINGS RELATED TO THE WPA STORMWATER STANDARDS

1. The Commission finds that the Applicant's proposed project activities are in the areas subject to regulation and review under WPA per 310 CMR 10.05(6)(k-q) and the Ordinance and requires the Applicant to provide stormwater management practices to attenuate pollutants and provide set back from the receiving waters and wetlands in accordance with the Stormwater Management Standards.

2. The Commission finds that the Applicant has demonstrated substantial compliance to the Stormwater Management Standards with the supporting stormwater calculations and information by utilizing a combination of three (3) bioretention basins, three (3) recharge chambers systems, three (3) detention basins/chambers systems, two (2) permeable rubber playground surfaces, and one large porous/permeable pavement parking area with accompanying treatment facilities to mitigate stormwater runoff impacts from the proposed project and provide groundwater recharge. Summary calculations and tables

of the systems provided with the final project stormwater report information indicates that overall post development peak runoff rates and total runoff volumes leaving the site will be slightly reduced for all design storms and appropriate treatment of project stormwater flows are provided in accordance with the Stormwater Management Standards and provide protection of the areas subject to regulation under the WPA and Ordinance.

3. The Commission finds that the Applicant has prepared a Long Term Pollution Prevention Plan (LTPPP) for the project in compliance with the Checklist for Stormwater Report noted under Standard 4 and 9. The Commission finds that the Applicant is responsible for implementation of the project LTPPP and documenting the activities under the LTPPP. To ensure protection of the areas subject to regulation under the WPA and Ordinance and compliance with the Stormwater Management Standards, the Commission finds that the Applicant shall implement the LTPPP in perpetuity and provide copies of the maintenance activity documentation of the LTPPP to the Commission on an annual basis.

4. The Commission finds that this project includes redevelopment of a portion of the existing Cashman Elementary School site and the Applicant has demonstrated substantial compliance with Stormwater Management Standards for Redevelopment – Standard 7 - by providing treatment and recharge for the redeveloped pavement areas at the existing school to the extent practicable in accordance with the Stormwater Management Standards. The substantial compliance with Stormwater Management Standards provides additional environmental and ecological benefit to the areas subject to regulation under the WPA and Ordinance associated with the existing Cashman Elementary School site than currently exists.

5. The Commission finds that this project is large and complex. The Commission finds that the Applicant has demonstrated design intent to control construction related impacts including erosion, sedimentation and other pollutants sources during construction and land disturbance activities to prevent impacts to the adjacent resources areas consistent with the Checklist for Stormwater Report for Standard 8, but the specific details of the construction control practices such as sediment traps, construction sequencing of the various site components, etc. are needed. On the provided Checklist under Standard 8 and in the supporting application information, the Applicant indicates that a detailed Construction Period Pollution Prevention Plan (CPPPP) and SWPPP are not provided, but will be prepared by the General Contractor who will be responsible for the management of the construction site and compliance with the NPDES Construction General Permit as allowed under the Checklist for this Standard. The Applicant further notes that a Notice of Intent will be filed with the EPA for coverage under that permit. Due to the complexity of the Applicant's stormwater design and to ensure protection of the areas subject to regulation under the WPA and Ordinance is maintained in compliance with the Stormwater Management Standards, the Commission finds that the Applicant shall prepare and provide the necessary CPPPP and SWPPP documents for review, comment and acceptance by the Commission, which includes a detailed construction sequence for each stormwater system location and that the Applicant shall also obtain the associated Federal, State and Local permits prior to any pre-construction meeting.

6. The Commission finds that the Applicant has prepared a project Stormwater BMP Operation and Maintenance Plan for the numerous stormwater pretreatment and treatment BMP's as part of the LTPPP in substantial compliance to the Stormwater Management Standards under Standard 9 and that the Applicant is responsible for implementation of the Stormwater BMP Operation and Maintenance Plan. The Commission notes, that due to the numerous components and complexity of the Applicant's stormwater system design, reporting of proper maintenance and checking to ensure that each stormwater system component is working properly and effectively is crucial to ensure the stormwater management systems function as designed and protection of the areas subject to regulation under the WPA and Ordinance is maintained. To ensure compliance, the Commission finds that the Applicant shall update the Stormwater BMP Operation and Maintenance Plan to identify all stormwater components proposed for the project and implement the Stormwater BMP Operation and Maintenance Plan in perpetuity with copies of the maintenance activity documentation under the Stormwater BMP Operation and Maintenance Plan provided to the Commission on an annual basis.

7. The Commission finds that the Applicant had initially provided an illicit discharge statement for the project with the Notice of Intent Application with the Checklist for Stormwater Report under Standard 10 and finds that, for the protection of the areas subject to regulation under the WPA and Ordinance, an updated illicit discharge statement for the final project design shall be provided.

DECISION

After careful consideration of the information provided, and of current site conditions, the Commission has determined that the requested Ordinance Waiver is justified, and that sufficient mitigation has been provided for the requested non-compliant activities to result in a net ecological gain relative to existing conditions. In making this decision to grant the Wavier, the Commission notes that in addition to the proposed mitigation and resulting ecological benefits, the proposed non-compliant activities will be located in an area that is currently largely disturbed and degraded already.

The proposed Project meets all requirements of the Wetland Protection Act and its associated regulations and, with the granting of the requested Ordinance Waiver, meets all requirements of the Amesbury Ordinance and associated regulations. Therefore, the Commission votes unanimously to grant the requested Ordinance Waiver, and to approve the project subject to compliance with the Order of Conditions.

SITE DEMOLITION NOTES

1. REFER TO SPECIFICATION SECTIONS:
   024100 DEMOLITION - FOR FURTHER INFORMATION ON GENERAL DEMOLITION.
   311000 SITE PREPARATION - FOR FURTHER INFORMATION ON DEMOLITION AND SITE PREPARATION.
   311213 TREE REMOVAL PLANTING - FOR FURTHER INFORMATION ON TREE PROTECTION FENCING AND MAINTENANCE.
   312000 EARTHWORK - FOR FURTHER INFORMATION ON SUBGRADE PREPARATION ON AREAS DISTURBED BY DEMOLITION.
   312500 EROSION AND SEDIMENTATION CONTROL.
2. THE EXISTING CONDITIONS PLAN SHOWN ARE AS SURVEYED BY: HANCOCK ASSOCIATES, 185 CENTRE STREET DANVERS, MA 01923, DATED 05 / 19 / 2021.
3. THE WORK DESCRIBED ON THIS PLAN IS THE GENERAL INTENT. THE CONTRACTOR SHALL INCLUDE IN THEIR BID ALL DEMOLITION WORK NECESSARY FOR THE PROPOSED IMPROVEMENTS.
4. THE CONTRACTOR IS RESPONSIBLE FOR VISITING THE SITE TO FAMILIARIZE HIMSELF WITH THE FULL SCOPE OF THE DEMOLITION REQUIRED FOR THE EXECUTION OF THE PROJECT CONTRACT AND SHALL VERIFY ALL EXISTING CONDITIONS IN THE FIELD. REPORT ANY DISCREPANCIES BETWEEN THE EXISTING CONDITIONS PLAN, AND THE ACTUAL SITE CONDITIONS, TO THE ARCHITECT, PRIOR TO BEGINNING WORK.
5. THIS PLAN INDICATES THE DEMOLITION OF FEATURES ON THE SURFACE OF THE SITE, INCLUDING FOOTING, FOUNDATION AND SUB-BASE MATERIALS.
6. RESERVED FOR FUTURE USE.
7. REFER TO CIVIL AND ELECTRICAL DRAWINGS FOR FURTHER INFORMATION ON ANY DEMOLITION OR MODIFICATIONS TO EXISTING UNDERGROUND OR OVERHEAD UTILITIES.
8. IN GENERAL - ALL EXISTING MATERIALS TO BE DEMOLISHED WITH-IN THE CONSTRUCTION AREA / WORK LIMIT INCLUDE, THOUGH ARE NOT ARE NOT LIMITED TO: TREES, SHRUBS, SIGNAGE, ROADWAY GRAVEL, SUB-BASES, FENCING, DECKING AND FOOTINGS, CONCESSIONS STAND, TRASH RECEPTACLES, BENCHES AND TOPSOIL.
9. ALL TREES, SHRUBS, GROUNDCOVER, STUMPS AND OVERBURDEN SHALL BE REMOVED IN THE EXECUTION OF THE PROPOSED SITE IMPROVEMENTS. REFER TO THE SPECIAL PROJECT CONDITIONS SPECIFICATION AND WORK REQUIRED HEREIN.
10. FOR ALL TREES TO BE REMOVED, AND OR EXISTING STUMPS ON THE SITE - ALL STUMPS SHALL BE GROUND DOWN TO 18" MIN. BELOW FINISH GRADE.
11. EXISTING PAVEMENT AREAS TO BE DEMOLISHED INCLUDE THOUGH ARE NOT LIMITED TO BITUMINOUS CONCRETE PAVEMENT, CONCRETE PAVEMENT, SUB BASE, CURBING, TRAFFIC SIGNS, AND OTHER ITEMS NOTED.
12. COORDINATE THE INSTALLATION OF ALL NEW TEMPORARY FENCING REQUIRED TO SECURE THE SITE AS REQUIRED DURING THE EXECUTION OF THE PROJECT CONTRACT.
13. COORDINATE SITE DEMOLITION WITH EROSION CONTROL AND STORM DRAINAGE REQUIREMENTS FOR THE DURATION OF THE PROJECT.
14. REMOVE FENCE SYSTEM AS NECESSARY TO REMOVE EXISTING TREES. PROVIDE TEMPORARY FENCING AS NECESSARY. REINSTALL FENCING SYSTEM IN THE SAME LOCATION AND MANNER AS ORIGINALLY INSTALLED.
15. (R) ITEMS TO BE STORED, PROTECTED AND RELOCATED AS DIRECTED IN SECTION 02 41 00 DEMOLITION, BY THE CONTRACTOR PER OWNER / ARCHITECTS DIRECTIONS.
16. ALL EXISTING IRRIGATION LINES, SPRAY HEADS, AND ASSOCIATED EQUIPMENT TO BE REMOVED IN ITS ENTIRETY.
17. ALL MATERIALS TO BE SALVAGED AND RETURNED TO THE CITY SHALL BE DELIVERED TO A LOCATION DESIGNATED BY THE CITY WITH IN THE CITY LIMITS.
18. PRIOR TO THE START OF ANY EARTH DISTURBANCE, PERIMETER EROSION CONTROL BARRIERS SHALL BE INSTALLED PER THE SITE EROSION AND SEDIMENT CONTROL PLANS SHEETS 1.3.01, 1.3.02, 1.3.03, AND 1.3.05 - 1.3.010.

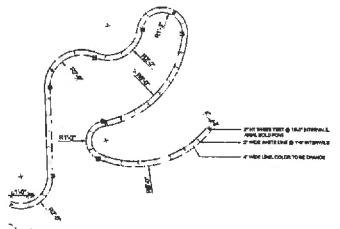
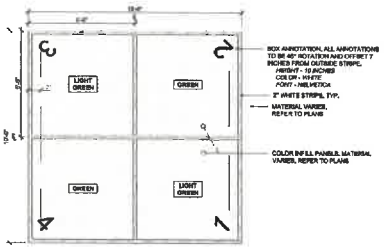
DOTS
DOTS ARE SPACED AT 8" WITHIN EACH COLUMN AND ALONG THE INITIAL ROW, HORIZ'LY. BECAUSE EACH COLUMN HAS A RADIAL LAYOUT THE INITIAL 8" SPACING BETWEEN THE COLUMNS WILL INCREASE IN EACH ROW AND WILL BE 1'-5" IN THE LAST ROW.

UNITED STATES MAP
CENTER POINT OF PLAYGROUND LAYOUT SHALL BE AT THE MIDDLE OF THE NEBRASKA AND IOWA BORDER (NEB), MAP SHALL BE ROTATED SO THE MOST SOUTHERN TEXAS POINT MEETS THE CENTERLINE OF THE NORTH ARROW (TEX), HAWAII AND ALASKA TO BE FIELD LOCATED.

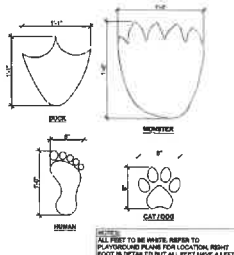


TEXT NOTES
ALL TEXT TO BE WHITE AND BOLD ARIAL FONT, SEE BELOW FOR SPECIFIC LAYOUT INFORMATION.

1. IMAGINE - 2'-0" HT AND 2'-0" SPACING BETWEEN LETTERS.
2. ALPHABET - ALL UPPERCASE TO BE 1'-0" HT AND LOWERCASE TO SCALED APPROPRIATELY PER TYPOGRAPHY STANDARDS. ALL TEXT SHALL BE CENTER JUSTIFIED ALONG THE RADIUS SHOWN, DIMENSIONS ARE SHOWN TO THE BOTTOM OF THE TEXT.
3. LABYRINTH - ALL TEXT TO BE 1'-0" HT AND CENTER JUSTIFIED WITHIN THE 4'-0" LABYRINTH LINE. TEXT DEPICTS THE LENGTH TRAVELED ALONG THE LABYRINTH AND VARIES BETWEEN 48'-0" AND 50'-0" SPACING, DIMENSIONS SHOWN ARE TO THE BOTTOM OF THE TEXT.
4. CREATE - 1'-0" HT AND RIGHT JUSTIFIED FROM THE PURITY OF THOUGHT BROWN, TEXT TO BE A CONSISTENT 1'-0" CLEAR OF THE OUTER EDGE BROWN.
5. "N" NORTH ARROW - 1'-0" HT AND CENTER JUSTIFIED, 6" CLEAR OF BASE OF NORTH ARROW.

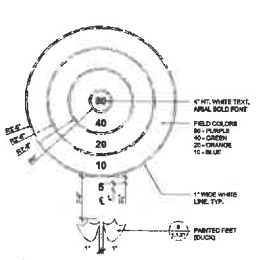


2 1.1.21 PLAYGROUND GAMES LAYOUT
SCALE: 1" = 10'-0"

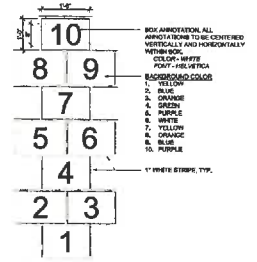


1 1.1.21 PLAYGROUND LINEWORK LAYOUT
SCALE: 1" = 10'-0"

5 1.1.21 TIGHT ROPE
SCALE: 3/8" = 1'-0"



4 1.1.21 FOUR SQUARE
SCALE: 1/2" = 1'-0"



ALL FEET TO BE WHITE, REFER TO PLAYGROUND PLANS FOR LOCATION, RIGHT FOOT IS DETAILED BUT ALL FEET HAVE A LEFT (L) AND RIGHT (R) FOOT NOTED ON THE PLAN.

6 1.1.21 PAINTED FEET
SCALE: 1-1/2" = 1'-0"

7 1.1.21 BAG TOSS
SCALE: 1/2" = 1'-0"

8 1.1.21 HOPSCOTCH
SCALE: 3/8" = 1'-0"

PRELIMINARY COLOR SELECTIONS AS SHOWN IN THE DRAWAY AND NOTED BELOW, LANDSCAPE ARCHITECT WILL MAKE FINAL COLOR SELECTIONS FROM THE MANUFACTURERS FULL OF RANGE OF COLORS (STANDARD AND CUSTOM) DURING THE SUBMITTAL PHASE.

PRELIMINARY COLORS
RED, BLACK, GREY, WHITE, PURPLE, YELLOW, ORANGE, BLUE, DARK BLUE, GREEN, LIGHT GREEN

R:	RED
Bl:	BLACK
G:	GREY
Wt:	WHITE
O:	ORANGE
B:	BLUE
DB:	DARK BLUE
G:	GREEN
LG:	LIGHT GREEN
P:	PURPLE

Partial Grading Plan - 04 Enlargement

1.2.04

© 2020 DiNisco Design

GENERAL NOTES

1. THE INTENT OF THIS PHASE OF THE NEW AES SCHOOL PROJECT IS TO SEPARATE THE EXISTING CASHMAN SCHOOL OPERATIONS FROM THE CONSTRUCTION WORK ZONE. STRICT ADHERENCE TO THE LIMIT OF WORK IS REQUIRED. THE CONTRACTOR SHALL MAKE ALL EFFORTS TO MINIMIZE ANY DISTURBANCE TO THE EXISTING SITE FEATURES TO REMAIN UNLESS SHOWN OTHERWISE ON THESE PLANS.
2. SEE LANDSCAPE PLANS FOR CLEARING, GRUBBING, TREE REMOVAL AND PROTECTION AND DEMOLITION OF OTHER SITE FEATURES.
3. AREAS DESIGNATED FOR PROPOSED STORMWATER INFILTRATION FACILITIES ARE TO BE PROTECTED FROM COMPACTION. STOCKPILING, TEMPORARY STORMWATER SEDIMENT BASINS OR DEWATERING BASINS ARE NOT TO BE PLACED IN THESE AREAS UNLESS OTHERWISE SHOWN ON THESE PLANS.
4. SEE SHEET 1.3.05 FOR ADDITIONAL NOTES REGARDING THE EROSION AND SEDIMENT CONTROLS AND DETAILS.
5. THE SITE CONTRACTOR SHALL INSTALL TEMPORARY SEDIMENT BASINS AND BEST MANAGEMENT PRACTICES AS NECESSARY TO PROTECT THE WETLAND RESOURCE AREAS, ABUTTING PROPERTIES AND DRAIN SYSTEMS TO COMPLY WITH THE FEDERAL NPDES CONSTRUCTION GENERAL PERMIT AND OTHER APPLICABLE PERMITS AND REGULATIONS.
6. SNOW REMOVAL: NO SNOW FROM SNOW REMOVAL OPERATIONS SHALL BE DEPOSITED BEYOND THE LIMIT OF WORK NOR IN THOSE AREAS IDENTIFIED AS TO NOT BE DISTURBED.
7. UTILITIES THAT ARE TO REMAIN IN SERVICE THROUGH THE EARLY SITE PREPARATION PACKAGE SHALL BE PROTECTED AND SHALL REMAIN FULLY FUNCTIONAL.
8. EXISTING UTILITIES TO BE DEMOLISHED SHALL REMAIN FULLY FUNCTIONAL UNTIL THEY ARE NO LONGER NEEDED IN USE. PRIOR TO ANY DEMOLITION OR DECOMMISSIONING OF ANY EXISTING UTILITY, THE CITY OF AMESBURY SHALL BE NOTIFIED AT LEAST 72 HOURS PRIOR TO THIS WORK.
9. THE CONTRACTOR SHALL VERIFY ALL EXISTING CONDITIONS IN THE FIELD AND REPORT TO THE ARCHITECT PRIOR TO BEGINNING ANY WORK ANY DISCREPANCIES BETWEEN THE PLANS AND THE ACTUAL SITE CONDITIONS.
10. THE WORK DESCRIBED ON THIS PLAN IS THE GENERAL INTENT. THE CONTRACTOR SHALL INCLUDE IN THEIR BID ALL DEMOLITION WORK NECESSARY FOR THE PROPOSED IMPROVEMENTS.
11. ALL EXISTING FEATURES LABELED "REMOVE" SHALL BE REMOVED AND DISPOSED OF LEGALLY OFF SITE, UNLESS OTHERWISE NOTED.
12. THE PROPOSED SITE CONSTRUCTION FENCE SHOWN HEREON SHALL BE DRIVEN POSTS, EXCEPT FOR THE PORTION AS NOTED ON THE PLANS WHICH SHALL BE MOVABLE.
13. ALL PROPOSED SITE CONSTRUCTION FENCING (BOTH DRIVEN AND MOVABLE) SHALL HAVE PRIVACY SCREENING (SCNVI) INSTALLED.
14. WORK ASSOCIATED WITH FENCE INSTALLATION TO SEPARATE THE CASHMAN SCHOOL AREA AND CONSTRUCTION WORK ZONE SHALL BE PERFORMED DURING OFF-HOURS OR ON WEEKENDS TO LIMIT DISTURBANCE TO THE ON-GOING SCHOOL OPERATIONS.
15. THE PROPOSED CONSTRUCTION FENCE IS ALSO THE LIMIT OF WORK. NO WORK SHALL TAKE PLACE OUTSIDE THE CONSTRUCTION FENCE WITHOUT THE PRIOR APPROVAL OF THE PROJECT ARCHITECT AND ENGINEER. SEE SHEET 1.0.01 FOR AREAS OUTSIDE THE LIMIT OF WORK.
16. THE LOCATION OF ALL UNDERGROUND UTILITIES SHOWN HEREON ARE BASED ON FIELD LOCATION OF VISIBLE STRUCTURES AND COMPILING INFORMATION FROM PLANS PROVIDED BY UTILITY COMPANIES AND GOVERNMENT AGENCIES. THE LOCATION SHOWN HEREON SHALL BE CONSIDERED APPROXIMATE. BEFORE ANY CONSTRUCTION, DEMOLITION OR SITE WORK, THE LOCATION OF ALL UNDERGROUND UTILITIES SHALL BE VERIFIED BY THE CONTRACTOR AND CONTACT "DIG-SAFE" AT 811.
17. CONTRACTOR SHALL OBTAIN TRENCHING AND ROAD OPENING PERMIT FROM THE AMESBURY PUBLIC WORKS DEPARTMENT AS NECESSARY FOR ANY WORK WITHIN THE PUBLIC ROAD RIGHT-OF-WAY.
18. THE DESIGNATED STOCKPILE AREA SHOWN ON THIS PLAN IS AN EXAMPLE OF A SUITABLE AREA FOR STOCKPILING OF SOIL MATERIALS. OTHER AREAS MAY BE SELECTED BY THE CONTRACTOR FOR STOCKPILE AREAS WITH PRIOR APPROVAL OF THE ARCHITECT. SEE NOTE 3 ABOVE FOR ADDITIONAL INFORMATION.
19. THIS PROJECT IS SUBJECT TO AN ORDER OF CONDITIONS ISSUED BY THE AMESBURY CONSERVATION COMMISSION. ALL WORK MUST BE PERFORMED IN COMPLIANCE WITH THAT ORDER AND ALL OTHER APPLICABLE PERMITS.
20. THE CONTRACTOR IS RESPONSIBLE FOR THE PREPARATION OF THE STORMWATER POLLUTION PREVENTION PLAN (SWPPP) AND THE CONSTRUCTION PERIOD POLLUTION PREVENTION AND EROSION CONTROL PLAN (CPPP). THESE DOCUMENTS SHALL BE PREPARED AND SUBMITTED TO THE AMESBURY CONSERVATION COMMISSION, OWNER, ARCHITECT AND ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY SITE DISTURBANCE. THESE DOCUMENTS ARE PART OF THE CONTRACT DOCUMENTS FOR THIS PROJECT.
21. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REPAIR AND/OR REPLACEMENT OF EXISTING ON-SITE AND OFF-SITE UTILITIES AND OTHER FEATURES DAMAGED BY THE WORK THAT ARE IDENTIFIED AS "TO BE PROTECTED AND TO REMAIN" OR ARE NOT SPECIFICALLY INTENDED FOR DEMOLITION AND/OR REMOVAL.
22. ALL UTILITIES (WATER, SEWER, GAS, ELECTRIC, TELECOMMUNICATIONS, DRAINS) THAT WILL NO LONGER BE IN SERVICE ARE TO BE REMOVED AND PROPERLY DISPOSED OF OFF SITE. WHERE PHYSICAL ISSUES MAKE IT IMPOSSIBLE TO REMOVE CERTAIN PORTIONS OF THESE UTILITIES, THOSE PORTIONS MAY BE ABANDONED IN PLACE, FOLLOWING APPROVAL BY THE ARCHITECT, AND SHALL BE PER THE REQUIREMENTS OF THE AMESBURY DPW REGULATIONS.

Site Mobilization Plan - 02

1.3.04

© 2020 DiNisco Design

EROSION AND SEDIMENT CONTROL NOTES

1. **GENERAL PERFORMANCE STANDARDS:**

1.1. THE CONTRACTOR SHALL INSTALL, ROUTINELY INSPECT AND MAINTAIN ALL SEDIMENT AND EROSION CONTROLS SUCH THAT THEY ARE IN PROPER WORKING ORDER AT ALL TIMES DURING THE CONSTRUCTION PROJECT UNTIL SUCH TIME AS ALL AREAS OF THE SITE TRIBUTARY TO THOSE EROSION CONTROLS ARE IN A PERMANENTLY STABILIZED CONDITION.

1.2. THE PLAN VIEWS IN THIS PLAN SET SHOW ONLY THE LOCATIONS OF THE PERIMETER EROSION CONTROLS AND ARE NOT INTENDED TO SHOW ALL EROSION CONTROLS NECESSARY FOR MANAGEMENT OF THE SITE. THE CONTRACTOR SHALL MANAGE THE SITE SUCH THAT EROSION AND SEDIMENT FROM RUNOFF AND WIND BLOWN DUST ARE CONTROLLED AND MINIMIZED AT ALL TIMES. THE EROSION CONTROLS SHOWN ON THIS PLAN INCLUDE THE INITIAL SETUP OF EROSION CONTROLS AND BASIC INFORMATION. TO MEET THE REQUIREMENT OF BEST MANAGEMENT PRACTICES, THE CONTRACTOR MUST MANAGE THE SITE PROPERLY WHICH MAY INCLUDE, BUT NOT BE LIMITED TO: MINIMIZING AREAS OF EXPOSED SOILS; INSTALLING TEMPORARY COVERS; MAKE NECESSARY ADJUSTMENTS TO THE EROSION CONTROL INSTALLATIONS TO IMPROVE FUNCTION; PROVIDE TEMPORARY SEDIMENT BASINS; INSTALL ADDITIONAL EROSION AND SEDIMENT CONTROL MEASURES NECESSARY.

1.3. THE EROSION CONTROL WORK IS ALSO SUBJECT TO PERMITS AND APPROVALS UNDER THE MUNICIPAL STORMWATER ORDINANCES AND ALL STATE, LOCAL AND FEDERAL REGULATIONS. THE PROJECT MAY ALSO BE SUBJECT TO OTHER STATE AND LOCAL APPROVALS. THE CONTRACTOR SHALL OBTAIN AND BE RESPONSIBLE FOR COMPLIANCE WITH THE CONDITIONS AND REQUIREMENTS OF THOSE PERMITS.

1.4. DESIGN, INSTALLATION AND MAINTENANCE OF SEDIMENT AND EROSION CONTROLS SHALL BE IN ACCORDANCE WITH BEST MANAGEMENT PRACTICES FOLLOWING THE GUIDELINES INCLUDE IN THE FOLLOWING:
- "STORMWATER MANAGEMENT FOR CONSTRUCTION ACTIVITIES, DEVELOPING POLLUTION PREVENTION PLANS AND BEST MANAGEMENT PRACTICES" U.S. ENVIRONMENTAL PROTECTION AGENCY, OCTOBER 1992.
- "MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES FOR URBAN AND SUBURBAN AREAS, A GUIDE FOR PLANNERS, DESIGNERS AND MUNICIPAL OFFICIALS", MASS. EXECUTIVE OFFICE OF ENVIRONMENTAL AFFAIRS, MAY 2003.
- U.S.D.A. NATURAL RESOURCES AND CONSERVATION SERVICES (NRCS) GUIDELINES.

2. **FEDERAL NPDES PHASE II COMPLIANCE:**

2.1. THIS PROJECT IS SUBJECT TO THE FEDERAL CLEAN WATER ACT REQUIREMENTS FOR CONSTRUCTION SITES ADMINISTERED BY THE U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA). THIS PROGRAM IS THE "NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) – PHASE II FOR CONSTRUCTION SITES. FOR COMPLIANCE WITH THIS PROGRAM, THE CONTRACTOR SHALL BE RESPONSIBLE FOR PREPARING A COMPLETE "STORMWATER POLLUTION PREVENTION PLANT (SWPPP)" IN CONFORMANCE WITH THE CURRENT CONSTRUCTION GENERAL PERMIT AND FILING A NOTICE OF INTENT WITH THE EPA UNDER THE NPDES PROGRAM. THE CONTRACTOR SHALL THEN MANAGE THE SITE IN COMPLIANCE WITH THE SWPPP AND IN COMPLIANCE WITH THE CONSTRUCTION GENERAL PERMIT. NOTE THAT THE SWPPP IS TO BE PREPARED TO BE CONSISTENT WITH THIS EROSION AND SEDIMENT CONTROL PLAN AND OTHER APPLICABLE APPROVALS. THE EROSION AND SEDIMENT CONTROL PLAN INCLUDED IN THIS PLAN SET MAY BE USED AS PART OF THE DOCUMENTATION REQUIRED FOR THE PREPARATION OF A SWPPP, BUT IS NOT TO BE CONSIDERED AS MEETING THE FULL REQUIREMENTS OF A SWPPP PREPARED FOR COMPLIANCE WITH THE NPDES PROGRAM.

2.2. A COPY OF THE SWPPP SHALL BE FILED WITH THE MUNICIPAL ENGINEERING DEPARTMENT, CONSERVATION COMMISSION AND OTHERS AS REQUIRED BY APPLICABLE PERMITS AND APPROVALS.

2.3. THE CONTRACTOR IS RESPONSIBLE FOR THE PREPARATION OF THE CONSTRUCTION PERIOD POLLUTION PREVENTION AND EROSION CONTROL PLAN (CPPP). THIS DOCUMENT SHALL BE PREPARED AND SUBMITTED TO THE AMESBURY CONSERVATION COMMISSION, OWNER, ARCHITECT AND ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY SITE DISTURBANCE. THIS DOCUMENT IS TO BE CONSIDERED PART OF THE CONTRACT DOCUMENTS FOR THIS PROJECT.

3. **PERIMETER FIBER LOG / CONSTRUCTION FENCE AND LIMIT OF WORK:**

3.1. PRIOR TO ANY DISTURBANCE OR ALTERATIONS OF ANY AREA ON THE SITE, AN EROSION CONTROL BARRIER AND CONSTRUCTION FENCE SHALL BE INSTALLED IN THE LOCATIONS SHOWN ON THE PLANS AND CONTRACT DOCUMENTS. THE INSTALLED PERIMETER EROSION CONTROL BARRIERS SHALL BE INSPECTED BY THE CITY OF AMESBURY, ARCHITECT AND ENGINEER PRIOR TO THE START OF SITE WORK.

3.2. INSTALL THE FIBER LOGS AS SHOWN. IN THOSE AREAS WHERE THE TOPOGRAPHY INDICATES THAT STORMWATER RUNOFF WILL BE CONCENTRATED (AT LOW POINTS), ADDITIONAL FIBER LOGS AS NECESSARY, SHALL BE ADDED FOR ADDITIONAL FILTRATION AND PROTECTION. SILT FENCE FOR ADDED SUPPORT MAY BE ADDED AS NECESSARY. THE REQUIRED LOCATIONS FOR THE ADDED FIBER LOG INSTALLATION WILL BE SELECTED BY THE ENGINEER AND / OR THE AUTHORIZED INSPECTOR/ SWPPP COORDINATOR UPON COMPLETION OF THE FIBER LOG INSTALLATION (SEE DETAIL).

3.3. ONCE INSTALLED, THE STAKED FIBER LOGS SHALL BE MAINTAINED IN PLACE UNTIL ALL AREAS UPGRADIENT FROM THE BARRIERS HAVE BEEN PERMANENTLY STABILIZED.

3.4. ALL DISTURBED AREAS NOT OTHERWISE DEVELOPED OR WHERE SPECIAL STABILIZATION MEASURES OR LANDSCAPE PLANTINGS ARE PROPOSED SHALL BE LOAMED AND SEEDED OR SODDED. SIX INCHES OF LOAM TOPSOIL (MIN. COMPACTED DEPTH) SHALL BE APPLIED UNLESS, OTHERWISE SPECIFIED. (SEE LANDSCAPE PLAN AND OTHER PLANS AS APPLICABLE).

3.5. THE PERIMETER FIBER LOGS AND CONSTRUCTION FENCING ARE ALSO LIMITS OF WORK. ALL AREAS OUTSIDE THE LIMIT ARE TO BE LEFT UNDISTURBED. DURING THE SITE WORK, ALL PERSONS AND EQUIPMENT SHALL STAY OUT OF THESE AREAS TO PRESERVE THE EXISTING VEGETATION AND SOIL COVER.

4. **CONSTRUCTION ENTRANCE:**

4.1. AT THE START OF SITE WORK, A STONE CONSTRUCTION ENTRANCE SHALL BE INSTALLED AT ALL ACCESS POINTS TO THE CONSTRUCTION SITE FROM THE ROADWAY TO CONTROL THE TRACKING OF MUD OFF THE SITE. THE ENTRANCE SHALL BE MAINTAINED UNTIL THE SITE IS IN A STABILIZED CONDITION WHEN THE POSSIBILITY OF VEHICLES TRACKING MUD OFF SITE HAS BEEN ELIMINATED.

4.2. THE CONTRACTOR SHALL SWEEP THE ADJACENT ROADWAYS WHEN MUD, DUST, DIRT, DEBRIS, ETC. HAS SHOWN SIGNS OF MUD BEING TRACKED ON THE ROADWAYS EXITING THE SITE. THE CONTRACTOR SHALL PAY PARTICULAR ATTENTION TO THIS MATTER AND IMMEDIATE ATTENTION IS ALWAYS REQUIRED.

4.3. THROUGHOUT THE CONSTRUCTION PROCESS, THE LOCATION OF THE CONSTRUCTION ENTRANCE WILL CHANGE DEPENDING ON CONSTRUCTION VEHICLE ENTRANCE AND EXIT LOCATIONS. THE CONTRACTOR SHALL DETAIL THESE LOCATIONS IN THE STORMWATER POLLUTION PREVENTION PLAN AT EACH PHASE.

5. **DEWATERING OF EXCAVATIONS:**

5.1. DISCHARGE FROM DEWATERING PUMPS OR TEMPORARY TRENCH OR EXCAVATION DRAINS SHALL NOT BE DISCHARGED DIRECTLY TO THE ON-SITE DRAINAGE SYSTEM, ON WETLAND RESOURCE AREAS. DISCHARGES SHALL BE DIRECTED TO A TREATMENT SYSTEM CONSISTING OF A SEDIMENT BASIN, STRAW BALE SEDIMENT BASIN, FILTER BAG SYSTEM, FRAC TANK OR OTHER APPROVED METHOD TO FILTER THE DISCHARGE WATER AND PREVENT EROSION.

5.2. THE PUMP DISCHARGE SYSTEMS MUST BE GREATER THAN 100 FEET FROM WETLAND RESOURCES UNLESS APPROVED BY THE MUNICIPAL CONSERVATION COMMISSION AND IN ACCORDANCE WITH OTHER APPLICABLE LAWS AND REGULATIONS.

5.3. ALL DEWATERING DRAINAGE ASSOCIATED WITH CONSTRUCTION ACTIVITIES MUST FIRST OBTAIN A DEWATERING DRAINAGE PERMIT. SUCH DISCHARGES SHALL COMPLY WITH THE MUNICIPAL REQUIREMENTS, UNITED STATES ENVIRONMENTAL PROTECTION AGENCY, MASSACHUSETTS DEP AND OTHER APPROPRIATE AGENCIES. UNDER NO CIRCUMSTANCE SHALL DEWATERING DRAINAGE BE DISCHARGED INTO A SANITARY SEWER.

6. **SOIL STOCKPILES:**

6.1. STOCKPILES OF SOIL MATERIALS SHALL BE PLACED WITHIN AREAS THAT ARE PROTECTED BY PERIMETER EROSION CONTROLS AS SHOWN ON THIS PLAN, OR SHALL BE SURROUNDED BY PROPER SILT FENCING, FIBER LOGS, OR STAKED STRAW BALES.

6.2. STOCKPILES THAT ARE TO BE IN PLACE FOR EXTENDED PERIODS OF TIME (MORE THAN 30 DAYS) SHALL BE COVERED OR OTHERWISE TEMPORARILY STABILIZED IN ACCORDANCE WITH BEST MANAGEMENT PRACTICES.

6.3. SEE SECTION 312800 MANAGEMENT AND DISPOSAL OF CONTAMINATED MATERIAL OF THE PROJECT SPECIFICATIONS FOR ADDITIONAL SOIL STOCKPILE GUIDELINES.

7. **CATCH BASIN INLET PROTECTION:**

7.1. CATCH BASINS WITHIN THE WORK AREA OR THAT WILL RECEIVE RUNOFF FROM THE WORK AREA SHALL BE PROTECTED WITH A SILT SACK AND OR OTHER APPROVED INSTALLATION TO MINIMIZE THE SEDIMENT LOAD TO THE BASIN.

8. **DUST CONTROL:**

8.1. SEE SECTION 312800 MANAGEMENT AND DISPOSAL OF CONTAMINATED MATERIAL OF THE PROJECT SPECIFICATIONS FOR ADDITIONAL DUST CONTROL GUIDELINES.

8.2. THE CONTRACTOR SHALL TAKE APPROPRIATE MEASURES DURING SITE WORK TO MINIMIZE WIND BLOWN DUST FROM EXPOSED SOIL SURFACES. MEASURES INCLUDE BUT ARE NOT LIMITED TO:
- SPRINKLING WATER ON EXPOSED SURFACES.
- APPLICATION OF TEMPORARY COVER SUCH AS HYDRO MULCH AND TACKIFIER, STRAW MATTING, JUTE MESTING ETC.

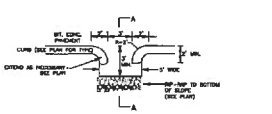
9. **INFILTRATION & DETENTION SYSTEMS:**

9.1. STORMWATER RUNOFF FROM THE DISTURBED CONSTRUCTION SITE SHALL NOT BE DISCHARGED INTO ANY EXISTING OR PROPOSED INFILTRATION SYSTEM (INCLUDING ALL UNDERGROUND RECHARGER FACILITIES AND BIORETENTION BASINS) UNTIL THE AREA BEING DRAINED IS FULLY STABILIZED AND CLEAN. UNTIL THEN, THE INFILTRATION SYSTEM SHALL REMAIN OFF-LINE AND PROTECTED. THE CONTRACTOR SHALL PROVIDE TEMPORARY BY-PASS SYSTEMS AS NECESSARY TO PREVENT CONSTRUCTION SITE RUNOFF FROM ENTERING THE INFILTRATION SYSTEMS.

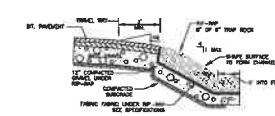
9.2. CLEAN ROOF RUNOFF MAY DISCHARGE INTO THE INFILTRATION SYSTEMS IF IT IS PIPED DIRECTLY TO THE SYSTEMS AND NOT RUN OVER DISTURBED AREAS.

10. **TEMPORARY SEDIMENT BASIN:**

10.1. THE PLAN SHOWS A SMALL BASIN NEAR THE CONSTRUCTION HAUL ROAD TO BE UTILIZED AS A TEMPORARY SEDIMENT BASIN. THIS AREA SHALL BE GRADED AS SHOWN AND THE OVERFLOW SPILLWAY INSTALLED PER THE DETAILS.

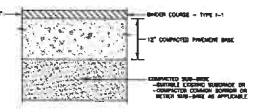


10.2. OTHER AREAS OF THE SITE MAY REQUIRE THE INSTALLATION OF OTHER TEMPORARY SEDIMENT BASINS DURING CONSTRUCTION. CONTRACTOR SHALL BE DILIGENT IN MONITORING SITE CONDITIONS AND INSTALLING THESES SEDIMENT BASINS WHERE TOPOGRAPHY AND RUNOFF CONDITIONS REQUIRE.



11. **PROTECTION OF EXCAVATIONS FROM RUNOFF:**

11.1. THE CONTRACTOR SHALL PROTECT ALL EXCAVATIONS FROM RUNOFF FROM ADJACENT AREAS AND SHALL DIVERT STORMWATER TO APPROPRIATE DRAINS AND STORMWATER BEST MANAGEMENT PRACTICES. TRENCH/FILTER RUNOFF AS NECESSARY TO MAINTAIN COMPLIANCE WITH THE NPDES GENERAL PERMIT.



12. **LONG-TERM POLLUTION PREVENTION PLAN:**

12.1. THE LONG-TERM POLLUTION PREVENTION PLAN AS PREPARED BY DGT ASSOCIATES AND AS INCLUDED IN APPENDIX 2 OF THE STORMWATER MANAGEMENT REPORT AND AS REVISED THROUGH SEPTEMBER 25, 2020 SHALL BE CONSIDERED PART OF THIS PLAN SET.

Vehicular Pavement Layout and Materials Plan - 02

1.3.08

© 2020 DiNisco Design

REFER TO THE SIGNING AND STRIPING PLANS (3.9.16, 3.9.17, 3.9.18 AND 3.9.19) FOR ALL OTHER PAVEMENT MARKINGS AND PAINT COLORS.

LAYOUT & MATERIALS NOTES

1. ALL ACCESSIBLE CURB CUTS SHALL BE CONFIRMATED TO MEET A.D.A. AND MAAB REQUIREMENTS.
   - SEE SHEET 1.3.10 FOR VERTICAL GRANITE CURB, TRANSITIONAL VERTICAL GRANITE CURB TO SLOPED GRANITE CURB SHALL BE PROVIDED AS NECESSARY.
   - AT CAPE COD BERM SECTIONS, NO CURB SHALL BE INSTALLED AT THE ACCESSIBLE CROSSING.
   - SEE NOTE 3 BELOW.
   - SEE SHEET 1.3.10 FOR DIMENSIONS FOR PERCEIVABLE FEATURES AND BITUMINOUS CURB OR WHAT DETAILS WERE CHANGED.
2. ACCESSIBLE PARKING SPACES AND ACCESS AISLES SHALL NOT EXCEED A SLOPE OF 1:48 (2%) IN ANY DIRECTION.
3. WALKWAY GRADES SHALL NOT HAVE SLOPES IN EXCESS OF 1:20 (5%) OR CROSS SLOPES IN EXCESS OF 1:50 (2%), UNLESS OTHERWISE NOTED.
4. WALK GRADIENTS AND CROSS SLOPES SHOWN ON THE GRADING PLANS ARE WITHIN, OR LESS THAN, THE REQUIREMENTS OF THE ARCHITECTURAL ACCESS BOARD'S (MAAB) REGULATIONS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CONSTRUCT THE WORK SO THAT IT IS IN COMPLIANCE WITH THE REGULATIONS. NOTE THAT THE DIMENSIONS AND GRADIENTS WITHIN THE REGULATIONS ARE NOT NECESSARILY CONSTRUCTION TOLERANCES. EXCEEDING THE MAXIMUM GRADIENTS IN THE REGULATIONS IS ENTIRELY AT THE CONTRACTOR'S RISK. THE CONTRACTOR SHALL VERIFY IN WRITING THAT ALL WALKS HAVE BEEN CONSTRUCTED IN COMPLIANCE WITH THE MAAB'S REGULATIONS.
5. CURB RADII AND DIMENSIONS SHOWN ARE AT THE FACE OF CURB.
6. FOR ACCESSIBLE CURB CUTS TO VEGETATED, SEE LANDSCAPE DRAWINGS.
7. SEE SPECIFICATIONS FOR PAVEMENT STRIPING AND MARKINGS.
8. LAYOUT SHOWN HEREON IS BASED UPON THE EXISTING CONDITIONS SURVEY PLAN CONTAINED IN THIS SET OF DRAWINGS. SURVEYOR OF RECORD SHALL BE CONTACTED PRIOR TO COMMENCEMENT OF ANY SITE WORK TO ESTABLISH SURVEY CONTROL FOR LAYOUT PURPOSES.
9. ALL ACCESSIBLE PARKING SPACES SHALL HAVE SIGNAGE AND MARKINGS COMPLIANT WITH MAAB REGULATIONS. SEE SPECIFICATIONS.
10. SEE LANDSCAPE MATERIALS PLAN FOR ADDITIONAL INFORMATION ON VEHICULAR CONCRETE AND BITUMINOUS CONCRETE PAVEMENT TOP COURSE TYPE, SCORE AND TEXTURE.
11. ROAD AND PARKING STRIPING SHALL BE STANDARD 4-INCH WIDE STRIPING AND MEET MUTCD STANDARDS.

DRAINAGE NOTES

1. FOR ROOF DRAINS, SEE PLUMBING PLANS. ROOF DRAINS EXISTING PVC DRAINING TO 10 FEET FROM THE BUILDING ARE BY THE PLUMBING CONTRACTOR. SITE CONTRACTOR TO COORDINATE WITH THE PLUMBER.
2. WHERE CONNECTIONS AND STRUCTURES ARE TO BE INSTALLED AT EXISTING DRAINS, CONTRACTOR TO EXAMINE LOCATION AND ELEVATION PRIOR TO INSTALLATION OF TRIBUTARY DRAIN SYSTEM AND NOTIFY THE ENGINEER OF ANY SIGNIFICANT DISCREPANCY FROM PLAN INFORMATION.
3. ALL EXISTING DRAIN FACILITIES TO BE ABANDONED OR REMOVED DURING THE CONSTRUCTION PROCESS SHALL BE PROPERLY ABANDONED AND/OR REMOVED IN ACCORDANCE WITH THE CITY OF AMESBURY DPW REQUIREMENTS.
4. FOR FOUNDATIONS DRAINS, UNDER SLAB DRAIN CONNECTIONS AND CLEANOUT DETAILS, SEE STRUCTURAL PLANS.
5. WHERE NOTED ON SHC PLANS, DRAINAGE PIPE DESIGNATED AS HDPE SHALL BE ADS N-12 (ASTM F2306) DUAL WALL PIPE (HDPE) OR APPROVED EQUAL.
6. WHERE NOTED ON SHC PLANS, DRAINAGE PIPE DESIGNATED AS RCP SHALL BE CLASS V REINFORCED CONCRETE PIPE OR APPROVED EQUAL.
7. STORMWATER MANAGEMENT STRUCTURES/MANHOLES TO REMAIN:
   - ADJUST FRAMES AND COVERS TO FINISHED GRADE AS NECESSARY, WHEN ADJUSTING UP LESS THAN 12", USE BRICK AND MORTAR TO MAKE FRAME AND COVER. WHEN ADJUSTING HEIGHT OVER 12", USE PRECAST CONCRETE RING ALONG WITH BRICK AND MORTAR TO BRING TO GRADE.
   - PERFORM CORRECTIONS TO BE APPROVED WITH BRICKS AND PORTLAND CEMENT MORTAR MIXES.
   - ALL WORK PER THE CITY OF AMESBURY DPW RECOMMENDS.
8. ALL UTILITIES NOTED AS "TO BE REMOVED/ABANDONED": EXISTING UTILITIES TO BE REMOVED/ABANDONED WITHIN THE PROPOSED BUILDING FOOTPRINT SHALL BE REMOVED. EXISTING UTILITIES OUTSIDE THE BUILDING TO BE ABANDONED IN PLACE, UNLESS OTHERWISE NOTED, AND SHALL BE REMOVED. OTHER UTILITIES SHOWN TO BE REMOVED/ABANDONED MAY BE CUT, CAPPED AND FILLED WITH FLOWABLE FILL AND ABANDONED IN PLACE. UTILITIES ABANDONED IN PLACE SHALL BE LOCATED, NOTED AND SHOWN ON RIS AS-BUILT PLANS. SEE DEMO SHEETS.
9. CONTRACTOR TO COORDINATE ELECTRIC / TELECOM DIRECT BANK LOCATIONS AND ELEVATIONS TO AVOID CONFLICT WITH DRAIN LINES AND STRUCTURES.
10. WHERE EXISTING ENCOUNTERED MATERIAL IS TO BE USED FOR BACKFILL IN UTILITY TRENCHES, MINIMUM TAPE SHALL BE INSTALLED IN THE TRENCH OVER THE BACKFILL MATERIAL. SEE SECTION 334000.

SITE UTILITY NOTES

1. ALL UTILITY INSTALLATIONS TO BE IN FULL COMPLIANCE WITH THE CITY OF AMESBURY DPW REQUIREMENTS.
2. REFER TO PLUMBING DRAWINGS FOR ADDITIONAL SEWER, WATER AND GAS INFORMATION.
3. ALL WATER MAINS AND SERVICES TO HAVE A MINIMUM COVER OF 5'-0".
4. WATER SERVICE SLEEVE FOR GATE VALVES TO REMAIN ARE TO BE ABANDONED TO FINISHED GRADE.
5. FOR SPRINKLER FIRE CONNECTIONS AND FIRE SERVICE CONNECTIONS, SEE FIRE PROTECTION PLANS.
6. THRUST BLOCKS TO BE INSTALLED AT ALL WATER MAIN BENDS. SEE DETAIL 1 ON SHEET 1.3.25.
7. SEWER SERVICE INSTALLATION:
   - CONTRACTOR IS TO PERFORM ALL SEWER INSTALLATION WORK SUCH THAT THERE IS NO DISRUPTION IN SERVICE TO THE EXISTING FIXTURES.
   - ALL EXISTING SEWER CONNECTIONS AND/OR COMPONENTS TO BE ABANDONED SHALL BE PROPERLY CAPPED AND PLUGGED IN ACCORDANCE WITH THE CITY OF AMESBURY DPW REQUIREMENTS.
8. SEWER MANHOLES TO REMAIN:
   - ADJUST FRAMES AND COVERS TO FINISHED GRADE AS NECCESSARY. WHEN ADJUSTING LESS THAN 18", USE BRICK AND MORTAR TO BRACE FRAME AND COVER. WHEN ADJUSTING GREATER THAN 18", USE PRECAST CONCRETE RISER RINGS. BRICK AND MORTAR TO BRACE. PLUG EXISTING CONNECTIONS TO BE REMOVED WITH BRICK AND HYDRAULIC CEMENT.
   - ALL WORK PER THE CITY OF AMESBURY DPW REQUIREMENTS.
9. ALL UTILITIES WORK AT TIE IN BRANCH/CONNECTION TO EXISTING UTILITIES SHALL BE COORDINATED WITHIN THE PROPERTIES BUILDING ENVELOPMENT AND WHERE THAT INTERFACE WITH NEW CONSTRUCTION CANNOT BE ABANDONED IN PLACE AND SHALL BE REMOVED. SEWER UTILITIES SHOWN TO BE REMOVED/ABANDONED MAY BE CUT, CAPPED AND PLUGGED WITH FLOWABLE FILL AND ABANDONED IN PLACE. UTILITIES ABANDONED IN PLACE SHALL BE LOCATED, NOTED AND SHOWN ON THE AS-BUILT PLANS. SEE SPECIFICATIONS.
10. ALL SEWER SERVICE PIPES TO BE ABANDONED IN PLACE SHALL BE CUT AND CAPPED AND AND A WATER TIGHT SEAL SHALL BE PROVIDED.
11. THE CONTRACTOR SHALL PROVIDE PVC INSULATION WHERE SEWER SERVICE PIPES HAVE LESS THAN 5'-0" OF COVER.
12. CONTRACTOR TO COORDINATE ELECTRIC / TELECOM/CATV RISER WORK LOCATIONS AND ELEVATIONS TO PROVE CONFLICT WITH PROPOSED SEWER, WATER AND GAS LINES AND STRUCTURES AND ALL EXISTING UTILITIES.
13. WHERE EXISTING ENCASTED MATERIAL IS TO BE USED FOR BACKFILL IN UTILITY TRENCHES, WARNING TAPE SHALL BE INSTALLED BY THE TRENCH RACK THE BACKFILL MATERIAL. SEE SECTION 331000 AND 333000.

Erosion and Sediment Control Plan - 03

1.3.18

© 2020 DiNisco Design

EROSION AND SEDIMENT CONTROL NOTES

1. **GENERAL PERFORMANCE STANDARDS:**

1.1. THE CONTRACTOR SHALL INSTALL, ROUTINELY INSPECT AND MAINTAIN ALL SEDIMENT AND EROSION CONTROLS SUCH THAT THEY ARE IN PROPER WORKING ORDER AT ALL TIMES DURING THE CONSTRUCTION PROJECT UNTIL SUCH TIME AS ALL AREAS OF THE SITE TRIBUTARY TO THOSE EROSION CONTROLS ARE IN A PERMANENTLY STABILIZED CONDITION.

1.2. THE PLAN VIEWS IN THIS PLAN SET SHOW ONLY THE LOCATIONS OF THE PERIMETER EROSION CONTROLS AND ARE NOT INTENDED TO SHOW ALL EROSION CONTROLS NECESSARY FOR MANAGEMENT OF THE SITE. THE CONTRACTOR SHALL MANAGE THE SITE SUCH THAT EROSION AND SEDIMENT FROM RUNOFF ARE WIND BLOWN DUST ARE CONTROLLED AND MINIMIZED AT ALL TIMES. THE EROSION CONTROLS SHOWN ON THIS PLAN INCLUDE THE INITIAL SETUP OF EROSION CONTROLS AND BASIC INFORMATION. TO MEET THE REQUIREMENT OF BEST MANAGEMENT PRACTICES, THE CONTRACTOR MUST MANAGE THE SITE PROPERLY WHICH MAY INCLUDE, BUT NOT BE LIMITED TO: MINIMIZING AREAS OF EXPOSED SOILS, INSTALLING TEMPORARY COVERS, MAKE NECESSARY ADJUSTMENTS TO THE EROSION CONTROL INSTALLATIONS TO IMPROVE FUNCTIONS, PROVIDE TEMPORARY SEDIMENT BASINS; INSTALL ADDITIONAL EROSION AND SEDIMENT CONTROL WHERE NECESSARY.

1.3. THE EROSION CONTROL WORK IS ALSO SUBJECT TO PERMITS AND APPROVALS UNDER THE MUNICIPAL STORMWATER ORDINANCES AND ALL STATE, LOCAL AND FEDERAL REGULATIONS. THE PROJECT MAY ALSO BE SUBJECT TO OTHER STATE AND LOCAL APPROVALS. THE CONTRACTOR SHALL OBTAIN AND BE RESPONSIBLE FOR COMPLIANCE WITH THE CONDITIONS AND REQUIREMENTS OF THOSE PERMITS.

1.4. DESIGN, INSTALLATION AND MAINTENANCE OF SEDIMENT AND EROSION CONTROLS SHALL BE IN ACCORDANCE WITH BEST MANAGEMENT PRACTICES FOLLOWING THE GUIDELINES INCLUDED IN THE FOLLOWING:
- "STORMWATER MANAGEMENT FOR CONSTRUCTION ACTIVITIES, DEVELOPING POLLUTION PREVENTION PLANS AND BEST MANAGEMENT PRACTICES" U.S. ENVIRONMENTAL PROTECTION AGENCY, OCTOBER 1992.
- "MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES FOR URBAN AND SUBURBAN AREAS. A GUIDE FOR PLANNERS, DESIGNERS AND MUNICIPAL OFFICIALS". MASS. EXECUTIVE OFFICE OF ENVIRONMENTAL AFFAIRS, MAY 2003.
- U.S.D.A. NATURAL RESOURCES AND CONSERVATION SERVICES (NRCS) GUIDELINES.

2. **FEDERAL NPDES PHASE II COMPLIANCE:**

2.1. THIS PROJECT IS SUBJECT TO THE FEDERAL CLEAN WATER ACT REQUIREMENTS FOR CONSTRUCTION SITES ADMINISTERED BY THE U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA). THIS PROGRAM IS THE "NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) – PHASE II FOR CONSTRUCTION SITES". FOR COMPLIANCE WITH THIS PROGRAM, THE CONTRACTOR SHALL BE RESPONSIBLE FOR PREPARING A COMPLETE "STORMWATER POLLUTION PREVENTION PLANS" (SWPPP) IN CONFORMANCE WITH THE CURRENT CONSTRUCTION GENERAL PERMIT AND FILING A NOTICE OF INTENT WITH THE EPA UNDER THE NPDES PROGRAM. THE CONTRACTOR SHALL THEN MANAGE THE SITE IN COMPLIANCE WITH THE SWPPP AND IN COMPLIANCE WITH THE CONSTRUCTION GENERAL PERMIT. NOTE THAT THE SWPPP IS TO BE PREPARED TO BE CONSISTENT WITH THIS EROSION AND SEDIMENT CONTROL PLAN AND OTHER APPLICABLE APPROVALS. THE EROSION AND SEDIMENT CONTROL PLAN INCLUDED IN THIS PLAN SET MAY BE USED AS PART OF THE DOCUMENTATION REQUIRED FOR THE PREPARATION OF A SWPPP, BUT IS NOT TO BE CONSIDERED AS MEETING THE FULL REQUIREMENTS OF A SWPPP PREPARED FOR COMPLIANCE WITH THE NPDES PROGRAM.

2.2. A COPY OF THE SWPPP SHALL BE FILED WITH THE MUNICIPAL ENGINEERING DEPARTMENT, CONSERVATION COMMISSION AND OTHERS AS REQUIRED BY APPLICABLE PERMITS AND APPROVALS.

2.3. THE CONTRACTOR IS RESPONSIBLE FOR THE PREPARATION OF THE CONSTRUCTION PERIOD POLLUTION PREVENTION AND EROSION CONTROL PLAN (CPPP). THIS DOCUMENT SHALL BE PREPARED AND SUBMITTED TO THE AMESBURY CONSERVATION COMMISSION, OWNER, ARCHITECT AND ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY SITE DISTURBANCE. THIS DOCUMENT IS TO BE CONSIDERED PART OF THE CONTRACT DOCUMENTS FOR THIS PROJECT.

3. **PERIMETER FIBER LOG / CONSTRUCTION FENCE AND LIMIT OF WORK:**

3.1. PRIOR TO ANY DISTURBANCE OR ALTERATIONS OF ANY AREA ON THE SITE, AN EROSION CONTROL BARRIER AND CONSTRUCTION FENCE SHALL BE INSTALLED IN THE LOCATIONS SHOWN ON THE PLANS AND CONTRACT DOCUMENTS. THE INSTALLED PERIMETER EROSION CONTROL BARRIERS SHALL BE INSPECTED BY THE CITY OF AMESBURY, ARCHITECT AND ENGINEER PRIOR TO THE START OF SITE WORK.

3.2. INSTALL THE FIBER LOGS AS SHOWN. IN THOSE AREAS WHERE THE TOPOGRAPHY INDICATES THAT STORMWATER RUNOFF WILL BE CONCENTRATED (AT LOW POINTS), ADDITIONAL FIBER LOGS, AS NECESSARY, SHALL BE ADDED FOR ADDITIONAL FILTRATION AND PROTECTION. SILT FENCE FOR ADDED SUPPORT MAY BE ADDED AS NECESSARY. THE REQUIRED LOCATIONS FOR THE ADDED FIBER LOG INSTALLATION WILL BE SELECTED BY THE ENGINEER AND / OR THE AUTHORIZED INSPECTOR/ SWPPP COORDINATOR UPON COMPLETION OF THE FIBER LOG INSTALLATION (SEE DETAIL).

3.3. ONCE INSTALLED, THE STAKED FIBER LOGS SHALL BE MAINTAINED IN PLACE UNTIL ALL AREAS UPGRADIENT FROM THE BARRIERS HAVE BEEN PERMANENTLY STABILIZED.

3.4. ALL DISTURBED AREAS NOT OTHERWISE DEVELOPED OR WHERE SPECIAL STABILIZATION MEASURES OR LANDSCAPE PLANTINGS ARE PROPOSED SHALL BE LOAMED AND SEEDED OR SODDED. SIX INCHES OF LOAM TOPSOIL (MIN. COMPACTED DEPTH) SHALL BE APPLIED UNLESS, OTHERWISE SPECIFIED. (SEE LANDSCAPE PLAN AND OTHER PLANS AS APPLICABLE).

3.5. THE PERIMETER FIBER LOGS AND CONSTRUCTION FENCING ARE ALSO LIMITS OF WORK. ALL AREAS OUTSIDE THE LIMIT ARE TO BE LEFT UNDISTURBED. DURING THE SITE WORK, ALL PERSONS AND EQUIPMENT SHALL STAY OUT OF THESE AREAS TO PRESERVE THE EXISTING VEGETATION AND SOIL COVER.

4. **CONSTRUCTION ENTRANCE:**

4.1. AT THE START OF SITE WORK, A STONE CONSTRUCTION ENTRANCE SHALL BE INSTALLED AT ALL ACCESS POINTS TO THE CONSTRUCTION SITE FROM THE ROADWAY TO CONTROL THE TRACKING OF MUD OFF THE SITE. THE ENTRANCE SHALL BE MAINTAINED UNTIL THE SITE IS IN A STABILIZED CONDITION WHEN THE POSSIBILITY OF VEHICLES TRACKING MUD OFF SITE HAS BEEN ELIMINATED.

4.2. THE CONSTRUCTION SHALL SWEEP THE ADJACENT ROADWAYS WHEN MUD, DUST, DIRT, DEBRIS, ETC. HAS SHOWN SIGNS OF MUD BEING TRACKED ON THE ROADWAYS EXITING THE SITE. THE CONTRACTOR SHALL PAY PARTICULAR ATTENTION TO THIS MATTER AND IMMEDIATE ATTENTION IS ALWAYS REQUIRED.

4.3. THROUGHOUT THE CONSTRUCTION PROCESS, THE LOCATION OF THE CONSTRUCTION ENTRANCE WILL CHANGE DEPENDING ON CONSTRUCTION VEHICLE ENTRANCE AND EXIT LOCATIONS. THE CONTRACTOR SHALL DETAIL THEIR LOCATIONS IN THE STORMWATER POLLUTION PREVENTION PLAN AT EACH PHASE.

5. **DEWATERING OF EXCAVATIONS:**

5.1. DISCHARGE FROM DEWATERING PUMPS OR TEMPORARY TRENCH OR EXCAVATION DRAINS SHALL NOT BE DISCHARGED DIRECTLY TO THE ON-SITE DRAINAGE SYSTEM, OR WETLAND RESOURCE AREAS. DISCHARGES SHALL BE DIRECTED TO A TREATMENT SYSTEM CONSISTING OF A SEDIMENT BASIN, STRAW BALE SEDIMENT BASIN, FILTER BAG SYSTEM, FRAC TANK OR OTHER APPROVED METHOD TO FILTER THE DISCHARGE WATER AND PREVENT EROSION.

5.2. THE PUMP DISCHARGE SYSTEMS MUST BE GREATER THAN 100 FEET FROM WETLAND RESOURCES UNLESS APPROVED BY THE MUNICIPAL CONSERVATION COMMISSION AND IN ACCORDANCE WITH OTHER APPLICABLE LAWS AND REGULATIONS.

5.3. ALL DEWATERING DRAINAGE ASSOCIATED WITH CONSTRUCTION ACTIVITIES MUST FIRST OBTAIN A DEWATERING DRAINAGE PERMIT. SUCH DISCHARGES SHALL COMPLY WITH THE MUNICIPAL REQUIREMENTS, UNITED STATES ENVIRONMENTAL PROTECTION AGENCY, MASSACHUSETTS DEP AND OTHER APPROPRIATE AGENCIES. UNDER NO CIRCUMSTANCE SHALL DEWATERING DRAINAGE BE DISCHARGED INTO A SANITARY SEWER.

6. **SOIL STOCKPILES:**

6.1. STOCKPILES OF SOIL MATERIALS SHALL BE PLACED WITHIN AREAS THAT ARE PROTECTED BY PERIMETER EROSION CONTROLS AS SHOWN ON THIS PLAN, OR SHALL BE SURROUNDED BY PROPER SILT FENCING, FIBER LOGS, OR STAKED STRAW BALES.

6.2. STOCKPILES THAT ARE TO BE IN PLACE FOR EXTENDED PERIODS OF TIME (MORE THAN 30 DAYS) SHALL BE COVERED OR OTHERWISE TEMPORARILY STABILIZED IN ACCORDANCE WITH BEST MANAGEMENT PRACTICES.

6.3. SEE SECTION 312800 MANAGEMENT AND DISPOSAL OF CONTAMINATED MATERIAL OF THE PROJECT SPECIFICATIONS FOR ADDITIONAL SOIL STOCKPILE GUIDELINES.

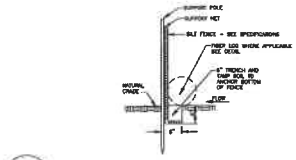
7. **CATCH BASIN INLET PROTECTION:**

7.1. CATCH BASINS WITHIN THE WORK AREA OR THAT WILL RECEIVE RUNOFF FROM THE WORK AREA SHALL BE PROTECTED WITH A SILT SACK AND OR OTHER APPROVED INSTALLATION TO MINIMIZE THE SEDIMENT LOAD TO THE BASIN

8. **DUST CONTROL:**

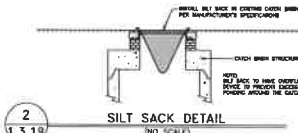
8.1. SEE SECTION 312800 MANAGEMENT AND DISPOSAL OF CONTAMINATED MATERIAL OF THE PROJECT SPECIFICATIONS FOR ADDITIONAL DUST CONTROL GUIDELINES.

8.2. THE CONTRACTOR SHALL TAKE APPROPRIATE MEASURES DURING SITE WORK TO MINIMIZE WIND BLOWN DUST FROM EXPOSED SOIL SURFACES. MEASURES INCLUDE BUT ARE NOT LIMITED TO:
- SPRINKLING WATER ON EXPOSED SURFACES.
- APPLICATION OF TEMPORARY COVER SUCH AS HYDRO MULCH AND TACKIFIER, STRAW MATTING, JUTE NETTING ETC.



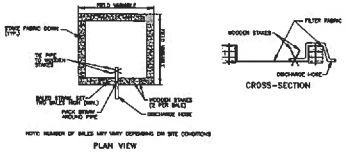
9. **INFILTRATION & DETENTION SYSTEMS:**

9.1. STORMWATER RUNOFF FROM THE DISTURBED CONSTRUCTION SITE SHALL NOT BE DISCHARGED INTO ANY EXISTING OR PROPOSED INFILTRATION SYSTEM (INCLUDING ALL UNDERGROUND RECHARGER FACILITIES AND BIORETENTION BASINS) UNTIL THE AREA BEING DRAINED IS FULLY STABILIZED AND CLEAN. UNTIL THEN, THE INFILTRATION SYSTEM SHALL REMAIN OFF-LINE AND PROTECTED. THE CONTRACTOR SHALL PROVIDE TEMPORARY BY-PASS SYSTEMS AS NECESSARY TO PREVENT CONSTRUCTION SITE RUNOFF FROM ENTERING THE INFILTRATION SYSTEMS.



9.2. CLEAN ROOF RUNOFF MAY DISCHARGE INTO THE INFILTRATION SYSTEMS IF IT IS PIPED DIRECTLY TO THE SYSTEMS AND NOT RUN OVER DISTURBED AREAS.

10. **LONG-TERM POLLUTION PREVENTION PLAN:**



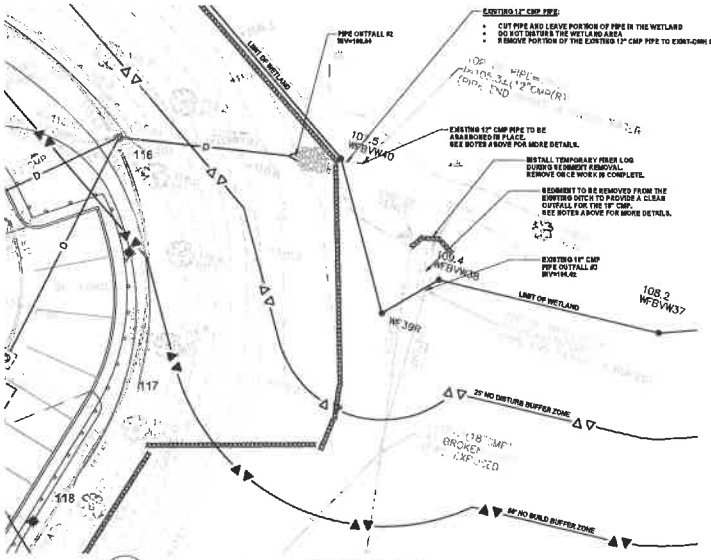
10.1. THE LONG-TERM POLLUTION PREVENTION PLAN AS PREPARED BY DGT ASSOCIATES AND AS INCLUDED IN APPENDIX 2 OF THE STORMWATER MANAGEMENT REPORT AND AS REVISED THROUGH SEPTEMBER 25, 2020 SHALL BE CONSIDERED PART OF THIS PLAN SET.

1 / 1.3.19 SILT FENCE DETAIL (NO SCALE)

2 / 1.3.19 SILT SACK DETAIL (NO SCALE)

NOTE: NUMBER OF BALES MAY VARY DEPENDING ON SITE CONDITIONS

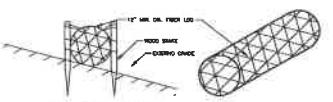
PLAN VIEW



DEWATERING OF EXCAVATIONS NOTES:
1. DISCHARGE FROM DEWATERING PUMPS OR TEMPORARY TRENCH OR EXCAVATION DRAINS SHALL NOT BE DISCHARGED DIRECTLY TO WETLAND OR STORM DRAIN SYSTEMS. THE DISCHARGES SHALL BE DIRECTED INTO A CONSTRUCTED SEDIMENT BASIN OR A STRAW BALE SETTLING BASIN, SETTLING BAGS, FILTER BAG, FRAC TANK OR SIMILAR DEVICE.
2. SETTLING BASINS MUST BE A MINIMUM OF 100 FEET FROM THE WETLAND RESOURCE AREAS.

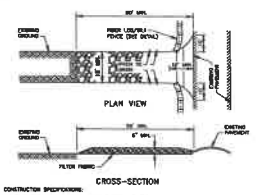
3 / 1.3.19 STRAW BALE SETTLING BASIN DETAIL (NO SCALE)

DRAIN OUTLET REPLACEMENT AT WETLANDS NOTES



SCHEDULE:
THE REPLACEMENT OF THE 12" CMP DRAIN OUTLET AT THE WETLANDS MUST BE PERFORMED IN THE FIRST SUMMER OF THE PROJECT SO THAT THE AREA IS AS DRY AS POSSIBLE AND THE PLANTINGS ALONG THE SLOPE CAN TAKE PLACE IN LATE SUMMER TO ESTABLISH THE VEGETATION BEFORE WINTER AND THEN MONITORED DURING THE CONSTRUCTION PERIOD.

CONSTRUCTION SEQUENCE:
1. PRIOR TO ANY WORK:
   1.1. THE LIMITS OF THE TREE AND SHRUB CLEARING AND PROPOSED SEDIMENT CONTROL BARRIER SHALL BE STAKED AND INSPECTED BY THE CONTRACTOR AND INSPECTED BY THE PROJECT ENGINEER.
   1.2. INSTALL THE SEDIMENT CONTROL BARRIER FOR INSPECTION BY THE PROJECT ENGINEER. THE ENGINEER WILL DETERMINE IF ANY PARTICULAR TREES AND SHRUBS WITHIN THE DESIGNATED LIMIT OF WORK CAN REMAIN AND BE PROTECTED.
2. CLEAR THE BRUSH AS REQUIRED.
3. TRENCH EXCAVATION AND REMOVE EXISTING 12 INCH DRAIN:
   3.1. EXCAVATE THE EXISTING TOPSOIL WITHIN THE TRENCH AREA AND STOCKPILE WITHIN THE UPLAND IN THE PROJECT LIMIT OF WORK FOR LATER REUSE.
   3.2. COMPLETE THE TRENCH EXCAVATION, CUT THE EXISTING DRAIN AT THE LOCATION SHOWN AND REMOVE THE EXISTING DRAIN. THE 12" CMP WITHIN THE WETLANDS IS TO BE ABANDONED IN PLACE. NO WORK SHALL BE DONE WITHIN THE WETLAND.
   3.3. INSTALL THE NEW PIPE AND FLARED END SECTION AND STONE RIP-RAP AND BACKFILL PER THE DRAIN DETAIL TO THE SUBGRADE OF THE TOPSOIL.
   3.4. REPLACE THE TOPSOIL IN THE TRENCH AREA TO THE ORIGINAL GRADE. TOPSOIL MUST BE FIRM BUT NOT COMPACTED. FINE GRADE BY HAND PRIOR TO PLANTING.
4. PLANTING:
   4.1. SEED THE DISTURBED AREAS PER THE LANDSCAPE PLANS.
   4.2. INSTALL STRAW MULCH AND JUTE MATTING TO PROTECT THE SEED BED.
   4.3. WATER AND MAINTAIN THE NEWLY SEEDED AREA AS NECESSARY UNTIL GROWTH IS FULLY ESTABLISHED AND APPROVED BY THE ENGINEER AND LANDSCAPE ARCHITECT.
   4.4. INSTALL PLANTINGS AND SEEDING ALONG THE SLOPE PER THE LANDSCAPE PLANS.
5. SEDIMENT REMOVAL FROM THE 18" CMP AND EXISTING DITCH:
   5.1. THE SEDIMENT WITHIN THE EXISTING 18" CMP OUTLET PIPE AND WITHIN THE EXISTING DITCH SHALL BE CAREFULLY REMOVED BY HAND AS TO NOT DISTURB THE VEGETATED WETLAND AREA.
   5.2. ALL WORK ASSOCIATED WITH SEDIMENT REMOVAL SHALL BE DONE BY HAND. ALL SEDIMENT REMOVED SHALL BE PROPERLY DISPOSED OF. NO MACHINES SHALL BE ALLOWED WITHIN THE 25' NO DISTURB BUFFER ZONE FOR THIS WORK. THE EXISTING VEGETATION WITHIN THE WETLANDS IS TO NOT BE DISTURBED.
6. REMOVAL OF THE SEDIMENT CONTROLS:
   6.1. UPON ACCEPTANCE BY THE ENGINEER OF THE STABILITY OF THE AREA, REMOVE THE SEDIMENT CONTROL BARRIER.



4 / 1.3.19 DRAIN OUTLET REPLACEMENT AND DITCH CLEANING AT WETLANDS

SCALE IN FEET: 1"=10' (0, 10, 20)

INSTALLATION NOTES FOR FIBER LOGS:
1. LAY THE FIBER LOG AT THE UPHILL SIDE OF THE SILT FENCE.
2. INSTALL APPROXIMATELY 4-5 WOOD STAKES PER 10 FEET OF FIBER LOG THROUGH THE MIDDLE/NETTING ALONG THE FIBER LOG AS NEEDED TO HOLD THE LOG IN PLACE.
3. DRIVE THE STAKE INTO THE GROUND DEEP ENOUGH TO HOLD THE LOG.
4. IN PAVED AREAS, SECURE FIBER LOG WITH CONCRETE BLOCKS OR SAND BAGS.
5. FIBER LOG SHALL BE 12 INCHES (MIN) IN DIAMETER UNLESS OTHERWISE NOTED ON THE PLANS AND SHALL BE A COMPOST FILLED FILTER SOCK MEETING THE MUNICIPAL ENGINEERING DEPARTMENT STANDARDS.

5 / 1.3.19 FIBER LOG DETAIL (NO SCALE)

CONSTRUCTION SPECIFICATIONS:
1. STONE SIZE – USE 2" TO 4" WASHED, ANGULAR STONE
2. THICKNESS – NOT LESS THAN SIX (6) INCHES.
3. WIDTH – FIFTEEN (15) FEET MINIMUM, BUT NOT LESS THAN THE FULL WIDTH AT POINTS WHERE INGRESS OR EGRESS OCCURS.
4. FILTER FABRIC – SHALL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING OF STONE.
5. MAINTENANCE – THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH SHALL PREVENT TRACKING BY FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE AS CONDITIONS DEMAND AND REPAIR OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACKED ONTO PUBLIC RIGHTS-OF-WAY MUST BE REMOVED IMMEDIATELY.
6. PERIODIC INSPECTION AND NEEDED MAINTENANCE SHALL BE PROVIDED.

6 / 1.3.19 STABILIZED CONSTRUCTION ENTRANCE DETAIL (NO SCALE)

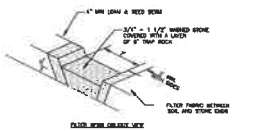
1.3.23

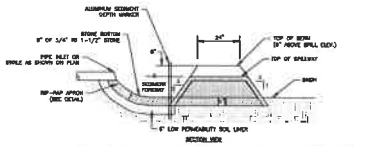
© 2020 Dinisco Design

MIX #1 – NEW ENGLAND WETLAND SEED MIX.

MIX #2 – NEW ENGLAND EROSION CONTROL/RESTORATION MIX FOR DETENTION BASINS.



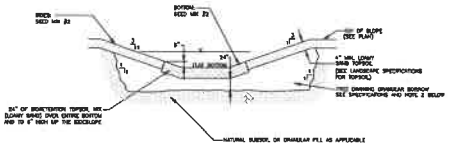
MIX #3 – NEW ENGLAND CONSERVATION/WILDLIFE MIX.



LAWN MIX

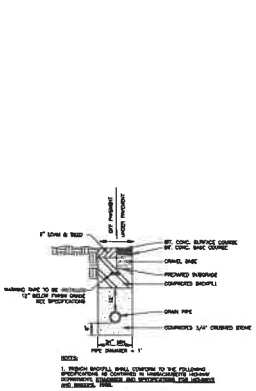
NOTE: THAT THE ABOVE SEED MIXES IDENTIFIED FOR USE ON THIS PROJECT ARE BY NEW ENGLAND NATIVE PLANTS, INC. AND INDICATE THE PLANT SPECIES MIX AND WEIGHT OF PURE/SEED COVER. SEED MIXES BY OTHER PRODUCERS MEETING THE INTENT OF THE LISTED MIXES MAY BE USED IF APPROVED AS EQUAL BY THE LANDSCAPE ARCHITECT.

SEE LANDSCAPE SPECIFICATIONS FOR SEED MIXES IDENTIFIED ON THE LANDSCAPE DRAWINGS AS "LAWN".



1 1.3.24 SEED MIXES FOR STORMWATER MANAGEMENT FEATURES (NO SCALE)

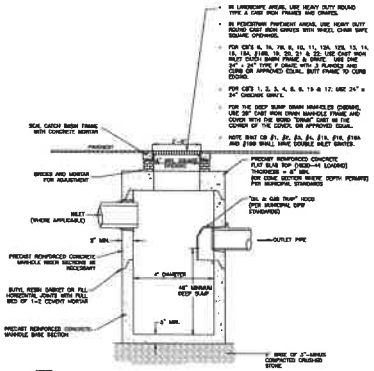
NOTE: BANK OF FOREBAY AND FILTER BERM BEYOND THE LIMITS OF STONE SHALL BE LOAMED AND SEEDED.



2 1.3.24 SEDIMENT FOREBAY AND FILTER BERM (NO SCALE)

NOTES:

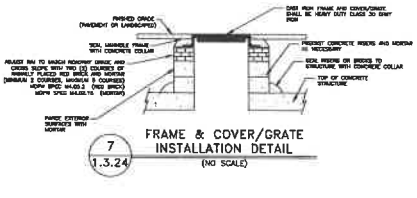
1. REMOVE FOREIGN TOPSOIL AND SUBSOIL TO THE ELEVATION OF THE PHASED SUBGRADE BELOW THE PROPOSED TOPSOIL. IF THE NATURAL MATERIAL MEETS THE REQUIREMENTS FOR "GRADE" IN NOTE 2 BELOW, THE EXCAVATION IS NOT NECESSARY. OTHERWISE REMOVE THE UNSUITABLE SOIL TO THE DEPTHS SHOWN AND BACKFILL WITH THE MATERIAL PER NOTE 2.
2. FREE DRAINING GRANULAR BORROW SHALL CONSIST OF WELL DRAINING SOIL CONSISTING OF CLEAN SAND AND GRAVEL WITH LESS THAN 5% SILT AND CLAY WHICH MAY MORE THAN 5 PERCENT CLAY, USDA TEXTURAL CLASS: SA–SIRE SOIL MIXING THIS MAY BE USED. SEE EARTHWORK SPECIFICATIONS.
3. BIORETENTION TOPSOIL MIX SHALL BE A MIXTURE OF SAND, TOPSOIL AND COMPOST AS FOLLOWS: 40% SAND, 20% TO 35% TOPSOIL, 20% TO 40% COMPOST (BY VOLUME). SEE SPECIFICATIONS FOR RUNNER INFORMATION.
4. FOR TOPSOIL, ORGANIC CONTENT SEE LANDSCAPE SPECIFICATIONS.
5. SEE LANDSCAPE DRAWINGS FOR OTHER PLANTINGS.



3 1.3.24 BIORETENTION BASIN DETAIL (NO SCALE)

NOTES:

1. TRENCH BACKFILL SHALL CONFORM TO THE FOLLOWING SPECIFICATIONS AS CONTAINED IN MASSACHUSETTS HIGHWAY DEPARTMENT, STANDARD AND SPECIFICATIONS FOR HIGHWAYS AND BRIDGES, 1988.



4 1.3.24 TYPICAL DRAIN PIPE BEDDING DETAIL (NO SCALE)

NOTES:

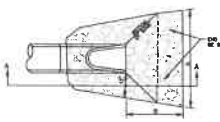
1. FOR CB #5, #6, #7A, #7B, #8, #9 AND #10, THE OPENING IN THE TOP SLAB SHALL BE OFFSET FROM THE CENTER OF THE SLAB AND SET OVER THE OUTLET PIPE TO ALLOW FOR INSTALLATION OF THE 90° & ONE TRAP HOOD.
2. USE THIS DETAIL FOR AD #1 AND AD #2 AND PROVIDE A ROUND BEEHIVE CAST IRON GRATE.

5 1.3.24 DEEP SUMP CATCH BASIN & DEEP SUMP DRAIN MANHOLE (DSDMH) (NO SCALE)

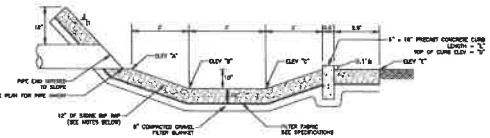
NOTES:

1. USE A 72 DIAMETER BRK MANHOLE WHERE RECOMMENDED WHICH TOTAL INSIDE DEPTH EXCEEDS 10 FT. OR WHERE PIPE ARRANGEMENT WILL DAMAGE THE INTEGRITY OF THE MANHOLE SECTIONS.
2. MANHOLE CONNECTION TO PIPE SHALL BE BY MEANS OF A FLEXIBLE RUBBER SLEEVE OR BOOT-TAL. PROJECT PIPE 1"–2" INTO MANHOLE.
3. THIS DETAIL IS ALSO BE USED FOR ALL ROOF DRAIN CLEANOUTS WHERE THE DRAIN IS 6 INCHES IN DIAMETER OR LARGER.

8 1.3.24 DRAIN MANHOLE DETAIL (NO SCALE)



NOTE:



RIP-RAP SHALL CONSIST OF EVENLY GRADED 6" TO 12" ANGULAR BROKEN STONE, LARG. STONE SIZE = 6") WITH A THICKNESS OF 18 INCHES. NOT MORE THAN 15 PERCENT OF THE STONE MAY BE SMOOTHED SPALLS AND STONES LESS THAN 4" IN SIZE.

PIPE SIZE (In.)	A (MIN.)	B* (MIN.) SEE PLAN
12" OR LESS	4'	5'
18"	16'	6'

* LENGTH OF RIP-RAP TO BE PER PIPE DETAIL UNLESS OTHERWISE SHOWN ON THE PLANS.

9 1.3.24 PIPE END SECTION WITH RIP – RAP APRON DETAIL (NO SCALE)

NOTES:

1. RIP–RAP SHALL CONSIST OF EVENLY GRADED 6" TO 12" ANGULAR BROKEN STONE, LARG. STONE SIZE = 6") WITH A THICKNESS OF 18 INCHES. NOT MORE THAN 15 PERCENT OF THE STONE MAY BE SMOOTHED SPALLS AND STONES LESS THAN 4" IN SIZE.
2. SEE DETERMINATION REFERS TO MEAN SPHERICAL DIAMETER.
3. MORTAR JOINTS RESTRICTION CURB SECTIONS OF SPILLWAY.

STRUCTURE	L	ELEVATIONS A	B	D	E

EXISTING HOLDING TANK & LIFT STATION DETAILS

SOURCE: 1973 RECORD PLANS FOR THE CASHMAN ELEMENTARY SCHOOL
(NO SCALE)

NOTE:
1. THE PLAN SHOWN ON THIS SHEET IS FROM THE 1972 PLAN 381 FOR THE FRIEND STREET ELEMENTARY SCHOOL (NOW NAMED THE CASHMAN ELEMENTARY SCHOOL). THIS IS INTENDED TO SHOW THE AVAILABLE INFORMATION ON THE EXISTING SEWER PUMPING STATION. NOTE THAT THIS IS NOT AN AS-BUILT DRAWING AND ACTUAL FIELD CONDITIONS MAY DIFFER.
2. NOTES ADDED TO THIS DRAWING FOR THE NEW WORK ARE SHOWN IN BOLD TEXT.
3. THE ELEVATIONS ON THIS SHEET ARE ON THE NGVD 1929 VERTICAL DATUM. TO CONVERT TO THE APPROXIMATE CURRENT PROJECT VERTICAL DATUM (NAVD 1988), SUBTRACT 0.8 FEET. CONTRACTOR TO CONFIRM ALL ELEVATIONS PRIOR TO ANY WORK ON THIS PUMP STATION AND NOTIFY THE ENGINEER OF ANY DISCREPANCIES.

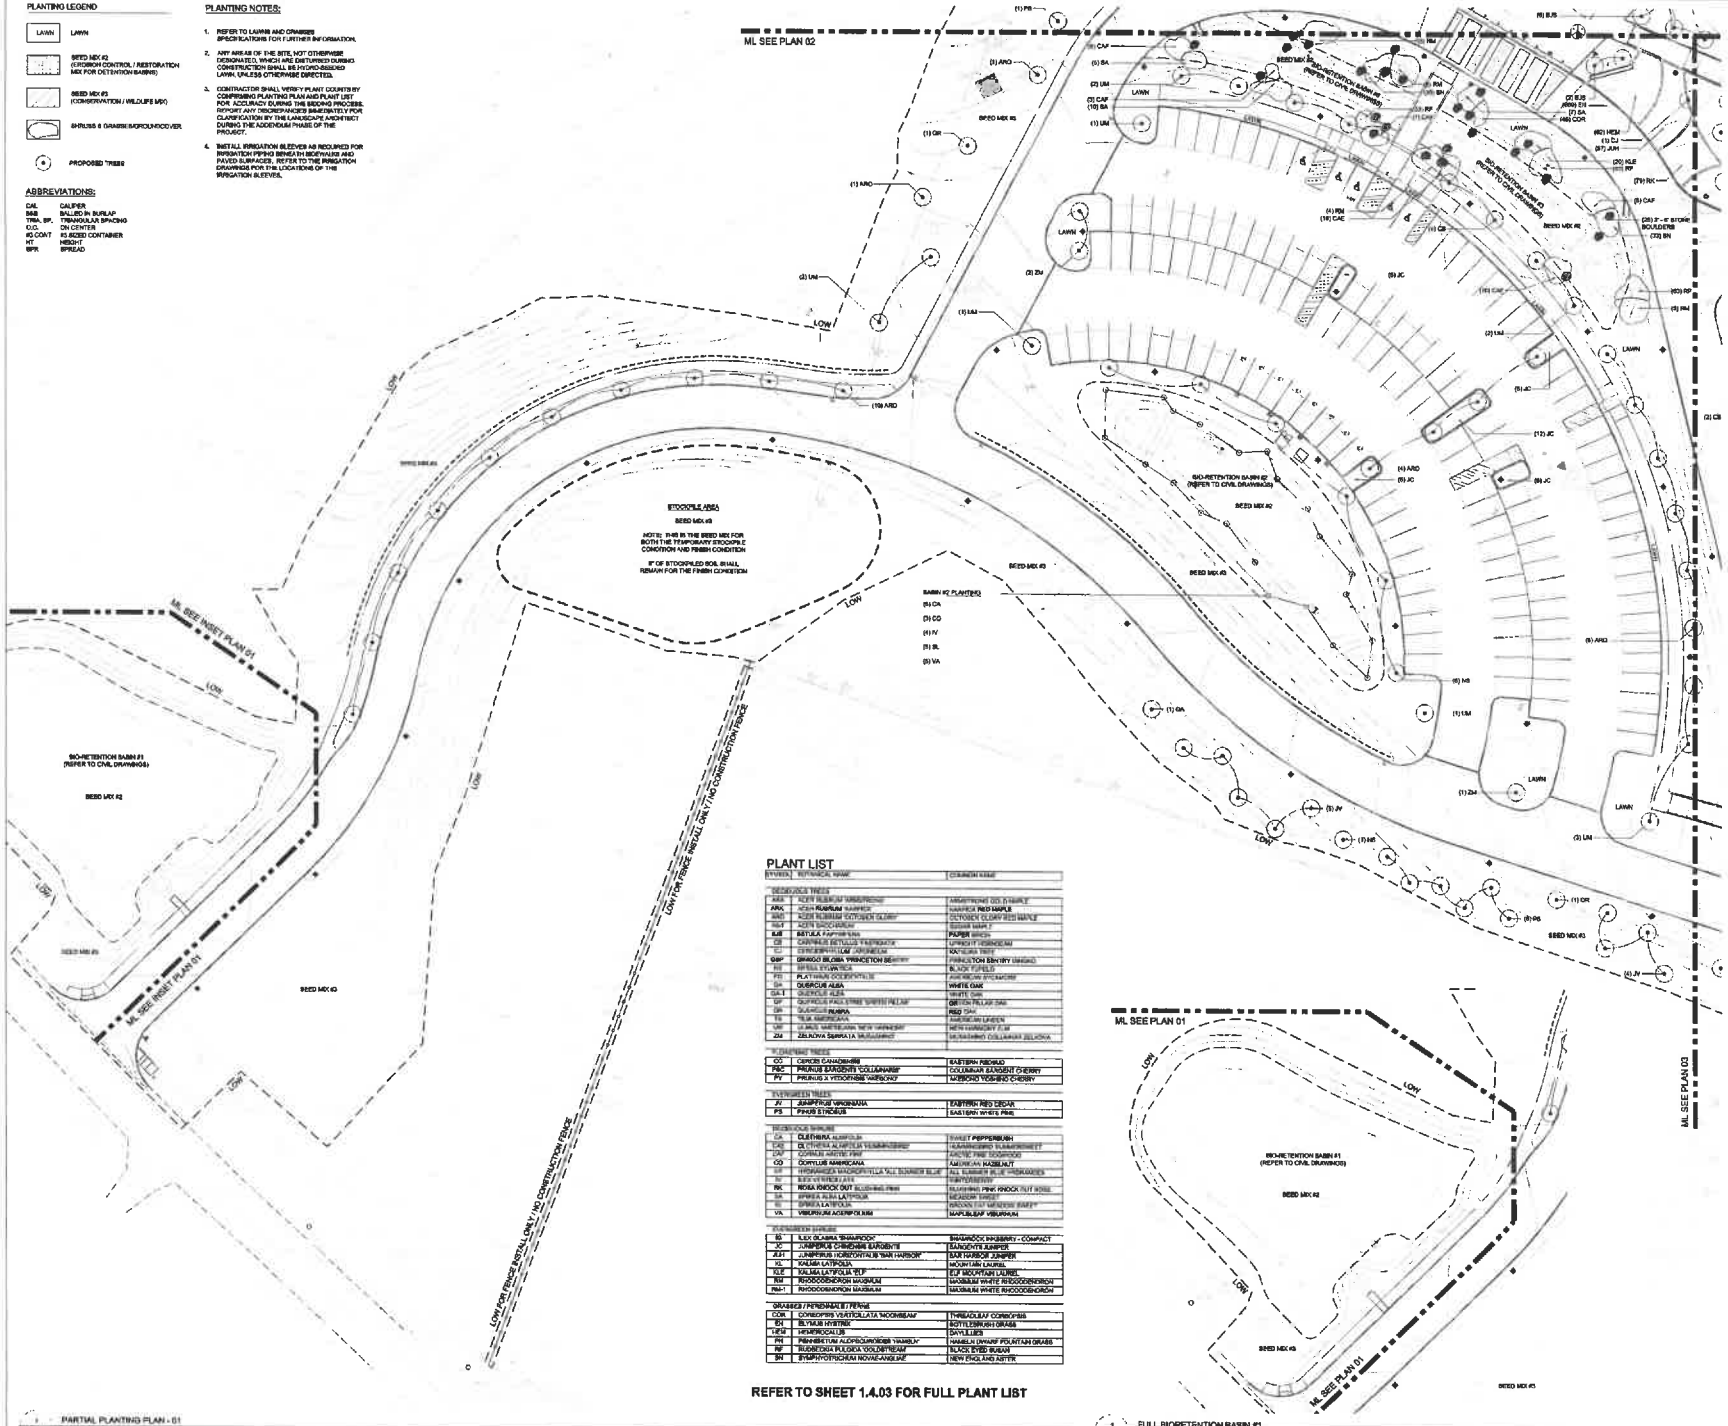
PLANTING LEGEND



- LAWN — LAWN
- SEED MIX #2 (EROSION CONTROL / RESTORATION MIX FOR DETENTION BASINS)
- SEED MIX #3 (CONSERVATION / WILDLIFE MIX)
- SHRUBS & GRASS/GROUNDCOVER
- PROPOSED TREES

PLANTING NOTES:

1. REFER TO LAWNS AND GRASSES SPECIFICATIONS FOR FURTHER INFORMATION.
2. ANY AREAS OF THE SITE, NOT OTHERWISE DESIGNATED, WHICH ARE DISTURBED DURING CONSTRUCTION SHALL BE HYDRO-SEEDED LAWN, UNLESS OTHERWISE DIRECTED.
3. CONTRACTOR SHALL VERIFY PLANT COUNTS BY CONFIRMING PLANTING PLAN AND PLANT LIST FOR ACCURACY DURING THE BIDDING PROCESS. REPORT ANY DISCREPANCIES IMMEDIATELY FOR CLARIFICATION BY THE LANDSCAPE ARCHITECT DURING THE ADDENDUM PHASE OF THE PROJECT.
4. INSTALL IRRIGATION SLEEVES AS REQUIRED FOR IRRIGATION PIPING BENEATH BIOSWALES AND PAVED SURFACES. REFER TO THE IRRIGATION DRAWINGS FOR THE LOCATIONS OF THE IRRIGATION SLEEVES.

City of Amesbury Planning Board Decision

NEW AMESBURY ELEMENTARY SCHOOL
ORDER OF CONDITIONS
013500 - B

ANNOTATED COPY

RECEIVED
FEB 17 REC'D 21
BY: City Clerk

PLANNING BOARD DECISION

Property Ownership:	**City of Amesbury** **62 Friend Street, Amesbury MA 01913**
Applicant:	**City of Amesbury** **62 Friend Street, Amesbury MA 01913**
Application Type:	**SITE PLAN REVIEW**
Project:	**Amesbury Elementary School**
Location:	**193 Lions Mouth Road, Amesbury, MA 01913**
Date:	**February 08, 2021**

A. GENERAL

On or about January 27, 2021, the Amesbury Planning Board (the "Board") received an application for Site Plan Review requesting to construct a new Elementary School ("Project") at 193 Lions Mouth Road in Amesbury MA. The application was submitted along with a Site Plan (the "Plan") drawn on January 27, 2020 by Dinisco Design, 99 Chauncy Street Suite 901, Boston, MA 02111, and last revised on January 6, 2021 and submitted along with supporting documents by Dinisco Design on behalf of City of Amesbury (the "Applicant"). The set of plans consists of seventy-four (74) sheets and includes civil, architectural and landscaping plans.

The Board held the initial public hearing on March 9, 2020, with subsequent public hearings on November 16, 2020, December 14, 2020, January 11, 2021, and January 25, 2021. The public hearing was closed on January 25, 2021 and a decision was rendered on February 8, 2021.

This is the Final Action of the Board ("Decision") on the Site Plan application.

B. FINDINGS:

1. **Subject Property:** The Property is located at 193 Lions Mouth Road and is identified on the Assessors Database as Map 50, Lots 6, 16, 42 and Map 37, Lot 4. The parcels is zoned Open Space Conservancy (OSC). The subject property consists of 35.30 acres on the existing Cashman Elementary School (CES) site and 2.51 acres on the Woodsom Farm parcel for a total area of approximately 37.81+/- acres. The portion of Woodsom Farm being used for this project was designated for municipal purposes by the Amesbury City Council. The parcel has frontage along Lions Mouth Road;

2. **Existing Conditions:** The site is currently occupied by the 61,472 SF Cashman Elementary School (CES) and two (2) little league play fields. The existing building having a footprint of 41,455 SF is located on the eastern portion of the site and abuts wetlands to the north and northwest, a residential neighborhood to the south and the Woodsom Farm, one of the largest open space areas in the City of Amesbury and owned by the City, to the west. The site is sloped towards the wetlands to the north/northwest. The existing grades to the north and northwest create a natural area that channelizes surface runoff from the Woodsom Farm and the hills surrounding this area;

3. **Project Description and Proposed Use:** The new Amesbury Elementary School (AES) is proposed to be built on an existing City owned site shared with the existing CES located at the Project Site. The new school facility is a 98,195 square feet building with a footprint of 36,895 square feet and consists of three levels. The new elementary school is designed to be a PK, K-2 grade configuration for 425 students. The entire site abuts the Woodsom Farm on the northwest and the Essex County Greenbelt Association along the northeast boundary. The proposed work includes the new school building, paved drives and parking, children's play surfaces, stormwater management, landscaping and redevelopment of some of the previously altered buffer area. The limit of work consists of approximately 15 acres out of the total site area. The project proposal does not include rehabilitation or demolition of any existing buildings.

4. **Site Layout, Grading and Building Location:** The school is located northwest of the existing Cashman Elementary School. The area west of the existing Cashman School will be developed into additional parking for the new school. The project will require the relocation of the two existing little league fields to provide the building area for the AES. One of the major changes to the site is the vehicular circulation pattern on site. The existing drive access will continue to be used as the main access to the existing Cashman as well as the new AES. A new drive is proposed at the southeast corner of the Woodsom Farm parcel. The site plan application and supporting materials indicate that the proposed arrangement of shared parking areas and driveways along with other site improvements (including but not limited to, dedicated vehicular drop-off areas for each school, a shared bus drop-off, and new playgrounds for the AES) have been made to use the site in the most efficient and safe manner. The Preferred Schematic Report dated January 02, 2019 prepared for the Massachusetts School Building Authority documents the School District's selection and recommendation for a preferred solution for the new Amesbury Elementary School. The Board notes that it has had no input in the findings, evaluation of the alternatives or any of the recommendations stated in the above mentioned report pertaining to the potential sites considered, including the proposed location for the construction of the new AES;

5. **Environmental Resource Protection:** The Project is subject to review by the Amesbury Conservation Commission (ACC) under the local and state regulations. As the wetlands data and Notice of Intent (NOI) application have been reviewed by consultants retained by ACC, the Board did not undertake separate review of work within the ACC regulatory jurisdiction. The Board has determined that it will incorporate the Order of Conditions and terms therein by reference here to ensure that the proposed development and improvements within environmental jurisdiction areas are made with no detrimental impact to environmental resource areas or otherwise endanger public health;

6. **Stormwater Management Design:** The stormwater resulting from the proposed site development and associated improvements is proposed to be treated and/or discharged into new storm water catch basins, bio-retention basins and infiltration chamber systems as shown on the site plan. The Applicant states that the project will include Stormwater Best

Management Practices (BMPs) to comply with the various local and state stormwater laws and regulations such that there will be no increase in stormwater discharges as required by such laws and regulations. Based on the testimony of the Applicant's engineering design team and the Board's peer reviewer, the Board finds the following:

a) The proposed stormwater management system as further revised during the application review and as approved herein is in substantial compliance with the various local and state laws and regulations pertaining to stormwater management, provided the proposed system is built as described, designed and shown on the final site plan;
b) The use of the porous pavement system (PPS) in the area of the parking lot of the new school is a critical piece of the stormwater management system. The use of a traditional asphalt pavement system would be impossible given the amount of fill that would be required to elevate the parking area and new school to a level high enough to accommodate a more traditional subterranean storm water management system typically used in conjunction with a standard asphalt paving system. Therefore, the proper installation and maintenance of the PPS system is critical to ensure the stormwater system is providing the proper flooding protection not only to the buildings on the school campus but to any downstream neighbors.
c) Following the proper manufacturers / installers / peer reviewers maintenance recommendations, reporting on the completion of proper maintenance and checks to insure that the system is working effectively is crucial or there is likelihood that the stormwater management system will fail or potential negative impacts downstream on abutting properties in the neighborhood.

7. **Water and Sewer Services:** A new water main loop will run through the site to connect at the existing water main on Lions Mouth Road to add capacity for domestic and fire service to the new facility. The sewer service for the new building will be gravity fed to the existing onsite pump station. The project will upgrade the existing duplex ejector pump within the pump station, which, according the Applicant is beyond its useful life. The ejector pump will then pump the sewer up and into the City sewer main on Lions Mouth Road. The City's DPW and Water Department have indicated the proposed improvements are

acceptable and recommend approval of the proposed site plan showing these utility upgrades;

8. **Traffic and Circulation:** The Applicant presented detailed information on the changes proposed to the existing circulation pattern for the CES and the new parking and vehicular movement patterns on the AES portion of the site. Additional capacity has been created for cars to queue around the CES parking lot. During pickup and drop off, the vehicles will enter from the easterly drive and exit from the westerly drive. There are additional improvements proposed off-site. A sidewalk will be built separate from this project to connect the two drives. Other intersection and sidewalk improvements are proposed along Lions Mouth Road, Highland Street and Friend Street intersection area. Given the building location, parking and circulation needs, the Applicant indicated that additional efficiencies were created by adding additional lanes and using one-way traffic patterns. The Board has largely depended on the testimony of public safety and School Department officials, and will use its peer reviewer's comments and recommendations on traffic to determine satisfactory compliance with traffic and circulation requirements;

9. **Building Design and Space Programming:** The project includes the construction of a new 98,195 SF three level building. The new school's exterior will be traditional brick with colored masonry and painted metal panel accents that, according to the designer, evoke modern-day traditional public building architecture. The Application indicates that the square footage allowed for each space is mandated by MSBA and has been approved by MSBA, the Amesbury School Committee and the Amesbury School Building Committee. The Board has relied upon the approval of the proposed building design by the School Building Committee and City public safety officials as it pertaining to spatial arrangement, safe access and egress and other building safety requirements;

10. **Landscaping:** A landscaping plan was submitted along with the Site Plan. The Board discussed the need for additional trees along the Woodsom Farm to provide some vegetative buffer in between the natural landscape and built environment. In order to reduce the heat-sink effect, tress with large canopy were incorporated into the parking

areas. The Board also finds that the grass strips and trees in between the sidewalk and travel lanes provide additional physical safety zones for school kids and other pedestrians. The Board finds that once the landscape design changes (Exhibit #1 - #3) have been incorporated into the Final Plans, the purpose and intent of the landscape requirements would be satisfied.

Based on the findings noted above, the Board finds that the Project satisfies the Site Plan Review criteria under Section XI.C of the Amesbury Zoning Bylaw (the "Bylaw").

C. WAIVERS

By memo dated 1/6/2021, the Applicant provided the Board with an updated list of waivers sought from the specific provisions of Amesbury's Zoning Bylaw. The Board has endeavored to grant waivers from those rules and regulations, only to the extent necessary, where the waivers are consistent with the purpose and intent of the regulations and would not threaten public health, safety or welfare and to minimize harm and disruption to the locus and real property abutting the locus. In the event that further waivers are required, the Applicant shall submit a written request for such waiver(s) to the Board and the Board may grant or deny such additional waivers in accordance with applicable rules and regulations in effect at that time. The waivers listed in Table 1 are the only waivers granted to the extent necessary to construct the project as per approved site plan(s):

TABLE 1:

Section(s) of Zoning Bylaw	Requested Waiver	Decision of the Board
Section XI.C.10.n.1 – Requires pipe material be reinforced concrete and that a minimum of three (3) feet of earthen cover be provided over pipes.	To allow a) provision of less than three (3) feet of earthen cover over drainage piping as stipulated below b) the use of HDPE material for piping in lieu of the required reinforced concrete material for pipe segments provided with a minimum of 2.5 feet of cover. c) the use of Class V RCP material for piping provided with earthen cover ranging between 1.8 and 2.5 feet.	Granted to the extent necessary provided all site and building improvements are carried out as per approved plans
Section XI.C.8.a.3 – Curb cut width	To make improvements to the existing 58 feet wide curb-cut and reduce it to 56 feet including a 12 feet landscaped median as shown on the revised driveway sketch	Granted to the extent necessary provided final site plans are updated to incorporate the driveway sketch as approved

D. APPROVAL OF THE SITE PLAN AND CONDITIONS THERETO

Upon notice and after a public hearing in accordance with the statute (General Laws, Chapter 40A, section 11) and the Amesbury Zoning Bylaw, and after full consideration of the evidence presented, and upon the findings made in Section B of this Decision, the Board shall grant a conditional Site Plan Approval for the proposed Amesbury Elementary School located at 193 Lions Mouth Road in Amesbury MA as shown on the approved Plan further upon the conditions and hereinafter set forth, for the premises described in the application.

I. COMPLIANCE WITH LOCAL, STATE AND FEDERAL REQUIREMENTS:

The Project and all construction, utilities, roads, drainage, earth removal and filling and all related appurtenances with respect to the Project, shall comply with all applicable local, state and federal regulations except as waived specifically by this Decision. The Applicant shall be responsible for acquiring all other local, state and federal permits and approvals as necessary to construct the Project as approved by the Board. Final action on all other permits shall be submitted to the Board for record. The Board notes that the following are some of the permits needed for this Project prior to start of any construction activity:

1. Compliance with the Massachusetts Wetlands Protection Act and related regulations, G. L. c. 131, § 40-40A, and the Amesbury Wetlands Ordinance and Regulations;
2. Compliance with DEP Stormwater Regulations, as needed; and
3. National Pollutant Discharge Elimination System (NPDES) permit from Environmental Protection Agency.

II. GENERAL AND IN PERPETUITY CONDITONS

OWNER 1. **Allowed Uses**: This Site Plan Approval pertains only to the new AES building and site improvements shown on the approved site plan;

OWNER 2. **Landscape Buffers** –The final plan shall be submitted for review and approval prior to start of construction;

CONTRACTOR 3. **As-built Plans:** To ensure compliance with the terms and conditions of this Decision and any approval or order by any federal or state agency, the Applicant shall submit to the Board complete and detailed Progress "As-Built" Plans with its request for a Certificate of Occupancy. Prior to issuance of a Certificate of Completion by the Board, the Applicant shall have prepared and submitted Final As-Built Plans, which shall indicate the actual location of permanent monuments; inverts and location of required utilities and drainage; location of all underground utilities; and location of all permanent structures. The accuracy of such Final As-Built Plans shall be certified by a Land Surveyor or a Professional Engineer, Registered in the Commonwealth of Massachusetts, retained by the Applicant. Any damage to public roads and walkways shall be repaired and/or replaced to the satisfaction of the Director of Public Works.

OWNER 4. **Site Plan Modifications:** Prior to addition or alteration of uses not allowed by this Site Plan Approval, the Applicant shall provide detailed information and plans along with a formal written request for modification to the approved Site Plan for determination of minor or major modification and approval by the Board. Any substantial modifications to the approved Site Plan or changes that impact the criteria under Section XI.C or the Performance Standards under XI.C.8 or conditions of approval of this Decision shall be subject to review and approval of the Board. The Board shall, if it so determines, require the applicant to submit a new application for modification to the approved Site Plan and may hold a new public hearing for review of the requested modifications;

OWNER 5. **Wetland Permitting:** In order to effectively coordinate and integrate the required observation and inspection reports for this project, the Board recognizes that the Plan(s) shown under the Notice of Intent Application (as revised) and the Order of Conditions, issued by the Amesbury Conservation Commission, shall also be carried out to the satisfaction of the Commission or its agents. Also,

a. Except as waived by this Decision or a decision of the Commission, the construction of this project shall comply with the Amesbury Wetlands Bylaw and Amesbury Conservation Commission Regulations in effect at the time any building permit is sought for the project or for any jurisdiction for roadway-associated construction,

and with all rules, regulations, filing and permit requirements and certifications of the Commission with respect to natural resource protection, construction of storm water management structures within the Buffer zone and their disposal, construction of other structures including retaining walls within the Buffer Zone, and wastewater disposal;

b. Any request for alteration to the Order of Conditions made by the Applicant to the Commission (or to Massachusetts Department of Environmental Protection (Mass DEP), upon appeal) shall be simultaneously provided to the Board. The proposed work shall comply with the "Order of Conditions" issued by the Commission upon the said premises;

c. The Order of Conditions from the Commission shall be carried out to the satisfaction of the Commission. Any violation of the Order of Conditions issued by the Commission shall be deemed to be a violation of this Approval, with all remedies to the City of Amesbury as provided by law;

OWNER 6. **Stormwater Management System:** The following requirements shall be met:

a) The application of sand to the porous pavement parking area should not be allowed to avoid premature clogging of the porous pavement.

b) The Operation and Maintenance (O&M) Plan dated 2/7/2020, last revised 12/1/2020 shall be incorporated into the project requirements by reference. The budget estimate included in the O&M Plan shall be utilized by pertinent School and City Departments for initial budgeting of required maintenance and inspection of the stormwater management system.

c) Porous Pavement System (PPS) and Stormwater Maintenance: The Applicant shall provide evidence in writing along with all supporting documents to establish that the proper maintenance schedule, use of correct snow / ice mitigation materials and generally ALL of the manufacturers recommendations and requirements for maintenance, cleaning and proper products to be used on the PPS and all of the stormwater management system as a whole have been done during the prior year. This evidentiary report shall be provided to the Board for review on an annual

basis no later than November 1st every year for a minimum of 5 years from the date of issuance of Certificate of Occupancy for the new building.

d) If any failure to report on the completion of proper maintenance or there being any other evidence that the PPS system is not working effectively enough to ensure the protections to the downstream neighbors upon inspection by the Board's inspectional engineer, then the applicant shall be required to establish an escrow account that will be funded with a minimum amount equal to that of at least 1 year of annual maintenance of the entire stormwater management system in advance for the following 5 years and shall extend the monitoring and reporting requirements for an additional 5 years from the first instance of maintenance failure.

CONTRACTOR / OWNER

7. **Fill Materials:** The project requires approximately 36,000 cubic yards of imported fill. Given the quantity of material involved, the following items shall be incorporated into the project specifications:

a) Documentation and tracking records of earthen material sources.

b) Specifications to require only clean natural earthen material free of cinders, brick, concrete and other deleterious material.

c) Testing records to confirm that the material utilized on the project satisfies the desired quality requirements.

CONTRACTOR / OWNER

8. The Applicant shall provide copies of the Construction Period Pollution Prevention & Erosion Control Plan (CPPP) and the project Stormwater Pollution Prevention Plan (SWPPP) in advance of any construction activity for review and approval by the Board's engineering review consultant. The approved documents shall be incorporated into the project construction documents;

OWNER

9. The Long Term Pollution Prevention Plan (LTPPP) shall be incorporated into the project construction documents;

10. **Traffic Studies and Improvements**: The recommendations from the Board's Traffic Peer Review by VHB dated 12/14/2020 are incorporated here by reference as conditions of approval. Further, the off-site improvements related to sidewalk and intersection

reconfiguration and reconstruction as shown on and included in information package submitted on Sep 29, 2020 (Exhibit #4) shall be required to be completed no later than 12 months from the issuance of the Certificate of Occupancy for the new AES building.

OWNER 11. The sidewalk proposed to be constructed along Lions Mouth Road to connect the two drives in this project shall be constructed and built prior to the issuance of the Certificate of Occupancy for the new AES building.

OWNER 12. Peer Review Fees: Any and all outstanding invoices for peer review services shall be paid in full prior to start of any construction activity.

III. PRIOR TO START OF ANY CONSTRUCTION ACTIVITY ON SITE

The Applicant shall file with the Board and all other relevant public agencies for review and for consistency with this Decision any documents and shall have completed the following actions:

DESIGN TEAM 1. **Revisions to the Final Site Plan and Supporting Documents:** The Final Site Plan shall be revised to address the following outstanding items through the supplemental review and approval process and as part of submission of Final Plans to the Board.

a) Engineering Review Memo dated 1/21/2021: The outstanding comments under Drainage shall be addressed;

b) Site Lighting Details: The project details shall be revised to incorporate the 'Site Lighting Fixture Base Detail' provided in sketch form by Dinisco Design, dated January 6, 2021. The detail indicates a 6 inch vertical exposure on light pole bases.

DESIGN TEAM 2. **Retaining Walls:** Any retaining walls over four (4) feet shall be designed by a structural engineer and accompanied by supporting documentation indicating that the existing soils and fill are appropriate for the proposed design. Additional test pits and accompanying data shall be supplied with the retaining wall design and details, if construction drawings change or revisions are required to the approved Final Plans;

CONTRACTOR 3. **Erosion Control Barriers** - Prior to the commencement of any site work (excluding any work within the existing building), an erosion control barrier (12 inch Fiber Log and Silt

Fence as per approved erosion control plan) shall be installed to include and upto the limit of work as shown on the approved Final Plan. The erosion control barrier shall be inspected by the ACC representative prior to commencement of site work and shall be maintained until all disturbed areas have been stabilized to the satisfaction of the Board and its representatives.

IV. DURING CONSTRUCTION

The following shall apply to all construction activity as per approved Site Plan:

CONTRACTOR

1. **Stockpiles** - Earth material stockpiles shall not be allowed immediately adjacent to perimeter siltation barriers or drain inlets. Long term stockpiles over 30 days shall be shaped, stabilized and circled by 12 inch Fiber Log and Silt Fence where applicable and shall be stabilized by temporary seeding, sheeting or netting;

CONTRACTOR

2. **Repair and Cleanup:** The existing roadways shall be kept clean of all earth materials during the construction phase. Any damage to public roads and walkways shall be repaired and/or replaced to the satisfaction of the DPW Director and City Engineer;

CONTRACTOR

3. **Utility Trenches** - Utility trenches within the public Right of Way shall be saw-cut prior to excavation. Open trenches shall be backfilled with bank gravel and compacted to 95%. Trenches shall be paved with asphalt binder to a minimum depth of three (3) inches and overlaid curb to curb to a minimum depth of one and half (1.5) inches. Water service trenches shall be infrared joint paved. The Director of DPW and the City Engineer shall have the final signoff on the right of way improvements and any change to these standards or those shown on approved plans shall be subject to their review and approval;

CONTRACTOR

4. **Construction Activities** - During construction, except within the individual building envelopes, the Applicant and its agents and employees shall conform to all local, state and federal laws regarding noise, vibration, dust and use of public roads and utilities. The Applicant shall at all times use all reasonable means to minimize inconvenience to residents in the general area and maintain safe and adequate vehicular access on Lions Mouth Road.

Construction shall not commence on any day Monday through Saturday before 7:00 AM. Construction activities shall cease by 6:00 PM Monday through Friday and by Noon on Saturday. The work day may be extended to a full day on Saturdays, with prior approval of the Building Inspector. No construction or activity whatsoever (except for interior finishing) shall take place on Sunday; and

CONTRACTOR

5. **Erosion Control and Stormwater Maintenance Requirement**: The Applicant's designee or assignee shall on a quarterly basis submit interim reports and supporting documents to the Board showing that requirements for stormwater system maintenance are being adhered to according to the approved SWPPP and NPDES Permit as well as other requirements of the Stormwater Management regulations, as applicable included here by reference.

V. PRIOR TO MAKING REQUEST FOR AN OCCUPANCY PERMIT

The Applicant shall file with the Board and all other relevant public agencies for review and for consistency with this Decision any documents and shall have completed the following actions:

CONTRACTOR / DESIGN TEAM

1. **Certification of Improvements** - The Applicant shall request the Board for a Certificate of Improvements and submit it to the Building Inspector from the Board verifying that conditions of approval have been met and that construction to date is per the approved plans;

CONTRACTOR / DESIGN TEAM

2. **Landscape Installation** - All site improvements, including landscaping and street trees shall be completed and installed as per Final Plans. The Landscaped Architect for the project shall submit a certification that the trees, shrubs and screening plants have been installed as per approved Final plans. All proposed trees shall be placed in position or staked out for approval by the Board prior to digging;

DESIGN TEAM

3. **Infrastructure Improvements:** The Applicant shall provide a written certification from its project engineer that the sewer pump upgrades as approved by this Decision have been completed and signed off by the City's water and sewer department. The Applicant shall

request written confirmation from the City Engineer and DPW Director that the finished construction of all utilities and municipal structures located within the public right of way or easement areas are adjusted to appropriate finished grade, and are adequately accessible for future maintenance;

CONTRACTOR

4. **Public Way Repairs**: Any damage to public roads and walkways shall be repaired and/or replaced to the satisfaction of the DPW Director and City Engineer;

CONTRACTOR / DESIGN TEAM

5. **'As-Built' Plan:** The preparation of an 'As-Built' plan (to be incorporated into the Operation and Maintenance Plan), should be submitted for Planning Board review and approval. Furthermore, the 'As-Built' Plan should be accompanied by a report from the Engineer of Record indicating whether the overall site construction (in general) and the stormwater management and drainage construction (in specific) complies with the design intent for the project. An Interim As-built Plan may be submitted if all improvements shown on the approved Site Plan have not been completed at the time of requesting an Occupancy Certificate.

RECEIVED
FEB 17 REC'D 21
BY: City Clerk

PLANNING BOARD VOTE:

On February 8, 2021, the Amesbury Planning Board voted in favor of the approval of the Site Plan, as amended, for the proposed Amesbury Elementary School and associated site improvements at 193 Lions Mouth Road in Amesbury MA subject to the findings, waivers and conditions noted in this Decision.

Filed with the City Clerk on February 17, 2021

City Clerk

SECTION 014339

EXTERIOR MOCK-UPS

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SUMMARY

A. RELATED SECTIONS AND DOCUMENTS:

This section applies to all specification sections and work of the Contract. See specifically:

1. 019113 General Commissioning
2. 033000 Cast-In-Place Concrete
3. 040001 Masonry
4. 050001 Miscellaneous and Ornamental Iron
5. 053100 Steel Decking
6. 061000 Rough Carpentry
7. 070001 Waterproofing, Dampproofing and Caulking
8. 070002 Roofing and Flashing
9. 071326 Air and Vapor Barriers
10. 072100 Insulation
11. 074213 Preformed Cladding
12. 074233 Phenolic Rainscreen System
13. 074247 Fiber Reinforced Cementitious Panel Rainscreen
14. 080001 Metal Windows
15. 092116 Gypsum Wallboard
16. Contract Drawings
17. Mock-up drawings are included in the Construction Documents.

B. After award of all subcontracts for separate components and materials of the exterior wall systems, and on basis of preliminary approval of materials and variations to proposed design of exterior wall systems, construct full-scale, fully enclosed performance mock-ups for review of construction and verification of assembly performance by means of full chamber field testing. Mock-ups shall be constructed by the same contractors and tradesmen that are awarded the various trades / work. Where requested by Architect, or as specified in individual specification sections, assemble and erect specified items, with specified attachment and anchorage devices, flashings, seals, and finishes. Remove mock-up assemblies prior to date of Final Inspection, or as directed.

C. Mock-ups, when approved by the Architect/Engineer, will be used as datum for comparison with the remainder of the Work for the purposes of acceptance or rejection.

D. Demolish and remove from site prior to requesting inspection for certification of Substantial Completion, all Mock-ups which are not permitted to remain as part of the finished work. Coordination demolition schedule with Owner and Architect.

E. Mock-up construction shall show details and assemblies as described by the Architect. The case where no directions have been issued by the Architect, mock-up shall be 10 ft. tall and 30 ft. wide and include at least the following elements:

1. Typical exterior opaque wall, assemblies, including grade, fenestration, eave, and roof to eave conditions.
2. It shall include (1) outside and (1) inside corner.
3. It shall include each exterior cladding material including critical junctions with other cladding materials.
4. All glazing types. Each type to be detailed in the same fashion as to be on the building.
5. Representative louvers installed and detailed as to be on the building.
6. Representative corner conditions for both opaque and glazed conditions.
7. Expansion joints. Show in all conditions, including roof.
8. A 12 in. wide portion of roof including metal deck, vapor barrier, insulation and roofing.

NOTE: Performance mock-up testing to occur with exposed performance layers to help determine source of any observed leaks and deficiencies. **Mock-up shall not be clad in exterior finishes until performance tests have been passed and performance aspect of mock-up has been approved by Architect and BECx.**

All details and assemblies are to be flashed and weeps as detailed in final construction. Assemblies to be constructed such that a testing chamber can be constructed and fully sealed to the back of the mock-up, allowing testing operations to pressurize and depressurize the chamber and so allow field testing to achieve pressure differentials. Refer to exterior testing protocols described elsewhere. Wall and window flashings, colored mortar, and control/ expansion joint sealants shall be included.

F. Mock-up size and configuration as shown on the mock-up drawings included in the Construction Documents. See Section 01 33 00 SUBMITTAL for additional requirements.

G. Mock-ups shall be complete in all respects and shall represent the final complete wall assembly, including metal components, precast concrete elements, glazing, sealants and metal finishes.

H. Construct mock-ups in location and orientation at Project site approved by Architect.

I. Do not place orders for wall components or materials, and do no fabrication until mock-ups are approved.

J. Where review of mock-ups may require revisions of construction, Architect will provide such revisions in writing to the Contractor.

K. Mock-ups shall remain in place until work on Project is complete, unless otherwise directed by the Architect.

L. Design and provide structural framework assemblies necessary to support and display mock-ups.

1.03 MOCK-UP INTENT

A. Obtain Owner's and Architect's approval of appearance and tested performance **prior** to large scale ordering and production.

1. To be acceptable, work on building must match detailing and acceptable performance of approved Mock-Ups.
2. To be acceptable, work must pass reference standards for tested performance on both Mock-up and field conditions.

B. Confirm construction sequence, details, compatibility, means, methods, and techniques. Work must be representative of field conditions and performed by representative agents who will be performing work in field.

1.04 MOCK-UP GENERAL REQUIREMENTS

A. Schedule Construct Mock-Ups at the earliest possible time and **before** ordering production quantities of materials. Note: should exterior work progress on building prior to full acceptance of mock-up, work shall be at contractor's risk and will be subject for revision to achieve conforming results. **Same includes full removal of installed assemblies if determined to be necessary.**

B. Materials: Provide actual materials to be used in the Project including actual finishes and colors.

1. Do not provide visual simulations, unless preapproved by Architect.

C. Utilities, Service Fixtures, Controls:

1. Include all visible components in Mock-Up. Items are not required to be operational.

D. Locations: Locate Mock-Ups where pre-approved by Owner and Architect.

1. Solar Orientation of Exterior Mock-Ups: Comply with Architect's directions.

E. Mock-Up Construction Drawings: GC/CM to engineer and provide Mock-Up construction drawings, unless otherwise specified.

F. Protect: Protect approved Mock-Ups from damage and modification until directed by Architect.

G. Disposal: Demolish, remove, and dispose of Mock-Ups when directed by Architect.

1.05 EXTERIOR CONSTRUCTION CONFIRMATION MOCK-UPS

Use "Exterior Appearance Mock-Ups" for additional purpose of confirming construction sequence, details, compatibility, means, methods, and techniques.

A. Scope: Construct on-site in designated location a "Performance Mock-up" conforming to the drawings, descriptions, and/or depictions provided by the Architect. This Mock-up will be subject to inspection by the BECx and performance testing, defined elsewhere in Specifications, by the Owner's Testing Agent.

1. Confirm the designated location on site conforms to requirements for utilities including electric power and water at Specified current values and pressures.

2. Confirm the designated location with the constructed Mock-up meets the BECx and BETA requirements for inspection and testing access, Specified or described elsewhere.
3. Construct the Mock-up in accordance with the Contract Documents.
4. Construct and seal the Testing Chamber in accordance BETA's Specifications and requirements.

B. Components:

Include the following additional components in the Mock-Ups:

1. All concealed construction for each exterior wall assembly.
2. Supports, framings, connections, ties, and anchors for each exterior skin material.
3. Concealed flashings, air barriers, liquid water barriers, damp-proofing, waterproofing.
4. Concealed joint sealants.
5. All other exterior wall construction and components not visible.
6. Interface and intersection of all wall components and materials.
7. Components and features as described by Architect. These are to include:
    a. Simulated Subgrade foundation to above grade wall transition.
    b. Windows with opaque wall assemblies and representative transitions.
    c. Representative curtainwall and store front conditions, including head, jamb, and sill conditions. If curtainwall to roof transition occurs on building, it shall be included in Mock-up as well.
    d. Wall to roof / parapet transition including a portion of full roof assembly.
    e. Each unique cladding type and support system.

C. Coordination and Sequence

1. Coordinate inspection and testing activities with the sequence of Mock-up Construction. The following is an example. Confirm sequence requirements with Architect, BECA, and BETA:
    a. Structure; glazing units; sheathing; air and vapor barriers / membranes; damp-proofing / waterproofing; and base layer roofing as well as the testing chamber are constructed to a point of completion.

b. These assemblies are inspected for quality, constructability, and conformance with the design intent and tested for properties including adhesion, air and water tightness. Note: specified testing values are to be achieved by performance layers of assembly without exterior cladding.

c. Insulation and finishes are applied.

d. The completed assembly is inspected and tested.

e. The completed Mock-up is left on site for the duration of the construction period, or as otherwise Specified, as a reference for the project standards moving forward.

PART 2 PRODUCTS

2.01 MATERIALS

A. Materials used in the initial mock-up construction shall comply as specified in the applicable sections for the work and as approved by submittal reviews.

B. Materials may be modified upon approval from the Architect, only to the extent required or mock-up approval by the Architect.

C. Modified materials shall comply with the specified requirements but may differ in appearance characteristics, such as color and texture.

D. Materials used in the construction of approved mock-up construction shall not be re-used in the corresponding permanent construction.

PART 3 EXECUTION

3.01 GENERAL

A. Refer to mock-up drawings included in the Construction Drawings.

END OF SECTION

SECTION 015000

TEMPORARY FACILITIES AND CONTROLS

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

C. The General Contractor shall be responsible for providing and maintaining all temporary facilities until Substantial Completion. Removal of such prior to Substantial Completion must be with the concurrence of the Architect. The General Contractor bears full responsibility for re-providing any facility removed prior to Substantial Completion if required for the Work.

D. Removal of all temporary facilities shall be condition precedent to Substantial Completion unless directed otherwise by the Architect or specifically noted in the Specifications.

E. Conform with all requirements of LEEDv4-S with respect to Construction Activity Pollution Preventions and Construction Waste Management.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Carefully examine all of the Contract Documents for requirements that may affect the Work of this Section.

B. Nothing in this Section is intended to limit types and amounts of temporary Work required, and no omission from this Section will be recognized as an indication by the Architect that such temporary activity is not required for successful completion of the Work or compliance with requirements of the Contract Documents.

1.03 REQUIREMENTS OF REGULATORY AGENCIES

A. Provide and maintain all temporary facilities in compliance with governing rules, regulations, codes, ordinances and laws of agencies and utility companies having jurisdiction over Work involved in the project.

B. Be responsible for all temporary Work provided, and obtain any necessary permits and inspections for such Work.

C. Do not interfere with normal use of streets in vicinity of project site except as absolutely necessary to execute required Work, and then only after proper arrangement has been made with applicable authorities, including traffic control.

D. Refer to the General Conditions of the Contract for additional requirements.

1.04 TEMPORARY WATER

A. The General Contractor shall provide and maintain at his own expense an adequate supply of water for his own use and the use of all Subcontractors during construction. The General Contractor shall make all necessary arrangements with the City's Water Department and pay for any sub-metering that may be required for determining General Contractor's usage.

B. Water shall be distributed by temporary hoses or pipelines as required for all construction uses and fire protection.

C. When the permanent water distribution system has been installed, it may be used as a source of water for construction purposes, provided that the General Contractor (1) assumes full responsibility for the entire water distribution system; and (2) pays all costs for operation, maintenance and restoration of the system.

D. Any temporary pipe lines and connections from the permanent service line, either outside or within the building, necessary for the use of the General Contractor and his subcontractors shall be installed, protected and maintained at the expense of the General Contractor.

E. General Contractor shall provide an adequate supply of cool drinking water, from approved sources of acceptable quality, satisfactorily cooled, for his employees and those of his subcontractors. Individual drinking cups shall be provided for all personnel on the job.

F. At the completion of this Contract, or when use of the permanent system for construction purposes is approved by the Owner, the General Contractor shall remove all of the temporary water distribution system.

G. Use of the permanent plumbing system for construction purposes is subject to the limitations noted in SECTION 220001-PLUMBING. In no case does it constitute acceptance by the Owner or the start of the Guarantee period.

1.05 WEATHER PROTECTION

A. It is the intent of these specifications to require the General Contractor to provide temporary enclosures and heat to permit construction work to be carried on during the months of November through March in compliance with MGL 149, Section 44G (D). These specifications are not to be construed as requiring enclosures or heat for operations that are economically unfeasible to protect in the judgment of the Architect. Included in this category, without limitation, are such items as Site Work, Excavation, Pile Driving, Steel Erection, Erection of certain exterior wall panels, Roofing and similar operations.

B. "Weather Protection" shall mean the temporary protection of that work adversely affected by moisture, wind and cold, by covering, enclosing and/or heating. This protection shall provide adequate working areas during the months of November through March as determined by the Architect and consistent with the approved construction schedule to permit the continuous progress of all work necessary to maintain an orderly and efficient sequence of construction operations. The General Contractor shall furnish and install all "weather protection" material and be responsible for all costs required to maintain a minimum temperature of 40 degrees F. at the working surface. This provision does not supersede any specific requirements for methods of construction, curing of materials or the applicable general conditions set forth in the Contract Articles with added regard to performance obligations of the General Contractor.

C. Within 30 calendar days after his award contract, the General Contractor shall submit in writing to the Architect for approval three (3) copies of his proposed methods for "Weather Protection."

D. Installation of weather protection and heating devices shall comply with all safety regulations including provisions for adequate ventilation and fire protection devices. Heating devices which may cause damage to finish surface shall not be used.

E. Responsibility for Weather Protection

1. The entire responsibility for weather protection during construction until Substantial Completion, shall be assumed by the General Contractor, who shall be liable for any damage to any work caused by his failure to supply proper weather protection and proper ventilation as required.

2. Any work damaged by frost shall be removed and replaced by the General Contractor at his own expense and as directed by the Architect.

3. It is to be specifically understood that the General Contractor shall do no work at any time or under any conditions which he deems unsuited to the perfect execution of the Work. This provision shall not be interpreted as constituting any waiver, release or lessening of the General Contractor's obligation to bring the Work to Substantial Completion within the period of time set forth in the Agreement.

F. Refer to the General Conditions of the Contract for additional information.

1.06 HEATING DURING CONSTRUCTION

A. Within thirty (30) calendar days after the commencement of work under this contract, the General Contractor shall submit in writing to the Architect for approval, three copies of this method and time schedule for heating during construction which shall occur with this general program schedule.

B. Provide vented, self-contained, liquid-propane-gas or fuel-oil heaters with individual space thermostatic control.

1. ***Use of gasoline-burning space heaters, open-flame heaters, or salamander-type heating units is prohibited.***

2. Heating Units: Listed and labeled for type of fuel being consumed, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

3. Comply with applicable safety regulations, including provisions for adequate ventilation and fire protection, when installing and operating heating devices. Do not use heating devices which may cause damage to finish surfaces.

C. After the building or portion thereof is completely enclosed by either permanent construction of substantial temporary materials having comparable resistance as the specified permanent construction, the General Contractor shall provide heat therein of not less that 55 degrees F. nor more than 75 degrees F. which shall be continuously maintained in the so enclosed area until the project is accepted.

D. Permanent Heating System: The General Contractor, may, with the approval of the Architect and Owner elect to use the permanent heating system as specified for the project once it has been tested, flushed out and chemically treated and is ready to operate. The General Contractor and the Heating and/or Electrical Subcontractor shall coordinate their work so that the permanent heating system for the building will be available and ready to provide heat as soon as the building is closed in. Use of the permanent heating system and portions thereof is subject to provisions specified elsewhere in this document and the following:

1. The General Contractor shall pay the costs of all fuel and electricity required for temporary heating until Substantial completion. Where the permanent system serves both Owner and General Contractor controlled areas, costs shall be proportional as specified above.

2. The General Contractor shall furnish and pay the costs of any materials and equipment which are not part of the permanent heating system and which may be required to operate the permanent heating system on a temporary basis.

3. The Heating Subcontractor shall provide all labor required for the final restoration of the permanent heating system if used for temporary heating purposes.

4. The General Contractor shall reimburse the Heating Subcontractor to operate any portion of the permanent heating system used for temporary heating until Substantial Completion.

5. The General Contractor shall reimburse the HVAC Subcontractor for the final cleaning and for any repairs or replacements necessary to restore the permanent heating system to perfect condition at the time of Substantial Completion.

6. No parts of the air handling system shall be used until temporary filters have been installed satisfactory to the Architect. Such filter shall be kept clean and in efficient working condition, and at the time of Substantial Completion shall be replaced by the permanent filters.

7. Guarantees to the Owner for the permanent heating system begin from the time of Substantial Completion of the project, not the time that temporary use of the system begins.

E. Ventilation and Humidity Control: Provide temporary ventilation required by construction activities for curing or drying of completed installations or for protecting installed construction from adverse effects of high humidity and to prevent accumulation of excess moisture in building. Select equipment that will not have a harmful effect on completed installations or elements being installed. Coordinate ventilation requirements to produce ambient condition required and minimize energy consumption.

1. Refer to Article "Moisture and Mold Control" in this Section for additional requirements.

2. Maintain humidity in the enclosed structure, including the existing portion of the building which remains, within limits which to prevent warping, mold growth, and damage building materials.

    a. If construction becomes damp or warped; if visible water is condensing on surfaces; or if mold growth is observed, humidity is too high. The General Contractor shall immediately effect dehumidification as necessary to reduce the humidity to acceptable levels. Replace affected materials.

3. Use permanent HVAC system to control humidity. Provide additional temporary heating and cooling systems if required to maintain acceptable ambient conditions, and to allow construction materials to dry sufficiently for subsequent Work.

   a. Provide separate temporary dehumidification systems to reduce substrate moisture levels to levels below 70% humidity levels required to allow installation or application of finishes including installation of drywall.

4. Provide ventilation required by construction activities in enclosed areas, for safely mixing, placing, curing and drying, and to vent volatile and hazardous materials.

F. Provide labor for continuous direct attendance of temporary heating and ventilating systems 24 hours per day throughout the progress of the work, for frequent inspection of the system, for emergency repairs, and for recording temperatures.

G. Operating labor shall be provided, including frequent inspection of the system, emergency repairs and keeping temperature records. The General Contractor shall pay all energy and operating costs for heating during construction. "Salamanders" shall not be used.

H. Refer to the General Conditions of the Contract for additional information.

1.07 TEMPORARY LIGHT AND POWER

A. The Electrical Subcontractor shall, at his own expense, make all arrangements for and provide all temporary light and power, except as otherwise specified. The temporary electrical service shall include but not be limited to all labor, materials, and equipment necessary to supply temporary power of adequate capacity for the project operations and testing. Transformers and meters, when required by the power company, will be furnished and installed by the appropriate power company and the Electrical Subcontractor shall pay all costs therefore. No connection shall be made to the Owner's power supply.

B. All temporary electrical work shall be performed under the direct supervision of at least one master electrician, who will be present on the project at all times when such work is being performed.

C. Temporary lighting and power shall be not less than the following:

1. Lighting - 200 watts per 100 square feet of floor area, plus 60 watts for each stair landing.

2. Receptacles - At least one 20 ampere duplex for each 1,000 square feet of floor space, and such others as will accommodate extension cords not greater than 50 feet in length to reach all work.

3. Fused switches for special construction equipment - On each floor of each building, at least one 30 ampere, 2 pole fused switch for equipment connection. Cables, and connection from switch to the special equipment, shall be provided, maintained and paid for by the trade requiring same.

4. Feeders - On each floor of each building, a feeder or feeders of sufficient capacity for the requirements of each entire floor.

D. The General Contractor shall pay the cost of electrical energy consumed by all trades until Substantial Completion for each phase is attained.

E. The Electrical Subcontractor, at his own expense, shall maintain all lamps in operating condition. Each Subcontractor shall furnish their own extension cords and all additional lamps as may be required for their work. Temporary work of a special nature, not otherwise specified thereunder, shall be provided, maintained and paid for by the trade requiring the same.

F. All lamps installed in permanent lighting fixtures and used as temporary lights during the construction period shall be removed and replaced shortly before Substantial Completion by the set of lamps required to be provided under SECTION 260001-ELECTRICAL.

G. All temporary work shall be provided in conformity with the National Electrical Code and in accordance with State laws, and requirements of the applicable power company. Particular attention is called to the Commonwealth of Massachusetts "Rules and Regulations for the Prevention of Accidents in Construction Operations", Industrial Bulletin No. 12 of Department of Labor and Industry. Division of Industrial Safety with specific reference to Section 4, Item 4.26 and Section 7 in its entirety.

H. The Electrical Subcontractor shall dismantle and completely remove from the project site all temporary electrical facilities only when the permanent electrical system has been installed and is in operation.

1.08 HOISTING EQUIPMENT AND MACHINERY

A. All hoisting equipment and machinery required for the proper and expeditious prosecution and progress of the work shall be provided by the trade requiring same.

1.09 TEMPORARY ENCLOSURES

A. The General Contractor shall provide approved temporary enclosures for all exterior openings, as soon as the building is enclosed and other wise made weathertight, or whenever necessary in order to provide suitable working conditions within the building. For this purpose, the permanent window enclosures may be utilized, except that a least one-quarter (1/4) of each window area in each space shall be provided with temporary non-flammable cloth screen to permit the exit of water vapor from the building at all times, or shall be otherwise equipped to effect the same result. The permanent door enclosures shall not be used as temporary enclosures, but temporary batten doors with proper hardware to make them self-closing shall be provided, complete with a locking device.

1.10 STAGING

A. Each subcontractor is responsible for providing, maintaining in safe condition, and removing all scaffolds, staging and planking as required for the proper execution of their Work.

B. The General Contractor shall furnish, install, maintain, and remove all temporary ramps, stairs, ladders and similar items as required for the use of all trades for proper execution of their Work.

C. Permanent stairs shall be erected as soon as possible, for which the General Contractor shall provide temporary protective treads, risers, handrails and shaft protection.

1.11 BARRIERS

A. Fences

1. The General Contractor shall be responsible for providing temporary fencing or barricades around the site and as otherwise may be necessary, to assure the safety of all persons, authorized or unauthorized. Such protective measures shall be located and constructed as required by local, state and federal ordinances, laws or regulations. Any such fencing or barricade shall be maintained in an orderly condition. Existing fencing may be utilized by the General Contractor as a portion of the construction fencing, if it meets or is modified to meet all the requirements listed below for construction fencing.

2. Security Enclosure and Lockup: Install temporary enclosure around partially completed areas of construction. Provide lockable entrances to prevent unauthorized entrance, vandalism, theft, and similar violations of security. Lock entrances at end of each work day. Provide secure areas for storage of materials and equipment.

3. Unless otherwise specified, all construction fencing, both driven post and movable, shall be 6 feet high and of chain link construction with scrims for vision and dust control, erected in a substantial manner, straight, plumb and true as approved by the Architect. Refer to the Drawings for locations where fence posts are to be driven and where fencing is to be movable.

    a. Provide driven post fencing as indicated on the Drawings. Posts shall be driven into the ground if not damaging to final pavement, other site fixtures or site amenities.

    b. Provide movable fencing as indicated on the Drawings. Panels shall be secured together and to adjacent post-driven sections with fence wire or metal strapping to create an effective barrier.

4. Gates shall be built into fence at such approved locations as are necessary, well cross-braced and hung on heavy strap hinges with proper post and hook for double gates. Provide heavy hasps and padlocks for each gate. Provide keys to Owner, Architect and OPM, and to Police and Fire Departments to facilitate emergency access. Provide Knox Box at each gate. Place copies of keys in Knox Box.

5. Temporary fencing shall be installed and re-positioned in with each phase as shown on the Phasing Drawings. Upon completion of the entire project the remaining temporary fencing shall be removed as directed by the Architect. Restore the site to acceptable condition after removing fencing.

6. Refer to phasing drawings for fence location.

B. Tree and Plant Protection

1. Existing trees and shrubs which are to remain shall at all times be carefully preserved and protected against any possible injury during the process of the work.

2. The trunk and exposed roots of trees within the area of operations shall be thoroughly protected with suitable temporary guards and barriers and the branches shall not be injured by the operation of power equipment or other material devices.

3. Refer to SECTION 311320-EXISTING PLANTS TO REMAIN for additional requirements.

C. Guard Rails

1. Furnish and maintain all necessary guard rails, barriers and the like as required for safety of personnel in the building, on the site, and public.

2. All such safety barriers shall be removed upon completion of this contract. Should the work be suspended, such safety barriers shall remain in place, and become the property of the Owner.

D. Siltation Control Barriers

1. Prior to the commencement of any site work, temporary siltation control barriers shall be installed as shown on the Drawings, and specified under SECTION 311000-SITE PREPARATION and SECTION 312000-EARTHWORK.

2. Siltation control barriers must be maintained until final acceptance of sitework, at which time they shall be removed at the General Contractor's expense.

1.12 DUST CONTROL

A. Provide and maintain throughout the conduct of the Work of this Contract, the following measures necessary, as a minimum, to control and reduce emission of airborne dust, and prevent contamination of exterior surfaces at adjacent public and private properties, or otherwise creating a nuisance to the Owner or adjacent properties.

1. Sufficiently wet construction materials with a fine spray or spinkling of water during removal, cutting or other handling to reduce the emission of airborne dust.

2. Street sweeping the project site entry to maintain all areas clean and free of dirt, mud, and debris at all times.

3. The above minimum measures notwithstanding, it shall be the Construction Manager's responsibility to utilize whatever means and methods the Construction Manager deems necessary to prevent the emission of dust to comply with the above requirements. The Construction Manager shall identify the cost for dust control in a separate line item included in the Schedule of Values provided in accordance with the Contract Documents.

4. Over the course of site work activities, document implementation of dust-control measures through date-stamped photos, inspection logs or reports. See also Dust Monitoring in SECTION 312000-EARTHWORK.

B. In the case of work in or near the Cashman School, dust controls should effectively seal off existing areas that remain in use by the school during construction, to maintain a clean and healthy environment in accordance with all applicable codes and standards. All contractor-controlled areas shall be under negative pressure

1.13 ACCESS ROADS AND TRAFFIC REGULATIONS

A. Traffic and Hauling Plan: Submit a detailed hauling plan; indicate trucking routes, schedules, timing, and types of vehicles, to be received and accepted by the Town of Amesbury's municipal department. See SECTION 013100-PROJECT PROCEDURES for construction vehicle transportation routes.

B. Work in Public Ways:

1. Confine construction traffic to designated routes.

2. If it is necessary to temporarily close or obstruct traffic on a public or private street or way, obtain a permit from the local authorities in advance of such closing or obstruction; comply with local ordinances regulating such permits.

3. Whenever work is occurring in a public street or way, comply with requirements of local police department. See SECTION 011000-SUMMARY OF WORK, Article 1.23 POLICE DETAILS.

C. Traffic Controls: Comply with requirements of authorities having jurisdiction.

1. Protect existing site improvements to remain including curbs, pavement, and utilities.

2. Maintain access for fire-fighting equipment.

D. Traffic Signs: Provide, operate and maintain temporary signs and personnel, as required to direct and maintain an orderly flow of traffic in areas affected by General Contractor's operations, including but not limited to, haul routes, site entrances, and on-site parking areas.

1. Traffic Control Signs: Provide post signs with breakaway post assemblies conforming to applicable provisions of the Massachusetts Department of Transportation "Standard Specifications."

2. Sign Sizes / Text: Include the Contract Price a quantity of five (5) metal signs and metal posts, average size of 600 square inches with a minimum of 20 characters per sign. Where appropriate, signs may be mounted on construction fencing. Specific signage requirements will be reviewed at the Pre-Construction Meeting.

E. Parking: Provide temporary parking areas on site for construction personnel. If additional space is required, the General Contractor shall submit parking plan to City and Architect for review and approval. Parking in front of adjacent residential properties and on residential side streets is not permitted under any circumstances.

1. Designate 6 reserved parking spaces for use by the Owner's personnel and Architect. Trucks shall not queue on public streets.

1.14 SPECIAL CONTROLS

A. Water controls, such as temporary swales or sumps, should effectively protect areas during construction until such time as the permanent storm water drainage system is completed and operational. Refer to the Contract Drawings for additional information regarding storm water control.

B. By state law, smoking is not allowed on school property including those areas under construction. The General Contractor shall submit a smoking control plan for approval before the first requisition. The plan must demonstrate the enforcement activities to be taken to ensure there is no smoking on the project site.

C. Loud and/or abusive language and inappropriate contact with students and staff shall not be tolerated and shall be cause for a worker's dismissal.

D. Public streets and roadways shall be kept clean of dirt tracked by construction vehicles entering and leaving the site in accordance with the Owner/Contractor Agreement.

1.15 TRAFFIC REGULATIONS

A. The General Contractor parking and staging areas are limited to on-site areas. On-street parking shall not be allowed. Trucks shall not queue on public streets

B. Refer to SECTION 013100-PROJECT PROCEDURES for other requirements.

1.16 ROOF PROTECTION

A. During the construction period after the installation of the roofing system as specified under Roofing and Flashing, the General Contractor shall take strict precautions against unnecessary traffic on the roof surface.

B. After the satisfactory completion of all roofing and flashing work, the General Contractor shall be responsible for damages to the roof caused by work or materials of the other trades.

1.17 DISPOSAL OF DEBRIS

A. Debris shall not be permitted to accumulate and the work shall at all times be kept satisfactorily clean.

B. Remove debris from site in accordance with the time specified in SECTION 311000-SITE PREPARATION.

C. The General Contractor shall require each of his Subcontractors engaged upon the work to bear his full responsibility for cleaning up during and immediately upon completion of his work, and shall remove all rubbish, waste, tools, equipment, and appurtenances caused by and used in execution of his work; but this shall in no way be construed to relieve the General Contractor of his primary responsibility for maintaining the building and site clean and free of debris, leaving all work in a clean and proper condition satisfactory to the Architect and/or Owner. **The General Contractor shall be responsible for and pay all costs related to furnishing the required construction dumpsters at the site and legal disposal of all construction debris**.

D. The General Contractor shall provide at least one tightly built chute, serving each floor, which shall lead down to angle offset and a gate at a convenient loading point for trucks or wagons.

E. At no time shall any rubbish be thrown from the windows of the building.

F. Immediately after unpacking, all packing materials, case lumber, excelsior, wrapping, or other rubbish, flammable or otherwise, shall be collected and removed from the building and premises.

G. Coordinate all disposal of debris according to requirements of SECTION 017419-CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL.

1.18 TEMPORARY OFFICES

A. Provide and maintain field office on site throughout construction period. The type and placement of temporary office facilities will require Owner approval.

1. General Contractor's Office – A General Contractor's field office at which the General Contractor's authorized representatives shall be present at all times while work is in progress. Instructions, notices and other communications delivered there by the Architect or the Owner or the Owner's Project Manager shall be deemed delivered to the General Contractor. The General Contractor's trailer (or trailers) shall be a sized to accommodate meetings with a conference table and chairs sufficient to accommodate 12 persons at one time unless otherwise mutually agreed upon.

2. Owner's Project Manager's Office Trailer – Trailer shall be in close proximity to the General Contractor's field office, shall be at least 10 feet x 44 feet dimensionally, and shall be equipped with two offices, electric lights, heat, air conditioning, window screens, secure locking devices, and a toilet room with a working chemical toilet. Such office shall be equipped with at least the following new furniture and equipment: two lockable steel desks (or agreeable field constructed equivalent), two quality office chairs (fully adjustable with rolling and swivel capability), one adjustable stool, two metal plan racks, 36 inch x 96 inch sloped plan table, 72 inch x 30 inch folding table and four folding chairs, one two-drawer, 36 inch x 20 inch x 29 inch high lockable lateral filing cabinet, 12 feet of 12 inch deep wall shelving, first aid kit, electric water cooler with 5-gallon refill jugs as required, under-counter refrigerator, small microwave, Keurig coffee maker similar to K-1500 supplied with K-cup type coffee, six visitor hard hats and yellow safety vests. All Office Trailer furniture shall become the property of the Owner at the conclusion of the Work.

3. The General Contractor shall also provide the Owner's office with the following:

   a. 4 data lines

   b. Internet access for email service and a hub for multi-use.

   c. Networked plain paper color printer/copier with scan to computer capability (similar to Epson WorkForce Pro WF-7840 wireless, wide-format all-in-one printer) and all necessary replacement cartridges.

   d. Two 19.5-inch HD monitors (similar to Acer AOPEN 19.5-inch wide screen TN LED LCD), keyboard, mouse and laptop docking station.

   e. Miscellaneous tackboards, whiteboards and other typical office supplies (pens, staplers, folders, copy paper, and the like)

4. Temporary Electrical Service: Wiring, outlets and fixtures suitable to light desks and tables and to provide power to heater and air conditioning system. Electrical subcontractor shall provide temporary power hook-up and wiring, and removal of the same when no longer needed. General Contractor shall pay for electric energy consumed.

1.19 TEMPORARY TOILETS

A. The General Contractor shall provide and service an adequate number of toilet booths with chemical type toilets and handwashing stations.

B. The toilets shall be erected in location approved by the Architect and shall be maintained by the General Contractor in a clean and orderly condition in compliance with all local and state health requirements including COVID-19.

C. When the permanent sanitary system is in operating condition, the General Contractor may use portions of the system as approved by the Architect, provided that the General Contractor (1) assumes full responsibility for the so used portions of the sanitary system, and (2) pays all costs for operation, maintenance, cleaning, and restoration of the used portions.

D. Sanitary Facilities: Provide temporary toilets, wash facilities, and drinking water for use of construction personnel. Comply with requirements of authorities having jurisdiction for type, number, location, operation, and maintenance of fixtures and facilities. Comply with COVID-19 protocols.

1. Clean, restock supplies and maintain facilities on minimum weekly basis.
2. Provide temporary toilet with padlock for exclusive use of Owner's Project Manager unless provided in the Owner's Project Manager's office trailer.
3. Toilets: Use of Owner's existing toilet facilities is not permitted.

E. Refer to the General Conditions of the Contract for additional information.

1.20 TEMPORARY TELEPHONE

A. Telephone Service for General Contractor: Provide temporary telephone service for use by construction personnel.

1. Install minimum of one telephone line in General Contractor's field office with answering machine or voice mail service.
    a. At each telephone, post a list of important telephone numbers.
        1) Police and fire departments.
        2) Ambulance service.
        3) General Contractor's home office.
        4) General Contractor's emergency after-hours telephone number.
        5) Architect's office.
        6) Engineers' offices.
        7) Owner's office.
        8) Principal subcontractors' field and home offices.
2. Provide superintendent with cellular telephone for use when away from field office. Superintendent shall carry telephone or radio at all times while on site. Maintain service until Final Completion.

B. Telephone Service for Owner's Field Office:

1. Telephone, Land Line: Provide telephone system and service in Owner's field office. Include one outside line.

a. Provide and pay for unlimited local and long distance calling services.

b. Maintain system for duration of contract.

c. Provide voice mail to each line; equipped with remote message retrieval, separate incoming and outgoing messages, time and date message stamp, pager notification of messages and call monitoring.

2. Provide training and support as required for the telephone system for the duration of Project.

C. Owner's Data Service: Provide internet access in the Owner's field office.

1. Provide dedicated high-speed (100+ Mbps) internet service, or other service with equivalent speed. Provide equipment, installation and monthly service fees for internet access without limitation on data bandwidth or usage.

2. Network: Provide local area network to connect each computer, printer, copier, scanner and other equipment. Include wiring, wireless router and, if required, switches necessary to connect each piece of equipment.

1.21 PROTECTION OF PERSONS AND PROPERTY

A. The General Contractor shall be responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the work.

B. The General Contractor shall take all reasonable precautions for the safety of, and shall provide all reasonable protection to prevent damage, injury or loss to:

1. All employees on the Work and all other persons who may be affected thereby.

2. All the Work and all materials and equipment to be incorporated therein, whether in storage on or off the site, under the care, custody or control of the General Contractor or any of his Subcontractors or Sub-subcontractors.

3. Any other property at the site or adjacent thereto, including (but not limited to) equipment, existing construction to remain, trees, shrubs, lawns, walks, pavements, roadways, structures and utilities not designated for removal, relocation or replacement in the course of the Work. Restore to original condition or replace any property on and/or off the site which may be damaged or destroyed in the execution of the Work.

C. The General Contractor and Subcontractors shall comply with (and the General Contractor shall give all notices regarding) all applicable laws, ordinances, rules, regulations and lawful orders of any public authority bearing on the safety of persons or property of their protection from damage, injury or loss.

D. The General Contractor shall erect and maintain, as required by existing conditions and progress of Work, all reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards, promulgating safety regulations and notifying Owners and users of adjacent utilities.

E. When the use of storage of explosives or other hazardous materials or equipment is necessary for the execution of the Work, the General Contractor shall exercise the utmost care and shall carry on such activities under the supervision of properly qualified personnel.

F. The General Contractor shall designate a responsible member of his organization at the site, whose duty shall be the prevention of accidents. This person shall be the General Contractor's superintendent unless otherwise designated by the General Contractor in writing to the Architect.

G. The General Contractor shall not load or permit any part of the Work to be loaded so as to endanger its safety.

H. In any emergency affecting the safety of persons or property, the General Contractor shall act, at his discretion, to prevent threatened damage, injury or loss. Any additional compensation or extension of time claimed by the General Contractor on account of emergency work shall be determined as provided in the General Conditions for Change in Contract and Methods of Preparation of Changes.

I. Water protection: Always protect excavation, trenches, buildings from damage from rain water, spring water, ground water, backing-up of drains or sewers, and other waters. Provide pumps, equipment, enclosures as required to provide this protection. Construct, maintain temporary drainage; do pumping necessary to keep excavation water free.

J. Remove snow and ice as necessary for safety and proper execution of work. Remove same when work is completed.

K. Provide constant protection against the weather as required to maintain work, materials, apparatus, fixtures, free from injury or damage. If low temperatures make it impossible to continue operations, cease work, notify Architect.

L. Shore, brace, enclose and otherwise protect, as required, existing buildings from damage during course of work.

1.22 TEMPORARY PROTECTION

A. The General Contractor shall provide weathertight enclosures for all exterior openings in buildings whenever the weather is such as to require same for protection against frost or heat, for drying out of plaster, or for suitable working conditions within the building before permanent doors and windows are installed.

B. The General Contractor shall:

1. Protect excavations, trenches, building and materials at all times from rain water, ground water, backing-up or leakage of sewers, drains or other piping and from water damage of any origin: provide all pumps, piping, coverings, and other materials and equipment as required by job conditions. (Refer also to SECTION 312000-EARTHWORK).

2. In addition to the weather protection during the months of November through March specified thereunder, provide temporary weathertight enclosures for openings in exterior walls and in roof decks when and as required to protect the Work form damage by inclement weather. Temporary enclosures shall be provided with adequate means of ventilation to prevent accumulation of moisture in the building.

3. Provide temporary wood doors for exterior entrances and elsewhere as required. Permanent door enclosures shall not be used as temporary enclosures.

4. Protect sills, jams and heads of openings through which materials are handled.

5. Protect decks and slabs to receive Work by other trades from any soiling which will prevent proper adhesion of subsequent work. Decks and slabs shall be left clean and free of all blemishes at the time other Trades begin the application of their work.

C. Roof surfaces and waterproofed surfaces shall not be subjected to traffic nor shall they be used for storage of materials. Where some activity must take place in order to carry out the work, adequate protection shall be provided.

D. After the installation of work by any Subcontractor is properly completed, the General Contractor shall be responsible for its protection and for repairing, replacing or cleaning any such work which has been damaged by other Trades or by any other cause, so that all Work is in perfect condition at the time of Substantial Completion.

E. All temporary protection and coverings shall be removed by the General Contractor at the completion of the work.

1.23 FIRE PROTECTION AND PREVENTION

A. Applicable Standards: Comply with NFPA 10 "Standard for Portable Fire Extinguishers," and NFPA 241 "Standard for Safeguarding Construction, Alterations and Demolition Operations."

B. Fire Extinguishers: Provide hand-carried, portable UL-rated type A fire extinguishers for temporary offices and similar spaces. In other locations provide hand-carried, portable, UL-rated type ABC dry chemical extinguishers, or a combination of extinguishers of NFPA recommended classes for the exposures.

1. Comply with NFPA 10 and 241 for classification, extinguishing agent and size required by location and class of fire exposure.

C. Fire Protection: Install and maintain temporary fire-protection facilities of types needed to protect against reasonably predictable and controllable fire losses. Comply with NFPA 241.

1. Prohibit smoking in construction areas.
2. Supervise welding operations, combustion-type temporary heating units, and similar sources of fire ignition according to requirements of authorities having jurisdiction.
3. Develop and supervise an overall fire-prevention and -protection program for personnel at Project site. Review needs with local fire department and establish procedures to be followed. Instruct personnel in methods and procedures. Post warnings and information.
4. Provide temporary standpipes and hoses for fire protection. Hang hoses with a warning sign stating that hoses are for fire-protection purposes only and are not to be removed. Match hose size with outlet size and equip with suitable nozzles.

D. Comply with recommendations regarding fire protection made by the representative of the fire insurance company carrying insurance on the Work and by local fire officials.

E. Fire Watch for Welding and Cutting Operations:

1. Whenever electric arc cutting and welding equipment or oxygen-fuel gas cutting and welding systems as described in 527 CMR 39.02 are in use on the site, comply with 527 CMR 39, including, but not limited to, the following:

    a. Before beginning the work, obtain permits for welding operations and for storage of fuel gases on the site from the local fire department as required by 527 CMR 39.04, 527 CMR 6.00 and 427 CMR 14.00.

    b. Maintain and pay for a fire department fire watch to be present on the site during performance of the work and for at least 60 minutes after the welding or cutting operations have been completed, to ensure that no fire exists.

    c. Maintain records of construction operations and fire watch activities as required by 527 CMR 39.04 (4). Record locations, dates, and times where welding or cutting operations were performed, the name of the assigned fire watch or watches, and the length of time for which the fire watch standby was continued after work was completed. Describe the work, fire protection provided and special precautions taken. Make records available to fire officials.

    d. Where there is any danger of the welding or cutting operations on one side of a wall, partition, ceiling or roof igniting-materials on the other side, also maintain a fire watch on the other side of the assembly.

2. Trade subcontractors shall provide fire watch for their own operations.

F. Permanent Fire Protection: At the earliest feasible date in each area of Project, complete installation of the permanent fire protection system, and place into operation. Make sure key personnel understand how the system operates.

1. If it is necessary thereafter to disable the permanent system for short periods of time, provide temporary protection of type acceptable to Owner's insurer and to the local Fire Department while the permanent system is inoperative.

G. In construction areas, the Electrical Subcontractor shall maintain horns and strobes to the extent requested by the local authorities having jurisdiction. Smoke detectors are not required.

1.24 ACCIDENT PREVENTION

A. Comply with all recommendations and requirements for accident prevention of the Associates, General Contractors of America and the American Standards Association Standard A10.2. The Field Superintendent of the General Contractor shall conduct regular and frequent inspections of the site for compliance with safety regulations, stating in writing to the Architect each month that he has done so. The Architect specifically reserves the right to direct and enforce compliance with safety regulations if conditions on the site do not comply.

B. Neither the Owner nor the Architect shall be responsible for providing a safe working place for the General Contractor, Subcontractors or their employees or any individual responsible to them for the work.

1.25 WELDING AND CUTTING

A. Whether electric or gas welding or cutting work done above or within ten (10) feet of combustible material or above space that may be occupied by persons, interposed shield or incombustible material shall be used to protect against fire damage or injury due to sparks and hot metal.

B. Tanks supplying gases for gas welding or cutting shall be placed at no greater distance from the work than is necessary for safety, securely fastened and maintained in an upright position where practicable. Such tanks, when stored for use, shall be remote from any combustible material and free from exposure to the rays of the sun or too high temperatures.

C. Suitable fire extinguishing equipment shall be maintained near all welding and cutting operations. When operations cease for the noon hour or at the end of the day, the surroundings adjacent to welding and cutting operations shall be thoroughly wetted down.

D. A workman equipped with suitable fire extinguishing equipment shall be stationed near welding and cutting operations to see that sparks do not lodge in floor cracks or pass through floor or wall openings or lodge in any combustible material. The workman shall be kept at the source of work offering special hazards for 30 minutes after the job is completed to make sure that smoldering fires have not been started.

E. A qualified electrician shall be in charge of installing and repairing electric or arc welding equipment. No electric welding equipment shall be connected into the Owner's electrical system.

F. Refer to the General Conditions of the Contract for additional information.

1.26 TEMPORARY AND TRIAL USAGE

A. Temporary or trial usage by Owner of any mechanical device, machinery, apparatus, equipment, or any work or materials supplied under Contract, before final completion and written acceptance by the Architect shall not be construed as evidence of Architect's acceptance of same.

B. The Owner reserves the privilege of such temporary or trial usage, for such reasonable time as required to properly test such item. Claims for damage, due to injury to, or breaking of any parts of such work, when the determined cause is weakness or inaccuracy of structural parts, or by defective material or workmanship, will not be permitted.

C. If the General Contractor so elects, he may, without additional cost to the Owner, place an approved person, or persons, to instruct and assist in such trial usage. Trials shall be made under the Architect's supervision.

1.27 OVERLOADING

A. Materials and fabricated work shall not be stacked on, or be transported over, floor and roof construction that would stress any of said construction beyond the designed live loads.

1.28 SNOW AND ICE REMOVAL

A. The General Contractor shall remove all snow and ice which may impede the work, damage the finishes or materials, be detrimental to workmen, or impede trucking, delivery, or moving of materials at the job site, or prevent adequate drainage of the site or adjoining areas.

1.29 WINTER CONSTRUCTION

A. The General Contractor shall be responsible for providing protection against damage to materials and work installed in freezing weather, by providing special heat and coverings to prevent damage by the elements, in a manner approved by the Architect. The ground surfaces, under footings, under pipe lines, under masonry, under concrete, and other work subject to damage shall be protected against freezing or ice formation. If low temperature makes it impossible to continue operations safely in spite of cold weather precautions, the General Contractor shall cease work and shall so notify the Architect.

1.30 WIND PROTECTION

A. Should high wind warnings be issued by the U.S. Weather Bureau, the General Contractor shall take every precaution to minimize danger to persons, to the work, and to adjacent property.

1.31 AIR QUALITY

A. Construction activities shall be scheduled so that sufficient time is allotted for building flush-out, per SECTION 018119 – INDOOR AIR QUALITY MANAGEMENT PLAN.

1.32 NOISE AND POLLUTION CONTROL

A. All work performed under the Contract shall conform to the requirements of Chapter 11, Section 31C and Section 142D of the General Laws, and Rules and Regulations adopted thereto by the Commonwealth of Massachusetts, Department of Public Health.

B. In addition, all work shall comply with **City of Amesbury** regulations for the control of noise including activities on construction sites.

1.33 SITE DRAINAGE AND PUMPING

A. The General Contractor shall be responsible for site drainage upon entering the premises and shall maintain such drainage during the life of his Contract in a manner approved by the Architect and so as not to adversely affect the adjacent areas.

B. The General Contractor shall during the progress of the work, provide and maintain all required pumps, suction and discharge lines, and power in sufficient number and capacity to keep all excavations, pits, trenches, foundations, and the entire property areas free form accumulation of water from any source whatsoever, at all items, and under any and all circumstances and contingencies that may arise.

C. For additional requirements for excavation dewatering, refer to SECTION 312000-EARTHWORK.

1.34 TEMPORARY USE OF ELEVATORS

A. Should the General Contractor desire the use of elevator equipment prior to Substantial Completion, he shall make necessary arrangements with the Elevator Subcontractor, subject to the approval of the architect and subject to code requirements.

B. The General Contractor shall reimburse the Elevator Subcontractor for any labor or materials which are not part of the permanent installation and which are required to provide temporary elevator service including, but not limited to, temporary car enclosures, requisite guards or other protection for elevator machine room and hoistway openings, main line switch with wiring and obtaining any other special labor or equipment needed to permit temporary usage.

C. The General Contractor shall sign the elevator subcontractor's temporary acceptance form before any elevator is placed into temporary service; and pay all costs of power, operation, and maintenance and attendance of the equipment.

D. The General Contractor shall leave the complete elevator equipment in the same condition as it was at the time it was returned over to him for temporary service. If repairs or replacements are necessary to restore the apparatus to its original condition, he shall allow the Elevator Subcontractor time to make such repairs or replacements and shall pay him for making them.

1.35 MOISTURE AND MOLD CONTROL

A. General Contractor's Moisture-Protection Requirements: Avoid trapping water in finished work. Document visible signs of mold that may appear during construction.

1. Protect Work from moisture in order to prevent the growth of fungus, bacteria and other biological contaminants.

B. Exposed Construction Phase: Before installation of weather barriers, when materials are subject to wetting and exposure and to airborne mold spores, protect as follows:

1. Protect porous materials from water damage.
2. Protect stored and installed material from flowing or standing water.
3. Keep porous and organic materials from coming into prolonged contact with concrete.
4. Remove standing water from decks.
5. Keep deck openings covered or dammed.

C. Partially Enclosed Construction Phase: After installation of weather barriers but before full enclosure and conditioning of building, when installed materials are still subject to infiltration of moisture and ambient mold spores, protect as follows:

1. Do not load or install drywall or other porous materials or components, or items with high organic content, into partially enclosed building.
2. Keep interior spaces reasonably clean and protected from water damage.
3. Maintain enclosure sufficiently weather tight to prevent water from entering the building.
4. Do not permit construction operations from introducing uncontrolled water into the structure from sources such as hoses and mechanical and plumbing systems.

5. Remove standing water from decks and slabs.

6. Periodically collect and remove waste containing cellulose or other organic matter.

7. Discard or replace water-damaged material.

8. Do not install material that is wet.

9. Discard and replace stored or installed porous materials that begin to grow mold; clean non-porous materials to remove mold.

10. Perform work in a sequence that allows any wet materials adequate time to dry before enclosing the material in drywall or other interior finishes.

11. Provide temporary heating, cooling and dehumidification as required to maintain acceptable ambient conditions, and to allow construction materials to dry sufficiently for subsequent Work.

D. Construction Phase of Construction: After completing and sealing of the building enclosure but prior to the full operation of permanent HVAC systems, maintain as follows:

1. Provide ventilation, heating, cooling and dehumidification per "Temporary Heating and Ventilation" Article in this Section.

2. Control moisture and humidity inside building by maintaining effective dry-in conditions.

3. Comply with each product manufacturer's written instructions for temperature, relative humidity, and exposure to water limits.

4. Store construction materials in clean, dry areas. Comply with specific requirements for storage and protection of materials as specified in the Contract Documents.

E. Drying of Wet Construction and Materials: If an unanticipated event permits the entry of water into new or existing construction, take steps necessary to dry out construction within 24 hours.

1. Identify wet materials and remediate in accordance with United States Environmental Protection Agency publication "Mold Remediation in Schools and Commercial Buildings," current edition.

2. Measure moisture content of materials that have been exposed to moisture during construction operations or after installation. Record readings beginning at time of exposure and continuing daily for 48 hours.

3. Use restoration drying techniques to achieve and maintain conditions that will not support biological growth. Consider the use of desiccant drying, if feasible.

4. If materials or construction cannot be adequately dried out within 24 hours, or which show evidence of biological growth, remove them from the construction area immediately, and legally dispose of them.

   a. Hygroscopic materials that may support mold growth, including wood and gypsum-based products, that become wet during the course of construction and remain wet for 24 hours are considered defective.

   b. Remove materials that cannot be completely restored to their manufactured moisture level within 24 hours.

5. Remove and replace construction which shows evidence of biological growth due to presence of moisture.

6. Where construction has been in contact with contaminated water, subsequent cleaning and decontamination shall be supervised by a qualified company approved by the Owner. The cost of such supervision shall not be considered a reimbursable cost of the work.

1.36 PROJECT SIGN

A. The General Contractor shall furnish and install one (1) project sign 4 ft. x 8 ft. in dimension. Sign shall comply with CMR 963 paragraph 2.04 (1) g. Sign shall be fabricated from one-inch thick medium density overlaid exterior plywood laminated with waterproof glues. All edges of sign shall be banded with 1 in. x ½ in. pine banding. Sign shall be supported by three 4 x 4 post supports set in 12 in. diameter concrete footings to a depth of four (4) feet and so that sign is raised a minimum of three (3) feet above grade. (Note: Alternative methods of support may be required by site conditions. Alternate methods of support shall be submitted to the Architect for approval.) All nails, nuts, bolts and other connecting hardware to be galvanized. Refer to Attachment A at the end of this Section.

B. Sign shall be lettered by a professional sign painted, in accordance with a drawing prepared by the Architect.

C. The Architect will make available a high-resolution graphic of the sign layout in a compatible image file (JPG, PDF, TIFF) for the General Contractor's use. The sign text shall comply with 963 CMR Par. 2.04(1)(g) for projects funded in part by the Massachusetts School Building Authority.

D. The General Contractor shall submit a scaled drawing for the proposed sign for approval by the Architect prior to fabrication.

E. No other signs or advertisements will be allowed to be displayed without the approval of the Architect.

F. The General Contractor shall obtain approval of local authorities for erection of sign.

SECTION 017419

CONSTRUCTION WASTE MANAGEMENT

PART 1 GENERAL

1.01 PROVISIONS INCLUDED

A. The Conditions of the Contract and Division 1, General Requirements, apply to the work under this Section.

B. Attention of the General Contractor and this Subcontractor is directed to provisions of the Contract Documents regarding the responsibility of all bidders to visit and inspect the site, including the existing building, and to base all bids on conclusions drawn from such inspections.

1.02 SCOPE OF WORK

A. This Section specifies administrative and procedural requirements for the General Contractor's implementation of waste management controls and systems for the duration of the Work.

1. Masonry subcontractor is responsible for waste management of masonry work.
2. Roofing and flashing subcontractor is responsible for waste management of roofing and flashing work.

B. Develop and implement a waste management plan compliant with the requirements of LEED-S v4 MR prerequisite Construction and Demolition Waste Management Planning and MR credit Construction and Demolition Waste Management.

1.03 INTENT

A. Sustainable Design Intent: Comply with project requirements intended to achieve sustainable design, measured and documented according to the LEED for Schools v.4 Green Building Rating System, of the US Green Building Council. Refer to SECTION 018113-SUSTAINABLE DESIGN REQUIREMENTS for certification level and certification requirements.

B. The Owner and Architect have established that this project shall generate the least amount of waste practical and that processes that ensure the generation of as little waste as possible due to error, poor planning, breakage, mishandling, contamination, or other factors shall be employed.

C. Of the waste that is generated, as many of the waste materials as economically feasible shall be reused, salvaged, or recycled. Waste disposal in landfills shall be minimized to the greatest extent practical.

D. With regard to these goals the General Contractor shall develop, for the Architect's review, a Waste Management Plan for this project.

1. Each Subcontractor, except for Sitework and Demolition, shall dispose of his own waste into dumpsters provided by the General Contractor. Sitework and Demolition Subcontractors shall dispose of surplus and waste off-site to a receiver that each of them provides.

2. The General Contractor shall be responsible for ensuring that debris will be disposed of at appropriately designated licensed solid waste disposal facilities, as defined by MGL Chapter 111, Section 150A.

1.04 SUBMITTALS

A. Waste Management Plan: Within 21 calendar days after receipt of Notice to Proceed, the General Contractor shall provide a compliant Construction Waste Management Plan including:

1. Identify a minimum of five materials target for diversion, (structural and non-structural). Determine and document the estimated percentage of the overall waste that these materials represent. Four materials streams and 75% minimum diversion rate REQUIRED.

2. Diverted materials must include at least four material streams.

3. Document if these materials will be site separated or commingled and sorted off site.

4. Describe the diversion strategies.

5. Identify the locations as to where the materials will be taken including recycling facilities, sorting facilities and landfills. Include the following:

a. Landfill Options: The name of the landfills where the non-recyclable Construction and Demolition waste will be taken to be disposed of, applicable tipping fees and the projected cost of disposing of the Project waste in landfills

b. Off-Site Sorting: The name of off-site sorting facilities to receive commingled demolition and construction debris collected in mixed materials containers on site.

c. If sorted off site, identify the sorting facilities and how the materials will be processed.

6. NOTE: Exclude all land-clearing debris and excavated soil from credit calculations. Alternative Daily Cover (ADC) does not count as diversion but must be included in total construction and demolition waste.

B. Landfill Certification: Provide a statement of verification that the landfills proposed for use are licensed for types of waste to be deposited and have sufficient capacity to receive the estimated waste from this project

C. For co-mingled materials collected in mixed containers on site and sorted off-site the following documentation must be provided:

1. For each container: A detailed breakdown of the weight of each material after sorting, including materials diverted to landfills
2. AND/OR provide the sorting facilities annual average recycling rate for EACH facility where off-site sorting takes place. Additionally, provide documentation that the facility is State regulated.
   Note: Co-mingled waste may be considered only one material stream, unless the facility can provide project specific diversion rates for each material stream.

D. Recycled, and Salvaged Materials: Provide a list of each material proposed to be recycled, salvaged or diverted from landfill during the course of the Project. Include a minimum of five of the following and any additional items:

1. Cardboard and paper
2. Clean dimensional Wood (free from nails, screws and similar foreign materials.)
3. Concrete and slurry wall materials
4. Brick/Masonry
5. Asphalt
6. Metals including framing, banding, stud trim, ductwork, piping, rebar, roofing, other trim, steel, iron, galvanized sheet steel, stainless steel, aluminum, copper, zinc, lead, brass, and bronze.
7. Gypsum Board
8. Mechanical and Electrical equipment
9. Building components that are removed intact during demolition
10. Glass
11. Packing materials
12. Beverage Containers

E. Meetings: A description of the regular meetings to be held to address waste management.

F. Procedures for Materials Handling: Provide a description of the means by which any waste materials and/or collection containers identified above will be protected from contamination, and a description of the means to be employed in recycling the above materials consistent with requirements for acceptance by designated facilities.

G. Transportation: Provide a description of the means of transportation of the recyclable materials identify if materials will be site-separated and self-hauled to designated centers, or whether mixed materials will be collected by a waste hauler and removed from the site for off-site sorting

H. Waste Management Progress Reports to be submitted concurrent with each monthly Application for Payment. Provide a written Waste Management Progress Report and updated tracking spreadsheet

I. Waste Management Final Report: Prior to Substantial Completion, submit a written Waste Management Final Report summarizing the types and quantities of materials recycled and disposed of under the Waste Management Plan. Include the name and location of disposal facilities. Quantity may be measured by either weight or volume; be consistent in calculations. Include the following:

1. Material category.
2. Generation point of waste.
3. Total quantity of waste, by weight.
4. Quantity of waste salvaged, both estimated and actual.
5. Quantity of waste recycled, both estimated and actual.
6. Total quantity of waste recovered (salvaged plus recycled).
7. Total quantity of waste recovered (salvaged plus recycled) as a percentage of total waste.

J. Other Submittals:

1. Records of Donations: Indicate receipt and acceptance of salvageable waste donated to individuals and organizations. Indicate whether organization is tax exempt.
2. Records of Sales: Indicate receipt and acceptance of salvageable waste sold to individuals and organizations. Indicate whether organization is tax exempt.
3. Recycling and Processing Facility Records: Indicate receipt and acceptance of recyclable waste by recycling and processing facilities licensed to accept them. Include manifests, weight tickets, receipts, and invoices.

4. Landfill and Incinerator Disposal Records: Indicate receipt and acceptance of waste by landfills and incinerator facilities licensed to accept them. Include manifests, weight tickets, receipts, and invoices.

1.05 CONTRACTORS

A. Contractor may subcontract work of this Section to a sub-contractor specializing in recycling and salvaging of construction waste.

1. Institution Recycling Network, 7 South State Street, Suite 2, Concord, NH 03301; tel. 866-229-1962
2. Waste Solutions, Inc., 965 Plain Street, Marshfield, MA 02050; tel. 781-844-1476
3. Eco-One Solutions, 18 Glenwood Street, Natick MA, 01760; tel. 978.270.8950
4. Or equal as approved by the Architect.

PART 2 PRODUCTS

Not Used

PART 3 EXECUTION

3.01 RECYCLING

A. Metal, including but not limited to aluminum stairs, structural beams and sections, and reinforcing steel shall be recycled.

B. Wood that is not painted and does not contain preservatives (i.e. creosote, arsenic, and chromium-containing preservatives) shall be segregated and recycled.

C. Refer to the Massachusetts Recycling Directory available at the Massachusetts State Bookstore (617-727-2834) in the State Capitol Building for recycling operations within the State.

3.02 WASTE MANAGEMENT PLAN IMPLEMENTATION

A. Manager: The General Contractor shall designate an on-site person responsible for instructing workers and overseeing and documenting results of the Waste Management Plan for the Project

B. Distribution: The General Contractor shall distribute copies of the Waste Management Plan to the Job Site Foreman, each Subcontractor, the Owner and the Architect.

C. Instruction: The General Contractor shall provide on-site instruction of appropriate separation, handling, and recycling, salvage, reuse, and return methods to be used by all parties at the appropriate stages of the Project

D. Separation Facilities: The General Contractor shall lay out and label a specific area to facilitate separation of materials for recycling, salvage, reuse, and return. Recycling and waste bin areas are to be kept neat and clean and clearly marked in order to avoid contamination of materials. Location shall be acceptable to the Architect.

E. Hazardous Wastes: Any unforeseen hazardous wastes shall be separated, stored, and disposed of according to local regulations and as directed by the Owner.

SECTION 017700

PROJECT CLOSEOUT

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SCOPE OF WORK

A. This section includes administrative and procedural requirements for contract closeout, including, but not limited to, the following:

1. Closeout procedures for phased construction.
2. Substantial Completion procedures.
3. Procedures for list of incomplete work (punch list).
4. Above Ceiling Inspections.
5. Final completion procedures.
6. Warranties.
7. Final cleaning.
8. Repair of the Work.

1.03 RELATED SECTIONS

A. The related work shall be performed under the following Sections:

1. SECTION 013500-ORDER OF CONDITIONS for Amesbury Planning Board requirements prior to issuance of the Certificate of Occupancy.
2. SECTION 017839-PROJECT RECORD DOCUMENTS for submitting record Drawings, record Specifications, and record Product Data.
3. SECTION 017900-DEMONSTRATION AND TRAINING for requirements for instructing Owner's personnel.
4. Divisions 02 through 33 Sections for specific closeout and special cleaning requirements for the Work in those Sections.

1.04 CLOSEOUT PROCEDURES FOR PHASED CONSTRUCTION

A. Preliminary activities and submittals indicated in Article 1.05, SUBSTANTIAL COMPLETION PROCEDURES apply to the completion of each phase of Work identified in the Section 011000 - SUMMARY OF WORK. Architect will issue a Certificate of Substantial Completion upon completion of Building and Site.

1.05 SUBSTANTIAL COMPLETION PROCEDURES

A. Prior to requesting the Architect's inspection to determine date of Substantial Completion, bring Work to a point where it is ready for Owner's occupancy and in accordance with the definition of "Substantial Completion" in the General Conditions.

1. Complete preliminary procedures and closeout submittals indicated in this Section. Architect will not perform inspection for Substantial Completion unless preliminary procedures and closeout submittals are completed.
2. Submit completed log of closeout activities, with dates of submittal and return entered to show that all items have been seen and, if specified, reviewed by the Architect.

B. Preliminary Procedures: Before requesting inspection for determining date of Substantial Completion of a construction phase, complete the following.

1. Complete each closeout activity and submittal required prior to requesting inspection by the Architect. Use log of closeout activities and submittals as checklist and guide to verify that prerequisites are complete.
2. Advise Owner of pending insurance changeover requirements.
3. Make final changeover of temporary construction keying to permanent and deliver keys to Owner’s Project Manager. Obtain signed receipt for delivery of keys. Advise Owner's personnel of changeover in security provisions.
4. Complete startup and testing of systems and equipment.
5. Perform preventive maintenance on equipment used prior to Substantial Completion.
6. Instruct Owner's personnel in operation, adjustment, and maintenance of products, equipment and systems specified in SECTION 017900 - DEMONSTRATION AND TRAINING.
7. Advise Owner of changeover in heat and other utilities.
8. Complete final cleaning requirements.
9. Complete touch up and repair work.
10. Remove temporary facilities within the Work area of the construction phase being completed.
11. Replace chipped or broken glass and other damaged transparent materials.

12. Touch up and otherwise repair and restore marred, exposed finishes and surfaces. Replace finishes and surfaces that cannot be satisfactorily repaired or restored or that already show evidence of repair or restoration.

13. Do not paint over "UL" and other required labels and identification, including mechanical and electrical nameplates.

C. Preliminary Procedures for Final Construction Phase: Before requesting inspection for determining date of Substantial Completion of last construction phase for project, complete preliminary procedures required for each phase. In addition, complete the following procedures:

1. Terminate and remove remaining temporary facilities from Project site, including construction field offices, mockups, construction tools, and similar elements.

D. Inspection by Authorities Having Jurisdiction: At least 21 calendar days prior to date anticipated for Substantial Completion, obtain and submit releases permitting Owner unrestricted use of the Work and access to services and utilities. Include occupancy permits, operating certificates, and similar releases. For phased work, certificates may be temporary as allowed by the authorities having jurisdiction. Include the following as applicable:

1. Certificate of Occupancy.
2. Certificate of inspection for elevators
3. Certificate of inspection for mechanical work.
4. Certificate of inspection for electrical work.
5. All other permits and certificates required by law.

E. Lighting Fixture Cleaning and Lamping: The Electrical Subcontractor shall clean light fixtures, lamps, globes, lenses and reflectors. Replace burned-out bulbs and those noticeably dimmed by use.

F. HVAC Systems: The HVAC Subcontractor shall remove temporary filters install permanent filters as specified in SECTION 230001 - HVAC. The HVAC subcontractor shall submit on a separate sheet, distinct from the Operating and Maintenance data, a list of filters used on the Project, a description of each type, and appropriate location for each type.

1. Replace parts subject to operating conditions during construction that may impede operation or reduce longevity.
2. Replace disposable air filters and clean permanent air filters.
3. Clean ducts, blowers, and coils if units were operated without filters during construction or that display contamination with particulate matter upon inspection.

4. Clean HVAC system in compliance with NADCA Standard 1992-01. Provide written report upon completion of cleaning.

G. Log of Closeout Activities and Submittals: Submit log listing each activity and submittal that must be completed prior to Substantial Completion of a construction phase. Review each specification section to identify closeout activities and submittals, including certifications, start-up and testing reports, operating and maintenance data, spare parts and extra materials, and training of Owner's personnel.

1. Submit sample log listing each closeout item prior to submitting other closeout submittals.

2. Arrange log in tabular format in form acceptable to Architect. Order entries by specification section number and include the following information for each:

   a. Specification section number, name, and paragraph reference.
   b. Type of activity or submittal (such as "test report" or "manual").
   c. Description of the activity or submittal.
   d. Date submitted by the General Contractor.
   e. Date returned by the Architect, if Architect's approval is required.
   f. Date transmitted to the Owner or Project Manager.
   g. Remarks.

3. Completed Log: Submit completed log with request for inspection for Substantial Completion.

H. Closeout Submittals: Before requesting inspection for determining date of Substantial Completion of a construction phase, submit closeout submittals specified in this Section and in other Sections; and as listed in the log of closeout activities and submittals prepared by the General Contractor. Required closeout submittals include the following:

1. List of items to be completed and corrected (punch list).
2. Tools, spare parts, extra materials, keys for equipment, and similar items to location designated by Owner. Package carefully and label with manufacturer's name and model number where applicable. Obtain receipt upon delivery.
3. Testing, adjusting and balancing reports, and other reports, specified in SECTION 230001-HVAC.
4. Sustainable design submittals required by SECTION 018113-SUSTAINABLE DESIGN REQUIREMENTS.
5. Copies of inspection certificates from authorities having jurisdiction.

6. Certifications related to installed work and similar information substantiating that project conforms to the requirements of the Contract Documents and is fully operational.

7. Operation and Maintenance Manuals, as specified in this SECTION.

8. Special warranties specified in individual specification Sections, in form reasonably acceptable to the Architect.

9. Project Record Documents, as specified in SECTION 017839-PROJECT RECORD DOCUMENTS.

10. Records of training sessions specified in SECTION 017900-DEMONSTRATION AND TRAINING to document completion of training.

I. Closeout Submittals for Final Construction Phase: Before requesting inspection for determining date of Substantial Completion of last construction phase for project, submit closeout submittals specified in this Section and in other Sections indicated to be submitted for each phase. In addition, submit the following:

1. Turnover information related to Owner's occupancy, use, operation and maintenance, including final meter readings, if applicable.

2. Consent of surety to payment at the time of Substantial Completion.

3. The General Contractor's and Subcontractors' project warranty required by General Conditions and individual Sections.

4. All documentation required for incentives as required by the utility companies.

1.06 PROCEDURES FOR LIST OF INCOMPLETE WORK (PUNCH LIST)

A. General Contractor's List of Incomplete Work (Punch List): Prepare a comprehensive, detailed punch list of incomplete work, including each trade and each part of the project. Prepare list in form acceptable to the Architect; incomplete punch lists will be returned to the General Contractor without action.

1. Prepare list using spreadsheet software such as Microsoft Excel, in version compatible with Architect's computer software.

2. Submit 2 hard copies and 1 copy in electronic format on CD-ROM.

3. Format: Tabular format, with work listed room by room. Include columns for the following information:

a. Room number.

b. Room name.

c. Description of the item of work.

d. Trade responsible for item of work.

e. Signature and date of the supervisor or responsible party for each trade, who shall initial punch list to indicate item has been completed.

f. Remarks.

g. Cost to complete item.

4. Organization:

a. Include the following information at the top of each page:

1) Project name.

2) Date.

3) Name of Architect.

4) Name of the General Contractor.

5) Page number.

b. Organize punch list into separate pages for work related to building interior, building exterior and roof, and the project site.

c. Organize list of spaces in sequential order, starting with exterior areas first and proceeding from lowest floor to highest floor.

d. Organize items applying to each space by major element, including categories for ceiling, individual walls, floors, equipment, and building systems.

B. The failure to include any items on such list does not alter responsibility of the General Contractor to complete all work in accordance with the Contract Documents. Refer to the General Conditions.

C. Request for Inspection: Submit a **written request** for inspection to determine Substantial Completion to the Architect a minimum of ten (10) calendar days prior to the date the work will be completed and ready for final inspection and tests. After submitting request, continue to diligently pursue completion of items on punch list. Include the following with request:

1. Three copies of the General Contractor's list of incomplete Work.

2. Certification letter that final cleaning is complete, preliminary activities and closeout submittals are complete, and that work is ready for inspection.

D. On receipt of request for inspection, Architect will either proceed with inspection or notify the General Contractor of unfulfilled requirements.

1. When the "punch list" has been prepared, the Architect will arrange a meeting with the General Contractor and Subcontractor(s) to identify and explain all "punch list" items and answer questions on the work which must be done before final acceptance.

2. If the General Contractor gives notice that Subcontractor has completed his "punch list" items, the Architect will inspect that portion of the work and, if the items are found to be satisfactorily completed, advise the General Contractor accordingly.

3. If the Architect begins the inspection and finds items that are incomplete and not minor in nature, the Architect will notify the General Contractor and suspend the inspection until the General Contractor completes or corrects such work.

4. Re-inspection: Request re-inspection when the Work identified in previous inspections as incomplete is completed or corrected.

5. The Architect and his Consultants will perform up to three (3) back punch inspections. If additional back punch inspections are required as a result of the failure of the applicable subcontractors and/or the General Contractor to confirm complete, costs incurred by the Architect and his Consultants associated with additional back punching will be at the General Contractor's expense.

E. Architect's Inspection: Architect will complete inspection of completed Work, and may add additional items to the punch list prepared by the General Contractor. Architect will transmit the revised punch list to the General Contractor.

1. Preparation of the Architect's punch list is not a Certificate of Substantial Completion, nor an affirmation that the Work is substantially complete, nor is the date of the list to be construed as the Date of Substantial Completion.

F. The General Contractor shall correct all "punch list" items or shall cause the correction of the "punch list" items listed with the Certificate of Substantial Completion within 60 calendar days of the date of Substantial Completion. Should the "punch list" not be completed within the specified time frame, the Owner may invoke the rights given under the General Conditions.

G. Prepare copies of the punch list applicable to each room or space and post in each room in conspicuous place. Require each tradesperson performing work to sign and date the posted list in space provided beside each item when the item completed. Monitor progress of completion, and verify that trades are signing punch list upon completion of items.

H. Certificate of Substantial Completion: Architect will prepare the Certificate of Substantial Completion after inspection and upon the General Contractor's completion of closeout activities and closeout submittals. Issuance of the Certificate of Substantial Completion and determination of the date of Substantial Completion are at the sole discretion of the Architect.

I. Monetization of Punch List: Prior to Final Completion, cooperate with the Architect in preparation of a monetized punch list, indicating the cost to complete each incomplete item, with total.

1.07 ABOVE CEILING INSPECTIONS

A. Schedule: Above ceiling inspections shall be clearly listed in the Construction Schedule and updated as appropriate. The Architect and his applicable consultants shall be provided a minimum of one week to visit the site and perform their inspections. Above ceiling inspections shall be scheduled by floor unless mutually agreed to separate a portion of a building or addition(s). In no case shall a floor be divided up into more than two areas.

B. Request for Inspection: The General Contractor shall submit to the Architect a **written request** for an above ceiling inspection a minimum of seven (7) calendar days prior to the scheduled start date shown in the updated Construction Schedule. Prior to performing above ceiling inspections, the Architect will require sign-offs from all applicable trades **and** confirmation by the General Contractor that **all** above ceiling work is complete for designated floor and ready for inspection.

1. If the Architect begins the inspection and finds items that are incomplete and not minor in nature, the Architect will notify the General Contractor and suspend the inspection until the General Contractor completes or corrects such work.

2. Re-inspection: Request re-inspection when the Work identified in previous inspections as incomplete is completed or corrected.

C. Architect's Inspection: Architect and applicable consultants will complete inspection of Work and provide a list of delinquent or incomplete items.

1.08 FINAL COMPLETION PROCEDURES

A. The General Contractor shall supervise and direct the work, using his best skill and attention. He shall be solely responsible for all construction means, methods, techniques, sequences and for coordinating all portions of the work under the Contract.

B. The General Contractor shall carefully check his own work and that of Subcontractors as the work is being performed. Unsatisfactory work shall be corrected immediately.

C. During the finishing stages of the project, the General Contractor shall make frequent inspections with Subcontractors and the Architect so as to progressively check for and correct faulty work.

D. Preliminary Procedures: Before requesting final inspection for determining final completion, complete the following:

1. Submit a final Application for Payment in accordance with the General Conditions.

2. Submit certified copy of Architect's Substantial Completion inspection list of items to be completed or corrected (punch list), endorsed and dated by Architect. The certified copy of the list shall state that each item has been completed or otherwise resolved for acceptance.

3. Submit evidence of final, continuing insurance coverage complying with insurance requirements.

E. Inspection: Submit a written request for final inspection for acceptance. On receipt of request, Architect will either proceed with inspection or notify the General Contractor of unfulfilled requirements. Architect will prepare a final Certificate for Payment after inspection or will notify the General Contractor of construction that must be completed or corrected before certificate will be issued.

1. Re-inspection: Request re-inspection when the Work identified in previous inspections as incomplete is completed or corrected.

F. Final Closeout Submittals: Prepare remaining closeout submittals and submit to the Architect prior to Final Completion, allowing sufficient time for review, at least 15 working days.

1. Final construction photographs.
2. Certificate of insurance for products and completed operations.
3. Consent of Surety to Final Payment.
4. An affidavit certifying that bills and indebtedness connected with the Work have been paid.
5. Proof that taxes, fees and similar obligations have been paid.
6. Additional turnover information which may be required by Owner's lender and Owner's property insurer.

G. Signed and Dated "Punch Lists": Complete items which are listed as incomplete on the General Contractor list of incomplete work and those listed on the Architect's list of incomplete work attached to the Certificate of Substantial Completion; or, if acceptable to the Owner's Project Manager, furnish assurance that Work not complete and accepted will be completed without delay.

1. As evidence of completion of this work, submit to the Architect the originals of the lists which were posted on site and which have been signed and dated item-by-item to indicate completion of all the work listed.

H. Remove remaining construction facilities, temporary controls, and tools.

I. Re-clean to standards specified for cleaning. Remove surplus materials and rubbish. Notify the Architect in writing that this cleaning has been completed.

J. Submit Final Application for Payment.

1.09 GUARANTEES

A. The work under this Contract, except as expressly excluded, and all subcontractors, severally and collectively, whether herein stipulated in each case or not, shall be guaranteed against faulty workmanship and/or material for a term of one year from date of Substantial Completion of the entire project. The provisions of the guarantee and/or guarantees shall be incumbent on all parties of the work, including the General Contractor, each Subcontractor, all material suppliers and all manufacturers whose products and/or equipment are incorporated into the project.

1.10 WARRANTIES

A. Submittal Time: Submit written warranties on request of Architect for designated portions of the Work where commencement of warranties other than date of Substantial Completion is indicated.

B. For work listed as "incomplete" at time of Substantial Completion, warranties required by the Contract Documents shall commence when such work is accepted as complete by the Architect, unless an exception is specifically made in the Certificate of Substantial Completion.

C. Submit properly executed warranties within 15 days of completion of the Work.

D. Assemble two executed copies of each warranty, bond, and service and maintenance contract applicable to the project. Include General Contractor's Project Warranty required by the General Conditions, and manufacturer's standard warranties and special warranties specified in individual specification Sections.

E. Organize warranty documents into an orderly sequence based on the table of contents of the Project Manual.

1. Bind warranties and bonds in heavy-duty, three-ring, vinyl-covered, loose-leaf binders, thickness to accommodate contents, and sized to receive 8-1/2-by-11-inch paper.
2. Identify each binder on the front and spine with the typed or printed title "WARRANTIES," Project name, and name of applicable Contractor.
3. Inside Title Page: Repeat information on the cover and identify applicable Owner's, name of responsible principal, address and telephone number.
4. Provide table of contents for each volume, arranged in systematic order, neatly typewritten.
5. Provide heavy paper dividers with plastic-covered tabs for each separate warranty. Mark tab to identify the product or installation. Provide a typed description of the product or installation, including the name of the product and the name, address, and telephone number of Installer.

6. Scan warranties and bonds and assemble complete warranty and bond submittal package into a single indexed electronic PDF file with links enabling navigation to each item. Provide table of contents at beginning of document.

F. Provide additional copies of each warranty to include in operation and maintenance manuals.

G. Submittal: Acceptance by the Architect is a prerequisite to Substantial Completion.

1. Submit one review copy of fully compiled warranties in final form. The Architect will review the copy and return it with comments.
2. Upon review and acceptance by the Architect, resubmit two corrected bound copies.

H. For items of Work delayed beyond date of Substantial Completion, provide updated submittal within ten days after acceptance, listing date of acceptance as start of warranty period.

1.11 OPERATIONS AND MAINTENANCE DATA

A. At least two (2) months prior to the time of turning over this contract to the Owner for use and occupancy or substantial completion, the General Contractor shall secure and deliver to the Owner via the Architect three (3) complete indexed files containing approved operating and maintenance manuals, shop drawings, training for the Owner personnel and other data as follows:

1. Operating manuals and operating instruction for the various systems.
2. Catalog data sheets for each item of mechanical or electrical equipment actually installed including performance curves, rating data and parts list.
3. Catalog sheets, maintenance manuals, and approved shop drawings of all mechanical or electrical equipment controls and fixtures with all details clearly indicated, including size of lamps.
4. Names, addresses and telephone numbers of repair and service companies for each of the major systems installed under this contract.
5. Refer to the respective SECTIONS for additional requirements.

B. Non-availability of operating and maintenance manuals or inaccuracies therein may be ground for cancellation and postponement of any scheduled final inspection by the Architect until such time as the discrepancy has been corrected and/or retainage of sufficient moneys to prepare same.

PART 2 PRODUCTS

2.01 MATERIALS

A. Cleaning Agents: Use cleaning materials and agents recommended by manufacturer or fabricator of the surface to be cleaned. Do not use cleaning agents that are potentially hazardous to health or property or that might damage finished surfaces.

1. Use cleaning products that meet Green Seal GS-37, or if GS-37 is not applicable, use products that comply with the California Code of Regulations maximum allowable VOC levels.

PART 3 EXECUTION

3.01 FINAL CLEANING

A. General: Perform final cleaning. Conduct cleaning and waste-removal operations to comply with local laws and ordinances and Federal and local environmental and antipollution regulations.

B. Cleaning: Employ experienced workers or professional cleaners for final cleaning. Clean each surface or unit to condition expected in an average commercial building cleaning and maintenance program. Comply with manufacturer's written instructions.

1. Complete the following cleaning operations before requesting inspection for certification of Substantial Completion for entire Project or for a portion of Project. This includes cleaning of the work of all finished trades where needed whether or not cleaning for such trades is included in their respective SECTIONS.

   a. Clean Project site, yard, and grounds, in areas disturbed by construction activities, including landscape development areas, of rubbish, waste material, litter, and other foreign substances and legally dispose of them.

   b. Sweep paved areas broom clean. Remove petrochemical spills, stains, and other foreign deposits.

   c. Rake grounds that are neither planted nor paved to a smooth, even-textured surface.

   d. Remove tools, construction equipment, machinery, and surplus material from Project site.

   e. Remove snow and ice to provide safe access to building.

   f. Clean exposed exterior and interior hard-surfaced finishes to a dirt-free condition, free of stains, films, and similar foreign substances. Avoid disturbing natural weathering of exterior surfaces. Restore reflective surfaces to their original condition.

   g. Remove debris and surface dust from limited access spaces, including roofs, plenums, shafts, trenches, equipment vaults, manholes, attics, and similar spaces.

   h. Sweep concrete floors broom clean in unoccupied spaces.

   i. Vacuum carpet and similar soft surfaces with HEPA-filtered vacuum, removing debris and excess nap; shampoo if visible soil or stains remain. Refer to SECTION 018113-SUSTAINABLE DESIGN REQUIREMENTS for requirements for meeting applicable sustainable design credits.

j. Clean transparent materials, including mirrors and glass in both sides of doors, windows, storefront, and curtain wall. Re-clean windows, storefront, and curtain wall initially cleaned under the Work of Division 08 Sections. Polish mirrors and glass, taking care not to scratch surfaces. Remove glazing compounds and other noticeable, vision-obscuring materials.

k. Remove labels that are not permanent.

l. Wipe surfaces of mechanical and electrical equipment, elevator equipment, and similar equipment. Remove excess lubrication, paint and mortar droppings, and other foreign substances.

m. Clean plumbing fixtures to a sanitary condition, free of stains, including stains resulting from water exposure.

n. Clean exposed surfaces of diffusers, registers, and grills.

o. Leave Project clean and ready for occupancy.

2. The Subcontractors for mechanical and electrical work, including Plumbing, Ventilating, Fire Protection, and Electrical Work shall respectively clean all materials and equipment installed by them, leaving all in a finished and clean state.

C. Construction Waste Disposal: Comply with waste disposal requirements in SECTION 017419 - CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL.

3.02 REPAIR OF THE WORK

A. Complete repair and restoration operations before requesting inspection for determination of Substantial Completion.

B. Repair or remove and replace defective construction. Repairing includes replacing defective parts, refinishing damaged surfaces, touching up with matching materials, and properly adjusting operating equipment. Where damaged or worn items cannot be repaired or restored, provide replacements. Remove and replace operating components that cannot be repaired. Restore damaged construction and permanent facilities used during construction to specified condition.

1. Remove and replace chipped, scratched, and broken glass, reflective surfaces, and other damaged transparent materials.

2. Touch up and otherwise repair and restore marred or exposed finishes and surfaces. Replace finishes and surfaces that that already show evidence of repair or restoration.

a. Do not paint over "UL" and other required labels and identification, including mechanical and electrical nameplates. Remove paint applied to required labels and identification.

3. Replace parts subject to operating conditions during construction that may impede operation or reduce longevity.

4. Replace burned-out bulbs, bulbs noticeably dimmed by hours of use, and defective and noisy starters in fluorescent and mercury vapor fixtures to comply with requirements for new fixtures.

3.03 WARRANTY INSPECTION

A. The General Contractor shall schedule a warranty inspection meeting at the project site no less than eight months and no more than (9) months after the Substantial Completion date(s) and shall provide an appropriate warranty retainage or warranty bond to ensure compliance for any deficient work.

END OF SECTION

SECTION 017823

OPERATION AND MAINTENANCE DATA

PART 1 - GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

1.02 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract and other DIVISION 01 Specification Sections, apply to this Section.

1.03 SUMMARY

A. Section includes administrative and procedural requirements for preparing operation and maintenance manuals, including the following:

1. Operation and maintenance documentation directory.
2. Operation manuals for systems, subsystems, and equipment,
3. Product maintenance manuals.
4. Systems and equipment maintenance manuals.

B. Related Sections:

1. SECTION 013300 - SUBMITTALS for submitting copies of submittals for operation and maintenance manuals.
2. SECTION 019113 – BUILDING COMMISSIONING REQUIREMENTS for verification and compilation of data into operation and maintenance manuals.
3. DIVISIONS 02 through 33 SECTIONS for specific operation and maintenance manual requirements for the Work in those Sections.

1.04 DEFINITIONS

A. System: An organized collection of parts, equipment, or subsystems united by regular interaction.

B. Subsystem: A portion of a system with characteristics similar to a system.

1.05 CLOSEOUT SUBMITTALS

A. The General Contractor shall secure and deliver to the operating agency via the Architect three (3) complete indexed files containing approved operating and maintenance manuals, shop drawings, training for the Owner personnel and other data.

B. Manual Content: Operations and maintenance manual content is specified in individual specification sections to be reviewed at the time of Section submittals. Submit reviewed manual content formatted and organized by this Section.

1. Where applicable, clarify and update reviewed manual content to correspond to modifications and field conditions.

C. Format: Submit operations and maintenance manuals in the following format:

1. PDF electronic file. Assemble each manual into a composite electronically-indexed file. Submit on digital media acceptable to Architect. All PDF files shall be native format and searchable.

a. Name each indexed document file in composite electronic index with applicable item name. Include a complete electronically-linked operation and maintenance directory.

b. Enable inserted reviewer comments on draft submittals.

2. Three paper copies. Include a complete operation and maintenance directory. Enclose title pages and directories in clear plastic sleeves.

D. Initial Manual Submittal: Submit one draft copy of each manual at least 30 days before commencing demonstration and training. Architect and Commissioning Agent will comment on whether general scope and content of manual are acceptable.

E. Final Manual Submittal: Submit three copies of each manual in final form prior to requesting inspection for Substantial Completion and at least 15 days before commencing demonstration and training. Architect and Commissioning Agent will return copy with comments.

1. Correct or modify each manual to comply with Architect's and Commissioning Agent's comments. Submit copies of each corrected manual within 15 days of receipt of Architect's and Commissioning Agent's comments and prior to commencing demonstration and training.

1.06 OPERATION AND MAINTENANCE DOCUMENTATION DIRECTORY

A. Prepare a single, comprehensive directory of operation and maintenance data and materials, listing items and their location to facilitate ready access to desired information.

B. Organization: Include a section in the directory for each of the following:

1. List of documents.
2. List of systems.
3. List of equipment.
4. Table of contents.

C. List of Systems and Subsystems: List systems alphabetically. Include references to operation and maintenance manuals that contain information about each system.

D. List of Subcontractors and Suppliers: List major subcontractors and suppliers with addresses and telephone numbers. Organize alphabetically by systems and subsystems, and alphabetically by name of entity.

E. List of Equipment: List equipment for each system, organized alphabetically by system. For pieces of equipment not part of system, list alphabetically in separate list.

F. Tables of Contents: Include a table of contents for each emergency, operation, and maintenance manual.

G. Identification: In the documentation directory and in each operation and maintenance manual, identify each system, subsystem, and piece of equipment with same designation used in the Contract Documents. If no designation exists, assign a designation according to ASHRAE Guideline 4, "Preparation of Operating and Maintenance Documentation for Building Systems."

1.07 REQUIREMENTS FOR OPERATION AND MAINTENANCE MANUALS

A. Organization: Unless otherwise indicated, organize each manual into a separate section for each system and subsystem, and a separate section for each piece of equipment not part of a system. Each manual shall contain the following materials, in the order listed:

1. Title page.
2. Table of contents.
3. Manual contents.

B. Title Page: Include the following information:

1. Subject matter included in manual.
2. Name and address of Project.
3. Name and address of Owner.
4. Date of submittal.
5. Name and contact information for the General Contractor.
6. Name and contact information for Project manager.
7. Name and contact information for Architect
8. Name and contact information for Commissioning Agent.
9. Names and contact information for major consultants to the Architect that designed the systems contained in the manuals.
10. Names and contact information for responsible subcontractors.
11. Name and contact information for relevant manufacturer’s representative.

12. Cross-reference to related systems in other operation and maintenance manuals.

C. Table of Contents: List each product included in manual, identified by product name, indexed to the content of the volume, and cross-referenced to Specification Section number in Project Manual.

1. If operation or maintenance documentation requires more than one volume to accommodate data, include comprehensive table of contents for all volumes in each volume of the set.

D. Manual Contents: Organize into sets of manageable size. Arrange contents alphabetically by system, subsystem, and equipment. If possible, assemble instructions for subsystems, equipment, and components of one system into a single binder.

1. Require each manufacturer to prepare or provide information on its own products and systems. Where equipment or systems are job-assembled by a Subcontractor, then require that Subcontractor to prepare maintenance instructions.

E. Manuals, Electronic Files: Submit manuals in the form of a multiple file composite electronic PDF file for each manual type required.

1. Electronic Files: Use electronic files prepared by manufacturer where available. Where scanning of paper documents is required, configure scanned file for minimum readable file size.

2. File Names and Bookmarks: Enable bookmarking of individual documents based upon file names. Name document files to correspond to system, subsystem, and equipment names used in manual directory and table of contents. Group documents for each system and subsystem into individual composite bookmarked files, then create composite manual, so that resulting bookmarks reflect the system, subsystem, and equipment names in a readily navigated file tree. Configure electronic manual to display bookmark panel upon opening file.

F. Manuals, Paper Copy: Submit manuals in the form of hard copy, bound and labeled volumes.

G. Binders: Heavy-duty, three-ring, vinyl-covered, loose-leaf binders, in thickness necessary to accommodate contents, sized to hold 8-1/2-by-II-inch paper; with clear plastic sleeve on spine to hold label describing contents and with pockets inside covers to hold folded oversize sheets.

1. If two or more binders are necessary to accommodate data of a system, organize data in each binder into groupings by subsystem and related components. Cross-reference other binders if necessary to provide essential information for proper operation or maintenance of equipment or system.

2. Identify each binder on front and spine, with printed title "OPERATION AND MAINTENANCE MANUAL," Project title or name, and subject matter of contents. Indicate volume number for multiple-volume sets.

3. Information for complex systems, such as elevators, may be separately bound. Include tabbed divider for system in primary binder and insert page directing user to separate volume; or include a clear cross reference in the table of contents.

4. Dividers: Heavy-paper dividers with plastic-covered tabs for each section of the manual. Mark each tab to indicate contents. Include typed list of products and major components of equipment included in the section on each divider, cross-referenced to Specification Section number and title of Project Manual.

5. Protective Plastic Sleeves: Transparent plastic sleeves designed to enclose diagnostic software storage media for computerized electronic equipment.

6. Supplementary Text: Prepared on 8-1/2-by-11-inch white bond paper.

7. Drawings: Attach reinforced, punched binder tabs on drawings and bind with text.

8. If oversize drawings are necessary, fold drawings to same size as text pages and use as foldouts.

9. If drawings are too large to be used as foldouts, fold and place drawings in labeled envelopes and bind envelopes in rear of manual_ at appropriate locations in manual, insert typewritten pages indicating drawing titles, descriptions of contents, and drawing locations.

1.08 OPERATION MANUALS

A. Content: In addition to requirements in this Section, include operation data required in individual Specification Sections and the following information:

1. System, subsystem, and equipment descriptions. Use designations for systems and equipment indicated on Contract Documents.

2. Performance and design criteria if the General Contractor is delegated design responsibility.

3. Operating standards.

4. Operating procedures.

5. Operating logs.

6. Wiring diagrams.

7. Control diagrams.

8. Piped system diagrams.

9. Precautions against improper use.

10. License requirements including inspection and renewal dates.

11. Equipment start up reports, balancing reports, field testing performance reports.

B. Descriptions: Include the following:

1. Product name and model number. Use designations for products indicated on Contract Documents.
2. Manufacturer's name.
3. Equipment identification with serial number of each component.
4. Equipment function.
5. Operating characteristics.
6. Limiting conditions.
7. Performance curves.
8. Engineering data and tests.
9. Complete nomenclature and number of replacement parts.

C. Operating Procedures: Include the following, as applicable:

1. Startup procedures.
2. Equipment or system break-in procedures.
3. Routine and normal operating instructions.
4. Regulation and control procedures.
5. Instructions on stopping.
6. Normal shutdown instructions.
7. Seasonal and weekend operating instructions.
8. Required sequences for electric or electronic systems.
9. Special operating instructions and procedures.

D. Systems and Equipment Controls: Describe the sequence of operation, and diagram controls as installed.

E. Piped Systems: Diagram piping as installed and identify color-coding where required for identification.

1.09 PRODUCT MAINTENANCE MANUALS

A. Content: Organize manual into a separate section for each product, material, and finish. Include source information, product information, maintenance procedures, repair materials and sources, and warranties and bonds, as described below.

B. Source Information: List each product included in manual identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual and drawing or schedule designation or identifier where applicable.

C. Product Information: Include the following, as applicable:

1. Product name and model number.
2. Manufacturer's name.
3. Color, pattern, and texture.
4. Material and chemical composition.
5. Reordering information for specially manufactured products.

D. Maintenance Procedures: Include manufacturer's written recommendations and the following:

1. Inspection procedures.
2. Types of cleaning agents to be used and methods of cleaning. Include recommendations for sustainable cleaning products complying with LEEDv4-S.
3. List of cleaning agents and methods of cleaning detrimental to product.
4. Schedule for routine cleaning and maintenance.
5. Repair instructions.

E. Repair Materials and Sources: Include lists of materials and local sources of materials and related services.

F. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.

1. Include procedures to follow and required notifications for warranty claims.

1.10 SYSTEMS AND EQUIPMENT MAINTENANCE MANUALS

A. Content: For each system, subsystem, and piece of equipment not part of a system, includes source information, manufacturers' maintenance documentation, maintenance procedures, maintenance and service schedules, spare parts list and source information, maintenance service contracts, and warranty and bond information, as described below.

B. Source Information: List each system, subsystem, and piece of equipment included in manual identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference. Specification Section number and title in Project. Manual and drawing or schedule designation or identifier where applicable.

C. Manufacturers' Maintenance Documentation: Manufacturers' maintenance documentation including the following information for each component part or piece of equipment:

1. Standard maintenance instructions and bulletins.
2. Drawings, diagrams, and instructions required for maintenance, including disassembly and component removal, replacement, and assembly.
3. Identification and nomenclature of parts and components.
4. List of items recommended to be stocked as spare parts.

D. Maintenance Procedures: Include the following information and items that detail essential maintenance procedures:

1. Test and inspection instructions.
2. Troubleshooting guide.
3. Precautions against improper maintenance.
4. Disassembly; component removal, repair, and replacement; and reassembly instructions.
5. Aligning, adjusting, and checking instructions.
6. Demonstration and training video recording, if available.

E. Maintenance and Service Schedules: Include service and lubrication requirements, list of required lubricants for equipment, and separate schedules for preventive and routine maintenance and service with standard time allotment.

1. Scheduled Maintenance and Service: Tabulate actions for daily, weekly, monthly, quarterly, semiannual, and annual frequencies.
2. Maintenance and Service Record: Include manufacturers' forms for recording maintenance.

F. Spare Parts List and Source Information: Include lists of replacement and repair parts, with parts identified and cross-referenced to manufacturers' maintenance documentation and local sources of maintenance materials and related services.

G. Maintenance Service Contracts: Include copies of maintenance agreements with name and telephone number of service agent.

H. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.

1. Include procedures to follow and required notifications for warranty claims.

1.11 ADDITIONAL DOCUMENTS REQUIRED BY SECTION 017839-PROJECT PROCEDURES

A. Documents to be included in O&M electronic PDF files:

1. Record Drawings
2. Record Submittals

1.12 MANUAL PREPARATION

A. Operation and Maintenance Documentation Directory: Prepare a separate manual that provides an organized reference to emergency, operation, and maintenance manuals.

B. Emergency Manual: Assemble a complete set of emergency information indicating procedures for use by emergency personnel and by Owner's operating personnel for types of emergencies indicated.

C. Product Maintenance Manual: Assemble a complete set of maintenance data indicating care and maintenance of each product, material, and finish incorporated into the Work.

D. Operation and Maintenance Manuals: Assemble a complete set of operation and maintenance data indicating operation and maintenance of each system, subsystem, and piece of equipment not part of a system.

1. Engage a factory-authorized service representative to assemble and prepare information for each system, subsystem, and piece of equipment not part of a system.
2. Prepare a separate manual for each system and subsystem, in the form of an instructional manual for use by Owner's operating personnel.

E. Manufacturers' Data: Where manuals contain manufacturers' standard printed data include only sheets pertinent to product or component installed. Mark each sheet to identify each product or component incorporated into the Work. If data include more than one item in a tabular format, identify each item using appropriate references from the Contract Documents. Identify data applicable to the Work and delete references to information not applicable.

1. Prepare supplementary text if manufacturers' standard printed data are not available and where the information is necessary for proper operation and maintenance of equipment or systems.

F. Drawings: Prepare drawings supplementing manufacturers' printed data to illustrate the relationship of component parts of equipment and systems and to illustrate control sequence and flow diagrams. Coordinate these drawings with information contained in record Drawings to ensure correct illustration of completed installation.

1. Do not use original project record documents as part of operation and maintenance manuals.

2. Comply with requirements of newly prepared record Drawings in SECTION 017839 - PROJECT RECORD DOCUMENTS.

G. Comply with SECTION 017700 - PROJECT CLOSEOUT for schedule for submitting operation and maintenance documentation.

END OF SECTION

SECTION 017839

PROJECT RECORD DOCUMENTS

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SCOPE OF WORK

A. Section includes administrative and procedural requirements for project record documents, including the following:

1. Record Drawings.
2. Record Specifications.
3. Record Product Data.
4. Miscellaneous record submittals.

1.03 RELATED WORK SPECIFIED ELSEWHERE

A. The following related work is to be performed under the designated SECTIONS:

1. SECTION 013500-ORDER OF CONDITIONS for Amesbury Planning Board As-Built Drawing requirements for monuments, inverts, utilities and stormwater systems.
2. SECTION 017700-PROJECT CLOSEOUT for general closeout procedures.
3. SECTION 017823-OPERATION AND MAINTENANCE DATA for operation and maintenance manual requirements.
4. Divisions 02 through 33 Sections for specific requirements for project record documents of the Work in those Sections.

1.04 CLOSEOUT SUBMITTALS

A. Record Drawings: Comply with the following:

1. Number of Copies: Submit copies of record Drawings as follows:
   a. Initial Submittal: Submit one paper copy set of marked-up record prints and one set of corrected record digital CAD files. Architect will indicate whether general scope of changes, additional information recorded, and quality of drafting are acceptable.

b. Final Submittal: Make changes requested by the Architect on the initial submittal. Submit three paper copy sets printed from record CAD files, and one set of record digital CAD files. Plot each Drawing, whether or not changes and additional information were recorded.

B. Record Specifications: Submit three paper copies and one annotated PDF electronic files of Project's Specifications, including addenda and contract modifications.

C. Record Product Data: Submit one paper copy of each submittal.

1. Where record Product Data are required as part of operation and maintenance manuals, submit duplicate marked-up Product Data as a component of manual.

D. Reports: Submit written report monthly indicating items incorporated in Project record documents concurrent with progress of the Work, including modifications, concealed conditions, field changes, product selections, and other notations incorporated.

PART 2 PRODUCTS

2.01 RECORD DOCUMENTS, GENERAL

A. Record Documents: Maintain two sets of record drawings, specifications and product data at the project site as Record Documents. Use one set exclusively for accurately and promptly recording as the work progresses actual installations wherever the work was installed other than as shown on the Contract Drawings or described in the specifications. The second set shall be used to indicate the profess of the work installed by coloring in the various pipe lines, ducts, and apparatus as needed. Maintain separate sets of drawings, specifications and product data for day-to-day use in constructing the Work.

B. Require Filed-Sub Bidders to maintain Record Drawings of Work done under their trade.

2.02 RECORD DRAWINGS

A. Record Prints: Maintain one set of marked-up paper copies of the Contract Drawings and Shop Drawings.

1. Preparation: Mark record prints to show the actual installation where installation varies from that shown originally. Require individual or entity who obtained record data, whether individual or entity is Installer, subcontractor, or similar entity, to provide information for preparation of corresponding marked-up record prints.
    a. Give particular attention to information on concealed elements that would be difficult to identify or measure and record later.
    b. Accurately record information in an acceptable drawing technique.
    c. Record data as soon as possible after obtaining it.
    d. Record and check the markup before enclosing concealed installations.
    e. Cross-reference record prints to corresponding archive photographic documentation.
2. Content: Types of items requiring marking include, but are not limited to, the following:
    a. Dimensional changes to Drawings.
    b. Revisions to details shown on Drawings.
    c. Depths of foundations below first floor.
    d. Locations and depths of underground utilities.
    e. Revisions to routing of piping and conduits.
    f. Revisions to electrical circuitry.
    g. Actual equipment locations.
    h. Duct size and routing.

i. Locations of concealed internal utilities.

j. Changes made by Change Order or Construction Change Directive.

k. Changes made following Architect's written orders, including Architect's Supplemental Instructions.

l. Revisions, supplemental information, and responses to Requests for Information.

m. Details not on the original Contract Drawings.

n. Field records for variable and concealed conditions.

o. Record information on the Work that is shown only schematically.

3. Mark the Contract Drawings and Shop Drawings completely and accurately. Utilize personnel proficient at recording graphic information in production of marked-up record prints.

4. Mark record sets with erasable, red-colored pencil. Use other colors to distinguish between changes for different categories of the Work at same location.

5. Mark important additional information that was either shown schematically or omitted from original Drawings.

6. Note Construction Change Directive numbers, alternate numbers, Change Order numbers, RFI numbers, and similar identification, where applicable.

B. Record Digital Data Files: Immediately before inspection for Certificate of Substantial Completion, review marked-up record prints with Architect. When authorized, prepare full sets of corrected digital data files of the Contract Drawings, as follows:

1. Formats

a. The General Contractor shall obtain one set of all Project Drawings of this Section on flash drives in DWG format. The CAD files shall be in the most current version of AutoCAD and Windows operating systems or other mutually agreeable formats. CAD Drawings shall maintain the established layering, color and pen thickness scheme. Make all modifications on the CAD Drawing files indicated on the marked up set of Record Drawings. Remove all superseded data to show the completed installation. These CAD files shall become the property of the Owner.

b. The record drawings required to be furnished under the terms of this Contract are shown in the List of Drawings at the front of the Project Manual **except** for the following Drawings: G.0.02; G.0.04-G.0.08, inclusive; 0.0.00-0.0.05, inclusive; 1.0.01-1.0.03, inclusive; and 5.9.01-5.9.03, inclusive.

2. Incorporate changes and additional information previously marked on record prints. Delete, redraw, and add details and notations where applicable.

3. Employ experienced CADD drafters to record information. Use same symbols and notations as used on original Contract Drawings. Delineate clearly, neatly, and accurately Work as it is installed.

4. Refer instances of uncertainty to Architect for resolution.

5. Architect will furnish General Contractor one set of digital data files of the Contract Drawings for use in recording information.

   a. Refer to SECTION 013300-SUBMITTALS for requirements related to use of Architect's digital data files.

   b. Architect will provide data file layer information. Record markups in separate layers.

6. Provide digital files to each Filed-Sub Bidder and require each to record their work in the Record Drawings.

C. Format: Identify and date each record Drawing; include the designation "PROJECT RECORD DRAWING" in a prominent location.

1. Record Prints: Organize record prints and newly prepared record Drawings into manageable sets. Bind each set with durable paper cover sheets. Include identification on cover sheets.

2. Format: Annotated PDF electronic file with comment function enabled.

3. Record Digital Data Files: Organize digital data information into separate electronic files that correspond to each sheet of the Contract Drawings. Name each file with the sheet identification. Include identification in each digital data file.

4. Identification: As follows:

   a. Project name.

   b. Date.

   c. Designation "PROJECT RECORD DRAWINGS."

   d. Name of Architect.

   e. Name of General Contractor.

D. Site utility drawings shall meet the City of Amesbury’s DPW requirements.

2.03 RECORD SPECIFICATIONS

A. Preparation: Mark Specifications to indicate the actual product installation where installation varies from that indicated in Specifications, addenda, and contract modifications.

1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.

2. Mark copy with the proprietary name and model number of products, materials, and equipment furnished, including substitutions and product options selected.

3. For each principal product, indicate whether record Product Data has been submitted in operation and maintenance manuals instead of submitted as record Product Data.

4. Note related Change Orders, record Product Data, and record Drawings where applicable.

5. Revisions, supplemental information, and responses to Requests for Information.

B. Format: Submit record Specifications as annotated PDF electronic file or scanned PDF electronic file(s) of marked up paper copy of Specifications.

2.04 RECORD PRODUCT DATA

A. Preparation: Mark Product Data to indicate the actual product installation where installation varies substantially from that indicated in Product Data submittal.

1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.

2. Include significant changes in the product delivered to Project site and changes in manufacturer's written instructions for installation.

3. Note related Change Orders, record Specifications, and record Drawings where applicable.

B. Format: Submit record Specifications as annotated PDF electronic file or scanned PDF electronic file(s) of marked up paper copy of Specifications.

1. Include record. Product Data directory organized by specification section number and title, electronically linked to each item of record Product Data.

PART 3 EXECUTION

3.01 RECORDING AND MAINTENANCE

A. Recording: Maintain one copy of each submittal during the construction period for project record document purposes. Post changes and modifications to project record documents as they occur; do not wait until the end of Project.

B. Maintenance of Record Documents and Samples: Store record documents and Samples in the field office apart from the Contract Documents used for construction. Do not use project record documents for construction purposes. Maintain record documents in good order and in a clean, dry, legible condition, protected from deterioration and loss. Provide access to project record documents for Architect's reference during normal working hours.

C. Keep marked-up sets for each trade up to date. Record new information within 48 hours of receipt, or of Work being installed.

1. Review Record Documents weekly, and certify to Owner that the Record Documents are current with each monthly Application for Payment.
2. The Owner shall have the right to retain that portion of the progress payment applicable to the unrecorded Work should if Record Documents are not current.

END OF SECTION

SECTION 017900

DEMONSTRATION AND TRAINING

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SCOPE OF WORK

A. This Section includes administrative and procedural requirements for instructing Owner's personnel for all applicable subcontractors, including the following:

1. Demonstration of operation of systems, subsystems, and equipment.
2. Training in operation and maintenance of systems, subsystems, and equipment.
3. ***Demonstration and training video*** recording for the following SECTIONS of work:
    a. SECTION 090005 – RESILIENT FLOORING
    b. SECTION 096566 – WOOD AND ATHLETIC FLOORING
    c. SECTION 096816 – CARPETING
    d. SECTION 114000 – FOODSERVICE EQUIPMENT
    e. SECTION 115213 – PROJECTION SCREENS
    f. SECTION 116143 – STAGE DRAPERY

1.03 RELATED WORK SPECIFIED ELSEWHERE

A. The following related work is to be performed under the designated SECTIONS:

1. SECTION 013100-PROJECT PROCEDURES for requirements for pre-instruction conferences.

2. DIVISIONS 02 through 33 Sections for specific requirements for demonstration and training for products in those Sections.

1.04 SUBMITTALS

A. Instruction Program: Submit two copies of outline of instructional program for demonstration and training, including a schedule of proposed dates, times, length of instruction time, and instructors' names for each training module. Include learning objective and outline for each training module.

1. At completion of training, submit 3 complete training manuals for Owner's use.

B. Qualification Data: For facilitator and instructor.

C. Attendance Record: For each training module, submit list of participants and length of instruction time.

D. Evaluations: For each participant and for each training module, submit results and documentation of performance-based test.

E. Report: Submit report of training. Include project name, name and address of General Contractor and subcontractor providing training, brief description of item or system which was the subject of the training, dates and times of training, and names and job description or title of Owner's personnel in attendance. Report briefly on activities occurring during training, including problems or questions (if any) and how these were resolved.

F. Demonstration and Training Video Recordings: Submit three copies within seven days of end of each training module.

1. Identification: On each copy, provide an applied label with the following information:

a. Name of Project.

b. Name and address of photographer.

c. Name of Architect.

d. Name of Contractor.

e. Date video was recorded.

f. Description of vantage point, indicating location, direction (by compass point), and elevation or story of construction.

2. Transcript: Prepared on 8-1/2-by-11-inch paper, punched and bound in heavy-duty, 3-ring, vinyl-covered binders. Mark appropriate identification on front and spine of each binder. Include a cover sheet with same label information as the corresponding video. Include name of Project and date of video on each page.

1.05 QUALITY ASSURANCE

A. Facilitator Qualifications: A firm or individual experienced in training or educating maintenance personnel in a training program similar in content and extent to that indicated for this Project, and whose work has resulted in training or education with a record of successful learning performance.

B. Instructor Qualifications: A factory-authorized service representative, experienced in operation and maintenance procedures and training.

C. Photographer Qualifications: A professional photographer who is experienced photographing construction projects.

D. Pre-instruction Conference: Conduct conference at Project site to comply with requirements in SECTION 013100-PROJECT PROCEDURES. Review methods and procedures related to demonstration and training including, but not limited to, the following:

1. Inspect and discuss locations and other facilities required for instruction.

2. Review and finalize instruction schedule and verify availability of educational materials, instructors' personnel, audiovisual equipment, and facilities needed to avoid delays.

3. Review required content of instruction.

4. For instruction that must occur outside, review weather and forecasted weather conditions and procedures to follow if conditions are unfavorable.

1.06 COORDINATION

A. Coordinate instruction schedule with Owner's operations. Adjust schedule to minimize disrupting Owner's operations.

B. Coordinate instructors, including providing notification of dates, times, length of instruction time, and course content.

C. Coordinate content of training modules with content of approved emergency, operation, and maintenance manuals. Do not submit instruction program until operation and maintenance data has been reviewed and approved by Architect

PART 2 PRODUCTS

2.01 INSTRUCTION PROGRAM

A. Program Structure: Develop an instruction program that includes individual training modules for each system and equipment not part of a system, by individual Specification Sections, including but not limited to the following:

1. Motorized doors, including overhead coiling doors.
2. Equipment, including gymnasium equipment, projection screens, food-service equipment, and residential appliances.
3. Fire-protection systems, including fire alarm, and fire-suppression systems.
4. Conveying systems, including elevators.
5. Domestic water distribution system, including pumps, filtration system and hot water system.
6. Sewage system and equipment.
7. Heat generation, including boilers, pumps, and water distribution piping.
8. Refrigeration systems, including chillers, condensers, pumps, and distribution piping.
9. HVAC systems, including air-handling equipment, air distribution systems, and terminal equipment and devices.
10. HVAC instrumentation and controls.
11. Electrical service and distribution, including transformers, switchboards, panelboards, and motor controls.
12. Packaged engine generators, including transfer switches.
13. Lighting equipment and controls.
14. Stage curtain, lighting and A/V equipment.
15. Communication systems, including intercommunication, public address, clocks and programming, voice and data, and CATV equipment.
16. Intrusion detection, surveillance and access control systems.

B. Training Modules: Develop a learning objective and teaching outline for each module. Include a description of specific skills and knowledge that participant is expected to master. For each module, include instruction for the following:

1. Basis of System Design, Operational Requirements, and Criteria: Include the following:
   a. System, subsystem, and equipment descriptions.
   b. Performance and design criteria if Contractor is delegated design responsibility.
   c. Operating standards.
   d. Regulatory requirements.

e. Equipment function.
f. Operating characteristics.
g. Limiting conditions.
h. Performance curves.

2. Documentation: Review the following items in detail:
   a. Operations manuals.
   b. Maintenance manuals.
   c. Project Record Documents.
   d. Identification systems.
   e. Warranties and bonds.
   f. Maintenance service agreements and similar continuing commitments.

3. Emergencies: Include the following, as applicable:
   a. Instructions on meaning of warnings, trouble indications, and error messages.
   b. Instructions on stopping.
   c. Shutdown instructions for each type of emergency.
   d. Operating instructions for conditions outside of normal operating limits.
   e. Sequences for electric or electronic systems.
   f. Special operating instructions and procedures.

4. Operations: Include the following, as applicable:
   a. Startup procedures.
   b. Equipment or system break-in procedures.
   c. Routine and normal operating instructions.
   d. Regulation and control procedures.
   e. Control sequences.
   f. Safety procedures.
   g. Instructions on stopping.
   h. Normal shutdown instructions.
   i. Operating procedures for emergencies.
   j. Operating procedures for system, subsystem, or equipment failure.
   k. Seasonal and weekend operating instructions.
   l. Required sequences for electric or electronic systems.
   m. Special operating instructions and procedures.

5. Adjustments: Include the following:
   a. Alignments.
   b. Checking adjustments.
   c. Noise and vibration adjustments.
   d. Economy and efficiency adjustments.

6. Troubleshooting: Include the following:
    a. Diagnostic instructions.
    b. Test and inspection procedures.
7. Maintenance: Include the following:
    a. Inspection procedures.
    b. Types of cleaning agents to be used and methods of cleaning.
    c. List of cleaning agents and methods of cleaning detrimental to product.
    d. Procedures for routine cleaning
    e. Procedures for preventive maintenance.
    f. Procedures for routine maintenance.
    g. Instruction on use of special tools.
8. Repairs: Include the following:
    a. Diagnosis instructions.
    b. Repair instructions.
    c. Disassembly; component removal, repair, and replacement; and reassembly instructions.
    d. Instructions for identifying parts and components.
    e. Review of spare parts needed for operation and maintenance.

PART 3 EXECUTION

3.01 PREPARATION

A. Assemble educational materials necessary for instruction, including documentation and training module. Assemble training modules into a combined training manual.

B. Set up instructional equipment at instruction location.

3.02 INSTRUCTION

A. Facilitator: Engage a qualified facilitator to prepare instruction program and training modules, to coordinate instructors, and to coordinate between the General Contractor, Contractor, OPM and Owner for number of participants, instruction times, and location.

B. Engage qualified instructors to instruct Owner's personnel to adjust, operate, and maintain systems, subsystems, and equipment not part of a system.

1. Owner will furnish the General Contractor with names and positions of participants.
2. Presenter must be willing to be videotaped.

C. Scheduling: Provide instruction at mutually agreed on times. For equipment that requires seasonal operation, provide similar instruction at start of each season.

1. Schedule training with Owner, through Owner’s Project Manager, with at least 14 days' advance notice.

D. Evaluation: At conclusion of each training module, assess and document each participant's mastery of module by use of an oral performance-based test.

E. Cleanup: Collect used and leftover educational materials and remove from Project site. Remove instructional equipment. Restore systems and equipment to condition existing before initial training use.

F. General for All Applicable Subcontractors: Engage a qualified commercial videographer/photographer to record demonstration and training video. Record each training module separately. Include classroom instructions and demonstrations, board diagrams, and other visual aids, but not student practice.

1. At beginning of each training module, record each chart containing learning objective

G. Video Format: Provide high-quality DVD and electronic format: AVE, WMV, MOV or MP4 as chosen by the Owner. Video must be professional in nature with clear sound and images.

H. Recording: Mount camera on tripod before starting recording, unless otherwise necessary to show area of demonstration and training. Display continuous running time.

END OF SECTION

SECTION 018113

SUSTAINABLE DESIGN REQUIREMENTS

PART 1 GENERAL

1.01 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General Conditions and Division 01 Specification Sections, apply to this Section.

1.02 SUMMARY

A. Section includes general requirements and procedures for compliance with certain prerequisites and credits needed for Project to obtain "LEED Version 4 for Building Design and Construction: Schools" (LEED v4 BD+C: Schools) **Silver** certification based on USGBC's LEED v4 BD+C: Schools.

1. Specific requirements for LEED are also included in other Sections.
2. Some LEED prerequisites and credits needed to obtain LEED certification depend on product selections and may not be specifically identified as LEED requirements. Compliance with requirements needed to obtain LEED prerequisites and credits may be used as one criterion to evaluate substitution requests and comparable product requests.
3. A copy of the LEED Project checklist is attached at the end of this Section for information only.
    a. Some LEED prerequisites and credits needed to obtain the indicated LEED certification depend on aspects of Project that are not part of the Work of the Contract.
4. A copy of the LEED Materials Reporting Form is included at the end of this section.
5. Definitions included in the "LEED Version 4 for Building Design and Construction" (LEED v4 BD+C) Reference Guide and online amendments apply to this Section.

B. Related Requirements:

1. Section 01 33 00, Submittals
2. Section 01 50 00, Temporary Facilities and Controls
3. Section 01 74 19, Construction Waste Management.
4. Section 01 78 23, Operations and Maintenance Data
5. Section 01 81 19, Indoor Air Quality Requirements.
6. Section 01 91 13 General Commissioning Requirements

7. Divisions 2 through 33 for LEED requirements specific to the work of each of these sections. Requirements may or may not include reference to LEED.

1.03 DEFINITIONS

A. Bio-Based Materials: Materials that meet the Sustainable Agriculture Network's Sustainable Agriculture Standard. Bio-based raw materials shall be tested using ASTM D 6866 and be legally harvested, as defined by the exporting and receiving country.

B. CDPH Standard Method v1.1: California Department of Public Health (CDPH) Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, v. 1.1–2010, for the emissions testing and requirements of products and materials.

C. Chain-of-Custody (COC): A procedure that tracks a product form the point of harvest or extraction to its end use, including all successive stage of processing, transformation, manufacturing, a distribution.

D. Chain-of-Custody Certificates: Certificates signed by manufacturers and fabricators certifying that wood used to make products was obtained from forests certified by an FSC-accredited certification body to comply with FSC STD-01-001.

E. Composite Wood and Agrifiber: Products made of wood particles and/or plant material pressed and bonded with adhesive or resin such as particleboard, medium density fiberboard (MDF), plywood, wheatboard, strawboard, panel substrates, and door cores.

F. Corporate Sustainability Report: A third-party verified report that outlines the environmental impacts of extraction operations and activities associated with the manufacturer’s product and the product’s supply chain.

G. Environmental Product Declaration (EPD): An independently verified report based on life-cycle assessment studies that have been conducted according to a set of common rules for each product category and peer-reviewed.

1. Product-Specific Declaration: A product with a publicly available, critically reviewed life-cycle assessment conforming to ISO 14044 that has at least a cradle to gate scope.

2. Industry-Wide (Generic) EPD: Provide products with third-party certification (Type III), including external verification, in which the manufacturer is explicitly recognized as a participant by the program operator. EPD must conform to ISO 14025, 14040, 14044, and EN 15804 or ISO 21930 and have at least a cradle to gate scope.

3. Product-Specific Type III EPD: A product with a third-party certification, including external verification, in which the manufacturer is explicated recognized by the program operator. EPD must conform to ISO 14025, 14040, 14044, and EN 15804 or ISO 21930 and have at least a cradle to gate scope.

H. Extended Producer Responsibility (EPR): Measures undertaken by the maker of a product to accept its own and sometimes other manufacturers' products as postconsumer waste at the end of the products' useful life.

I. Health Product Declaration Open Standard (HPD): A standard format for reporting product content and associated health information for building products and materials.

J. Indoor Air Quality (IAQ) Management Plan: Plan developed by the Contractor to provide a healthy indoor environment for workers and building occupants during construction. Plan must meet or exceed the recommendations of the Sheet Metal and Air Conditioning Contractors National Association (SMACNA) "IAQ Guidelines for Occupied Buildings Under Construction."

K. Leadership Extraction Practices: Products that meet at least one of the responsible extraction criteria, which include: extended producer responsibility; bio-based materials; FSC wood products; materials reuse; recycled content; and other USGBC approved programs.

L. Material Cost: The dollar value of materials being provided to the site, after Contractor mark-ups, including transportation costs, taxes, fees, and shop labor, but excluding field equipment and field labor costs.

M. Materials Reuse: Reuse includes salvaged, refurbished, or reused products.

N. Multi-Attribute Optimization: Third party certified products that demonstrate impact reduction below industry average in at least three of the following six categories: global warming potential; stratospheric ozone depletion; acidification; eutrophication; tropospheric ozone creation; nonrenewable resource depletion.

O. Recycled Content: Recycled content is the sum of postconsumer recycled content plus one-half the preconsumer recycled content, based on cost.

1. "Postconsumer" material is defined as waste material generated by households or by commercial, industrial, and institutional facilities in their role as end users of the product, which can no longer be used for its intended purpose.

2. "Preconsumer" material is defined as material diverted from the waste stream during the manufacturing process. Excluded is reutilization of materials, such as rework, regrind, or scrap, generated in a process and capable of being reclaimed within the same process that generated it.

P. Regional Materials: Materials that are extracted, harvested, recovered, and manufactured within a radius of 100 miles from the Project site.

Q. Volatile Organic Compounds (VOC) Emissions Test: Refer to CDPH Standard Method v1.1 definition.

1.04 ADMINISTRATIVE REQUIREMENTS

A. Work of this project includes completed building and application for LEED certification. Work is not complete until Owner has accepted USGBC's final review of LEED certification.

1. Provide documentation required by LEED and LEED review.

B. Provide materials and procedures necessary to obtain LEED prerequisites and credits required in this Section. Other Sections may specify requirements that contribute to LEED prerequisites and credits. Refer to other sections for additional materials and procedures necessary to obtain LEED prerequisites and credits.

C. Respond to questions and requests for additional information from Architect and the USGBC regarding LEED credits until the USGBC has made its determination on the project's LEED certification application.

D. LEED Online Submittals: Upload LEED documentation submittal data directly to USGBC project "LEED Online" website. Complete online forms at least monthly and as necessary to document LEED credits for submittals required in this Section.

E. LEED Conference: Schedule and conduct a conference at a time convenient to Owner and Architect within 21 days prior to commencement of the work. Advise Architect, Owner's Commissioning Authority**,** and Owner's Project Manager of scheduled meeting dates.

1. Attendees: Authorized representatives of Owner, Owner's Commissioning Authority, Owner's Project Manager, Architect, and their consultants; Contractor and its superintendent; major subcontractors; suppliers; and other concerned parties shall attend the conference. Participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
2. Agenda: LEED goals for the project, Contractor's action plans, and discussion of targeted LEED Prerequisites and Credits.
3. Minutes: Record and distribute minutes to attendees and other entities with responsibilities for obtaining LEED Credits.

1.05 ACTION SUBMITTALS

A. General: Submit additional LEED submittals required by other Specification Sections.

1. Submit each LEED submittal simultaneously with applicable product submittal.

2. Where LEED credits require photographic documentation, take necessary photographs and include them with the submittal.

B. LEED Documentation Submittals:

1. General, LEED Materials Reporting Form: Project submittals must be accompanied by a completed LEED Materials Reporting Form. Submittal packages must also include highlighted documentation supporting the sustainability claims made on the LEED Materials Reporting Form.

2. SSc5, Heat Island Reduction: Product data for roof and non-roof hardscape products indicating compliance with solar reflectance index (SRI) and solar reflectance (SR) requirements.

3. EAp3, Building-Level Energy Metering: Product data for meters, sensors, and data collection system used to provide continuous metering of building energy-consumption performance.

4. EAc3, Advanced Energy Metering: Product data for meters, sensors, and data collection system used to provide continuous metering of individual energy-consumption performance of any individual energy end uses that represent 10% or more of the total annual consumption of the building.

5. MRp2/MRc5, Construction and Demolition Waste Management: Comply with submittal requirements of Section 017419 "Construction Waste Management and Disposal."

6. MRc2, Building Product Disclosure and Optimization: Environmental Product Declarations complying with LEED requirements.

a. Documentation should confirm EPD conforms with ISO 14205, 14040, 14044 and EN 15804 or ISO 21930.

b. EPD shall have at least Cradle to Gate scope.

c. Complete “LEED Materials Documentation Sheet” with MRc2 information for each product having an EPD.

7. MRc3, Building Product Disclosure and Optimization, Sourcing of Raw Materials: Option 2, Leadership Extraction Practices.

a. Extended Producer Responsibility: Product data and certification letter from product manufacturers, indicating participation in an extended producer responsibility program and statement of costs.

b. Bio-Based Materials: Product data and certification for bio-based materials, indicating that they comply with requirements. Include statement of costs.

c. Certified Wood: Product data and chain-of-custody certificates for products containing certified wood. Include statement indicating cost for each certified wood product.

d. Materials Reuse: Receipts for salvaged and refurbished materials used for Project, indicating sources and costs.

e. Recycled Content: Product data and certification letter from product manufacturers, indicating percentages by weight of postconsumer and preconsumer recycled content for products having recycled content. Include statement of costs.

f. Regional Content: Product data and certification letter from product manufacturers, indicating extraction, harvest, recovery, and manufacturer location and distance (miles) from the Project site.

8. MRc4, Building Product Disclosure and Optimization, Material Ingredients: Option 1, Material Ingredient Reporting.

   a. Material ingredient reports for products that comply with LEED requirements for material ingredient reporting, including but not limited to the following:

      1) Manufacturer Inventory.

      2) Health Product Declaration.

      3) Cradle to Cradle certifications.

      4) Declare product labels.

9. EQp2/EQc3/EQc4, Indoor Air Quality: Comply with submittal requirements of SECTION 018119-INDOOR AIR QUALITY REQUIREMENTS.

Product Category	VOC Content	Volume Used	General Emissions Compliance	Category Evaluation Compliance
a. Paints and coatings	X	X	X	
b. Adhesives and sealants	X	X	X	
Adhesives and sealants applicable to products in categories c, d, and f below.				
c. Flooring			X	
d. Products containing composite wood or agrifiber products or wood glues				X (ULEF, NAF)

e. Ceilings, walls, thermal, and acoustic insulation			X	X (Batt Insulation)
f. Exterior applied materials. (Healthcare and Schools projects only)	X	X		

1.06 INFORMATIONAL SUBMITTALS

A. Qualification Data: For LEED coordinator.

B. Project Materials Cost Data: Provide statement indicating total cost for materials used for Project. Costs exclude labor, overhead, and profit. Include breakout of costs for the following categories of items:

1. Mechanical.
2. Electrical.
3. Plumbing.
4. Wood construction materials.
5. Furniture.
6. Specialty items such as elevators and equipment.
7. Earthwork and exterior improvements, hard costs.

C. LEED Action Plan Components: Provide preliminary submittals within fourteen days of date established the Notice to Proceed indicating how the following requirements will be met:

1. MRp2/MRc5, Waste management plan, complying with SECTION 017419-CONSTRUCTION WASTE MANAGEMENT.
2. EQp2/EQ3/EQ4, Indoor air quality plan, complying with SECTION 018119-INDOOR AIR QUALITY REQUIREMENTS.

D. LEED Progress Reports: Concurrent with each Application for Payment, submit reports comparing actual construction and purchasing activities with LEED action plans for the following:

1. MRp2/MRc5, Waste reduction progress reports complying with SECTION 017419-CONSTRUCTION WASTE MANAGEMENT.
2. MRc2, Building product disclosure and optimization – environmental product declarations.
    a. LEEDv4 MR BPDO Calculator or equivalent MR Tracking Sheet monitoring the project's progress towards targeted LEED MR Credits. To be presented at construction meetings.

3. MRc3, Building product disclosure and optimization – sourcing of raw materials.

   a. Option 2:

      1) Extended producer responsibility.

      2) Bio-based materials.

      3) Certified wood products.

      4) Materials reuse.

      5) Recycled content.

         AND additionally for any product meeting at least one of attributes 1-5 above:

      6) Regional content.

   b. LEEDv4 MR BPDO Calculator or equivalent MR Tracking Sheet monitoring the project's progress towards targeted LEED MR Credits. To be presented at construction meetings.

4. MRc4, Building product disclosure and optimization – material ingredients.

   a. LEEDv4 MR BPDO Calculator or equivalent MR Tracking Sheet monitoring the project's progress towards targeted LEED MR Credits. To be presented at construction meetings.

5. EQc2, Low emitting materials.

   a. LEEDv4 Low Emitting Materials Calculator or equivalent Low Emitting Materials Tracking Sheet monitoring the project's progress towards targeted LEED Indoor Environmental Quality Credits. To be presented at construction meetings.

6. EQc3, Indoor air quality, during construction, complying with SECTION 018119-INDOOR AIR QUALITY REQUIREMENTS.

7. EQc4, Indoor air quality assessment, complying with SECTION 018119-INDOOR AIR QUALITY REQUIREMENTS.

1.07 QUALITY ASSURANCE

A. LEED Coordinator: Engage an experienced LEED-Accredited Professional to coordinate LEED requirements. LEED coordinator may also serve as waste management coordinator.

PART 2 PRODUCTS

2.01 MATERIALS, GENERAL

A. Provide products and procedures necessary to obtain LEED credits required in this Section. Although other Sections may specify some requirements that contribute to LEED credits, the Contractor shall determine additional materials and procedures necessary to obtain LEED credits indicated. Contractor to determine a combination of credit options best suited for achieving credits required.

1. Exclusions: Special equipment, such as elevators, escalators, process equipment, and fire suppression systems, is excluded from the credit calculations. Also excluded are products purchased for temporary use on the project, like formwork for concrete.

B. Unauthorized Products: Materials and products required for work of this section shall not contain asbestos, lead, mercury, polychlorinated biphenyls (PCBs), or other hazardous materials identified by the Owner.

2.02 BUILDING PRODUCT DISCLOSURE AND OPTIMIZATION

A. MRc2, Building Product Disclosure and Optimization, Environmental Product Declarations (EPD): Option 1. Provide at least 20 permanently installed products (sourced from at least 5 different manufacturers) which meet one of the disclosure criteria:

1. Product-Specific Declaration: Valued as one quarter (1/4) of a product.
2. Industry-Wide (Generic) EPD: Valued as one half (1/2) of a product.
3. Product-Specific Type III EPD: Valued as one whole product.

B. MRc3, Building Product Disclosure and Optimization, Sourcing of Raw Materials: Option 2, Leadership Extraction Practices. Provide products that meet at least one of the responsible extraction criteria below for at least 25%, by cost, of the total value of permanently installed building products in the project:

1. Extended producer responsibility program.
2. Bio-based materials.
3. Certified Wood: Wood-based materials include, but are not limited to, the following materials when made from wood, engineered wood products, or wood-based panel products:
    a. Rough carpentry.
    b. Miscellaneous carpentry.
    c. Heavy timber construction.
    d. Wood decking.

e. Metal-plate-connected wood trusses.

f. Structural glued-laminated timber.

g. Finish carpentry.

h. Architectural woodwork.

i. Wood paneling.

j. Wood veneer wall covering.

k. Wood flooring.

l. Wood lockers.

m. Wood cabinets.

4. Recycled content.

a. Exceptions: Do not include fire protection, operational plumbing, operational mechanical, and operational electrical components, and specialty items, such as elevators and equipment, in the calculation.

5. AND Regional content, only for a product that meets at least one of the attributes 1-5 listed above.

6. Note: Structure and enclosure materials may not constitute more than 30% of the value of MRc3 compliant building products.

C. MRc4, Building Product Disclosure and Optimization, Material Ingredients: Option 1, Material Ingredient Reporting.

1. Use at least 20 different permanently installed products from at least five different manufacturers that use any of the following programs to demonstrate the chemical inventory of the product to at least 0.1% (1000 ppm), which meet one of the following disclosure criteria:

a. Manufacturer Inventory.

b. Health Product Declarations (HPDs).

c. Cradle to Cradle (C2C) certifications.

d. Declare product labels.

2.03 LOW-EMITTING MATERIALS

A. EQc2, Low-Emitting Materials, General Emissions Requirements: Products must demonstrate they have been tested and determined compliant in accordance with California Department of Public Health, (CDHP), Standard Method v1.1-2010, using the applicable exposure scenario. Manufacturer's documentation demonstrating compliance must state the range of total VOCs (tVOC) after 14 days measured as specified in the CDPH Standard Method v1.1 as follows:

1. 0.5mg/m3 or less,
2. between 0.5 and 5.0 mg/m3 or,
3. 0.50 mg/m3 or more.

B. EQc2, Low-Emitting Materials, Paints and Coatings, VOC content: For field applications that are inside the weatherproofing system, 100 percent of paints and coatings shall comply with the limits for VOC content when calculated according to the California Air Resources Board (CARB) 2007, Suggested Control Measure (SCM) for Architectural Coatings, **OR** the South Coast Air Quality Management District (SCAQMD) Rule 1113, effective June 3, 2011.

Product Type:	Allowable VOC Content (g/L):
Bond Breaker	350
Clear wood finishes - Varnish	275
Clear wood finishes – Sanding Sealer	275
Clear wood finishes - Lacquer	275
Colorant – Architectural Coatings, excluding IM coatings	50
Colorant – Solvent Based IM	600
Colorant - Waterborne IM	50
Concrete – Curing compounds	100
Concrete – Curing compounds for roadways & bridges	350
Concrete surface retarder	50
Driveway Sealer	50
Dry-fog coatings	50
Faux finishing coatings - Clear topcoat	100
Faux finishing coatings – Decorative Coatings	350
Faux finishing coatings - Glazes	350
Faux finishing coatings - Japan	350
Faux finishing coatings – Trowel applied coatings	50
Fire-proof coatings	150
Flats	50
Floor coatings	50
Form release compounds	100
Graphic arts (sign) coatings	150
Industrial maintenance coatings	100
Industrial maintenance coatings – High temperature IM coatings	420
Industrial maintenance coatings – Non-sacrificial anti-graffiti coatings	100
Industrial maintenance coatings – Zinc rich IM primers	100
Magnesite cement coatings	450
Mastic coatings	100

Metallic pigmented coatings	150
Multi-color coatings	250
Non-flat coatings	50
Pre-treatment wash primers	420
Primers, sealers and undercoaters	100
Reactive penetrating sealers	350
Recycled coatings	250
Roof coatings	50
Roof coatings, aluminum	100
Roof primers, bituminous	350
Rust preventative coatings	100
Stone consolidant	450
Sacrificial anti-graffiti coatings	50
Shellac- Clear	730
Shellac – Pigmented	550
Specialty primers	100
Stains	100
Stains, interior	250
Swimming pool coatings – repair	340
Swimming pool coatings – other	340
Traffic Coatings	100
Waterproofing sealers	100
Waterproofing concrete/masonry sealers	100
Wood preservatives	350
Low solids coatings	120

C. EQc2, Low-Emitting Materials, Paints and Coatings, General Emissions Requirement: For field applications that are inside the weatherproofing system, at least 90 percent of paints and coatings, measured by volume, shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

1. To comply with the General Emissions Requirement, products shall meet one of the following:
    a. UL Greenguard Gold Certified
    b. SCS Indoor Advantage Gold Certified
    c. MAS Certified Green
    d. Documentation that product meets the California Department of Public Health (CDHP), Standard Method v1.1-2010, using the applicable exposure scenario.

D. EQc2, Low-Emitting Materials, Adhesives and Sealants, VOC content: For field applications that are inside the weatherproofing system, 100 percent of adhesives and sealants shall comply with the limits for VOC content when calculated according to South Coast Air Quality Management District (SCAQMD) Rule #1168, requirements in effect on July 1, 2005, and rule amendment date January 7, 2005:

Architectural Applications:	Allowable VOC Content (g/L):
Indoor carpet adhesives	50
Carpet pad adhesives	50
Outdoor carpet adhesives	150
Wood flooring adhesives	100
Rubber floor adhesives	60
Subfloor adhesives	50
Ceramic tile adhesives	65
VCT and asphalt tile adhesives	50
Dry wall and panel adhesives	50
Cove base adhesives	50
Multipurpose construction adhesives	70
Structural glazing adhesives	100
Single ply roof membrane adhesives	250
Specialty Applications:	
PVC welding	510
CPVC welding	490
ABS welding	325
Plastic cement welding	250
Adhesive primer for plastic	550
Computer diskette manufacturing	350
Contact adhesive	80
Special purpose contact adhesive	250
Tire retread	100
Adhesive primer for traffic marking tape	150
Structural wood member adhesive	140
Sheet applied rubber lining operations specialty	850
Top and Trim adhesive	250
Substrate Specific Applications:	
Metal to metal substrate specific adhesives	30
Plastic foam substrate specific adhesives	50
Porous material (except wood) substrate specific adhesives	50
Wood substrate specific adhesives	30
Fiberglass substrate specific adhesives	80
Sealants:	
Architectural sealant	250
Marine deck sealant	760

Nonmember roof sealant	300
Roadway sealant	250
Single-ply roof membrane sealant	450
Other sealant	420
Sealant Primers:	
Architectural non-porous sealant primer	250
Architectural porous sealant primer	775
Modified bituminous sealant primer	500
Marine deck sealant primer	760
Other sealant primer	750
Other	
Other adhesives, adhesive bonding primers, adhesive primers or any other primers	250

1. Exception: The provisions of SCAQMD Rule 1168 do not apply to adhesives and sealants subject to state or federal consumer product VOC regulations.

E. EQc2, Low-Emitting Materials, Adhesives and Sealants, General Emissions Requirement: For field applications that are inside the weatherproofing system, at least 90 percent of adhesives and sealants, measured by volume, shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

F. EQc2, Low-Emitting Materials, Flooring, General Emissions Requirement: 100 percent of flooring shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

1. To comply with the General Emissions Requirement, products shall meet one of the following:
    a. FloorScore Certified (hard surface flooring and flooring adhesives)
    b. Green Label Plus certified (carpet, adhesive, and cushion)
    c. NSF/ANSI 332 certified (resilient flooring)
    d. Documentation that product meets the California Department of Public Health (CDHP), Standard Method v1.1-2010, using the applicable exposure scenario.

G. EQc2, Low-Emitting Materials, Composite Wood: 100 percent of composite wood, agrifiber products, and adhesives shall be made using ultra-low-emitting formaldehyde (ULEF) resins as defined in the California Air Resources Board's "Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products" or shall be made with no added formaldehyde (NAF).

H. EQc2, Low-Emitting Materials, Exterior Applied Materials, VOC content: For field applications that are exterior applied, at least 90 percent of adhesives, sealants, coatings, roofing, and waterproofing, measured by volume, shall comply with the limits for VOC content when calculated according to the California Air Resources Board (CARB) 2007, Suggested Control Measure (SCM) for Architectural Coatings, **AND** the South Coast Air Quality Management District (SCAQMD) Rule 1168, effective June 3, 2011 for adhesives and sealants.

1. Refer to Table under 2.03, B. above for allowable VOC content. Refer to CARB 2007 SCM and SCAQMD Rule 1168 for any products not listed.
2. The following materials are prohibited and do not count toward total percentage compliance:
    a. Hot-mopped asphalt for roofing.
    b. Coal tar sealants for parking lots and other paved surfaces.

I. Additional Low-Emitting Requirements:

1. If the applicable regulation requires subtraction of exempt compounds, any content of intentionally added exempt compounds larger than 1% weight by mass (total exempt compounds) must be disclosed.
2. If a product cannot reasonably be tested as specified above, testing of VOC content must comply with ASTM D2369-10; ISO 11890, part 1; ASTM D6886-03; or ISO 11890-2.
3. Methylene chloride and perchloroethylene may not be intentionally added in paints, coatings, adhesives, or sealants.

2.04 INDOOR WATER USE REDUCTION

A. WEp2, Indoor Water Use Reduction, Appliances: Provide ENERGY STAR or performance equivalent appliances.

B. WEp2/WEc2, Indoor Water Use Reduction, Plumbing Fixtures: Do not exceed water flow requirements indicated in Division 22 - PLUMBING. All newly installed toilets, urinals, private lavatory faucets, and showerheads that are eligible for labeling must be WaterSense labeled.

PART 3 EXECUTION

3.01 NONSMOKING BUILDING

A. EQp2, Environmental Tobacco Smoke Control: Smoking is not permitted within the building or within 25 feet (8 m) of entrances, operable windows, or outdoor-air intakes.

4. Refer to SECTION 018119-INDOOR AIR QUALITY REQUIREMENTS.

3.02 CONSTRUCTION WASTE MANAGEMENT

A. MRp2 MRc5, Construction and Demolition Waste Management: Comply with SECTION 017419-CONSTRUCTION WASTE MANAGEMENT.

3.03 CONSTRUCTION INDOOR-AIR-QUALITY MANAGEMENT

A. EQc3/EQc4, Construction Indoor Air Quality Management Plan: Comply with SECTION 018119-INDOOR AIR QUALITY REQUIREMENTS.

END OF SECTION

LEEDv4 Materials Reporting Form

New Amesbury Elementary School
193 Lions Mouth Road, Amesbury, MA

LEED® V4 MATERIALS REPORTING FORM

MATERIAL OR PRODUCT:
MATERIAL COST (LESS LABOR AND EQUIPMENT):

Contractor/Installer:	Manufacturer:
Address:	Manufacturer Address:
Contact:	

Signed by:_____ Date:_____

Company:_____

***Instructions to Contractor/Installer**:* Please complete the following information in all appropriate categories. Use one documentation sheet for each product or material (e.g. tile and grout each get their own sheet). Attach any supporting information to this sheet (including, but not limited to, cut sheets and letters from manufacturers to demonstrate compliance).

LEED MR Credit 2 – BPDO: Environmental Product Declarations
(For Division 3-10 & 31.60.00, 32.10.00, 32.30.00, 32.90.00 products and materials)

*Does the product have a manufacturer's **Environmental Product Declaration (EPD)**[1]?*

Product Manufacturer:	Product Name:	EPD Provided? (Y/N)

*Does the product contain **regionally**[2] **extracted, harvested, or recovered**[3] **materials**?*

Raw Materials:	Miles to Project

*Was the material/product **manufactured**[4] **and purchased regionally**?*

Location of Manufacturer (City/State):	
Distance from Manufacturer to Project Site (Miles)	
Location of Distributor (City/State)	
Distance from Distributor to Project Site (Miles)	

1. Environmental Product Declaration (EPD): a statement that the item meets the environmental requirements of ISO 14021-1999, ISO 14025-2006 and EN 15804, or ISO 21930-2007.
2. Regional: within 100 miles of project site as-the-crow-flies.
3. Extraction, harvest, or recovery location: Location of origin for virgin or recycled resources from which the building product's components are made. (i.e. before processing or manufacturing.)
4. Manufactured Location: Final assembly of components into the building product that is furnished or installed.

LEED MR Credit 3 – BPDO: Sourcing of Raw Materials
(For Division 3-10 & 31.60.00, 32.10.00, 32.30.00, 32.90.00 products and materials)

*Does the manufacturer participate in an **extended producer responsibility[5] program**?*

Product Manufacturer:	Product Name:	Extended Producer Responsibility Program? (Y/N)

*Is the product **bio-based[6]**? If so, does it meet the Sustainable Agriculture Network's (SAN) Sustainable Agriculture Standard?*

Product Manufacturer:	Product Name:	Meets SAN Sustainable Agriculture Standard? (Y/N)

*Does the material/product contain **FSC Certified wood**?*

Component:	Vendor Chain-of-Custody #	% Wood of Materials	% FSC Wood of Materials	Vendor invoice provided? (Y/N)

*Is the material/product **reused, salvaged or refurbished**?*

Component:	Reused, Salvaged or Refurbished Product? (Y/N)	Actual Cost Paid or Replacement Value (whichever is higher):

*Does the material/product contain **post-consumer[7] and/or pre-consumer[8] recycled content**?*

Percentage of post-consumer content:	
Percentage of pre-consumer content:	

*If only part of **the assembly contains recycled content**, fill in the chart below:*

Assembly Components:	Weight:	% Post-Con	% Pre-Con
Totals by weight (should equal 100% of assembly)			

*Does the product contain **regionally[2] extracted, harvested, or recovered[3] materials**?*

Raw Materials:	Miles to Project

*Was the material/product **manufactured[4] and purchased regionally[2]**?*

Location of Manufacturer (City/State):	
Distance from Manufacturer to Project Site (Miles)	
Location of Distributor (City/State)	
Distance from Distributor to Project Site (Miles)	

5. Extended producer responsibility: measures undertaken by the maker of a product to accept its own and sometimes other manufacturer's products as postconsumer waste at the end of the product's useful life.
6. Bio-based Material: commercial or industrial products that are composed in whole, or in significant part, of biological products, renewable agricultural materials (including plant, animal, and marine materials), or forestry materials. Bio-based raw materials must be tested using ATSM Test Method D6866 and be legally harvested, as defined by the exporting and receiving country. Leather and other animal hides are excluded.
7. Post-Consumer Recycled Content: Portion of material or product which derives from discarded consumer waste that has been recovered for use as a raw material (e.g. plastic water bottles, newspaper)
8. Pre-Consumer Recycled Content: Portion of material or product which derives from recovered industrial materials that are diverted from municipal solid waste for use in a different mfg. process, prior to use by a consumer

LEED MR Credit 4 – BPDO: Material Ingredients
(For Division 3-10 & 31.60.00, 32.10.00, 32.30.00, 32.90.00 products and materials)

*Does the product have a manufacturer's **Health Product Declaration (HPD)**[9]?*

Product Manufacturer:	Product Name:	HPD Provided? (Y/N)

*Does the product contain **regionally**[2] **extracted, harvested, or recovered**[3] **materials**?*

Raw Materials:	Miles to Project

*Was the material/product **manufactured**[4] **and purchased regionally**?*

Location of Manufacturer (City/State):	
Distance from Manufacturer to Project Site (Miles)	
Location of Distributor (City/State)	
Distance from Distributor to Project Site (Miles)	

LEED EQ Credit 2 – Low-Emitting Materials (Where applicable, regardless of Division)

*Does the material/product comply with all applicable standards for **VOC content and emissions**?*

Product Manufacturer:	Product Name:	TVOC Emissions[10] Range	VOC Content (g/l)	Source Provided? (Y/N)

*Is the materials/product **wet-applied**[11]?*

Product Manufacturer:	Product Name:	VOC Content (g/l)	Volume Used (L)	Source Provided? (Y/N)

*Is the material/product **interior applied** (inside the weatherproofing) **or exterior applied**? (Schools only)*

Product Manufacturer:	Product Name:	Interior	Exterior

*Is the **composite wood material/product ULEF or NAF**[12]?*

Product Manufacturer:	Product Name:	ULEF or NAF?	Source Provided? (Y/N)

*Does **batt insulation contain no added formaldehyde**, including no urea formaldehyde, phenol formaldehyde, and urea-extended phenol formaldehyde? (Schools only)*

Product Manufacturer:	Product Name:	No added formaldehyde? (Y/N)	Source Provided? (Y/N)

9. Health Product Declaration (HPD): a report of the materials or ingredients content of a building product and the associated health effects. Defining the content of this report is the Health Product Declaration Open Standard™
10. TVOC Emissions for Building products must be tested and determined compliant in accordance with California Department of Public Health (CDPH) Standard Method v1.1-2010.
11. All paints and coatings wet-applied on site must meet applicable VOC limits of the California Air Resources Board (CARB) 2007, Suggested Control Measure (SCM) for Architectural Coatings, or the South Coast Air Quality Management District (SCAQMD) Rule 1113, effective June 3, 2011. All adhesives and sealants wet-applied on site must meet the applicable chemical content requirements of SCAQMD Rule 1168, July 1, 2005, Adhesive and Sealant Applications, as analyzed by the methods specified in Rule 1168.
12. Composite Wood Evaluation as defined by the California Air Resources Board (CARB), Airborne Toxic Measure to Reduce Formaldehyde Emissions from Composite Wood Products Regulation, must be documented to have low formaldehyde emissions that meet the CARB ATCM for formaldehyde requirements for ultra-low-emitting formaldehyde (ULEF) resins or no added formaldehyde (NAF) resins.

SECTION 018119

INDOOR AIR QUALITY REQUIREMENTS

PART 1 GENERAL

1.01 RELATED DOCUMENTS

A. All of the Contract Documents, including General Conditions and Division 1 General Requirements, apply to the work of this section.

1.02 SUMMARY

A. Requirements for minimum indoor air quality (IAQ) performance standards during the period of construction.

B. The General Contractor shall develop, for Owner and Architect review, a Construction Indoor Air Quality Management Plan for this Project.

C. Sustainable Design Intent: Comply with project requirements intended to achieve sustainable design, measured and documented according to the LEED for Schools v.4 Green Building Rating System, of the US Green Building Council.

1.03 RELATED REQUIREMENTS

A. Examine Contract Documents for requirements that affect work of this Section. Other Specification Sections that directly relate to work of this Section include, but are not limited to:

1. Section 01 33 00, Submittals.
2. Section 01 50 00, Temporary Facilities and Controls.
3. Section 01 74 19, Construction Waste Management.
4. Section 01 81 13, Sustainable Design Requirements
5. Section 01 91 13, General Commissioning.
6. Division 22, 23 and 26
7. Divisions 3 through 14 Specification Sections; Specific requirements relating to indoor air quality for each Section.

1.04 PERFORMANCE REQUIREMENTS

A. Comply with minimum requirements of Sections 4 through 7 of ASHRAE 62.1-2010, Ventilation for Acceptable Indoor Air Quality and approved Addenda.

1. Coordinate with requirements of Section 01 91 13, General Commissioning, and Division 23 - HVAC.

B. Prevent exposure of building systems to environmental tobacco smoke during construction. At a minimum, take the following measures:

1. Do not allow smoking inside the project building.
2. Locate exterior designated smoking areas at least 25 feet away from entries, outdoor air intakes and operable windows during construction.

C. During construction meet or exceed the minimum requirements of the recommended Control Measures of the Sheet Metal and Air Conditioning National Contractors Association (SMACNA) IAQ Guidelines for Occupied Buildings under Construction, 2nd edition, 2007, ANSI/SMACNA 008-2008, Chapter 3.

D. Protect occupied portions of the building from transfer of dust and particulate matter, noise and odor emissions generated during construction in compliance with the minimum requirements of the recommended Control Measures of the Sheet Metal and Air Conditioning National Contractors Association (SMACNA) IAQ Guidelines for Occupied Buildings under Construction, 2nd edition 2007, ANSI/SMACNA 008-2008, Chapter 3.

E. Protect absorptive materials from moisture damage when stored on-site and after installation.

F. Use materials and products in compliance with the VOC content limits as established in LEED credit IEQ Low Emitting Materials.

G. During construction, comply with the following requirements, per LEED IEQ Construction Indoor Air Quality Management Plan:

1. Develop and implement a moisture control plan to ensure dry conditions will be maintained to protect absorptive materials stored on site. Include criteria for protecting the building from moisture intrusion and occupant exposure to mold spores.
2. If permanently installed air handlers are used during construction, filtration media with a Minimum Efficiency Reporting Value (MERV) of 8 shall be used at each return air grille, as determined by ASHRAE 52.2-2007. Protect active outdoor air intakes and return air grilles with applicable filtration media. Periodically inspect temporary media and replace as necessary. Replace filtration media immediately prior to occupancy.
3. Develop and implement a plan to reduce noise and emissions on the construction site; address the following:

a. Surrounding community noise and vibration impacts. Determine which areas on and adjacent to the site will require special protection from noise.

b. Construction Worker training and protective equipment. Determine construction activities that may require the use of protective gear or specialty equipment and properly train workers in their use and/or operation.

c. Source Reduction. Develop and implement policies to limit truck and equipment idling on site and to limit vibration and noise from demolition and construction activities

1.05 SUBMITTALS

A. Construction Indoor Air Quality (IAQ) Management Plan: the General Contractor shall submit a preliminary Construction IAQ Management Plan for review.

1. Within 21 calendar days after receipt of Notice to Proceed, the General Contractor shall submit to the Owner a finalized Construction IAQ Management Plan.

2. The proposed Plan shall comply with Division 23 – MECHANICAL requirements.

3. The proposed Plan shall include, but not be limited to, the following:

a. Protection of ventilation system components during construction.

b. Cleaning and replacing contaminated ventilation system components after construction, including filtration media.

c. Temporary ventilation.

d. Protection of absorptive materials from moisture damage when stored on-site and after installation.

g. Sequence of finish installation plan.

h. Selection of cleaning products and procedures to be used during construction and final cleaning.

i. Other items required by SMACNA IAQ Guidelines for Occupied Buildings under Construction, 2nd edition 2007, ANSI/SMACNA 008-2008 Chapter 3.

4. Coordinate Construction IAQ Management Plan with Owner's current IAQ management plans and procedures.

5. Comply with the requirements of LEED IEQ Construction Indoor Air Quality Management Plan

B. Material Safety Data Sheets (MSDS): Submit for materials with date clearly identified. MSDS must contain specific chemical content data identifying the percent of the total product mass represented by each listed chemical.

C. Product Data: Submit for each type of filtration media used during construction and installed immediately prior to occupancy, include and highlight MERV values the documentation provided.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Take special care to prevent accumulation of moisture on materials and within packaging during delivery, storage, and handling to prevent development of mold and mildew inside packaging and on products.

B. Immediately remove from site and properly dispose of materials showing signs of mold and mildew, including materials with moisture stains.

C. When not in use, store products in original sealed containers, in a designated location

PART 2 PRODUCTS

2.01 FILTRATION MEDIA

A. Filtration Media: Comply with ASHRAE 52.2-2007 and provide filtration media with compliant MERV ratings.

PART 3 EXECUTION

3.01 CONSTRUCTION IAQ MANAGEMENT PLAN IMPLEMENTATION

A. IAQ Manager: The General Contractor shall designate an on-site person responsible for instructing workers and overseeing and documenting results of the Construction IAQ Management Plan for the Project.

B. Distribution: The General Contractor shall distribute copies of the Construction IAQ Management Plan to the Job Site Foreman, each subcontractor, the Owner, and the Architect.

C. Instruction: The General Contractor shall provide on-site instruction of appropriate procedures and methods to be used by all parties at the appropriate stages of the Project.

D. Preconditioning: Allow products, which have odors and significant VOC emissions, to off-gas in specified dry, well-ventilated space for sufficient period to dissipate odors and emissions prior to delivery to Project.

1. Remove containers and packaging from materials prior to conditioning to maximize off-gassing of VOCs.
2. Condition products in ventilated warehouse or other building.

E. Coordinate Construction IAQ Management Plan with final cleaning as indicated in SECTION 017700-PROJECT CLOSEOUT.

END OF SECTION

SECTION 018300

MINIMUM WAGE RATES

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. The listing of CLASSIFICATIONS AND MINIMUM WAGE RATES as determined by the Commissioner of Labor and Industries under the provisions of Sections 27 and 27A, Chapter 149 of the General Laws as amended, are attached herewith and are hereby made a part of the Contract Documents.

B. The General Contractor and all Subcontractors shall comply with the requirements of Chapter 149 of the General Laws, Commonwealth of Massachusetts, Section 26 and 27D, inclusive, as amended.

C. It is the obligation of the Contractor to assure that the Contractor and all of its subcontractors comply with the requirements of the Massachusetts Prevailing Wage Law, MGL c.149 SS26-27H. The Contractor shall be responsible for all loss, cost and damage suffered or incurred by the Owner as a result of any stop work order or other enforcement action taken by the Attorney General under the authority of MGL c.149 S27, and shall release, indemnify, hold harmless and defend the Owner, the Architect, their officers, employees and consultants, from and against all claims, actions, suits, fines, or administrative proceedings arising out of or related to the violation by the Contractor or any subcontractor of the said Prevailing Wage Law (or, in the case of the Contractor's defense obligation, the claimed violation thereof).

D. It is the obligation of the Contractor to assure that the Contractor and all of its subcontractors comply with the requirements of the Davis-Bacon Act issued by the U.S. Department of Labor under the Davis-Bacon and Related Acts. The Contractor shall be responsible for all loss, cost and damage suffered or incurred by the Owner as a result of any stop work order or other enforcement action taken by the DOL's OFCCP, and shall release, indemnify, hold harmless and defend the Owner, the Architect, their officers, employees and consultants, from and against all claims, actions, suits, fines, or administrative proceedings arising out of or related to the violation by the Contractor or any subcontractor of the said Prevailing Wage Law (or, in the case of the Contractor's defense obligation, the claimed violation thereof).

E. When there is a conflict between the prevailing wage rate under the Prevailing Wage Rates determined by the Department of Labor Standards and to Federal (Davis-Bacon) Minimum Wage Rates, the worker will be paid at the higher wage rate.

THE COMMONWEALTH OF MASSACHUSETTS
EXECUTIVE OFFICE OF LABOR AND WORKFORCE DEVELOPMENT
DEPARTMENT OF LABOR STANDARDS

Prevailing Wage Rates

As determined by the Director under the provisions of the Massachusetts General Laws, Chapter 149, Sections 26 to 27H

ROSALIN ACOSTA
Secretary
MICHAEL FLANAGAN
Director

Awarding Authority: City of Amesbury

Contract Number:

City/Town: AMESBURY

Description of Work: New Amesbury Elementary School Project consists of new construction of a 98,196 SF elementary school and related site work.

Job Location: 193 Lion's Mouth Road, Amesbury, MA

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards ("DLS") if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F "rental of equipment" contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at http://www.mass.gov/dols/pw.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.
- Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and criminal penalties.

Additional Apprentice Information:

Minimum wage rates for apprentices employed on public works projects are listed above as a percentage of the pre-determined hourly wage rate established by the Commissioner under the provisions of the M.G.L. c. 149, ss. 26-27D. Apprentice ratios are established by the Division of Apprenticeship Training pursuant to M.G.L. c. 23, ss. 11E-11L.

All apprentices must be registered with the Division of Apprenticeship Training in accordance with M.G.L. c. 23, ss. 11E-11L.

All steps are six months (1000 hours.)
Ratios are expressed in allowable number of apprentices to journeymen or fraction thereof, unless otherwise specified.

** Multiple ratios are listed in the comment field.

SECTION 018623

INTEGRATED AUTOMATION PERFORMANCE REQUIREMENTS

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

C. System integration shall be responsibility of BAS sub-subcontractor and made an integral part of SECTION 250001.

1.02 SCOPE OF WORK

A. This Section shall comprise of the comprehensive monitoring of the Integrated Building Management Systems (IBMS).

1. Building Automation System (BAS)
2. Lighting Control System
3. Electrical System
4. Security System
5. Fire Alarm System
6. Plumbing System
7. Food Service Equipment System
8. Monitoring & Control Software: The Building Operating System (BOS), providing the comprehensive monitoring & integration platform for IBMS.

1.03 BASIS OF DESIGN

A. The purpose of this SECTION is to integrate individual building systems into a unified comprehensive management system for HVAC, electrical, plumbing, security and other building components identified herein.

1.04 OVERALL ARCHITECTURE OF IBMS

A. The Integrated Building Management System (IBMS) shall incorporate industry standard operating systems, communication networks and protocols. The system shall be designed to be completely modular in structure and freely expandable at any stage. Refer to system integration architecture diagrams on Drawings 8.5.07, 9.7.07 and 10.3.13.

1.05 RELATED WORK SPECIFIED ELSEWHERE

A. The following related work is to be performed under the designated SECTIONS:

1. Heating, ventilating and air conditioning systems: SECTION 230001-HVAC.
2. Building HVAC automation system: SECTION 250001-BUILDING AUTOMATION SYSTEM.
3. Lighting controls system, fire alarm system, meters and submeters, emergency generator, intrusion detection system, video surveillance system, door access controls and CO detection system: SECTION 260001-ELECTRICAL.
4. Gas meters, water meters, water submeters, domestic hot water heater, domestic hot water temperature monitoring, and other requirements: SECTION 220001-PLUMBING.
5. Ansul system, walk-in freezer, walk-in cooler, and other requirements: SECTION 114000-FOOD SERVICE EQUIPMENT.

1.06 SUBMITTALS

A. Submit complete shop drawings in accordance with the requirements of SECTION 013300-SUBMITTALS.

B. All shop drawings shall be prepared in both hard copy and electronic form (in a standard format such as AutoCAD 2012 or newer). In addition to the drawings, the Contractor shall furnish a CD/diskette containing the identical information. Drawings shall be B size or larger. See Section 230001-HVAC for additional requirements. Upon request, VAV INTERNATIONAL Engineers shall provide via email the CAD floor plan drawings for use by the BAS contractor. The drawings are diagrammatic and final floor plans and equipment locations are the responsibility of the BAS contractor.

C. Shop Drawings shall include:

1. A single integrated submittal for IBMS and Section 250001-BAS components of which are to be included in graphic form (refer to attachments) and in narrative form.
2. Work by others designated for integration under this SECTION shall be completely defined and include:
    a. Sequence of operation
    b. Points list
    b. Point list of all BACnet interface
    c. Control Diagrams.
    d. Work specified in other Sections shall submit a certificate of compatibility with IBMS requirements

3. Riser diagrams and floor plans depicting locations of all controllers, routers, hubs, workstations, and the like with associated network architecture and wiring. Floor plans used shall be the common files shared by all graphic components.

4. Individual schematics of each mechanical system showing all connected points with reference to their associated controller. “Typicals” to be allowed where appropriate.

5. Wiring diagrams detailing interconnecting devices such as fan and pump starts, freezestats, smoke detectors, relays and similar items, shall be provided for each system.

6. All HVAC systems being integrated shall have full information whether the controller is being supplied by BAS or supplied as part of the system. Specific examples are:

   a. Packaged Rooftop Units- provide BACnet interface points, provide external points being furnished, provide sequence of operation.

   b. Kitchen DCV- provide BACnet interface points, provide external points being furnished, provide other means of interface, include other components being interfaced (i.e. makeup air unit, Ansul, fire alarm), provide comprehensive diagrams and sequence of operation.

7. Written narratives for all sequences shall be included, edited for specific BAS system and specific equipment being controlled (i.e. ERU’s heat wheel frost and/or capacity control may be achieved through wheel speed modulation or through a bypass damper modulation- this contractor shall specify which type and specific sequence of operation). Any deviations from the original design shall be highlighted. A “Bill of Materials” list shall be provided for each system indicating part numbers, descriptions, manufacturer, and quantities of each component utilized.

D. Submittal data shall contain manufacturer’s data sheets on all hardware and software products required by the specification and sequences. Valve, damper, and airflow station schedules shall indicate size, type, configuration, capacity, maximum pressure rating, pressure drop, maximum differential pressure shut-off capabilities and name and location of all equipment served.

E. Software submittals shall contain narrative descriptions of sequences of operation, program listings, point lists, and a complete description of the graphics, reports, trends, alarms and configuration to be furnished with the workstation software. Provide complete information on user programming (commands, sequences, and similar items). Information shall be bound or in a three-ring binder with an index and tabs.

1.07 COMMISSIONING

A. Where indicated in the equipment or commissioning specifications, engage a factory-authorized service representative, to perform startup service in accordance with functional test sheets and seamless integration with the work of this SECTION 019113-GENERAL COMMISSIONING.

B. Complete installation and startup checks and functional tests according to SECTION 019113-GENERAL COMMISSIONING and manufacturers written instructions.

C. Naming System:

1. Air Handling Unit - AHU, Energy Recovery Unit - ERU, Boiler - B, Exhaust Fan - EF, Electric Unit Heater - EUH, Electric Wall Heater - EWH, Kitchen Exhaust Fan - KEF, Supply Fan - SF, Makeup Air Unit - MAU, Packaged Rooftop Unit- RTU, Chiller - CH, Chilled Beam - CB, Fan Coil Unit - FCU, Pump - P, Fintube Radiation - FTR, Variable Volume Terminal - VAV.

2. Each equipment shall be assigned a unique tag number. Certain equipments are tagged to indicate its capacity or type, and is not indicated dedicated with unique tag; such equipment shall be assigned to nearest major room number which it is serving. i.e., if a VAV terminal size 8 is serving a group of rooms including room 174, it shall be assigned a unique tag number of VAV-174.

3. Room names and numbers shall be the final designations chosen by Owner, which may be different from that are shown on the contract documents. It is responsibility of this contractor to coordinate with Architect to assure that the information is current.

1.08 TRAINING

A. The BAS Contractor shall provide both on-site and classroom training to the Owner's representative and maintenance personnel using the BAS acceptance testing documents.

B. On-site training shall also include a minimum of 40 hours of hands-on instruction geared toward the operation and maintenance of the systems. Duration and schedule of training sessions shall be as dictated by the Owner. Prior to training, the necessary lesson plans, training documents, handouts, and the like shall be provided with the curriculum outline.

1.09 OPERATION AND MAINTENANCE MANUALS

A. The operation and maintenance manuals shall contain all information necessary for the operation, maintenance, replacement, installation, and parts procurement for the entire BAS. This documentation shall include specific part numbers and software versions and dates. A complete list of recommended spare parts shall be included with the lead time and expected frequency of use of each part clearly identified. These manuals shall be delivered to the Owner's representative within two months of the final approved submittals before substantial completion. (Refer to SECTION 017823-OPERATION AND MAINTENANCE DATA.)

B. The preventative maintenance shall include all tasking, frequency, and special instructions required for a proactive preventative maintenance action plan.

C. Following project completion and testing, the BAS contractor shall submit "as-built" record drawings reflecting the exact installation of the system. The as-built documentation shall also include a copy of all application software both in written form and on CD/diskette.

1.10 WARRANTY

A. The IBMS contractor shall warrant the entire system (parts and labor) for 12 months after successful system acceptance testing is accepted by Owner's Representative. Beneficial use by the Owner may be an alternative method to begin the warrantee period (providing there is a minimum of 12 months left after successful system acceptance testing and system acceptance by Owner's Representative). During the warranty period, the IBMS contractor shall be responsible for all software and hardware upgrades and revisions during normal workday schedule, and within 48 hours of notification if solution cannot be resolved via the remote or web-site connection, to provide and maintain complete and workable building control systems.

B. Updates to the manufacturer's software shall be provided at no charge during the warranty period.

1.11 QUALIFICATIONS

A. Firm performing work as sub-subcontractor (IBMS) and (BAS) shall have a minimum continuous experience under the same name or successor name under the same ownership.

1. Twenty (20) years experience in installation and service of BAS systems.
2. Ten (10) years of experience in installation and service of Tridium Jace and Niagara platform-based integrations.
3. Ten (10) years experience in lighting control system integration in BAS using Niagara platform.
4. Ten (10) full time certified technicians (current staff) in office(s) within 50-mile radius to job sites.
5. Technicians shall have a minimum of ten (10) years experience with specified integration platforms as a certified technician.
6. Is a factory authorized installer of BAS system with a complete line of BACnet/IP components and system.
7. Reference list of the following shall be submitted:
    a. Three (3) open protocol BACnet based BAS installations of Buildings of 100,000 SF or more which have been operated for a minimum of five years after date of Substantial Completion.
    b. Three (3) municipalities with integrated buildings using Niagara platform, with minimum of five (5) buildings each of minimum of 20,000 SF, all of which have been operated for a minimum of two (2) years after date of Substantial Completion.
    c. Completed comprehensive BACnet/IP based BAS system in minimum of two building projects of over 10,000 SF in floor area.

PART 2 PRODUCTS

2.01 BUILDING AUTOMATION / BUILDING MANAGEMENT SYSTEM

A. General - Refer to SECTION 250001-BAS

B. BAS shall be based on Open Protocol non-proprietary BACnet/IP system down to its lowest components.

C. All components and software utilized in Integration shall be open-license non-proprietary without any restrictions.

D. Acceptable BAS System:

1. Distech
2. Honeywell
3. Johnson Controls

E. Basic Graphics Requirement:

1. First layer of graphics display shall be based on floor plans of the building that is common to all systems, with each space having room name and number.
2. The floor plan shall reside in a central file to be shared so that updated floor plan shall reflect in all subsystems.
3. The final graphics shall reflect “as-built” conditions, including but not limited to room numbers and names.

F. Remote Access

1. The integrated BAS system shall be accessible to VNS through web-based internet access without any special software.
2. Access to the web site shall be provided with varying degree of security clearances, and such access shall be recorded.
3. Remote access devices can be smart phone, tablet computer, laptop computer or desktop computer.

2.02 ELECTRICAL INTEGRATION

A. Lighting Control System:

1. Refer to SECTION 260001 for full information of the Lighting Control System provided under electrical.
2. The system shall communicate integrate via open protocol BACnet/IP.
3. Entire capability of the Lighting Control System, including but not limited to lighting zone controls, space lighting controls, scheduling, read/write, alarm, trend logging shall be integrated.

4. It is the intent of the Owner to have simplified control interface for their day to day usage. The simplified interface requirement shall be as directed by the Owner.

5. Certain interface to security system shall be defined at a later date. Currently, 3 set of contacts are provided for the intruder alert system which shall be monitored by IBMS. Upon intruder alarm, selected outdoor lights shall be energized along with selected indoor lights.

B. Security System

1. Refer to Section 26001 for full information of the Security System provided under electrical.

2. Intrusion Detection- 3 sets of dry contacts is provided. Single or group point assigning to each contact shall be determined by owner.

3. Card Access- 3 sets of dry contacts are provided. Single or group point assigning to each contact shall be determined by owner.

4. Electrical shall run unshielded #16 twisted pair wiring for each dry contact to the BAS panel designated by BAS.

5. Final wiring connections and programming by BAS.

6. It is envisioned that certain security alarm condition shall turn on selected outdoor and indoor lights, to be finalized by the City.

C. Fire Alarm System

1. Refer to Section 26001 for full information of the Fire Alarm System provided under electrical.

2. Three sets of dry contacts are provided. Single or group point assigning to each contact shall be determined by owner.

3. Full interface to the Amesbury Fire Department is by electrical.

D. Meters and Submeters

1. Refer to Section 26001 for full information of the smart panels with integral meters.

2. Pertinent panels provided by electrical have integral meters which shall be daisy chained, and the daisy chain wiring brought to the BAS panel designated.

3. Final wiring connection, programming and interface by BAS.

4. KW and KWh monitoring and trend logging for each group of submetering as defined by the City. Envisioned grouping is lighting, HVAC, and lights & pugs.

5. Demand limiting to be defined by the City. City shall define priority load shedding groups, and as the demand reaches the set point KW, load shedding shall occur based on the priority. It is envisioned that the load shedding shall involve lighting by zones and HVAC systems. BAS contractor shall work with the City to incorporate full load shedding programming into the BAS.

E. Generator

1. BAS to monitor run status of the generator and the transfer switches.

2.03 PLUMBING INTEGRATION

A. Refer to Section 220001- Plumbing for full information on items listed below.

B. City Water Meter

1. Plumbing is to provide new meters with a proper BAS interface, to trend log flow in GPM as well as GPD totalization.
2. In addition to the trend logging, the information shall alarm the unusually high consumption rate or flow during unoccupied hours to alert owner of the potential system leakage.

C. Gas Meters

1. Plumbing is to provide new gas meters.
2. Gas Consumption- plumbing shall provide new gas. BAS to wire, and trend log flow and totalization.
3. Gas Pressure- plumbing shall provide a ¾" tap with a valve. BAS to provide pressure sensor, wiring and programming to monitor the gas pressure. Alarm status shall be registered when gas pressure drops below 5.5" WG.

D. Domestic Hot Water

1. Digital mixing valves provides 16-point of data to be integrated into the BAS. BAS to provide trend logging.
2. When hot water supply temperature falls below 10°F below set point (refer to Plumbing Section for specific settings) for more than 5 minutes or when recirculating water temperature falls below 100°F, alarm shall be registered.
3. BAS contractor shall provide current transducer to monitor status of recirculation pump.

E. Elevator Sump Pump

1. BAS contractor shall provide current transducer to monitor status of elevator sump pump.

2.04 FOOD SERVICE INTEGRATION

A. Refer to SECTION 1140001- FOOD SERVICE EQUIPMENT for full information on items listed below.

B. Walk in Freezer and Cooler- are each provided with monitoring panel, which allows output for alarm status as well as to read temperatures. BAS to run wires, alarms, and provide trend logging. If the temperature deviates by 5 degrees from set point for more than 3 minutes, alarm status shall register.

C. Ansul System- is provided with a dry set of contacts. Electrical to run wiring to designated BAS panel. BAS to make final contact, trend log, and control pertinent selected HVAC equipment as required by Code and as directed by local Fire Department. It is envisioned that upon Ansul system discharge, kitchen exhaust fan continues to run but makeup air unit shall be shut off.

2.05 CIVIL

A. Refer to SECTION - CIVIL for full information on items listed below.

B. There are (2) duplex sewage pump system, each with a control panel. Electrical to run wiring to designated BAS panel. BAS to make final contact, trend log. Control panel to report pump statuses and high level alarms.

PART 3 EXECUTION

3.01 SYSTEM STARTUP AND ACCEPTANCE TESTING

A. BAS and other trade system shall be tested and commissioned independently to assure that it is working properly, and so certified by factory representatives, prior to the Integration process.

B. Other trades shall provide a full detail of interface requirement to the BAS/ System Integrator.

C. System integration is part of the Substantial Completion requirements.

D. Comply with commissioning requirements.

3.02 TRAINING

A. The BAS/ Integration Contractor shall provide both on-site and classroom training to the Owner's representative and maintenance personnel using the BAS acceptance testing documents.

B. On-site training shall also include a minimum of 40 hours of hands-on instruction geared toward the operation and maintenance of the systems. Owner shall dictate duration and schedule of the training sessions. Prior to training, the necessary lesson plans, training documents, handouts, and the like shall be provided with the curriculum outline.

C. Training shall also include remote access device usage, within minimum of 6 designated City employees, using smart phones, tablet computers, laptop and computers through web access. Simulation of alarm status alert to designated on-call person's smart phone, remote access, information retrieval, override, adjustments, or shut downs shall be reviewed through real time simulation.

D. All training sessions shall be professionally videotaped with high quality sound and copy of the recording provided to the City of Amesbury.

3.03 OPERATION AND MAINTENANCE MANUALS

A. The operation and maintenance manuals shall contain all information necessary for the operation, maintenance, replacement, installation, and parts procurement for the entire BAS. This documentation shall include specific part numbers and software versions and dates. A complete list of recommended spare parts shall be included with the lead time and expected frequency of use of each part clearly identified. These manuals shall be delivered to the Owner's representative within 2 months of the final approved submittals before substantial completion. (Refer to Section 017823-Operation and Maintenance Data.)

B. The preventative maintenance shall include all tasking, frequency, and special instructions required for a proactive preventative maintenance action plan.

C. Following project completion and testing, the BAS contractor shall submit “as-built” record drawings reflecting:

1. The exact installation of the system.
2. If the shop drawing was mark with any comments such comments shall also be integrated.
3. Reduced size plans showing locations of sensors (not including space sensors) such as duct DP sensors, pipe DP sensors, space static pressure sensors, and field control panels.
4. The as-built documentation shall also include a copy of all application software both in written form and on CD/diskette.

END OF SECTION

SECTION 019113

BUILDING COMMISSIONING REQUIREMENTS

PART 1 GENERAL

1.01 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 1 Specification Sections, apply to this Section.

B. All related Specification sections shall be used in conjunction with this Section.

C. OPR and BoD documentation prepared by the Owner and Architect / Engineer contain requirements that apply to this section.

1.02 SUMMARY

A. This section includes requirements for commissioning during the construction phase, functional testing phase and the building turnover phase. Includes requirements for all specified and associated systems, subsystems and equipment. The intent of this section is to specify the commissioning responsibilities of the Contractor, HVAC Subcontractor, TAB Subcontractor, Automated Temperature Controls Subcontractor, Plumbing Subcontractor, Electrical Subcontractor and the Fire Protection Subcontractor. The Contractor will assure participation and cooperation of his subcontractors for the commissioning process. The Commissioning Authority for this project will be hired by the Owner.

B. This project has been designed to meet the requirements of the Silver rating level for the US Green Building Council's Leadership in Energy and Environmental Design for Building Design & Construction – Schools (LEED BD&C – Schools) (Version 4) Green Building Rating System. This commissioning section includes all requirements of the LEED program for EA Prerequisite 1, Fundamental Commissioning of the Building Energy Systems and EA Credit 3, Enhanced Commissioning as described in the Energy and Atmosphere section. These requirements will be adhered to, regardless of whether the owner chooses to formally register this project with USGBC.

C. The Commissioning Authority is not responsible for construction means, methods, coordination between trades, job safety or any other related management function on the job site.

1.03 DEFINITIONS

A. Architect: Includes Architect identified in the Contract for Construction between Owner and Contractor.

B. Automated temperature controls (ATC): building management system and components providing automated control of related environmental and/or process systems and equipment.

C. Basis of Design (BoD): A document that records concepts, calculations, decisions, and product selections used to meet the OPR and to satisfy applicable regulatory requirements, standards, and guidelines. The document includes both narrative descriptions and lists of individual items that support the design process.

D. Commissioning Plan: A document that outlines the organization, schedule, allocation of resources, and documentation requirements of the commissioning process.

E. Contractor: The prime Contractor identified in the Contract for Construction between Owner and Contractor.

F. Construction Checkout Documents / Pre-Functional Checklists: The CxA will produce pre-functional checklists that can be used by the Contractor / Subcontractors prior to the start of functional testing. These checklists are tools to help the Contractor and Subcontractors verify that the installation complies with the Contract Documents. Any deficiencies that are found can then be corrected early in the process when the Contractors are fully mobilized on the site. The pre-functional checklists will be created for all equipment included in the scope of the commissioning process.

G. Commissioning Authority (referred to herein as the CxA): The individual or group responsible for executing the commissioning process.

H. Engineering Professionals: Includes the Engineers identified in the Contract for Construction between Owner and Contractor, responsible for design of HVAC, plumbing, fire protection, electrical, communications, controls for HVAC systems and other related systems.

I. Leadership in Energy and Environmental Design for Building Design & Construction - Schools (LEED BD&C - Schools): A rating system provided by the U.S. Green Building Council that rates the environmentally friendly and energy efficient performance of a newly renovated building based on established guidelines.

J. Mock-up (system or component): A system, or component of a system, that is constructed ahead of other similar pieces of equipment that allows the commissioning agent and the installing contractors the ability to evaluate the installation. It allows early testing of system / equipment applications, user interfaces, component interaction techniques and check out of the building automation logic.

K. Owner's Project Requirements (OPR): A document that details the functional requirements of a project and the expectations of how it will be used and operated. These include Project goals, measurable performance criteria, cost considerations, benchmarks, success criteria, and supporting information.

L. Subcontractor: Individual contractors responsible to the Contractor for installation of specific systems to be commissioned.

M. Systems, Subsystems, Equipment, and Components: Where these terms are used together or separately, they shall mean "as-built" systems, subsystems, equipment, and components.

N. Testing, Adjusting, and Balancing (TAB): Testing, adjusting and balancing of air and water systems, subsystems, equipment and components per the contract documents.

1.04 COMMISSIONING TEAM

A. Members Appointed by Contractor(s): Individuals, each having the authority to act on behalf of the entity he or she represents, explicitly organized to implement the commissioning process through coordinated actions. The commissioning team will consist of, but not be limited to, representatives of each Contractor, including Project superintendent and subcontractors, installers, suppliers, and specialists deemed appropriate by the CxA.

B. Members Appointed by Owner or Owner representative:

1. The CxA: Owner or Owner representative has engaged the CxA under a separate contract.
2. Representatives of the Owner or Owner representative including facility users and operation and maintenance personnel.
3. Architect and engineering design professionals.

1.05 OWNER'S or OWNER'S REPRESENTATIVES RESPONSIBILITIES

A. Provide the OPR and BoD documentation for use in developing the commissioning plan, checklists and testing plans, operation and maintenance training plan, and a systems manual.

B. Assign operation and maintenance personnel and schedule them to participate in commissioning team activities, including but not limited to, the following:

1. Coordination and testing meetings.
2. Training in operation and maintenance of systems, subsystems, and equipment.
3. Demonstration of operation of systems, subsystems and equipment.
4. Review system performance and recent building history approximately 10 months into the 12 month warranty period with the CxA.

1.06 COMMISSIONING RESPONSIBILITIES

A. The responsibilities of various parties in the commissioning process are provided in this section. It is noted that the services for the Owners Project Manager, Architect, HVAC mechanical and electrical designers/engineers, and Commissioning Authority are not provided for in this contract. That is, the Contractor is not responsible for providing their services. Their responsibilities are listed here to clarify the commissioning process.

B. All Parties:

1. Follow the Commissioning Plan: (The commissioning plan is an informational document that clarifies how the commissioning process will proceed. This plan is developed by the Commissioning Authority and outlines the responsibilities of the Commissioning Authority, Owner as well as what services will be required of the Design Team, Contractor and their subcontractors. This document fully describes the processes that will be used to carry out commissioning.)
2. Attend commissioning scoping meeting and additional meetings, as necessary.

C. Architect / Engineer - Construction and Acceptance Phase:

1. The owner manages the Commissioning Authority contract.
2. Attend the commissioning scoping meeting and selected commissioning team meetings.
3. Perform normal submittal review, construction observation as contracted.
4. Coordinate resolution of system deficiencies identified during commissioning, according to the contract documents.
5. Provide the Commissioning Authority with a copy of all bulletins, sketches, RFIs, addenda and any project document updates to help keep the commissioning plan up to date.

D. Commissioning Authority - Construction and Acceptance Phase:

1. The Commissioning Authority is not responsible for design concept, design criteria, compliance with codes, design or general construction scheduling, cost estimating, or construction management. The Commissioning Authority may assist with problem solving, non-conformance or deficiencies but, ultimately, that responsibility resides with the general contractor and the A/E. The primary role of the Commissioning Authority is to develop and coordinate the testing plan manual, to observe and document performance – which systems are functioning in accordance with the documented design intent and in accordance with the Contract Documents. The Contractors will provide all tools or the use of tools to start, checkout and functionally test equipment and systems, except for specified testing with portable data-loggers, which will be supplied and installed by the Commissioning Authority.
2. Coordinates and directs the commissioning activities in a logical, sequential and efficient manner using consistent protocols and forms, centralized documentation, clear and regular communications and consultations with all necessary parties, frequently updated timelines and schedules and technical expertise.
3. Coordinate the commissioning work and, with the Contractor, ensure that commissioning activities are being scheduled into the master schedule.
4. Plan and conduct a commissioning scoping meeting and other commissioning meetings.
5. Request and review additional information required to perform commissioning tasks, including O&M materials, contractor start-up and checkout procedures.
6. Before startup, gather and review the current control sequences and interlocks and work with contractors and design engineers until sufficient clarity has been obtained, in writing, to be able to write detailed testing procedures.
7. Review normal Contractor submittals applicable to systems being commissioned for compliance with commissioning needs, concurrent with the A/E reviews.
8. Write and distribute pre-functional tests and checklists.
9. Overview the development of an enhanced start-up and initial systems checkout plan with Subs.
10. Perform site visits to observe component and system installations. Attends selected planning and job-site meetings to obtain information on construction progress. Review construction meeting minutes for revisions/substitutions relating to the commissioning process. Assist in resolving any discrepancies.

11. Witnessing the cleaning, flushing and chemical treatment of the hydronic systems prior to balancing.
12. Witnessing any ductwork pressure testing and cleaning. Verifying adherence of the Indoor Air Quality during construction by LEED EQ Credit 3.1.
13. Verify pre-functional tests and checklist completion by reviewing pre-functional checklist reports and by selected site observation and spot-checking.
14. Verify systems startup by reviewing start-up reports and by selected site observation.
15. Review Testing Adjustment and Balancing execution plan and sample report.
16. Verify air and water systems balancing by reviewing completed reports and by selected site observation.
17. Write the functional performance test procedures for equipment and systems.
18. Coordinate, witness and approve “mock-up” installations of systems and equipment as defined in this division, section 3.03.
19. Analyze any functional performance trend logs and monitoring data to verify performance.
20. Coordinate witness and approve manual functional performance tests performed by installing contractors. Coordinate retesting as necessary until satisfactory performance is achieved.
21. Maintain a master deficiency and resolution log and a separate testing record. Provide the Contractor with written progress reports and test results with recommended actions.
22. Oversee the training of the Owner’s operating personnel.
23. Review of equipment warranties.
24. Review and approve the preparation of the O&M manuals (one master set).
25. Development of a systems training manual.
26. Provide a final commissioning report.
27. Organize and perform seasonal or deferred testing of equipment and systems.
28. Organize and perform 10th month warranty review of systems and equipment.

E. Project Manager – Owner's Representative – Construction and Acceptance Phase:

1. Facilitate the coordination of the commissioning work by the Commissioning Authority, and, with the Contractor to ensure that commissioning activities are being scheduled into the master schedule by the Contractor well in advance.
2. Review the final Commissioning Plan.
3. Attend a commissioning scoping meeting and other commissioning team meetings.
4. Perform the normal review of contractor submittals.
5. Furnish a copy of all construction documents, addenda, change orders and approved submittals and shop drawings related to commissioned equipment to the Commissioning Authority.
6. Review the functional performance test procedures submitted by the Commissioning Authority, prior to testing.
7. When necessary, observe and witness pre-functional checklists, startup and functional testing of selected equipment.
8. Review commissioning progress and deficiency reports (Commissioning Portal) and respond to issues assigned.
9. Coordinate the resolution of non-compliance and design deficiencies identified in all phases of commissioning.
10. A representative will attend a commissioning scoping meeting and other necessary meetings scheduled by the Commissioning Authority to facilitate the commissioning process.
11. Arrange for facility operating and maintenance personnel to attend various field commissioning activities including equipment & system "mock-ups" and field training sessions.

F. General Contractor (GC) – Construction and Acceptance Phase:

1. General Contractor shall assign representatives with expertise and authority to act on its behalf and shall schedule them to participate in and perform commissioning process activities including, but not limited to, the following:
    a. Evaluate performance deficiencies identified in test reports and, in collaboration with entity responsible for system and equipment installation, recommend corrective action.
    b. Provide the CxA with a detailed and accurate construction schedule updated on a monthly basis. Coordinate scheduling of commissioning activities with the CxA and include them in the construction schedule.

c. Provide a schedule for equipment submittals, installation manual submittals, operation and maintenance data submittals, equipment start-up, and testing to CxA for incorporation into the commissioning plan. Update schedule on a monthly basis throughout the construction period.

d. Provide CxA with copies of all approved change orders or other modifications impacting construction when approved.

e. Participate in construction phase coordination meetings.

f. Participate in commissioning inspections.

g. Ensure accurate completion of construction checkout documents for all systems to be commissioned prior to verification site visits by the CxA.

h. Certify readiness of systems to be commissioned prior to functional performance testing.

i. Participate in functional performance testing of systems to be commissioned.

j. Resolving issues identified during commissioning and coordinating correction of deficiencies. Ensure responses to open issues within two weeks of being posted via online tracking database (Commissioning Portal).

k. Participate in operation and maintenance planning and verification.

l. Participate in operation and maintenance training sessions.

m. Participate in final review of equipment and systems and participate in final acceptance meeting.

n. Certify the work is complete and systems are operational according to the contract documents, including calibration of controls and any instrumentation.

o. Coordinate subcontractor commissioning activities.

p. Review and approve final commissioning documentation.

q. Assist in coordinating the Subcontractors, as needed, to perform testing of systems and equipment as it relates to project phasing.

r. Assist in coordinating the Subcontractors, as needed, to perform deferred or opposite seasonal testing of systems and equipment.

s. Assist in coordinating the Subcontractors to resolve issues discovered during the system performance review 10 months into the 12 month warranty period.

t. Assist in coordinating personnel and providing documentation, as needed, to meet the LEED-NC requirements.

u. Coordinate and arrange for mock-up systems and equipment as defined in this division, section 3.03.

G. Subcontractors shall assign representatives with the expertise and the authority to act on behalf of the entity responsible for installation of systems to be commissioned who shall participate in and perform commissioning team activities including, but not limited to, the following:

1. Provide a schedule for equipment submittals, installation manual submittals, operation and maintenance data submittals, equipment start-up, and testing to CxA for incorporation into the commissioning plan. Update schedule on a monthly basis throughout the construction period.
2. Participate in construction phase coordination meetings.
3. Provide information to the CxA for developing construction phase commissioning plan including, but not limited to:
4. Schedule as mentioned above.
5. Equipment submittals.
6. Installation manual submittals.
7. Operation and maintenance information submittals.
8. Complete construction checkout documents for all systems to be commissioned.
9. Provide all necessary assistance and work associated with the completeness and installation of “mock-up” equipment as defined in this division, section 3.03.
10. Maintain updated Project Record Documents for periodic review by the CxA and submit final record documents at project completion.
11. Certify readiness of systems to be commissioned prior to functional performance testing.
12. Participate in functional performance testing of systems to be commissioned.
13. Participate in test procedures meeting.
14. Provide technicians who are familiar with the construction and operation of the installed systems, are trained in the use of required testing instruments and procedures to participate in testing of installed systems, subsystems and equipment.
15. Participate in operation and maintenance planning, documentation and verification.
16. Resolving issues identified during commissioning and coordinating correction of deficiencies. Ensure responses to open issues within two weeks of being posted via online tracking database (Commissioning Portal).

17. Participate in training sessions for Owner's operation and maintenance personnel.

18. Participate in final review at acceptance meeting.

19. Participate, as needed, in performing deferred or opposite seasonal testing of systems and equipment.

20. Assist in coordinating personnel and providing documentation, as needed, to meet the LEED-NC for Schools & MA-CHPS requirements.

1.07 COMMISSIONING DOCUMENTATION

A. Commissioning Plan: A document, prepared by the CxA, that outlines the schedule, allocation of resources and documentation requirements of the commissioning process, including but not limited to, the following:

1. Plan for delivery and review of submittals, systems manuals and other documents and reports. Identification of the relationship of these documents to other functions and a description of submittals that are required to support the commissioning processes. Submittal dates include the latest date approved submittals must be received without adversely affecting commissioning.

2. Overview of the organization, layout and content of commissioning documentation and a description of documents to be provided along with identification of responsible parties.

3. Identification of systems and equipment to be commissioned.

4. Description of schedules for testing procedures along with identification of parties involved in performing and verifying tests.

5. Identification of items that must be completed before the next operation can proceed.

6. Description of responsibilities of commissioning team members.

7. Description of observations to be made.

8. Description of requirements for operation and maintenance training, including required training materials.

9. Description of expected performance for systems, subsystems, equipment and controls.

10. Requirements for documenting changes on a continuous basis to appear in the project record documents.

11. Process and schedule for completing construction checklists for systems to be commissioned.

12. Step by step procedures for testing systems, subsystems and equipment with descriptions for methods of verifying relevant data, recording the results obtained and listing parties involved in performing and verifying tests.

B. Construction Checkout Documents / Pre-functional Checklists: The CxA will develop construction checklists for each system to be commissioned including interfaces with the ATC system, safeties, and interlocks. Separate entries will be provided for each item to be checked. Construction checklists will be completed by the installing Subcontractor and verified by the Contractor and CxA. Space will be provided for sign off of installing Subcontractor, Contractor and CxA. Each checklist will include, but not limited to, the following:

1. Name and identification code of each item being checked.
2. Verification of each item including verification of all required data and construction practices listed in the construction checklists. This list outlines all work necessary to be completed prior to the start of functional testing for the particular system, subsystem and equipment.
3. Notation of any equipment or installation that deviates from approved submittals or the construction documents.
4. Name(s) of personnel involved with verification and dates on which verification activities and construction checklists were completed.

C. Witness systems, assemblies, equipment, and component startup.

D. Hydronic Start-up Documents: Documentation that narrates the flushing, cleaning, chemical treatment, pressure testing and air bleeding of any associated hydronic systems, assemblies, equipment, and component start-up. Documentation should identify individuals present who witnessed said testing.

E. Certificate of Readiness: Certificate of Readiness shall be signed by the Contractor, Subcontractor(s), Installer(s) and CxA certifying that systems, subsystems, equipment, and associated controls are ready for testing and that all relevant information including submittals, installation data and operation and maintenance documentation has been submitted. Completed construction checklists signed by the responsible parties shall accompany this certificate.

F. Functional Performance Testing: CxA will develop functional performance test documents for each system to be commissioned including interfaces and interlocks. Separate entries will be provided for each item to be tested. CxA will prepare separate tests for each mode of operation and provide space to indicate whether the mode under test responded. All information gathered will be documented by the CxA. Each test will include, but not limited to, the following:

1. Name and identification of each item being checked.
2. Date of test.
3. Indication of whether the record is for a first test or retest following correction of a problem or issue.
4. List of deficiencies.
5. Calibration of sensors and sensor function.

6. Testing conditions under which test was conducted, including (where applicable) ambient conditions, setpoints, override conditions, and status and operating conditions that impact the results of the test.

7. Control sequences for mechanical and electrical systems.

8. Verification of control signals for each setpoint at specified conditions.

9. Responses to control signal at specified conditions.

10. Sequence of responses to control signals at specified conditions.

11. Electrical demand or power input at specified conditions.

12. Expected performance of systems, subsystems and equipment at each step of the tests. Narrative description of observed performance of systems, subsystems and equipment. Notation to indicate whether the observed performance at each step meets the expected results.

13. Interaction of auxiliary equipment.

G. Test and Verification Reports: CxA will create test scenarios, record test data, observations, and measurements on test documents. Photographs, forms and other means appropriate for the application will be included with test documentation. CxA will compile test and verification reports and verification certificates and include them in the commissioning report.

H. Training Plans: To be prepared by the contractor and submitted to the CxA and the Owner for review and comment prior to finalizing training plans.

I. Corrective Action Documents: CxA will document corrective action taken for systems and equipment that fail tests including required modifications to systems and equipment and revisions to test procedures. Retest and final results will also be documented.

1. Issues Log or Commissioning Notice: CxA prepares and maintains an issues log that describes design, installation and performance issues that are at variance with the OPR, BoD and contract documents. Identification and tracking of issues as they are encountered, documenting the status of unresolved and resolved issues. Issues log is shared with members of the Design/Construction/Commissioning team via an internet portal which is maintained by the CxA.

    a. BVH Commissioning Portal: The CxA Commissioning Portal is an on-line issue tracking database developed by BVH Integrated Services, Inc. The Portal is used by the CxA to track issues and assign responsibility for corrective action. All members of the Commissioning Team will be given access to the Portal to respond to issues and / or deficiencies. Open issues will be sorted by the individual trades. Once the Contractor / Subcontractor(s) have made any necessary corrections they will update their specific issues on line for re-verification by the commissioning provider.

J. Systems Training Manual: CxA will develop a systems training manual for the operation and maintenance personnel that includes the intended operation of the systems and equipment listed as well as document setpoints and schedules. It should be noted that the Systems Training Manual does not in any way replace the Subcontractor / vendor training nor does it relieve Subcontractor(s) of their responsibilities as outlined in other divisions within the contract documents.

1.08 SUBMITTALS BY CONTRACTOR

A. Information listed below shall be submitted with the product and system product literature and shop drawing submittals for review and approval by the Owner, Architect, Engineering Professionals and the CxA. This information will be used to confirm the product compliance with the Contract Documents and to establish detailed commissioning requirements and procedures. The information shall be specific to each system to be commissioned and shall be inclusive of all related systems, equipment and components.

1. Manufacturer cut sheets and product literature and shop drawings in accordance with the requirements of other divisions.
2. Manufacturer's detailed installation and start-up requirements including equipment checklists for each piece of equipment.
3. Operation instructions.
4. Manufacturer's recommended maintenance and troubleshooting procedures.
5. Warranty and owners obligations to maintain warranty.
6. Detailed product data for each piece of equipment including part load capacities, electrical components and requirements. (As appropriate)
7. Manufacture's certified test reports on each piece of equipment.
8. Performance curves for each piece of equipment being submitted. (As appropriate)
9. Coordination and Record Drawings.
10. Logic flow diagrams for control systems sequences of operation. Include detailed sections of the Sequence of Operations for related function groups.
11. Interpret function groups for clarity.
12. Indicate initial setpoints, reset schedules, sensor locations.

B. Operation and Maintenance Manuals:

1. The Contractor shall develop the Operation and Maintenance manuals in accordance with the requirements indicated in Division 01.

2. All submittal information indicated in item 1.8A above shall be included in the operations and maintenance manual in addition to the information required below.

3. Manufacturer's break-in instructions.

4. Manufacturer suggested service requirements.

5. Spare parts list edited for specific equipment used on the project. Provide names/numbers of local distributors for spare parts

6. Preventative maintenance instructions

7. Troubleshooting guides

8. Plumbing and HVAC piping sanitation certificates

9. Approved Final Air and Water Balancing Report

10. Warranties with Warranty start & completion dates

11. Equipment Start-up Reports

1.09 QUALITY ASSURANCE

A. Operations and Maintenance Training Instructor Qualifications: Equipment training shall be provided by a factory authorized technical representatives, experienced in training, operation and maintenance procedures for installed systems, subsystems and equipment.

1.10 COORDINATION

A. Coordination Meetings: CxA will conduct periodic coordination meetings of the commissioning team to review progress on the commissioning plan, to discuss scheduling conflicts and to discuss upcoming commissioning process activities.

B. Pretesting Meetings: CxA will conduct pretest meetings of the commissioning team to review start-up reports, pretest verification results, testing procedures, testing personnel and instrumentation requirements and manufacturer's authorized service representative services for each system, subsystem, equipment and component to be tested.

C. Testing Coordination: CxA shall coordinate sequence of testing activities to accommodate required quality assurance and control services with a minimum of delay and to avoid necessity of removing and replacing construction to accommodate testing and verification.

D. Manufacturer's Field Services: CxA will coordinate services with the help of the Contractor/Subcontractor of manufacturer's field services.

1.11 SYSTEMS TO BE COMMISSIONED

A. The following systems will be commissioned where applicable in this project at the following random sampling rates, selected by the CxA at any chosen time at the discretion of the CxA including up to the day of testing:

1. Includes:

a. Heating, ventilation and air conditioning systems.

1) Boilers, chillers, air handling units including rooftop units, make up air units and split a/c systems

2) Terminal equipment – induction units, cabinet heaters, unit heaters, fan coil units, radiant panels

3) Pumps and drives

b. All Direct Digital Controls (DDC) will be verified for proper operation as they relate to the above equipment including interfaces for remote monitoring. All security and system interlocks associated with the control system will be commissioned.

c. Spot checking of air and water balancing readings.

d. Building domestic water systems including hot and cold systems

e. Any water booster pumps

f. Sewage ejector pumps

g. Backflow preventers

h. Fire protection systems includes the fire pump and alarm check valves

i. Building Envelope including but not limited to:

1) Insulation

2) Wall Framing

3) Thermal Bridging

4) Air & Water Leakage

5) Solar Glazing

6) Thermal Glazing

7) Fenestration Framing

8) Infra-red (IR) scans of roof and exterior wall assemblies

j. Building Electrical Power Systems

k. Occupancy sensors

l. Emergency generator and associated transfer switches

m. Fire alarm system

n. Fire protection system

o. Telecommunication systems

p. Security system

2. Any building system deemed as renewable energy will be commissioned by the LEED guidelines.

3. Central building automation and controls systems, and all equipment forming a part of these systems (including linkages to remote monitoring and control sites).

PART 2 PRODUCTS

2.01 TEST EQUIPMENT

A. All standard testing equipment required to perform start-up and initial checkout and required functional performance testing shall be provided by the Division contractor for the equipment being tested.

B. All testing equipment shall be of sufficient quality and accuracy to test and/or measure system performance with the tolerance specified in this Section. The Contractor(s) instrumentation shall meet the following standards:

1. Be of sufficient quality and accuracy to test and/or measure system performance within the tolerances required to determine adequate performance.
2. Be calibrated on the manufacturer's recommended intervals with calibration tags permanently affixed to the instrument being used.
3. Be maintained in good repair and operating condition throughout the duration of use on this project.
4. Be recalibrated / repaired if dropped and/or damaged in any way since last calibrated.

PART 3 EXECUTION

3.01 TESTING PREPARATION

A. Prerequisites for Testing:

1. Certify that systems to be commissioned have been completed, calibrated and manufacturer start-ups (where required) are complete. Verify systems to be commissioned are operating according to the OPR, BoD, and the contract documents and the Certificates of Readiness are signed and submitted.
2. Certify that building instrumentation and automated temperature controls associated with the systems to be commissioned have been completed and calibrated and are operating according to the OPR, BoD, and the contract documents and that preset set points have been recorded.
3. Certify that TAB procedures have been completed and that TAB reports have been submitted, discrepancies corrected and corrective work approved.
4. Test systems and intersystem performance after approval of construction checklists for systems, subsystems, and equipment.
5. Set systems, subsystems, and equipment into operating mode to be tested (i.e. normal shut down, normal auto position, normal manual position, unoccupied cycle, and emergency power and alarm conditions.)
6. Verify each operating cycle after it has been running for a specified period and is operating in a steady state condition.
7. Inspect and verify the position of each device and interlock identified on checklists. Sign off each item as acceptable or failed. Repeat this test for each operating cycle that applies to system being tested.
8. Check safety cutouts, alarms and interlocks with smoke control and life safety systems during each mode of operation.
9. Update checklists or data sheet after a deficiency is observed and corrected.
10. Verify equipment interface with monitoring and control system and TAB criteria including the following:
    a. Supply and return flow rated for variable flow and constant volume systems in each operational mode, including maximum and minimum flow capacity
    b. Operation of terminal units in both heating and cooling cycles
    c. Minimum outdoor air intake in each operational mode and at minimum and maximum airflows
    d. Building pressurization
    e. Total exhaust airflows and total outdoor air intake

f. Operation of indoor air quality monitoring systems

11. Verify proper responses of monitoring and control systems controllers and sensors to include the following:

    a. For each controller or sensor, record the indicated monitoring and control system reading and the test instrument reading. If the initial test indicates that the test reading is outside of the control range of the installed device, check calibration of the installed device and adjust. Retest malfunctioning devices and record results on checklist or data sheet.

    b. Report deficiencies and prepare an issues log entry.

12. Verify that construction checkout of systems to be commissioned has been completed and approved. CxA will verify construction checkout and start-up including requirements specified in individual Division Sections and equipment manufacturer's recommendations.

B. Testing Instrumentation: Install measuring instruments and logging devices to record test data for the required test periods. Instrumentation will monitor and record full range of operating conditions and will allow for calculation of total capacity of system for each mode of operation. Operational modes may include the following:

1. Occupied and unoccupied
2. Full load and minimum flow
3. Maximum flow and minimum flow
4. Warm up and cool down
5. Economizer cycle
6. Emergency power supply
7. Life safety alarm modes
8. Temporary upset of system operation
9. Partial occupancy conditions
10. Special cycles

3.02 START-UP, CONSTRUCTION CHECKLISTS AND INITIAL CHECKOUT

A. The following procedures apply to all equipment to be commissioned.

B. General: Each piece of equipment receives full construction checkout. There will be some sampling strategies used for terminal equipment. The construction checkout protocol for a given system must be successfully completed prior to formal functional performance testing of equipment or subsystems of the given system. Before any system start-ups begin, the Contractor(s) shall conduct a final installation verification audit for their work. The Contractor shall be responsible for completion of all work including change orders and punch list. This visual check of the various systems to be commissioned shall verify that all components are properly installed. The following items as a minimum shall be observed, but not be limited to, check of:

1. Air Distribution Systems:
    a. Mounting and support of equipment.
    b. Noise, vibration, air and water leaks.
    c. Air filtration, presence and operation of dampers, diffusers, grilles, fire dampers and access doors.
    d. Presence of thermostats and other adjustable temperature control devices.
    e. Presence of smoke sensors and other safety devices.
    f. Instrumentation, gauges, thermometers and flow measuring devices.
    g. Access to equipment and filters.
    h. Insulation of ductwork is complete.
    i. Ductwork is sealed.
    j. Power available to equipment.
    k. Temperature controls are complete.
    l. Air and water balancing is complete and a hand written report available.
2. Heating and Cooling Systems Equipment and Piping:
    a. Service access is acceptable.
    b. Proper cycling.
    c. Excessive noise, vibration or leaks.
    d. Presence of safety devices and controls.
    e. Proper identification of all piping, valves, starters and equipment.
    f. Pressure testing and flushing of systems.

g. Power available to equipment.

h. Temperature controls are complete.

i. Equipment start-up and checkout by the manufacturer's representatives are complete.

j. Air and water balancing is complete and a hand written report available.

3. Plumbing Systems and Equipment:

a. Service access is acceptable.

b. Proper cycling.

c. Excessive noise, vibration or leaks.

d. Presence of safety devices and controls.

e. Proper identification of all piping, valves, starters and equipment.

f. Pressure testing and flushing of systems.

g. Power available to equipment.

h. Equipment start-up and checkout by the manufacturer's representatives are complete.

4. Fire Protection System and Equipment:

a. Service access is acceptable.

b. Proper cycling.

c. Excessive noise, vibration or leaks.

d. Presence of safety devices and controls.

e. Proper identification of all piping, valves, starters and equipment.

f. Pressure testing and flushing of systems.

g. Power available to equipment.

h. Equipment start-up and checkout by the manufacturer's representatives are complete.

i. Emergency power complete and in place.

5. Building Electrical System and Equipment:

a. Service access is acceptable to all devices.

b. Presence of safety devices and controls.

c. Proper identification of all starters, switches and equipment.

d. Power available to equipment.

e. Equipment start-up and checkout by the manufacturer's representatives are complete.

C. If any work is found incomplete, incorrect, or non-functional, the Contractor shall correct the deficiency before system start-up work proceeds.

D. Contractor shall provide a full start-up plan for each system to be commissioned including all subsystems; equipment and components which shall at a minimum include the following documentation:

1. Construction Check-out Documents
2. Manufacturer's standard written start-up procedures copied from the installation manuals with check boxes by each procedure and a signature block added by hand at the end.
3. Manufacturer's normally used field checkout sheets.

E. Construction Checkout Documents / Pre Functional Checklists

1. Job specific prefunctional checklists will be provided by the CxA along with additional minimum testing and demonstration requirements as set forth by the Owner.

F. Sensor Calibration:

1. Calibration of all sensors shall be included as part of the construction checklists performed by the Contractors.

3.03 FUNCTIONAL PERFORMANCE TESTING

A. This sub section applies to commissioning functional performance testing for all Divisions.

B. Objectives and Scope:

1. The objective of functional performance testing is to demonstrate that each system is operating according to the documented design intent and Contract Documents. Functional testing facilitates bringing the systems from a state of substantial completion to full dynamic operation. Additionally, during the testing process, areas of deficient performance are identified and corrected, improving the operation and function of the systems.
2. In general, each system to be commissioned should be operated through all modes of operation where there is a specified system response. Verifying each sequence in the sequences of operation is required. Proper responses to such modes and conditions as power failure, freeze condition, low oil pressure, no flow, equipment failure shall be tested.

C. The responsible subcontractor or his/her designee executes the performance of the construction checkout, start-up, and checkout. When checking off construction checklists, signatures may be required of other subcontractors for verification of completion of their work.

D. The CxA will observe, at minimum, the procedures for each piece of primary equipment.

E. The subcontractors shall execute start-up and provide the CxA with a signed and dated copy of the completed start-up and construction checklists.

F. Only individuals that have a direct knowledge and witness that a line item task on the construction checklist was actually performed shall initial or check that item off.

G. Test Methods:

1. Mock-Up Systems

a. "Mock-Up" equipment and systems are to be completed in all respects and readied for functional testing prior to building completion. These systems are as follows:

1) Window glazing / curtainwall structures

2) Any exterior wall structures – masonry, brick, stucco, metal panels, wood.

3) Roofing

4) Typical Classroom

5) Typical Dedicated Outside Air Handling Unit

6) Typical Terminal Unit

7) Typical Hydronic Base-Mounted Pump

b. "Mock-up" equipment is defined as systems and equipment that are in sufficient quantities where early detection of system deficiencies will help to reduce future rejection of equipment. These are permanent installations – not temporary for the sake of demonstration only. The equipment "mock-up" will establish a level of quality of the equipment installation and its operation. This proactive approach will reduce future installation and operational errors of repetitive equipment.

c. "Mock-up" equipment will be reviewed and approved by the Engineer, CA, and Owner's Representative

d. “Mock-up” equipment will be deemed readied for testing and approval as defined below:

1) Dedicated Outside Air Handling Unit,

a) Manufacturer start-up completed and report submitted

b) Associated VFD is operational (if applicable)

c) Discharge and Return Ducts to unit completed, sealed, and insulated

d) Piping to coils for unit is completed per detail

e) Pump is installed and powered if applicable

f) Piping is insulated

g) Equipment identification installed

h) Pipe and Duct identification completed

i) Valve Tags installed

j) Final filters installed

k) All Gages and Thermometers installed

l) Condensate pans trapped and piped to floor drain

m) VAV boxes downstream under control to at least allow BMS command to open.

n) Automatic Temperature Controls installed, functioning, and reporting to the BAS, including all associated sensors and airflow measuring devices

2) Terminal Unit / Variable Air Volume Boxes (VAV)

a) Equipment identification installed

b) Piping to VAV reheat coil is completed as per detail. Pipe Identification and Valve tagging completed

c) Piping is insulated

d) Primary and secondary air ducts are completed, sealed, and insulated

e) All diffusers served by VAV are installed with proper flex runs to limit any air velocity noise.

f) Unit supports in place.

g) Automatic Temperature Controls installed, functioning, and reporting to the BAS, including all associated sensing devices.

h) Hydronic Base-Mounted Pump (HW, CHW, CW)

i) Manufacturer start-up completed and report submitted

j) Vibration isolation installed

k) Piping supports installed

l) Associated VFD is operational (if applicable)

m) Discharge and inlet piping to unit completed, sealed, and insulated

n) Pump is powered

o) Piping is insulated

p) Equipment identification installed

q) Pipe identification completed

r) Valve Tags installed

s) Construction strainer mesh removed and final strainer installed

t) All Gages and Thermometers installed

u) Automatic Temperature Controls installed, functioning, and reporting to the BAS, including all associated sensors and flow/pressure measuring devices

e. GC is responsible to schedule and provide all necessary time and personnel to achieve the “mock-up” installations. GC will coordinate this effort with the CA and Owners Representative for acceptance.

2. Functional performance testing and verification may be achieved by manual testing (persons manipulate the equipment and observe performance) or by monitoring the performance and analyzing the results using the control system’s graphic trend log capabilities.

3. Tests shall be performed using design conditions whenever possible and where required.

4. Set-up:

a. Each function and test shall be performed under conditions that simulate actual conditions to the closest practical approximation.

b. The Contractor executing the test shall provide all necessary materials, system modifications, to produce the flows, pressures, temperatures, necessary to execute the test under specified conditions.

c. At completion of the test, the Contractor shall return all affected building equipment and systems to their pre-test condition.

d. Functional performance testing will commence as systems are brought to substantial completion and will be done on a system by system basis. The results of these tests will be documented and submitted to the Owner for final system acceptance. The Commissioning Authority will attain this objective by developing individual systems testing protocols which, when implemented by the trade Contractor, will allow the Commissioning Authority to observe, evaluate, identify deficiencies, recommend modifications, adjust, and document the systems and systems equipment performance over a range of load and functional levels. Functional performance testing as a minimum will be performed on the following systems:

5. Air Distribution Systems:

   a. The Testing and Balancing Contractor (TAB) shall demonstrate total airflow at each piece of air handling equipment at simulated full cooling, heating and/or max/min or fresh (outside) air.

   b. Spot checks of approximately 10% of air outlets will be made. The Commissioning Authority will select outlets and the air balancer shall demonstrate a reading of that outlet. Where appropriate, the thermostat shall be adjusted to simulate full cooling, full heating.

   c. The Testing and Balancing Contractor (TAB) shall demonstrate proper room static pressure with respect to the adjacent space(s).

   d. Observe motor HP draw at selected fan motors.

   e. Discrepancies between the balancing report and spot check results will be dealt with to correct all deficiencies. In the event that significant deficiencies are detected, the entire balancing procedure shall be repeated.

      1) Any noted drafts or noisy air distribution devices will be evaluated and corrective action taken.

      2) The Testing and Balancing Contractor (TAB) shall verify the proper calibration of temperature, pressure and safety devices as installed on the various pieces of mechanical equipment. The Testing and Balancing Contractor (TAB) shall assist the Commissioning Authority in the proper setting of all temperature, pressure and safety devices.

      3) Any balancing related problems identified during the functional testing procedures shall be addressed and corrected.

6. Hydronic Systems:

   a. The Testing and Balancing Contractor shall demonstrate total water flows at each pump, air handler, chiller and terminal heating equipment.

b. Spot checks of approximately 10% of hydronic terminals will be made. The CxA will select terminals and the balancer shall demonstrate a reading at the equipment via the flow control device or by using an ultrasonic device.

c. Discrepancies between the balancing report and actual testing results shall be dealt with to correct all deficiencies. In the event that significant deficiencies are detected, the entire balancing procedure shall be repeated.

d. Assist in verifying the calibration and operation of any flow meters and differential pressure sensors.

e. Assist in verifying the calibration and operation of any temperature sensors.

f. Any balancing related problems identified during the functional testing procedures shall be addressed and corrected.

7. Exhaust Systems:

a. The Testing and Balancing Contractor (TAB) shall demonstrate total airflow at each exhaust fan system.

b. Spot checks of approximately 10% of air outlets will be made. The Commissioning Authority will select outlets and the air balancer shall demonstrate a reading of that outlet.

c. The Testing and Balancing Contractor (TAB) shall demonstrate proper room static pressure with respect to the adjacent space(s).

d. Observe motor HP draw at selected fan motors.

e. Discrepancies between the balancing report and spot check results shall be dealt with to correct all deficiencies. In the event that significant deficiencies are detected, the entire balancing procedure shall be repeated.

f. Any noted drafts or noisy air distribution devices shall be evaluated and corrective action taken.

g. Any balancing related problems identified during the functional testing procedures shall be addressed and corrected.

8. Automatic Temperature Controls (ATC):

a. ATC Contractor shall demonstrate the proper operation of the temperature control sequences for each air handling systems, variable air volume boxes, boilers, chillers, pumps, exhaust and terminal heating/cooling equipment as listed in 1.11 of this Section.

b. ATC Contractor shall demonstrate the proper sequences as they apply to the equipment listed in 1.11 of this Section: This includes but not limited to the following:

1) Occupied/unoccupied time sequences.

2) Night setback/night set-up features.

3) Morning warm-up sequences.

4) Air-side economizers.

5) Proper control of steam boilers and associated equipment such as deaerator, boiler feed pumps, condensing economizer system and combustion air.

6) Proper control of discharge air temperature from air handling equipment including reset temperature sequences.

7) Heating hot water discharge temperature control to the building systems including hot water reset.

8) Proper staging and control of the heat exchangers.

9) Lead/lag operation of the various pumps.

10) Control of hot water freeze pumps.

11) Proper control and discharge temperatures from the reheat coils.

12) Operation and control of the fan coils and unit heaters.

13) Proper operation and control of the chillers and cooling towers.

14) Run standby operation of pumps.

15) Proper operation and control of any energy recovery systems.

16) Proper control of the exhaust fans

17) Proper annunciation of building alarms including fail safe controls and proper shut down of equipment.

18) Proper control of all air handling equipment with respect to air volume.

19) Demonstrate any terminal box operation for 30 consecutive days (24 / 7) without a system problem. Shall include temperature and humidity (where applicable) and recording of same.

20) Calibration of all temperature pressure and safety devices.

21) Proper display of all ATC graphics.

22) Control of all automatic control valves and dampers.

23) Assist in calibration of all airflow stations.

9. Plumbing Systems:
    a. Verify proper operation and control of the domestic water heating system.
    b. Proper operation and calibration of the thermostatic mixing valves.
    c. Verify proper operation of the backflow preventer systems.
    d. Verify proper operation of the storm water systems.
    e. Demonstrate proper operation and control of the various pumping systems – (i.e. domestic water booster, sewage ejector, re-circulation pumps)
    f. Demonstrate the ability of the domestic hot water system to maintain the design minimum water temperature at all the faucets serviced by the system for 5 minutes while all faucets are active.
    g. Demonstrate domestic hot water at the faucet within a reasonable amount of time of faucet opening.
10. Electrical Systems:
    a. Demonstrate proper operation of all building lighting, lighting control systems and occupancy sensors.
    b. Demonstrate proper operation of electrical supply and distribution metering system.
    c. Demonstrate proper operation of the emergency generator, transfer switch, emergency power and uninterruptible power supply (UPS) systems.
    d. Verify proper operation of variable frequency drive systems, main electrical gear systems, low and medium voltage systems, and ground systems.
    e. Demonstrate proper operation of elevator systems.
11. Life Safety Systems:
    a. Verify operation of fire pump, fire alarm, egress pressurization, fire suppression and egress lighting.
12. Coordination and Scheduling:
    a. Scheduling is the responsibility of the Contractor. Commissioning activities shall be scheduled through the Contractor. The Contractor shall be responsible for integrating functional performance testing and commissioning requirements into the master activity schedule.
    b. The subcontractors shall provide sufficient notice to the CxA regarding their completion schedule for the construction checklists and start-up of all equipment and systems. The CxA will direct, witness and document the functional testing of all equipment and systems.

c. Subcontractors are responsible for execution of all tests.

d. Functional testing is conducted after construction checklists and start-up has been satisfactorily completed. The control system is sufficiently tested and approved by the CxA before it is used for TAB or to verify performance of other components or systems.

e. The Contractor shall verify completeness of the building envelope, perimeter and interior items which affect proper operation and control of HVAC, Plumbing, Fire Protection and electrical equipment and systems.

f. The air and water balancing is completed and debugged before functional testing of air and water related equipment or systems.

g. Testing proceeds from components to subsystems to systems.

h. When the proper performance of all interacting individual systems has been achieved, the interface or coordinated responses between systems is checked.

13. Problem Solving:

a. The CxA will recommend solutions to problems found, however the burden of responsibilities to solve, correct and retest problems rests with the Contractor, Subcontractor, Architect and Engineering Professionals.

14. Trend Logs:

a. Upon completion of successful functional performance testing, contractor shall submit graphic trend logs to CxA.

b. Submit graphic trend log for each piece of controlled equipment for each controlled parameter.

c. Trend logs shall demonstrate successful performance for a seven day period unless the controlled process requires a longer timeline.

d. Trend log color printouts shall be submitted demonstrating successful seasonal performance.

e. Trend logs shall be color graphic with legend submitted to the CxA in printout.

3.04 SEASONAL/DEFFERRED TESTING

A. The purpose of (opposite) seasonal functional testing is to evaluate the performance of selected equipment during design weather conditions that may not have been available during the initial functional testing. Ideally cooling equipment needs to be functionally tested under hot, humid summer conditions to ensure proper operation in accordance with design specifications. The same is true for heating hot water and steam systems is which require colder, winter climates.

B. The functional testing performed during seasonal testing will adhere to the guidelines listed above in item 3.03 in this section.

C. Any deficiencies will be documented and submitted to the Contractor and correction of these items will be the responsibility of the respective Subcontractors.

3.05 POST OCCUPANCY/WARRANTY REVIEW

A. The purpose of a post occupancy/warranty review is to review the building systems and equipment prior to warranty expiration. The post occupancy/warranty review will take place approximately 10 months into the 12 month warranty period. The facilities operating staff will be interviewed to discuss any issues discovered during the previous month's operation of the facility (concerning previously commissioned equipment). The building control system and equipment will be inspected to identify any deficiencies.

B. Any warranty related deficiencies will be documented and submitted to the Contractor and correction of these items will be the responsibility of the respective Subcontractors.

3.06 DOCUMENTATION, NON-COMFORMANCE AND APPROVAL OF TESTS

A. Documentation:

1. The CxA will witness and document the results of functional performance tests using the specific procedural forms developed for that purpose.
2. Reports will include measured data, data sheets and a comprehensive summary describing the operation of systems at the time of testing.
3. Data sheets for each controller verifying proper operation of the control system, the system it serves, the service it provides and its location will be provided.

B. Non-Conformance:

1. The CxA will record the results of the functional testing on the procedure or test form.
2. Corrections of minor deficiencies identified may be made during the tests at the discretion of the CxA. In such cases the deficiency and resolution will be documented on the procedure form.
3. Every effort will be made to expedite the testing process and minimize unnecessary delays, while not compromising the integrity of the procedures. However, the CxA will not be pressured into overlooking deficient work or loosening acceptance criteria to satisfy scheduling or cost issues, unless there is an overriding reason to do so at the request of the Owner.

4. Should a deficiency be identified during checkout, start-up or testing, the CxA will discuss the issue with the responsible subcontractor. When there is no dispute on the deficiency and the subcontractor accepts responsibility to correct it:

    a. The CxA documents the deficiency and the subcontractor's response and intentions and they go on to another test or sequence.

    b. After a system performance testing is complete, the CxA submits the noncompliance issues on the internet portal.

5. If there is a dispute about a deficiency, regarding whether it is a deficiency or who is responsible:

    a. The deficiency will be documented on the BVH portal with the subcontractor's response and the item will be tagged for the Engineer / Architect to review and comment for resolution.

6. Resolutions are made at the lowest management level possible. Other parties are brought into the discussions as needed. Final interpretive authority is with the Owner.
7. The CxA documents the resolution process.
8. Once the interpretation and resolution have been decided, the appropriate party corrects the deficiency. The CxA reschedules the test and the test is repeated until satisfactory performance is achieved. Also, an additional test of another like system or piece of equipment will be completed at the cost of the party responsible for the faulty test.
9. If it is determined that the system is constructed according to the Contract Documents, Owner will decide whether modifications required to bring the performance of the system to the OPR and BoD documents shall be implemented or if tests will be accepted as submitted. If corrective Work is performed, Owner will decide if tests will be repeated and a revised report submitted.
10. Cost of Retesting.
    a. The cost to re-perform a construction check-out or functional test, shall be by the party responsible for the faulty test. If they are not responsible, any cost recovery for retesting costs proposed shall be negotiated with the appropriate party.

    b. The time for the CxA to direct any retesting required because a specific construction checklist or start-up test item, reported to have been successfully completed, but determined during functional testing to be faulty, will be negotiated with the appropriate party, who may choose to recover costs from the party responsible for executing the faulty test.

c. Failure Due to Manufacturer Defect:

1) If 10% or three, whichever is greater, of identical pieces (size alone does not constitute a difference) of equipment fail to perform to the Contract Documents (mechanically or substantively) due to manufacturing defect, not allowing it to meet its submitted performance spec, all identical units may be considered unacceptable by the CxA. In such case, the subcontractor shall provide the following:

a) Within one week of notification from the Contractor, the subcontractor or manufacturer's representative shall examine all other identical units making a record of the findings.

b) The findings shall be provided by the CxA within two weeks of the original notice.

c) Within two weeks of the original notification, the Contractor, subcontractor or manufacturer shall provide a signed and dated, written explanation of the problem, cause of failures, and all proposed solutions which shall include full equipment submittals.

2) The proposed solutions shall significantly exceed the specification requirements of the original installation.

3) The Owner and Design Team will determine whether a replacement of all identical units or a repair is acceptable.

4) Two examples of the proposed solution will be installed by the subcontractor and the subcontractor will be allowed to test the installations for up to one week, upon which the Owner and Design Team will decide whether to accept the solution.

5) Upon Acceptance, the Contractor and/or manufacturer shall replace or repair all identical items, at their expense and extend the warranty accordingly, if the original equipment warranty had begun. The replacement/repair work shall proceed with reasonable speed beginning within one week from when parts can be obtained.

a) Approval: The CxA notes each satisfactorily demonstrated function on the test form. The CxA recommends acceptance of each test using a standard form.

b) Deferred Testing:

(1) If tests cannot be completed because of a deficiency outside the scope of the subcontractor responsible for installation of the System to be commissioned, the deficiency shall be documented and reported. Deficiencies shall be resolved and corrected by appropriate parties and test rescheduled.

(2) If the testing plan indicates specific seasonal testing, appropriate initial performance tests shall be completed, documented, and additional tests scheduled.

3.07 OPERATION AND MAINTENANCE TRAINING REQUIREMENTS

A. The Contractor shall be responsible for coordination, scheduling and completing operations and maintenance training for the Owners designated personnel on all Systems to be commissioned.

1. Training materials shall be submitted for review and approval of the CxA well in advance of training.
2. Trainer qualifications and certifications shall be submitted for review and approval of the CxA well in advance of training.
3. Each subcontractor responsible for training will submit a written training plan to the CxA for review and approval prior to training. The plan will include field orientation during installation, classroom instruction and field training after the completion of installation and cover the following elements:
   a. Equipment (included in training)
   b. Intended audience
   c. Location of training
   d. Objectives
   e. Subjects covered (description, duration of discussion, special methods)
   f. Duration of training on each subject.
   g. Instructor for each subject
   h. Methods (classroom lecture, video, site walk-through, actual operational demonstrations, written handouts)
   i. Instructor and qualifications

4. For the primary equipment, the Controls subcontractor shall provide a short discussion of the control of the equipment during the mechanical or electrical training conducted by others.

5. Subcontractors shall provide all qualified personnel, including manufacturer representatives, for equipment and system training.

B. The CxA will verify and approve the content and adequacy of the training of Owner personnel for systems to be commissioned.

1. Training rigor: to be established by Owner & CxA

2. In addition to these general requirements, the specific training requirements for Owner personnel are specified in Division 01.

C. Training Planning Meeting: Before operation and maintenance training, CxA shall convene a training planning meeting to include Owner's operation and maintenance personnel, each Contractor, and subcontractors. In addition to requirements specified in other Divisions, perform the following:

1. Review the OPR and BoD.

a. Review installed systems, subsystems, and equipment.

b. Review instructor qualifications

c. Review instructional methods and procedures.

d. Review training module outlines and contents.

e. Review course materials (including operation and maintenance manuals.

f. Verify and discuss locations and other facilities required for instruction.

g. Review and finalize training schedule and verify availability of educational materials, instructors, audiovisual equipment, and facilities needed to avoid delays.

h. For instruction that must occur outside, review weather and forecasted weather conditions and procedures to follow if conditions are unfavorable.

3.08 EXCLUSIONS

A. The Commissioning Authority is not responsible for construction means, methods, coordination between trades, job safety or any other related management function on the job site.

B. The Contractor and Subcontractors will provide all technician services requiring tools or the use of tools to functionally test, adjust or otherwise bring equipment into a fully operational state. It is required by this specification that the person to represent the automated temperature control system shall be the person who wrote the control programming. The CxA will observe technicians as they complete testing, and may make minor adjustments, but will not perform construction or technician services.

END OF SECTION

Division 2
Existing Conditions

SECTION 023000

SUBSURFACE EXPLORATION DATA

PART 1 GENERAL

1.01 GENERAL REQUIREMENTS

A. PART A and DIVISION 1 of PART B are hereby made a part of this SECTION.

B. Examine all conditions as they exist at the project prior to submitting a bid for the work of this SECTION.

1.02 SUBSURFACE DATA

A. Subsurface soil investigations have been made and the results are attached to this Section. Refer to the Drawings for additional information.

Attachment A – GZA Geotechnical Engineering Report (CES Site) (dated 01/15/20)
Attachment B – DGT Soils Reports (dated 06/10/20, 01/16/20 & 12/14/18)
Attachment C – ECMS Phase 1 Environmental Site Assessment (ESA) (dated 09/13/18)
Attachment D – ECMS ACM PLM Sample Results (dated 06/09/20)
Attachment E – ECMS Imminent Hazard Evaluation (dated 07/28/20)

B. The subsurface data are provided for the information of the Bidders. Bidders shall interpret these subsurface data according to their own judgment and shall understand that the subsurface conditions may vary from those recorded herein. Neither the Owner, nor the Architect shall be liable for any error or discrepancy in the information given. Bidders shall make such investigations on the site as necessary to verify conditions, and shall assume for themselves the character of materials to be encountered.

1.03 PROTECTION OF EXISTING CONDITIONS

A. Take all proper precautions to protect the Owner and adjoining property from injury or unnecessary interference; and replace or put in good condition any existing items which are damaged or injured in carrying out the work, unless designated to permanently be done away with.

B. Keep all access drives and walks clear of debris during building operations. Repair streets, drives, curbs, sidewalks, poles, and the like, where disturbed by building operation and leave them in as good condition after completion of the work as before operations started.

Re: Geotechnical Engineering Report
Proposed Amesbury Elementary School
193 Lions Mouth Road
Amesbury, Massachusetts

Dear Ms. Low:

In accordance with our agreement dated November 12, 2019, GZA GeoEnvironmental, Inc. (GZA) is pleased to submit this geotechnical engineering report for the above-referenced project. The objectives of our services were to evaluate subsurface conditions and to provide geotechnical design and construction recommendations for a proposed elementary school adjacent to the existing Cashman Elementary School at 193 Lions Mouth Road in Amesbury, Massachusetts (Site). Please note that this report is subject to the Limitations attached as **Appendix A**.

Elevations cited in this report were estimated using the topographic survey dated December 17, 2019, provided by DINISCO DESIGN | architects + planners (Dinisco), which is based on the North American Vertical Datum (NAVD88).

BACKGROUND

Our understanding of the project is based on discussions with Dinisco, our work at the Site and electronic conceptual plans prepared by Dinisco titled "25286 – Additional Testing Map – DGT TPS & GZA prop borings 10-24-2019.pdf."

The Site is currently occupied by play areas and ball fields with associated structures, including sheds and wooden canopies. The proposed school location is bordered by the Woodsom Farms property and residential property to the west and southwest, the existing Cashman Elementary School to the south, and undeveloped land to the north and northeast. The proposed building area currently has an undulating topography, ranging between approximately elevations (EL) 115 and 120 feet. Existing grades rise to the southwest of the site to elevations of up to about 142 feet. A stream and wetlands are located to the west, north, and northeast of the Site. Refer to **Figure 1** for a Site Locus.

Prior to construction of the original Cashman School, it appears that elevations in the proposed building area were lower, ranging from about EL 110 to 115 feet, and that fill was placed to construct the existing ball fields. This is based on "The Site Plan, Friend Street Elementary School, Amesbury Massachusetts," prepared by Campbell, Aldrich & Nulty, dated 1973, that shows existing and proposed grades for the existing Cashman Elementary school construction. Though no elevation datum is given, it appears that the grades on the 1973 plan

An Equal Opportunity Employer M/F/V/H

are about 5-1/2 feet lower than current grades based on a comparison of building slab elevations noted on the current project plans to the 1973 architectural plans.

GZA previously performed borings for this project in 2018 and submitted a Preliminary Geotechnical Engineering Report dated September 14, 2018. The previous borings are included in this report, which supersedes our September 2018 report.

Based on schematic plans provided by DiNisco, we understand that proposed development will consist of constructing a new school building with a footprint of approximately 40,000-square feet to the north of the existing school building. The bus drop-off and parking area for the proposed school building will be to the south of the proposed building and west of the existing school building. The proposed finished floor elevation of the building ranges from approximately 119.5 to 120.5 feet (which will require filling up to about 5 feet from current grades), with a portion of the gymnasium in the southwest corner of the school at approximately EL 134 feet. We understand that fills of up to about 5 feet are also expected in some of the parking areas Existing site conditions and the proposed building, parking area, and driveways are shown on **Figure 2**.

SCOPE OF SERVICES

GZA performed the following scope of services:

1. Developed and executed a subsurface exploration program consisting of twelve soil borings (including the 2018 borings) to evaluate soil and groundwater conditions.
2. Performed gradation analyses on five selected samples collected from the borings to confirm field classifications and assist in evaluating potential on-site reuse of soils excavated during construction.
3. Developed geotechnical design recommendations and prepared this report summarizing our findings.

SUBSURFACE EXPLORATIONS

GZA BORINGS

GZA engaged New England Boring Contractors of Derry, New Hampshire to perform two sets of borings using an ATV-mounted drill rig. Borings GZA-1 through 4, DTG-1 and DTG-2 were performed in August 2018; borings GZA-5 through GZA-10 were performed on December 14, 2019 and January 3, 2020. The 2018 borings were advanced using cased, drive-and-wash drilling techniques, and the 2019/2020 borings were advanced using cased, drive-and-wash and hollow-stem-auger drilling techniques.

The 2018 borings were terminated at depths ranging from 7.4 to 18.3 feet below ground surface (bgs) due to split spoon refusal. The 2018 borings were located based on conceptual site layouts provided by DiNisco and to avoid being within the baseball fields. The 2019/2020 borings were performed to depths ranging from 15.1 to 29.5 feet bgs and were located prior to drilling by the project surveyors, Hancock Associates. Borings GZA-6 and GZA-8 were terminated at depths of 15.1 feet and 18.4 feet, respectively, due to split spoon refusal. Bedrock was cored at GZA-7 from depths of 19.5 feet to 29.5 feet.

In general, Standard Penetration Tests (SPTs) were performed, and split spoon samples were obtained, continuously in the top 10 feet and then at 5-foot intervals to the bottom of the borehole. The borings were backfilled with drill cuttings to the existing ground surface.

A GZA representative observed the borings, classified the soil samples and prepared the boring logs attached as **Appendix B**. The approximate boring locations are shown on **Figure 2**. Ground surface elevations at the boring locations were estimated using Google Earth.

RECENT TEST PITS BY OTHERS

The project site engineer, DGT Associates (DGT), observed 13 test pits excavated at the Site by the Town on November 14 through 29, 2018 to evaluate the seasonal high water table and suitability of onsite soils for stormwater management. Ten additional test pits were performed by the Town and observed by DGT in November and December 2019 to assess the depth to bedrock where shallow bedrock was anticipated. The test pit data and a plan of the test pit locations are attached in **Appendix C**.

LABORATORY TESTING

Five soil samples obtained from the borings were submitted to Thielsch Laboratories in Cranston, Rhode Island for gradation analysis to confirm field classifications and assist in evaluating on-site reuse of soils excavated during construction. Geotechnical laboratory test results are attached as **Appendix D.**

SUBSURFACE CONDITIONS

Below the existing topsoil, subsurface conditions encountered in the borings and test pits in the proposed building area generally consisted of the following strata (in order of increasing depth): Fill; Sand; Silty Sand, Sand and Gravel; Glacial Till; possible weathered Bedrock; and Bedrock. Boring GZA-1 encountered subsoil below the topsoil. Borings GZA-1, GZA-2, GZA-5 to GZA-10 and DGT-1 were terminated in possible weathered Bedrock at elevations ranging from approximately EL 105 to 101 feet. Rock coring was performed at boring GZA-7 where top of Bedrock was encountered at approximately EL 98.7 feet.

Conditions were similar in the proposed parking areas except that Bedrock was shallower in many locations. DGT encountered Weathered Bedrock that could be excavated by backhoe in 18 of the 23 test pits at depths ranging from 1 foot to 9 feet below grade, which corresponds to EL 133.5 to 106 feet; and refusal in nine test pits at depths of EL 129.5 to 121.5 feet. Boring GZA-4, also located in the proposed parking lot, encountered SPT refusal at EL 126.7 feet.

The strata encountered in the borings are described below in further detail. The depths and thicknesses referenced herein should be considered approximate. Refer to the borings logs attached as **Appendix B** for more detailed subsurface conditions at specific exploration locations.

Fill – Fill was encountered below the topsoil layer and at the ground surface in borings GZA-2, GZA-5 through GZA-10, and DGT-2. The thickness of the fill was observed to be approximately 2 to 8 feet in thickness, and generally consisted of brown, fine to coarse sand, with up to 50 percent gravel, up to 50 percent silt, and up to 10 percent roots, grass and brick. SPT N-Values within the Fill ranged from 2 to 34 blows per foot (bpf), indicating that the Fill was a very loose to dense consistency. Bottom of Fill (or subsoil where present) varied from approximately EL 111 to 117.5 feet in the borings within and immediately adjacent to the proposed building.

Sand – Sand was encountered below the Topsoil in borings GZA-3 and DGT-1 to depths of 3.5 to 6 feet. The Sand generally consisted of brown, fine to coarse sand, with up to 20 percent gravel, up to 20 percent silt. The upper portion of the Sand contained trace amounts of roots. SPT N-Values within the Sand ranged from 10 to 24 bpf, indicating that the Sand was a medium dense consistency.

Silty Sand – Silty Sand was encountered below the Topsoil, Fill, and Sand and Gravel in borings GZA-1 to GZA-6, GZA-8, GZA-10, and DGT-2 to depths 8 to 14.5 feet and had an approximate thickness ranging from 4 to 9 feet. The Silty Sand generally consisted of brown fine to coarse sand, with up to 50 percent silt, and up to 20 percent gravel. GZA-6 contained up to 35 percent Clayey Silt. SPT N-Values within the Silty Sand ranged from 11 to 28 bpf, indicating that the Silty Sand was a medium dense consistency.

Sand and Gravel – Sand and Gravel was encountered below the Fill (or subsoil) at borings GZA-1, GZA-6, and GZA-7, and below the Silty Sand in borings GZA-5, DGT-1, and DGT-2. The Sand and Gravel was observed to be approximately 2 to 7 feet in thickness and was not fully penetrated in boring DGT-2 before it was terminated at a depth of 10 feet. The Sand and Gravel generally consisted of brown, fine to coarse sand, with up to 50 percent gravel and up to 20 percent silt. SPT N-Values within the Sand and Gravel ranged from 10 to 61 bpf (but typically at least 20), indicating that the Sand and Gravel was a medium dense to very dense consistency.

Glacial Till – Glacial Till was encountered below the Fill, Silty Sand, Sand and Gravel, and Sand strata in borings GZA-1, GZA-2, GZA-4, GZA-5, GZA-8, GZA-9, GZA-10, and DGT-1. Depths to the top of Glacial Till ranged from 4 to 13 feet and the Glacial Till thickness (where penetrated) ranged from 2.5 to 6 feet. The Glacial Till was not fully penetrated in borings GZA-4 and DGT-1 before the borings were terminated at depths of 8.3 and 7.4 feet, respectively. The Glacial Till generally consisted of light brown to brown, fine to coarse sand, with up to 50 percent gravel, and up to 50 percent silt and clayey silt. SPT N-Values within the Glacial Till ranged from 11 bpf to split spoon refusal, indicating that the Glacial Till was a medium dense to very dense consistency.

Possible Weathered Bedrock/ Bedrock – Severely to completely weathered bedrock was encountered in borings GZA-1, GZA-2, and GZA-5 to GZA-10. These borings were terminated due to split spoon refusal in the very dense weathered bedrock at depths of approximately 13.5 feet and 17 feet, corresponding to EL 111 to 102 feet. The weathered bedrock generally consisted of dark brown/gray, fine to coarse sand and gravel with up to 35 percent silt. Practical split spoon refusal was encountered at the bottom of borings GZA-4 and DGT-1 within or at the bottom of the glacial till at depths of approximately 4 to 6 feet, corresponding to EL 131 105.4 feet.

Bedrock was cored in boring GZA-7 between the depths of 19.5 feet to 29.5 feet (EL 98.7 to 88.7 feet). The bedrock consisted of gray, hard, slightly weathered Phyllite.

DGT encountered Weathered Bedrock and rippable bedrock (that is rock that could be excavated by backhoe) in 18 out of 23 test pits at depths ranging from 1 foot to 9 feet below grade, which corresponds to EL 133.5 to 106 feet; and refusal in competent bedrock in nine test pits at depths of EL 129.5 to 121.5 feet.

GROUNDWATER

Groundwater was observed in borings GZA-1, GZA-2, and GZA-6 through GZA-10 during drilling at depths of about 4.1 to 13.9 feet, corresponding to elevations 115.3 and 105.6 feet, respectively. Groundwater was not encountered in borings GZA-3, GZA-4 and DGT-2, and was not recorded upon completion in boring DGT-1. A stabilized water reading was obtained in the groundwater monitoring well at GZA-5 at a depth of 1.6 feet, corresponding to approximately EL 118.9 feet. The groundwater reading may have been artificially high due to melting snow. Groundwater elevations varied throughout the site in DGT test pits, ranging from EL 127 to 111 feet. The test pits closest to the proposed building location observed groundwater at EL 120.3 to 111 feet. Existing site grades indicate that the ground surface slopes downward towards the north side of the Site near the wetland area; indicating that the groundwater may be shallower in the northern end of the Site.

It should be noted that fluctuations in groundwater levels may occur due to variations in season, rainfall, site features and other factors different from those existing at the time of the explorations and measurements. During times of the year, we would expect the groundwater level to be higher than measured during the exploration programs.

RECOMMENDATIONS

The geotechnical design and construction recommendations presented below are based on our evaluation of the available data and design concepts provided to GZA and are subject to the limitations contained in **Appendix A**. References to the IBC refer to the International Building Code 2015 with Massachusetts State Building Code 9th Edition (MSBC) amendments.

FOUNDATION TYPE

We recommend a shallow foundation system consisting of spread and/or continuous footings bearing on undisturbed, natural granular soils (Sand, Silty Sand, Sand and Gravel, and/or Glacial Till) or on compacted Structural Fill placed over the undisturbed, natural granular soil, after removal of the existing topsoil and fill. In areas where proposed bottom of footing is in the natural granular soils (that is, overexcavation of fill not required), we recommend that the natural soils be overexcavated to 1 foot below bottom of footing and replaced with Sand-Gravel Fill or ¾-inch Crushed Stone wrapped in non-woven filter fabric. Structural Fill consists of off-site Granular Fill or Sand-Gravel Fill or on-site Sand and Gravel provided it does not contain debris, boulders and/or organics, and can be compacted as required herein. Recommended gradation requirements for Granular Fill, Sand-Gravel Fill and ¾-inch Crushed Stone are presented in **Table 1**.

The recommended maximum net allowable bearing pressure for footings supported on the undisturbed natural soils or on Structural Fill placed over the undisturbed natural soils at this Site is 2.5 tons per square foot (tsf).

Following excavation and replacement, estimated post-construction total settlement is anticipated to be less than about 1 inch, and differential settlement between adjacent columns is expected to be less than about 1/2 inch, provided that the recommendations for footing design, subgrade preparation, and backfilling presented herein are followed.

For foundations that are smaller than 3 feet wide, reduce the bearing value to one third of the above value multiplied by the least lateral footing dimension in feet. Continuous wall footings should be at least 18 inches wide and isolated footings at least 24 inches wide.

For frost protection, exterior footings and interior footings in unheated areas should bear at least 4 feet below final exterior grades. Interior footings in heated areas should bear at least 1.5 feet below top of slab.

BUILDING SLAB

Slab-on-grade construction is recommended for proposed floor slabs. Provide a base course consisting of at least 6-inches of compacted Sand-Gravel Fill or ¾-inch Crushed Stone below the building slab. After removing topsoil, the existing fill may be left in place beneath proposed slab areas, provided that the subgrade is stable during proof compaction.

We recommend using a vertical subgrade reaction coefficient (k_1) of 100 pounds per cubic inch (pci) for the concrete slab-on-grade supported on a compacted Sand-Gravel or Crushed Stone base course placed over properly prepared Structural Fill or naturally deposited Sand, Silty Sand, Sand and Gravel. This recommended value is based on empirical correlations and our experience on other projects. This modulus of subgrade reaction value is for loading applied over a 1-foot by 1-foot square area and must be adjusted for the actual size and geometry of the loaded area prior to use in analysis.

We recommend subslab drainage and a perimeter drain be provided, based on the high groundwater levels observed in the borings and test pits.

SEISMIC DESIGN

Soils encountered in the building area are not considered susceptible to liquefaction based on criteria set forth in Section 1806.4 of the MSBC. In accordance with Section 1613.5.2 of the IBC, we recommend that Site Class C be used for seismic design assuming that building foundations are designed and constructed as recommended herein.

In accordance with the MSBC 9th Edition, the structure should be designed using the following seismic parameters:

S_S =0.267g	S_1=0.078g
S_{DS} =0.214g	S_{D1}=0.089g
PGA_M=0.184g	PGA=0.153

Where:

- S_S and S_{DS} are the spectral acceleration and design spectral response acceleration parameters at 0.2-second period, respectively;
- S_1 and S_{D1} are the spectral acceleration and design spectral response acceleration parameters at 1.0-second period, respectively; and
- PGA and PGA_M are the peak ground acceleration and the maximum considered earthquake peak ground acceleration, respectively.

LATERAL EARTH PRESSURES FOR BELOW GRADE WALLS

Buried foundation walls (such as, for elevator pits and exterior below-grade walls) should be designed to resist lateral earth pressures. Static lateral earth pressures and the resultant force per unit width applied to the walls should be based on at-rest conditions (such as, where the top of wall is restrained by the floor slab).

In accordance with Section 1610 of the MSBC, we recommend that the design earth pressures for these fixed, below-grade walls be designed using an at-rest pressure of 60 pounds per cubic foot (pcf), which is applicable for walls above groundwater and walls with perimeter drains. This pressure applies to foundation walls that are laterally supported at the bottom and top, subject to backfill with a horizontal surface, and assumes that the walls are backfilled with free draining soils such as Granular Fill (provided that it has less than 8 percent passing sieve No. 200) or Sand-Gravel (see **Table 2**) within at least 3 feet of the walls and with perimeter drains provided so that no water pressure develops behind the wall.

If walls are cantilevered or free to move at the top, such as site retaining walls, we recommend that the (active) design earth pressures for below-grade walls be designed using an equivalent fluid pressure of 40 pcf above the estimated design groundwater elevation. The resultant force, P_o, should act at a height of one-third the height of the wall (H/3) from the base of the wall.

Where the calculated earth pressure behind the wall is less than 250 pounds per square foot (psf), it should be increased to 250 psf to account for stresses created by compaction within 5 feet of the wall.

Retaining walls should be designed for appropriate surcharge loads. In addition, exterior below-grade foundation walls and site retaining walls should also be designed to resist an earthquake lateral force F_w evaluated in accordance with MSBC Section 1610.2 that is equal to:

$$F_w=0.100\ (S_s)(F_a)(\gamma_t)(H^2)$$

Where:

- S_S is the design spectral response acceleration parameters at 0.2-second period (See Seismic Design above);
- F_a is the site coefficient from Table 1613.3.3(1) of 2015 IBC (F_a = 1.2 for this site) ;
- γ_t is the soil total unit weight (γ_t=125 pcf for compacted Sand and Gravel fill);
- H is the height of the foundation wall.

Foundation Stability

The building foundation system should be checked for sliding between the base of the footings and base slab and the subgrade soils. The recommended coefficient of friction to resist sliding between mass concrete/formed concrete and silty sand is 0.3. The minimum factor of safety for sliding under static loads should be 1.5. Passive resistance may be computed using an equivalent fluid pressure of 180 pcf, neglecting the upper foot of embedment, provided that backfilling and compaction adjacent to the embedded portion of the foundations is performed.

GROUNDWATER CONTROL

As previously noted, we recommend the use of perimeter and subslab drains below the entire building footprint based on groundwater levels observed in the explorations.

The perimeter and subslab drains should consist of a 4-inch perforated PVC pipe, surrounded by a minimum 6-inch-thick zone of ¾-inch Crushed Stone wrapped in non-woven filter fabric (Mirafi 140N or equivalent). The top of pipe should be at least 6 inches below bottom of slab; pipe invert should be at or above bottom of footing elevation. The perimeter and subslab drain solid piping should be sloped to convey water by gravity away from the building to a storm drain or designated infiltration area. Additionally, we recommend a backflow preventer on the subslab drain to prevent water from rising up under the slab through the solid piping. Perforated piping adjacent to the building foundation may be laid flat.

CONSTRUCTION CONSIDERATIONS

Footing Subgrade Preparation

We anticipate that the soil encountered at footing subgrade level will consist of fill in most areas of the proposed building. The topsoil, subsoil (where present) and fill should be removed from below the bearing zone of proposed building footings to undisturbed, natural granular soil or weathered bedrock. The bearing zone is defined as the zone extending at a 1H:1V sloping down and outward from 1 foot horizontally from the bottom exterior edge of the footing. After excavation to natural soils (Sand, Sand and Gravel, Silty Sand and Glacial Till), or weathered rock, the subgrade should be proof-compacted with a minimum of six passes of a walk-behind vibratory drum roller or walk-behind heavy vibratory plate compactor (with a static weight of at least 500 pounds) in confined areas. Weak or soft spots identified during proof-compaction should be excavated and replaced with compacted Structural Fill. In areas where existing fill is removed from below proposed bottom of footing, the excavation should be backfilled to footing subgrade with compacted Structural Fill.

Where the proposed bottom of footing elevation is within the natural soils, the natural soils should be overexcavated by 1 foot, the subgrade proof-compacted as described above (after removal of soil disturbed by excavation), and a 1-foot-thick "pad" of compacted Sand-Gravel or ¾-inch Crushed Stone placed to bottom of footing grade.

Final excavations to footing subgrade should not be made until the areas are ready for fill or concrete placement. Excavation to final subgrade elevation should be performed using a smooth-edged bucket, if practical, to limit disturbance to the subgrade. Loose or disturbed material should be removed by hand.

Slab Subgrade Preparation

Existing soils may be left in place below slab base course elevation after removal of the topsoil and subsoil (if any), provided the subgrade is stable when proof-compacted with at least six passes of a large vibratory drum roller (minimum 10,000 pound static weight with 20,000 dynamic force). Excavate any weak or soft spots identified during proof-compaction and replace with compacted Sand-Gravel Fill. Recommended gradation requirements are presented in **Table 1**.

Subgrade Preparation for Driveway and Parking Areas

We understand that up to 5 feet of fill will be placed within the parking lot. Prior to placement of fill, any vegetation and topsoil, should be removed from proposed pavement areas and the subgrade proof-compacted with at least six passes of a large vibratory drum roller (minimum 10,000 pound static weight with 20,000 dynamic force). Excavate any weak or soft spots identified during proof-compaction and replace with compacted Sand-Gravel Fill.

Construction Dewatering

Based on the observed groundwater levels in the borings and test pits, construction dewatering will likely be required to construct footings and utilities "in the dry." We anticipate that dewatering may be accomplished using localized sumps and pumps, and discharged on-site into excavated pits located outside of the building area. If discharged to an off-site drainage system, pumped groundwater will need to be treated to remove total suspended solids (at a minimum). All construction dewatering should be conducted in accordance with local, state and federal regulations.

Reuse of Existing Soils

Based on visual and laboratory classifications, the existing on-site soil will not meet gradation and material requirements for Sand-Gravel. Some existing Fill materials may meet the gradation requirements of Granular Fill. However, though it will be difficult due to the high silt content, we anticipate that some of the on-site soils will be able to be reused as Structural Fill below building and pavement base courses provided that the water content is controlled and the material is not placed during wet and/or cold conditions. Handling, placement, and compaction of soil with a high silt content is difficult, especially during cold temperatures or when wet. To re-use some silty excavated soils on-site, it may be necessary to sandwich layers of the on-site soil between layers of off-site Sand-Gravel. Fill for use as building slab and pavement base course will need to be imported to the Site. In addition, imported fill will be required for the 1-foot-thick Sand-Gravel or Crushed Stone "pad" below footings.

Excavated soil from the Site may need to be exported depending on final site grades. Excavated soil should be disposed of in accordance with applicable local, state and federal regulations. Off-site disposal of soil may require chemical precharacterization testing to assess disposal options depending on the receiving facility.

Potential for Bedrock

Based on the borings and test pit data, we do not anticipate encountering bedrock for foundation construction, assuming footings are constructed above EL 113 feet. However, rippable weathered bedrock was encountered in seven of the twelve borings and 18 of the test pits and may be encountered in excavating for deeper utilities. Competent bedrock was encountered in the southern portion of the site at elevations ranging from EL 129.5 to 121.5 feet. In addition, bedrock outcrops were observed in the northern portion of the adjacent Woodsom Farms property. If encountered, we recommend bedrock be removed to at least 1 foot below proposed utility invert, and backfilled to the invert elevation with pipe bedding materials.

Excavation Slopes and Temporary Earth Support

Where space is not available to safely lay back excavations, a temporary earth support system will be required. Temporary earth support systems, if required, should be selected by the Contractor and be designed by an experienced Professional Engineer registered in the Commonwealth of Massachusetts and retained by the Contractor.

The Owner and the Contractor should make themselves aware of and become familiar with applicable local, state, and federal safety regulations, including the current Occupational Safety and Health Administration (OSHA) Excavation and Trench Safety Standards. Construction site safety generally is the sole responsibility of the Contractor, who shall also be solely responsible for the means, methods, and sequencing of construction operations. We are providing this information solely as a service to our Client. Under no circumstances should the information provided below be interpreted to mean that GZA is assuming responsibility for construction site safety or the Contractor's activities; such responsibility is not being implied and should not be inferred.

The Contractor should be aware that slope height, slope inclination, or excavation depths (including utility trench excavations) should in no case exceed those specified in local, state, or federal safety regulations, e.g.; OSHA Health and Safety Standards for Excavations, 29 CFR Part 1926, or successor regulations. Such regulations are strictly enforced and, if they are not followed, the Owner, Contractor, and/or earthwork and utility subcontractors could be liable for substantial penalties.

As a safety measure, it is recommended that all vehicles and soil piles be kept a minimum lateral distance from the crest of the slope equal to no less than the slope height. Exposed slope faces should also be protected against the elements.

FINAL DESIGN AND CONSTRUCTION

We trust that the information presented herein addresses your needs related to the geotechnical aspects of the project at this time for the proposed Amesbury Elementary School. GZA will prepare earthwork specifications and review near-final foundation, grading, and utility plans for geotechnical issues and to confirm that our recommendations are incorporated into the design documents.

During construction, we recommend that GZA be engaged to review contractor submittals and to observe subgrade preparation and building earthwork construction for compliance with our recommendations, project foundation plans, and specifications.

We thank you for the opportunity to work on this project and would look forward to our continued involvement. Please do not hesitate to contact the undersigned if you have any questions.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.

Heather Audet, P.E.
Senior Project Manager

Bruce W. Fairless, P.E.

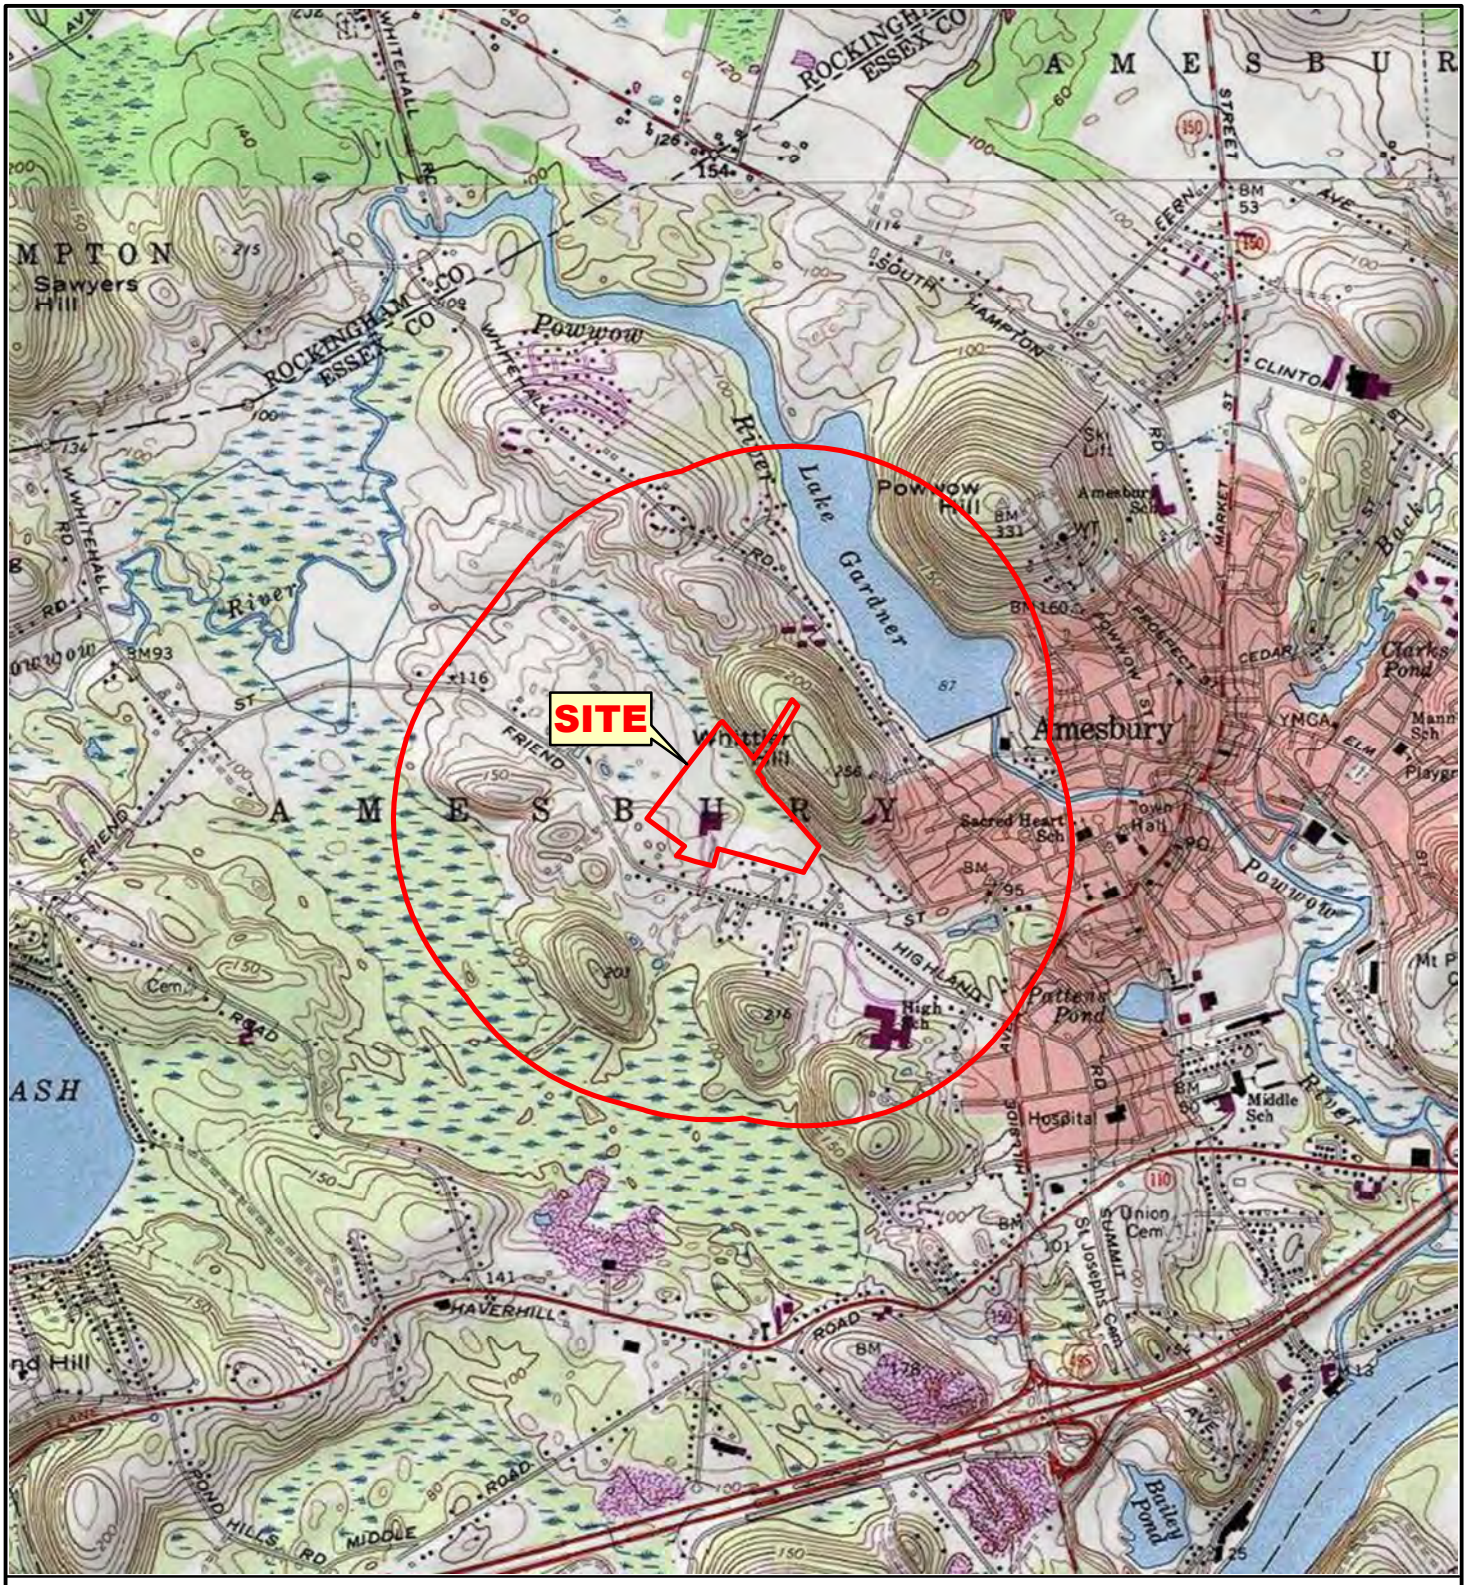
TABLE

Proposed Amesbury Elementary School
Amesbury, MA

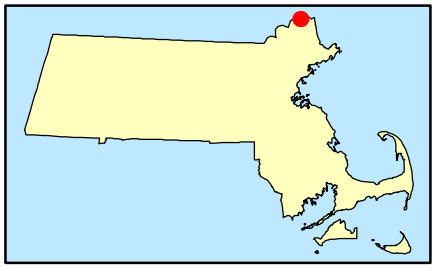
TABLE 1
RECOMMENDED USE AND GRADATION CRITERIA FOR FILL MATERIALS

Granular Fill: Within building area below slab-on-grade base course.
Within 2 feet of pavement basecourse.

Sand-Gravel: For use as slab-on-grade and pavement base course and as backfill within three feet laterally of below grade walls. Use for 1-foot thick pad below footings.



Crushed Stone: For use in underdrain system, slab base course, in bottom of excavations to aid in construction dewatering and maintaining subgrade stability during wet conditions, backfill behind walls, and in confined areas. Use for 1-foot thick pad below footings.



Ordinary Fill: General landscape areas, or more than 2 feet below pavement.

GRADATION REQUIREMENTS

Sieve Size	Percent Finer by Weight
Granular Fill shall be free from ice and snow, roots, sod, rubbish and other deleterious or organic matter. Granular Fill shall conform to the following gradation requirements:	
⅔ of the loose lift thickness	100
No. 10	30 - 90
No. 40	10 - 70
No. 200	*0 - 15 * 0 -8 for backfill behind walls
Sand-Gravel shall consist of durable sand and gravel and shall be free from ice and snow, roots, sod, rubbish and other deleterious or organic matter. Sand-Gravel shall conform to the following gradation requirements:	
3 inch	100
½ inch	50 - 85
No. 4	40 - 75
No. 40	10 - 35
No. 200	0 - 8
Crushed Stone shall consist of durable crushed rock or durable crushed gravel stone and shall be free from ice and snow, clay, loam and other deleterious material. Crushed Stone shall conform to the following gradation requirements:	
1 inch	100
3/4 inch	90 - 100
1/2 inch	10 - 50
3/8 inch	0 - 20
No. 4	0 - 5
Ordinary Fill	Ordinary Fill shall be free from trash, ice, snow, tree stumps, roots, organic materials, and other deleterious matter. Ordinary Fill shall contain no stone greater than two-thirds (⅔) the loose lift thickness with a maximum stone size of six (6) inches in diameter and contain no more than 30% passing the No. 200 sieve. It shall have physical properties such that it can be readily spread and compacted during filling.

APPENDIX A - LIMITATIONS

USE OF REPORT

1. GZA GeoEnvironmental, Inc. (GZA) prepared this report on behalf of, and for the exclusive use of our Client for the stated purpose(s) and location(s) identified in the Proposal for Services and/or Report. Use of this report, in whole or in part, at other locations, or for other purposes, may lead to inappropriate conclusions; and we do not accept any responsibility for the consequences of such use(s). Further, reliance by any party not expressly identified in the contract documents, for any use, without our prior written permission, shall be at that party's sole risk, and without any liability to GZA.

STANDARD OF CARE

2. GZA's findings and conclusions are based on the work conducted as part of the Scope of Services set forth in Proposal for Services and/or Report, and reflect our professional judgment. These findings and conclusions must be considered not as scientific or engineering certainties, but rather as our professional opinions concerning the limited data gathered during the course of our work. If conditions other than those described in this report are found at the subject location(s), or the design has been altered in any way, GZA shall be so notified and afforded the opportunity to revise the report,as appropriate, to reflect the unanticipated changed conditions .

3. GZA's services were performed using the degree of skill and care ordinarily exercised by qualified professionals performing the same type of services, at the same time, under similar conditions, at the same or a similar property. No warranty, expressed or implied, is made.

4. In conducting our work, GZA relied upon certain information made available by public agencies, Client and/or others. GZA did not attempt to independently verify the accuracy or completeness of that information. Inconsistencies in this information which we have noted, if any, are discussed in the Report.

SUBSURFACE CONDITIONS

5. The generalized soil profile(s) provided in our Report are based on widely-spaced subsurface explorations and are intended only to convey trends in subsurface conditions. The boundaries between strata are approximate and idealized, and were based on our assessment of subsurface conditions. The composition of strata, and the transitions between strata, may be more variable and more complex than indicated. For more specific information on soil conditions at a specific location refer to the exploration logs. The nature and extent of variations between these explorations may not become evident until further exploration or construction. If variations or other latent conditions then become evident, it will be necessary to reevaluate the conclusions and recommendations of this report.

6. In preparing this report, GZA relied on certain information provided by the Client, state and local officials, and other parties referenced therein which were made available to GZA at the time of our evaluation. GZA did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this evaluation.

7. Water level readings have been made in test holes (as described in this Report) at the specified times and under the stated conditions. These data have been reviewed and interpretations have been made in this Report. Fluctuations in the level of the groundwater however occur due to temporal or spatial variations in areal recharge rates, soil heterogeneities, the presence of subsurface utilities, and/or natural or artificially induced perturbations. The water table encountered in the course of the work may differ from that indicated in the Report.

8. Recommendations for foundation drainage, waterproofing, and moisture control address the conventional geotechnical engineering aspects of seepage control. These recommendations may not preclude an environment that allows the infestation of mold or other biological pollutants.

COMPLIANCE WITH CODES AND REGULATIONS

9. We used reasonable care in identifying and interpreting applicable codes and regulations. These codes and regulations are subject to various, and possibly contradictory, interpretations. Compliance with codes and regulations by other parties is beyond our control.

ADDITIONAL SERVICES

10. GZA recommends that we be retained to provide services during any future: site observations, design, implementation activities, construction and/or property development/redevelopment. This will allow us the opportunity to: i) observe conditions and compliance with our design concepts and opinions; ii) allow for changes in the event that conditions are other than anticipated; iii) provide modifications to our design; and iv) assess the consequences of changes in technologies and/or regulations.

20													
25													

REMARKS

1. Ground surface elevations estimated from Google Earth.
2. Encountered split spoon refusal approximately 7.4 feet below ground surface (bgs); therefore the boring was terminated at approximately 7.4 feet bgs. Upon completion borehole was backfilled up to existing grade with drill cuttings and sand.

See Log Key for explanation of sample description and identification procedures. Stratification lines represent approximate boundaries between soil and bedrock types. Actual transitions may be gradual. Water level readings have been made at the times and under the conditions stated. Fluctuations of groundwater may occur due to other factors than those present at the times the measurements were made.

25													

REMARKS

1. Ground surface elevations estimated from Google Earth.
2. Advanced casing and commenced drive & wash drilling methods to a depth of 4 feet below ground surface (bgs).
3. Observed slight color change and increased silt content over bottom 2-inches of sample S-5, possible strata change.
4. Advanced casing to approximately 9 feet bgs and continued in an open hole after sample S-5.
5. Change in strata based on change in drilling resistance.
6. Observed increased roller-bit resistance and rig chatter approximately 13.3 feet bgs. Encountered split spoon refusal approximately 14.2 feet bgs in sample S-6.
7. Observed increased roller bit resistance approximately 60 sec/inch from 14.2 to 15 feet bgs. Observed small, angular rock fragments in return water.
8. Terminated boring approximately 15 feet bgs. Upon completion borehole was backfilled up to existing grade with drill cuttings and sand.

See Log Key for explanation of sample description and identification procedures. Stratification lines represent approximate boundaries between soil and bedrock types. Actual transitions may be gradual. Water level readings have been made at the times and under the conditions stated. Fluctuations of groundwater may occur due to other factors than those present at the times the measurements were made.

25													

REMARKS

1. Ground surface elevations estimated from Google Earth.
2. Advanced casing and commence drive & wash drilling methods at a depth of 4 feet below ground surface (bgs).
3. Observed increased roller bit resistance and rig chatter approximately 17 to 18 feet bgs. Observed gray, angular rock fragments in return water.
4. Encountered split soon refusal approximately 18.3 feet bgs; therefore boring was terminated at approximately 18.3 feet bgs. Upon completion borehole was backfilled up to existing grade with drill cuttings and sand.

See Log Key for explanation of sample description and identification procedures. Stratification lines represent approximate boundaries between soil and bedrock types. Actual transitions may be gradual. Water level readings have been made at the times and under the conditions stated. Fluctuations of groundwater may occur due to other factors than those present at the times the measurements were made.

REMARKS

1. Ground surface elevation estimated from a plan entitled "Additional Soil Test Location Plan", dated 10/18/19, prepared by Dinisco Design.
2. Wash is returning light brown color and no sediment.
3. Very dense soils encountered at depth of 11 feet below ground surface; wash water returning sediment that appears to be glacial till.
4. Rock structure observed in gravel-sized pieces in sample S-7.
5. Monitoring well installed and a flush-mounted cover installed upon completion.

See log key for explanation of sample descriptions and identification procedures. Stratification lines represent approximate boundaries between soil and bedrock types. Actual transitions may be gradual. Water level readings have been made at the times and under the conditions stated. Fluctuations of groundwater may occur due to other factors than those present at the times the measurements were made.

REMARKS

1. Ground surface elevations estimated from an undated plan entitled "21288ec_WBLOCK 12-17-19_3-PLAN SET (ANSI E)" (NAVD88 datum) received from DiNisco Design on December 23, 2019.
2. Sample S-2 was obtained using AW rods. The SPT value is not representative of insitu conditions.
3. Due to the use of hollow stem auger drilling methods, the SPT-value may not be representative at samples S-3 through S-5.
4. Completely weathered rock observed in sample S-5.
5. Increase in drilling effort at approximately 17 feet below ground surface (bgs).
6. Rock structure observed in Sample S-6.
7. Boring terminated at approximately 20 feet bgs. Upon completion, borehole backfilled with soil cuttings and sand to approximate ground surface.

See Log Key for explanation of sample description and identification procedures. Stratification lines represent approximate boundaries between soil and bedrock types. Actual transitions may be gradual. Water level readings have been made at the times and under the conditions stated. Fluctuations of groundwater may occur due to other factors than those present at the times the measurements were made.

Boring No.: GZA-9

Amesbury, Massachusetts 01913

Location Address or Lot No. 193 Lions Mouth Road, Amesbury, MA 01913 – Charles C. Cashman Elementary School

TEST HOLE LOG

Soil Evaluator: Joe Losanno

Deep Hole Number 18-01 Date: 11/14/2018 Time: A.M. Weather 30°, sunny

Location (identify on site plan) see attached sketch

Land Use Playground Area Slope (%) 0-3 Surface Stones None

Vegetation Grass Lawn

Landform Ground Moraine

Position on landscape (sketch on the back) Bottom Slope

Distances from:

Open Water Body see sketch Feet Drainageway see sketch Feet

Possible Wet Area see sketch Feet Property Line see sketch Feet

Drinking Water Well see sketch Feet Other

DEEP OBSERVATION HOLE LOG

Depth from Surface (inches)	Soil Horizon	Soil Texture (USDA)	Soil Color (Munsell)	Soil Mottling	Other (Structure, Stones, Boulders, Consistency, % Gravel)
0 – 10”	Imported Topsoil	Silt Loam	10 YR 3/3	None Observed	Massive-Friable
10 – 60”	C	Sandy Loam	2.5 Y 5/4	Some @ 15”	Massive-Friable, w/ gravel and weathered rock (30-40%)

Parent Material (geologic) Coarse-loamy melt-out till Depth to Bedrock: None Observed

Depth to Groundwater: Standing Water in the Hole: None Observed Weeping from Pit Face: None Observed

Estimated Seasonal High Ground Water: Inconclusive – difficult to determine

Location Address or Lot No. 193 Lions Mouth Road, Amesbury, MA 01913 – Charles C. Cashman Elementary School

TEST HOLE LOG

Soil Evaluator: Joe Losanno

Deep Hole Number 18-02 Date: 11/14/2018 Time: A.M. Weather 30°, sunny

Location (identify on site plan) see attached sketch

Land Use Playground Area Slope (%) 0-3 Surface Stones None

Vegetation Grass Lawn

Landform Ground Moraine

Position on landscape (sketch on the back) Bottom Slope

Distances from:

Open Water Body	see sketch	Feet	Drainageway	see sketch	Feet
Possible Wet Area	see sketch	Feet	Property Line	see sketch	Feet
Drinking Water Well	see sketch	Feet	Other		

DEEP OBSERVATION HOLE LOG

Depth from Surface (inches)	Soil Horizon	Soil Texture (USDA)	Soil Color (Munsell)	Soil Mottling	Other (Structure, Stones, Boulders, Consistency, % Gravel)
0 – 8”	Imported Topsoil	Silt Loam	10 YR 3/3	None Observed	Massive-Friable
8 – 20”	Fill	Loamy Sand (Fine)	10 YR 4/4	None Observed	Massive-Friable, w/ gravel
20 – 60”	C	Sandy Loam	2.5 Y 5/4	> 5% @ 20” Concentrations: 7.5 YR 4/6 Depletions: 5 Y 4/1	Massive-Friable, w/ gravel and weathered rock (10%)

Parent Material (geologic) Coarse-loamy melt-out till Depth to Bedrock: None Observed

Depth to Groundwater: Standing Water in the Hole: @ 57” Weeping from Pit Face: @ 49”

Estimated Seasonal High Ground Water: @ 20” based on soil morphology & weathered rock

Note: Fill material observed appears to be the same material as the natural substratum. Based on knowledge of the development of the site, it is assumed that the material removed for the leveling of the baseball field was placed above the natural substratum and then covered by the imported topsoil observed.

Location Address or Lot No. 193 Lions Mouth Road, Amesbury, MA 01913 – Charles C. Cashman Elementary School

18-09	11/29/18	28”	Weeping at 28”	Refusal at 32” – Fractured Ledge.
18-10	11/29/18	70”	Weeping at 70”	22”-90” some Fractured Rock (1) No Refusal.
18-11	11/29/18	Inconclusive (3)	No water at 90”.	8”-90” some Fractured Rock (1) 90 Refusal (Fractured ledge.)
18-12	11/29/18	Inconclusive (3)	No water at 96”	8”-96” some Fractured Rock (1) 96 Refusal (Fractured ledge.)
18-13	11/29/18	44”	Weeping at 44”	Fill – No refusal at 50”

(1.) Denotes profile that included some weathered rock in portions in the profile with the soil.
(2.) Denotes Profile that included a significant proportion of weathered rock in the profile with the soil.
(3.) Inconclusive due to inconsistent redoximorphic features (variegated mottles), or possibly obscured due to the presence of weathered rock. Likely not an indicator of seasonal high groundwater.

ESHGW = Estimated Seasonal High Groundwater.

RE: Amesbury Elementary School Project at 193 Lions Mouth Road, Amesbury, MA.
Additional Soil Testing on May 12 and 13, 2020

Dear Ms. Low:

This report contains the results of the on-site soil testing conducted by DGT Associates on May 12 and 13, 2020 at the subject property. This testing was conducted to provide additional soils information within the area of certain planned stormwater management facilities to confirm soil conditions and estimated seasonal high groundwater elevations. This was done to supplement the data as recommended by the Peer Reviewers of the project to check any assumptions made in the design of the stormwater facilities that were based on previous testing. Analysis of the data will be used to make any necessary adjustments in the designs if found necessary.

The testing consisted of ten (10) deep test pits and permeability tests were also performed at four (4) of the test pit locations. Testing was performed by Massachusetts Licensed Soil Evaluator (Fredric W. King, PE) of DGT. The City of Amesbury Department of Public Works provided the excavation services on both days of testing. *Note that the permeability tests are for saturated hydraulic conductivity as added supporting information of the textural analysis of the on-site soils. The soil infiltration rates will utilize the Rawls infiltration rates per the Mass. Stormwater Management Handbook.*

The test pit logs are included on Attachment 1. The permeability tests are in Attachment 2. A Summary Table is included in Attachment 3 that shows the surface elevation and ESHGW depth and elevation at each of the Test Holes. The locations of the test pits, are included in the Soil Test Hole Location Plan in Attachment 4.

Please contact me if you have any questions regarding this report.

Sincerely,
DGT Associates

Fredric W. King

RE: Charles C. Cashman Elementary School at 193 Lions Mouth Road, Amesbury

Dear Ms. Low:

This report contains the results of the on-site soil testing conducted by DGT Associates on November 26, 2019 and December 12, 2019 at the Charles C. Cashman Elementary School property in Amesbury, Massachusetts for the proposed New Amesbury Elementary School Project. The testing consisted of ten (10) deep test pits, and two (2) permeability test holes.

DGT had previously conducted soil testing at this property on November 14th and 29th of 2018. This testing was completed to provide supplemental information on the character of the soils at the site, estimated seasonal high groundwater table (ESHGWT) depths and to assess the suitability of the soils for stormwater management design purposes for the proposed project. Testing was performed by Massachusetts Licensed Soil Evaluator (Joseph A. Losanno, EIT) of DGT. The City of Amesbury Department of Public Works provided the excavation services on both days of testing.

According to the NRCS Soils Mapping, the soil in the area of testing are Leicester fine sandy loam and Charlton fine sandy loam. The testing generally confirmed this data except that depths to ESHGW were shallower than expected in the areas of Charlton series soils. Soil Report dated 12/14/19 contains all NRCS data.

Generally, throughout the area of testing, the soils observed consisted of an imported topsoil, over a loamy sand or fine sand fill, over a sandy loam substratum, over fractured / weathered ledge. For more detailed information, see the test logs contained in Attachment 1. The locations of the test pits, are included in the Soil Test Hole Location Plan in Attachment 3.

The ESHGWT was determined by the presence of redoximorphic features in conjunction with groundwater weeping / standing groundwater observed in test pits TH 18-05, 19-02, 19-03 and 19-07. Test pits 19-01 were determined to have variegated colors within the test pit (weeping groundwater was observed at TH 19-01 at 127"). No signs of redoximorphic features were observed within TH 19-05a, 19-05b, 19-05c and 19-06.

Refusal / Ledge (non-rip-able) was observed within TH 19-05a, 19-05b and 19-05c between 10 and 39 inches below grade. Refusal was also encountered in TH 19-06 at 96 inches below grade. Ledge encountered in all of the other test pits containing ledge was determined to be rip-able.

Two (2) permeability tests utilizing the US Army Corps of Engineers method "In-situ Permeability Testing in the Vadose Zone" were performed in the substratum of test pit 19-01 and 19-03 to help characterize the soils in certain strata at these locations (note: that these are not infiltration rates). The resulting permeability rates were 0.32 inches per hour and 1.68 inches per hour respectively. The tabulation of these tests are included in Attachment 2. These tests were in representative soil types at the site and confirm the soils are relatively permeable and suitable for infiltration purposes. Design infiltration rates will based on the RAWLS rates published in the Massachusetts Stormwater Handbook in coordination with our testing results.

DGT Associates
Surveying &
Engineering

1071 Worcester Rd
Framingham, MA 01701
508.879.0030
www.dgtassociates.com

Soil samples were gathered from the site to run sieve analyses of the on-site material in order to confirm the field textural analysis. At this time DGT has not completed the sieve analyses due to mechanical issues with our in house test equipment. Therefore, some of the information contained in this report is subject to slight variation. An updated report will be supplied if any significant modifications to this report are required.

Please contact me if you have any questions regarding this report.

Sincerely,
DGT Associates

Joseph A. Losanno, EIT (SE 13870)
Project Engineer

RE: Charles C. Cashman Elementary School at 193 Lions Mouth Road, Amesbury

Dear Ms. Khazadian:

This report contains the results of the on-site soil testing conducted by DGT Associates on November 14, 2018 and November 29, 2018 at the Charles C. Cashman Elementary School property in Amesbury, Massachusetts. The testing consisted of eleven (11) deep test pits, one (1) hand dug test pit, and two (2) permeability test holes.

The purpose of the testing was to determine the character of the soils at the site, estimated seasonal high groundwater (ESHGW) depths and to assess the suitability of the soils for stormwater management design purposes for a proposed project. Testing was performed by Massachusetts Licensed Soil Evaluators (Fredrick W. King, P.E. and Joseph A. Losanno, EIT) of DGT. The Town of Amesbury Department of Public Works provided the excavation services on both days of testing.

According to the NRCS Soils Mapping, the soil in the area of testing are Leicester fine sandy loam and Charlton fine sandy loam. The testing generally confirmed this data except that depths to ESHGW were shallower than expected. Attachment 1 contains the NRCS Map for the site and descriptions of the soil types.

Generally throughout the area of testing the soils observed consisted of an imported topsoil, over a loamy sand or fine sand fill, over a sandy loam to fine sand substratum, over fractured / weathered ledge. For more detailed information see the test logs contained in Attachment 2. The locations of the test pits, are included in the Soil Test Hole Location Plan in Attachment 5.

Due to the abnormally high amount of precipitation that fell throughout the months of October and November, the high groundwater conditions observed at the site provided a good check on the ESHGW determinations. In some of the test holes, the observed groundwater weeping / standing groundwater elevation confirmed that observed redoximorphic soil features (mottles) were variegated when there were large differences between the observed elevation of mottles in relation to the weeping / standing groundwater. The ESHGWT was determined by observed weeping / standing groundwater between twenty-eight inches (28”) and seventy-six inches (76”) for test pits 18-07 through 18-10 and 18-13. The ESHGWT was determined by redoximorphic features observed between eight inches (8”) and twenty inches (20”) for test pits 18-02, 18-03 and 18-04. The ESHGWT was determined to be inconclusive or below the bottom of the test hole for TH 18-01, 18-11, and 18-12.

www.dgtassociates.com

Two (2) permeability tests utilizing the US Army Corps of Engineers method "In-situ Permeability Testing in the Vadose Zone" were performed in the substratum of test pit 18-02 and the sand fill material in test pit 18-07. The resulting permeability rates were 5.5 inches per hour and 15.1 inches per hour respectively. The tabulation of these tests are included in Attachment 3. These tests were in representative soil types at the site and confirm the soils are relatively permeable and suitable for infiltration purposes.

Soil samples were gathered from the site to run sieve analyses of the on-site material in order to confirm the field textural analysis. These results will be used along with the permeability testing to determine design infiltration rates based on the RAWLS rates published in the Massachusetts Stormwater Handbook. For more detailed information, see the sieve analysis data and computation sheets with the particle size distribution graph in Attachment 4. Also see Figure 2.3.2: USDA, NRCS, 2007 National Soil Survey Handbook, Part 618, Exhibit 8 Comparison of Particle Size Scales for each test also contained in Attachment 4.

Please contact me if you have any questions regarding this report.

Sincerely,
DGT Associates

Joseph Losanno

Joseph A. Losanno, EIT (SE 13870)

NRCS Soils Map and Information

for

Charles C. Cashman Elementary School

193 Loins Mouth Road
Amesbury, Massachusetts 01913

Map Scale: 1:3,930 if printed on A landscape (11" x 8.5") sheet.

N

Meters: 0 50 100 200 300

Feet: 0 150 300 600 900

Map projection: Web Mercator Corner coordinates: WGS84 Edge tics: UTM Zone 19N WGS84

MAP LEGEND

Area of Interest (AOI)

- Area of Interest (AOI)

Soils

- Soil Map Unit Polygons
- Soil Map Unit Lines
- Soil Map Unit Points

Special Point Features

- Blowout
- Borrow Pit
- Clay Spot
- Closed Depression
- Gravel Pit
- Gravelly Spot
- Landfill
- Lava Flow
- Marsh or swamp
- Mine or Quarry
- Miscellaneous Water
- Perennial Water
- Rock Outcrop
- Saline Spot
- Sandy Spot
- Severely Eroded Spot
- Sinkhole
- Slide or Slip
- Sodic Spot
- Spoil Area
- Stony Spot
- Very Stony Spot
- Wet Spot
- Other
- Special Line Features

Water Features

- Streams and Canals

Transportation

- Rails
- Interstate Highways
- US Routes
- Major Roads
- Local Roads

Background

- Aerial Photography

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Essex County, Massachusetts, Northern Part
Survey Area Data: Version 14, Sep 7, 2018

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Dec 31, 2009—Sep 12, 2016

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
67A	Leicester fine sandy loam, 0 to 3 percent slopes	5.3	19.5%
405B	Charlton fine sandy loam, 3 to 8 percent slopes	17.0	61.8%
405C	Charlton fine sandy loam, 8 to 15 percent slopes	5.1	18.7%
Totals for Area of Interest		**27.5**	**100.0%**

Essex County, Massachusetts, Northern Part

67A—Leicester fine sandy loam, 0 to 3 percent slopes

Map Unit Setting

National map unit symbol: vjh4
Mean annual precipitation: 45 to 54 inches
Mean annual air temperature: 43 to 54 degrees F
Frost-free period: 145 to 240 days
Farmland classification: Not prime farmland

Map Unit Composition

Leicester and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Leicester

Setting

Landform: Depressions, drainageways
Landform position (two-dimensional): Toeslope
Landform position (three-dimensional): Dip
Down-slope shape: Concave
Across-slope shape: Concave
Parent material: Friable coarse-loamy eolian deposits over friable coarse-loamy basal till derived from granite and gneiss

Typical profile

O - 0 to 3 inches: muck
H2 - 3 to 8 inches: fine sandy loam
H3 - 8 to 31 inches: fine sandy loam
H4 - 31 to 60 inches: gravelly fine sandy loam

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Natural drainage class: Poorly drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.60 to 6.00 in/hr)
Depth to water table: About 0 to 18 inches
Frequency of flooding: None
Frequency of ponding: None
Available water storage in profile: Moderate (about 8.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: A/D
Hydric soil rating: Yes

Minor Components

Whitman

Percent of map unit: 8 percent
Landform: Depressions
Hydric soil rating: Yes

Woodbridge

Percent of map unit: 7 percent
Hydric soil rating: No

Data Source Information

Soil Survey Area: Essex County, Massachusetts, Northern Part
Survey Area Data: Version 14, Sep 7, 2018

Essex County, Massachusetts, Northern Part

405B—Charlton fine sandy loam, 3 to 8 percent slopes

Map Unit Setting

National map unit symbol: 2wh0n
Elevation: 0 to 1,440 feet
Mean annual precipitation: 36 to 71 inches
Mean annual air temperature: 39 to 55 degrees F
Frost-free period: 140 to 240 days
Farmland classification: All areas are prime farmland

Map Unit Composition

Charlton and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Charlton

Setting

Landform: Hills, ground moraines, ridges
Landform position (two-dimensional): Backslope, shoulder, summit
Landform position (three-dimensional): Crest, side slope, nose slope
Down-slope shape: Linear, convex
Across-slope shape: Convex
Parent material: Coarse-loamy melt-out till derived from granite, gneiss, and/or schist

Typical profile

Ap - 0 to 7 inches: fine sandy loam
Bw - 7 to 22 inches: gravelly fine sandy loam
C - 22 to 65 inches: gravelly fine sandy loam

Properties and qualities

Slope: 3 to 8 percent
Depth to restrictive feature: More than 80 inches
Natural drainage class: Well drained
Runoff class: Low
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to high (0.14 to 14.17 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Salinity, maximum in profile: Nonsaline (0.0 to 1.9 mmhos/cm)
Available water storage in profile: Moderate (about 6.9 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2e
Hydrologic Soil Group: B

Hydric soil rating: No

Minor Components

Sutton

Percent of map unit: 8 percent
Landform: Ground moraines, hills
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Base slope
Down-slope shape: Concave
Across-slope shape: Linear
Hydric soil rating: No

Paxton

Percent of map unit: 5 percent
Landform: Drumlins, hills, ground moraines
Landform position (two-dimensional): Backslope, summit, shoulder
Landform position (three-dimensional): Side slope, crest
Down-slope shape: Linear, convex
Across-slope shape: Convex
Hydric soil rating: No

Leicester

Percent of map unit: 1 percent
Landform: Drainageways, depressions
Down-slope shape: Linear
Across-slope shape: Concave
Hydric soil rating: Yes

Chatfield

Percent of map unit: 1 percent
Landform: Hills, ridges
Landform position (two-dimensional): Backslope, shoulder, summit
Landform position (three-dimensional): Crest, side slope, nose slope
Down-slope shape: Convex
Across-slope shape: Linear, convex
Hydric soil rating: No

Data Source Information

Deep Test Hole Logs

for

Charles C. Cashman Elementary School

193 Loins Mouth Road
Amesbury, Massachusetts 01913

Location Address or Lot No. 193 Lions Mouth Road, Amesbury, MA 01913 – Charles C. Cashman Elementary School

TEST HOLE LOG

Soil Evaluator: Joe Losanno

Deep Hole Number 18-01 Date: 11/14/2018 Time: A.M. Weather 30°, sunny

Location (identify on site plan) see attached sketch

Land Use Playground Area Slope (%) 0-3 Surface Stones None

Vegetation Grass Lawn

Landform Ground Moraine

Position on landscape (sketch on the back) Bottom Slope

Distances from:

Open Water Body see sketch Feet Drainageway see sketch Feet

Possible Wet Area see sketch Feet Property Line see sketch Feet

Drinking Water Well see sketch Feet Other

DEEP OBSERVATION HOLE LOG

Depth from Surface (inches)	Soil Horizon	Soil Texture (USDA)	Soil Color (Munsell)	Soil Mottling	Other (Structure, Stones, Boulders, Consistency, % Gravel)
0 – 10”	Imported Topsoil	Silt Loam	10 YR 3/3	None Observed	Massive-Friable
10 – 60”	C	Sandy Loam	2.5 Y 5/4	Some @ 15”	Massive-Friable, w/ gravel and weathered rock (30-40%)

Parent Material (geologic) Coarse-loamy melt-out till Depth to Bedrock: None Observed

Depth to Groundwater: Standing Water in the Hole: None Observed Weeping from Pit Face: None Observed

Estimated Seasonal High Ground Water: Inconclusive – difficult to determine

Location Address or Lot No. 193 Lions Mouth Road, Amesbury, MA 01913 – Charles C. Cashman Elementary School

TEST HOLE LOG

Soil Evaluator: Joe Losanno

Deep Hole Number 18-02 Date: 11/14/2018 Time: A.M. Weather 30°, sunny

Location (identify on site plan) see attached sketch

Land Use Playground Area Slope (%) 0-3 Surface Stones None

Vegetation Grass Lawn

Landform Ground Moraine

Position on landscape (sketch on the back) Bottom Slope

Distances from:

Open Water Body	see sketch	Feet	Drainageway	see sketch	Feet
Possible Wet Area	see sketch	Feet	Property Line	see sketch	Feet
Drinking Water Well	see sketch	Feet	Other		

DEEP OBSERVATION HOLE LOG

Depth from Surface (inches)	Soil Horizon	Soil Texture (USDA)	Soil Color (Munsell)	Soil Mottling	Other (Structure, Stones, Boulders, Consistency, % Gravel)
0 – 8”	Imported Topsoil	Silt Loam	10 YR 3/3	None Observed	Massive-Friable
8 – 20”	Fill	Loamy Sand (Fine)	10 YR 4/4	None Observed	Massive-Friable, w/ gravel
20 – 60”	C	Sandy Loam	2.5 Y 5/4	> 5% @ 20” Concentrations: 7.5 YR 4/6 Depletions: 5 Y 4/1	Massive-Friable, w/ gravel and weathered rock (10%)

Parent Material (geologic) Coarse-loamy melt-out till Depth to Bedrock: None Observed

Depth to Groundwater: Standing Water in the Hole: @ 57” Weeping from Pit Face: @ 49”

Estimated Seasonal High Ground Water: @ 20” based on soil morphology & weathered rock

Note: Fill material observed appears to be the same material as the natural substratum. Based on knowledge of the development of the site, it is assumed that the material removed for the leveling of the baseball field was placed above the natural substratum and then covered by the imported topsoil observed.

Location Address or Lot No. 193 Lions Mouth Road, Amesbury, MA 01913 – Charles C. Cashman Elementary School

Soil Test Hole Location Plan

for

Charles C. Cashman Elementary School

193 Loins Mouth Road
Amesbury, Massachusetts 01913

LEGEND

- SURFACE CONTOUR
- EDGE OF PAVEMENT
- CHAIN LINK FENCE
- EDGE OF WOODED AREA
- OHW — EXISTING UTILITY POLE WITH DESIGNATION OVERHEAD WIRES AND GUY POLE
- RETAINING WALL
- EDGE OF DIRT / GRAVEL
- WFA2 — LIMIT OF BORDERING VEGETATED WETLAND WITH FLAG NUMBER
- D.E.P. HYDROLOGICAL CONNECTION (FROM MASS GIS)
- LIMIT OF BORDERING VEGETATED WETLAND (FROM PLAN IN NOTE 5)
- 100' WETLAND BUFFER ZONE
- 50' NO-BUILD BUFFER ZONE
- 25' NO-DISTURB BUFFER ZONE
- FEMA FLOOD ZONE X (SEE NOTE 6)
- × 100.7 — SPOT ELEVATION
- PROMINENT DECIDUOUS TREE
- PROMINENT CONIFEROUS TREE
- TYPICAL SHRUB
- LIGHT POLE
- WATER HYDRANT
- SIGN
- 2-POST SIGN
- VGC — VERTICAL GRANITE CURB
- BB — BITUMINOUS BERM
- BIT. CONC. — BITUMINOUS CONCRETE
- CLF — CHAIN LINK FENCE
- T1–P1 — TRANSECT # – PLOT # (SEE NOTE 7)

DEED BOOK 5843, PAGE 244
PLAN BOOK 121, PLAN 52
PLAN 454 OF 1965

RECORD OWNER: THE INHABITANTS OF THE TOWN OF AMESBURY

NOTES:

1) THIS PLAN HAS BEEN PREPARED TO ASSIST ARCHITECT IN THE PRELIMINARY PLANNING PHASES OF THE NEW ELEMENTARY SCHOOL PROJECT.
2) THIS PLAN HAS BEEN COMPILED FROM INFORMATION PROVIDED BY THE CITY OF AMESBURY, RECORD PLANS, AND AERIAL PHOTOGRAPHS.
3) ELEVATIONS SHOWN HEREON FROM CITY GIS AND PURPORTS TO REFER TO THE NATIONAL GEODETIC VERTICAL DATUM OF 1929 (NGVD29) PER THE CITY ENGINEER.
4) PROPERTY LINES SHOWN HEREON SHOULD BE CONSIDERED APPROXIMATE.
5) WETLANDS SHOWN HEREON WERE DELINEATED BY DGT ASSOCIATES ON 7/19/18 AND LOCATED BY INSTRUMENT SURVEY ON 7/24/18 AND 7/25/18 BY HANCOCK ASSOCIATES. SAID WETLANDS ARE SUPPLEMENTED BY INFORMATION SCALED FROM PLAN ENTITLED "WOODSOM FARM SOCCER FIELDS" BY OAK CONSULTING GROUP, REVISION DATE 3/5/15 AND FROM MASS GIS OLIVER MAPS WETLAND LAYERS. THE DELINEATION WAS ADJUSTED BY BSC GROUP AND DGT ASSOCIATES ON 10/2/18 AND LOCATED ON 10/3/18 BY HANCOCK ASSOCIATES.
6) FEMA FLOOD ZONE X SHOWN HEREON SCALED FROM FLOOD INSURANCE RATE MAP 25009C0101F BEARING AN EFFECTIVE DATE OF 7/3/2012. NO ELEVATION ASSOCIATED WITH SAID FLOOD ZONE.
7) TRANSECT AND PLOT NUMBERS SHOWN HEREON PROVIDED BY DGT ASSOCIATES.

Surficial Geologic Map of the Salem Depot-Newburyport East-Wilmington-Rockport 16-Quadrangle Area in Northeast Massachusetts

Compiled by Byron D. Stone, Janet Radway Stone, and Mary L. DiGiacomo-Cohen

Introduction

The surficial geologic map of the Salem Depot-Newburyport East-Wilmington-Rockport area shows the distribution of nonlithified earth materials at land surface in sixteen 7.5-minute quadrangles (total 658 mi^2) in northeast Massachusetts (fig. 1). Across Massachusetts, these materials range from a few feet to more than 500 ft in thickness. They overlie bedrock, which crops out in upland hills and in resistant ledges in valley areas. The geologic map differentiates surficial materials of Quaternary age on the basis of their lithologic characteristics (grain size, sedimentary structures, mineral and rock-particle composition), constructional geomorphic features, stratigraphic relationships, and age. Surficial materials also are known in engineering classifications as unconsolidated soils, which include coarse-grained soils, fine-grained soils, or organic fine-grained soils. Surficial materials underlie and are the parent materials of modern pedogenic soils, which have developed in them at the land surface. Surficial earth materials significantly affect human use of the land and an accurate description of their distribution is particularly important for water resources, construction aggregate resources, earth-surface hazards assessments, and land-use decisions.

The mapped distribution of surficial materials that lie between the land surface and the bedrock surface is based on detailed geologic mapping of 7.5-minute topographic quadrangles, as part of a cooperative state-wide mapping program between the U.S. Geological Survey and the Massachusetts Department of Public Works (now Massachusetts Highway Department) (Page, 1967, Stone, 1982), and the Office of the Massachusetts State Geologist. Each published geologic map presents a detailed description of local geologic map units, the genesis of the deposits, and age correlations among units. Regional summaries of these maps and unpublished maps discuss the ages of multiple glaciations, the nature of glaciofluvial, glaciolacustrine, and glaciomarine deposits, and the processes of ice advance and retreat across Massachusetts (Warren and Stone, 1986, Koteff and Pessl, 1981, papers in Larson and Stone, 1982, Oldale and Barlow, 1986, Stone and Borns, 1986).

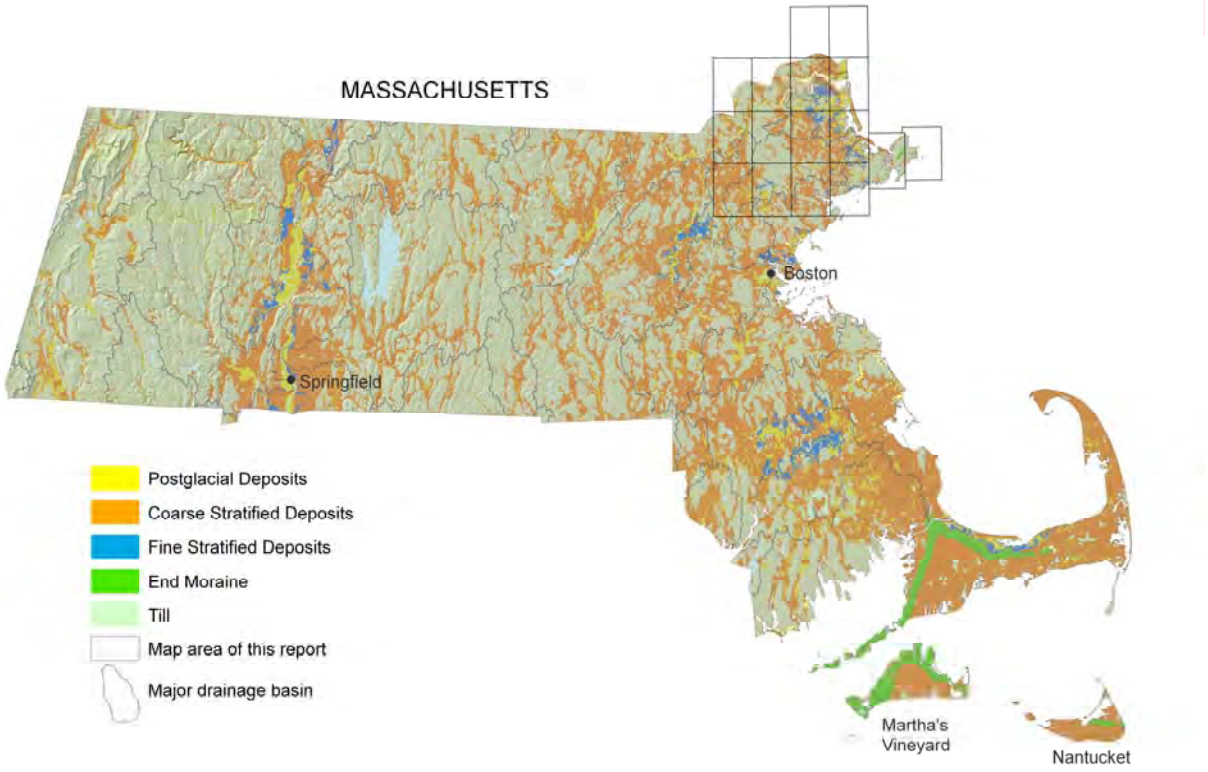

Figure 1. General distribution of glacial and postglacial deposits in Massachusetts (Stone and Beinikis, 1993, MassGIS, 1999) and map area covered by this report.

This compilation of surficial geologic materials is an interim product that defines the areas of exposed bedrock, and the boundaries between glacial till, glacial stratified deposits, and overlying postglacial deposits. This work is part of a comprehensive study to produce a statewide digital map of the surficial geology at a 1:24,000-scale level of accuracy. This map of 16 quadrangles revises previous digital surficial geologic maps (Stone and Beinikis, 1993, MassGIS, 1999) that were compiled on base maps at regional scales of 1:250,000 and 1:125,000. The purpose of this study is to provide fundamental geologic data for the evaluation of natural resources, hazards, and land information within the Commonwealth of Massachusetts.

Surficial Materials in Massachusetts

Most of the surficial materials in Massachusetts are deposits of the last two continental ice sheets that covered all of New England in the latter part of the Pleistocene ice age (Schafer and Hartshorn, 1965; Stone and Borns, 1986; Oldale and others, 1982). The glacial deposits are divided into two broad categories, ***glacial till*** and ***glacial stratified deposits***. Till, the most widespread glacial deposit, was laid down directly by glacier ice. Glacial stratified deposits are concentrated in valleys and lowland areas and were laid down by glacial meltwater in streams, lakes, and the sea in front of the retreating ice margin during the last deglaciation. Postglacial sediments, primarily

floodplain alluvium and swamp deposits, make up a lesser proportion of the unconsolidated materials.

Glacial till deposits consist of nonsorted, generally nonstratified mixtures of mineral and rock particles, ranging in grain size from clay to large boulders. The matrix of most tills is composed dominantly of fine sand and silt. Boulders within and on the surface of tills range from sparse to abundant. Some tills contain lenses of sorted sand and gravel and less commonly, masses of laminated fine-grained sediments. The color and lithologic characteristics of till deposits vary across Massachusetts, but generally reflect the composition of the local underlying and northerly adjacent bedrock from which the till was derived. Till blankets the bedrock surface in variable thickness, ranging from a few inches to more than 200 ft, and commonly underlies stratified meltwater deposits. Tills deposited during the last two glaciations occur in superposition within Massachusetts (Koteff, 1966; Newton, 1978; Weddle and others, 1989). The upper till was deposited during the last (late Wisconsinan) glaciation; it is the most extensive till and commonly is observed in surface exposures, especially in areas where till thickness is less than 15 ft (thin till unit on the map). The lower till ("old" till) was deposited during an earlier glaciation (probably Illinoian), and has a more limited distribution; it is principally a subsurface deposit that constitutes the bulk of material in drumlins and other hills where till thickness is greater than 15 ft. The distribution of lower till is shown primarily by the thick till unit on the map. Generally, the lower till generally is overlain by thin upper till deposits in these areas. In all exposures showing the superposed two tills, the base of the upper till truncates the weathered surface of the lower till. The lower part of the upper till commonly displays a zone of shearing, dislocation, and brecciation, in which clasts of lower till were mixed and incorporated into the upper till during the last glaciation.

End moraine deposits are composed predominantly of bouldery ablation till, but may also locally include sorted sediments. These deposits were laid down by glacial-melting processes along active ice margins during retreat of the last (late Wisconsinan) ice sheet. Extensive end moraines on Nantucket and Martha's Vineyard (fig. 1) are related to the terminal position of the late Wisconsinan ice sheet, and the end moraines on Cape Cod are associated with recessional positions of the last ice sheet. Less extensive end moraines occur locally elsewhere in southeastern Massachusetts, in the Boston area, and on this map in the Gloucester-Rockport area of northeastern Massachusetts.

Glacial stratified deposits consist of layers of well-sorted to poorly sorted gravel, sand, silt, and clay laid down by flowing meltwater in glacial streams, lakes, and marine embayments that occupied the valleys and lowlands of Massachusetts during retreat of the last ice sheet. Textural variations within the meltwater deposits occur both areally and vertically because meltwater-flow regimes were different in glaciofluvial (stream), glaciodeltaic (where a stream entered a lake or the sea), glaciolacustrine (lake bottom), and glaciomarine (marine bottom) depositional environments. Grain-size variations also resulted from meltwater deposition in positions either proximal to or distal from the retreating glacier margin, which was the principal sediment source. A common depositional setting contained a proximal, ice-marginal meltwater stream in which horizontally bedded glaciofluvial gravel and/or sand and gravel were laid down; farther down valley, the stream entered a glacial lake where glaciodeltaic sediments were deposited, consisting of horizontally layered sand and gravel delta-topset beds overlying inclined layers of sand in delta-foreset beds. Farther out in the glacial lake, very fine sand, silt, and clay settled out on the lake bottom in flat-lying, thinly bedded glaciolacustrine layers. Thick sequences having these textural variations commonly are present in the vertical section of meltwater deposits across the State (Stone and

others, 1992). Detailed geologic maps permit precise mapping of meltwater sedimentary units within each glacial lake or valley outwash system (Jahns, 1941; 1953; Koteff, 1966). These units, known as *morphosequences* (Koteff, 1974; Koteff and Pessl, 1981), are the smallest mappable stratigraphic units on detailed geologic maps. *Morphosequences* are bodies of stratified meltwater sediments that are contained in a continuum of landforms, grading from ice-contact forms (eskers, kames) to non-ice-contact forms (flat valley terrace, delta plains) that were deposited simultaneously at and beyond the margin of the ice sheet and, graded to a specific base level. Each morphosequence consists of a proximal part (head) deposited within or near the ice margin and a distal part deposited farther away from the ice margin. Both grain size and ice-melt collapse deformation of beds decrease from the proximal to the distal part of each morphosequence. The head of each morphosequence is either ice marginal (ice contact) or near ice marginal. The surface altitude of fluvial sediments in each morphosequence was controlled by a specific base level, either a glacial-lake or marine water plane or a valley knickpoint. Few morphosequences extend distally more than 10 km, and most are less than 2 km in length. In any one basin, individual morphosequences were deposited sequentially as the ice margin retreated systematically northward. Consequently, in many places the distal, finer grained facies of a younger morphosequence stratigraphically overlies the proximal, coarse-grained facies of a preceding morphosequence. Figure 2 shows the variability of sediment types in the subsurface of glacial stratified deposits. The figure schematically shows the relationship between coarse-grained deltaic deposits and extensive fine-grained lake (or marine) deposits in the subsurface. Such coarse- and fine-grained units are common in most of the valleys and lowlands of Massachusetts (Langer, 1979, Stone and others, 1979; Stone and others, 1992; Stone and others, 2005). On this interim map, coarse-grained and fine-grained textural variations within glacial stratified deposits are shown only where they occur at land surface. Subsurface textural variations are not shown.

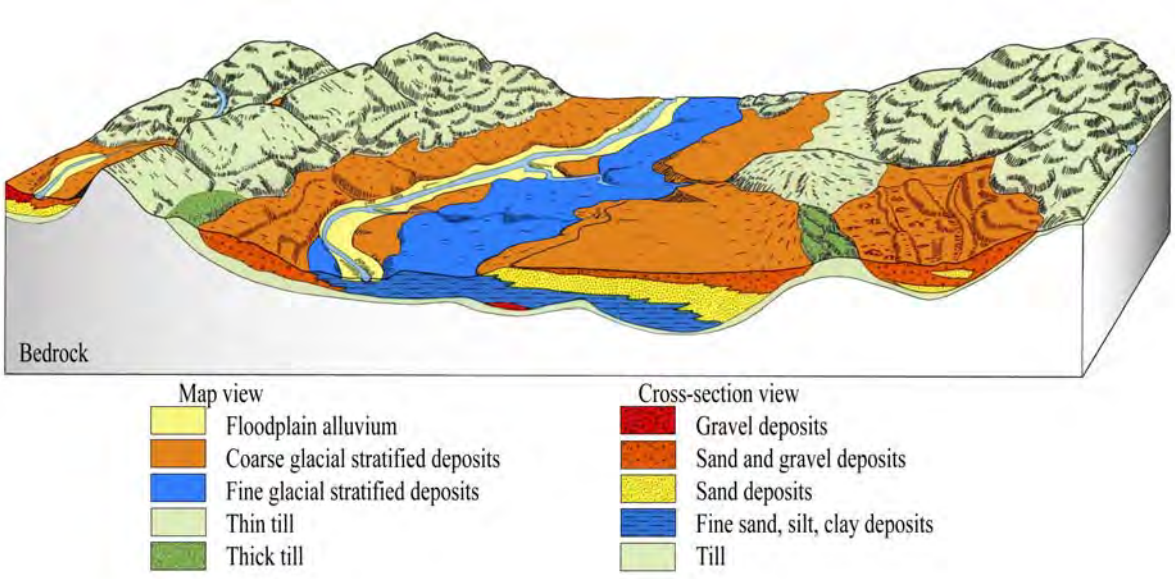

Figure 2. Block diagram illustrating the typical areal and vertical distribution of glacial and postglacial deposits overlying bedrock (modified from Stone and others, 1992).

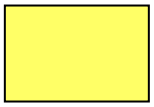
The areal distribution of till and stratified deposits across Massachusetts is related to regional physiography (fig.1). The thickness of these materials varies considerably because of such factors as the high relief of the bedrock surface, changing environments of deposition during deglaciation, and various effects of postglacial erosion and removal of glacial sediments. In highland areas, notably in the western and central parts of the State, till is the major surficial material and is present as a discontinuous mantle of variable thickness over the bedrock surface. Till is thickest in drumlins (reportedly as much as 230 ft thick) and on the northwest slopes of most bedrock hills. Glacial meltwater deposits that average 50 feet in thickness (Stone and Beinikis, 1993) overlie the till in small upland valleys and north-sloping basins between bedrock hills. Glacial stratified deposits are the predominant surficial materials in the Connecticut River valley, the northeastern and southeastern lowlands, and on Cape Cod and the islands. In northeastern Massachusetts, glacial meltwater deposits include glaciomarine sediments deposited when sea level was as much as 100 ft above present level. Glacial meltwater deposits generally overlie till; however, well logs indicate that in some places till is not present and the stratified deposits lie directly on bedrock. On Cape Cod and the islands, in the southeastern lowland, and in parts of the Connecticut River valley these deposits completely cover the till-draped bedrock surface.



Postglacial deposits locally overlie the glacial deposits throughout the State. Alluvium underlies the floodplains of most streams and rivers. Swamps occur in low-lying, poorly drained areas in upland and lowland settings, but swamp deposits are shown only where they are estimated to be at least 3 ft thick. Salt-marsh and estuarine deposits are present mainly along the tidal portions of streams and rivers entering the offshore areas. Beach deposits occur along the shoreline. Early postglacial regressive deposits represent former, higher marine shoreline positions and are preserved at altitudes 20 ft to 60 ft above modern sea level between Gloucester and the New Hampshire state line.

Description of Map Units

Postglacial Deposits

Artificial fill—Earth materials and manmade materials that have been artificially emplaced, primarily in highway and railroad embankments, and in dams; may also include landfills, urban development areas, and filled coastal wetlands

Floodplain alluvium—Sand, gravel, silt, and some organic material, stratified and well sorted to poorly sorted, beneath the floodplains of modern streams. The texture of alluvium commonly varies over short distances both laterally and vertically, and generally is similar to the texture of adjacent glacial deposits. Along smaller streams, alluvium is commonly less than 5 ft thick. The most extensive deposit of alluvium on the map is along the Merrimack River where the texture is predominantly sand, fine gravel, and silt, and total thickness is as much as 25 ft. Alluvium typically overlies thicker glacial stratified deposits.

Swamp deposits—organic muck and peat that contain minor amounts of sand, silt, and clay, stratified and poorly sorted, in kettle depressions or poorly drained areas. Most swamp deposits are less than about 10 ft thick. Swamp deposits overlie glacial deposits or bedrock. They locally overlie glacial till even where they occur within thin glacial meltwater deposits.

Salt-Marsh deposits—peat and organic muck interbedded with sand and silt, deposited in environments of low wave energy along the coast and in river estuaries. Marsh deposits are dominantly peat and muck, generally a few feet to 25 ft thick. In the major estuaries, marsh deposits locally overlie estuarine deposits (not mapped) which are sand and silt with minor organic material as much as 30-80 ft thick. The marsh and estuarine deposits generally are underlain by adjacent glacial material, either till, coarse stratified deposits, or glaciomarine fine deposits.

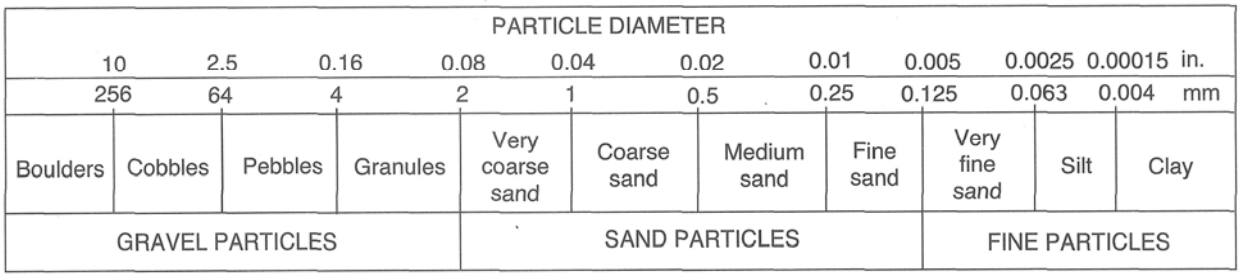
Beach and Dune deposits—sand and fine gravel deposited along the shoreline by waves and currents, and by wind action. The texture of beach deposits varies over short distances and is generally controlled by the texture of nearby glacial materials exposed to wave action. Sand beach deposits are composed of moderately sorted very coarse to fine sand, commonly laminated. Coarser layers may contain some fine gravel particles; finer layers may contain some very fine sand and silt. Gravel beach deposits are composed of granule-to-cobble-sized clasts in moderately sorted thin beds. Minor amounts of sand within gravel beds, and thin beds of sand as alternating layers. Beach deposits are rarely more than a few feet thick. Sand dune deposits are composed of moderately to well sorted, fine to medium sand, variably massive, laminated, and cross bedded. Dune deposits are as much as 35 ft thick. Unit includes artificial sand deposits in locally replenished beaches.

Early postglacial marine regressive deposits—sand and gravel deposited along former, higher shorelines in northeastern Massachusetts by waves and currents, and by wind action, as well as sand and gravel deposited by fluvial and wave action in lower estuarine valleys. The fluvial estuarine-terrace deposits are shown on the map where they overlie glaciomarine fine deposits; elsewhere, sand and gravel in postglacial terrace deposits are included in the glacial coarse stratified map unit. The fluvial terrace deposits are mixtures of gravel and sand within individual layers, and as alternating layers. Sand and gravel layers generally range from 25 to 50 percent gravel particles and from 50 to 75 percent sand particles. Layers are well to poorly sorted. Beach and near-shore deposits are composed of moderately sorted very coarse to fine sand, commonly laminated. Coarser layers may contain some fine gravel particles; finer layers may contain some very fine sand and silt. Regressive beach and near-shore deposits are rarely more than a few feet thick. Regressive spit deposits are 10-30 ft thick.

Glacial Stratified Deposits

Sorted and stratified sediments composed of gravel, sand, silt, and clay (as defined in particle size diagram, fig. 3) deposited in layers by glacial meltwater. These sediments occur as four basic

textural units—gravel deposits, sand and gravel deposits, sand deposits, and fine deposits. On this interim map, gravel, sand and gravel, and sand deposits are not differentiated and are shown as *Coarse Deposits* where they occur at land surface. *Fine Deposits* also are shown where they occur at land surface. **Textural changes occur both areally and vertically (fig. 2), however subsurface textural variations are not shown on this interim map.**



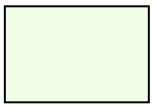


Figure 3. Grain-size classification used in this report, modified from Wentworth (1922).

Coarse deposits include: *Gravel deposits* composed mainly of gravel-sized clasts; cobbles and boulders predominate; minor amounts of sand within gravel beds, and sand comprises few separate layers. Gravel layers generally are poorly sorted and bedding commonly is distorted and faulted due to postdepositional collapse related to melting of ice. *Sand and gravel deposits* composed of mixtures of gravel and sand within individual layers and as alternating layers. Sand and gravel layers generally range from 25 to 50 percent gravel particles and from 50 to 75 percent sand particles. Layers are well to poorly sorted; bedding may be distorted and faulted due to postdepositional collapse. *Sand deposits* composed mainly of very coarse to fine sand, commonly in well-sorted layers. Coarser layers may contain up to 25 percent gravel particles, generally granules and pebbles; finer layers may contain some very fine sand, silt, and clay.

Glaciolacustrine Fine deposits include very fine sand, silt, and clay that occurs as well-sorted, thin layers of alternating silt and clay, or thicker layers of very fine sand and silt deposited in glacial lakes. Very fine sand commonly occurs at the surface and grades downward into rhythmically bedded silt and clay varves. Locally, this map unit may include areas underlain by fine sand.

Glaciomarine fine deposits include silty clay, fine sand, and some fine gravel deposited in a higher level sea in environments of low wave energy along the coast and in river estuaries. Fine to very fine sand, massive and laminated, commonly is present at the surface and grades downward into interbedded very fine sand, silt, and silty clay. Lower silty clay and clay is massive and thinly laminated. Total thickness is generally a few feet to 75 ft.

Glacial Till Deposits

Thin till—Nonsorted, nonstratified matrix of sand, some silt, and little clay containing scattered gravel clasts and few large boulders; in areas where till is generally less than 10-15 ft thick and including areas of bedrock outcrop where till is absent. Predominantly upper till of the last glaciation; loose to moderately compact, generally sandy, commonly stony. Two facies are present in some places; a looser, coarser-grained ablation facies, melted out from supraglacial position; and an underlying more compact, finer-grained lodgement facies deposited subglacially. In general, both ablation and lodgement facies of upper till derived from fine-grained bedrock are finer grained, more compact, less stony and have fewer surface boulders than upper till derived from coarser grained crystalline rocks. Fine-grained bedrock sources include the red Mesozoic sedimentary rocks of the Connecticut River lowland, marble in the western river valleys, and fine-grained schists in upland areas.

Thick till—Nonsorted, nonstratified matrix of sand, some silt, and little clay containing scattered gravel clasts and few large boulders at the surface; in the shallow subsurface, compact, nonsorted matrix of silt, very fine sand, and some clay containing scattered small gravel clasts in areas where till is greater than 10-15 ft thick, chiefly in drumlin landforms in which till thickness commonly exceeds 100 ft (maximum recorded thickness is 230 ft). Although upper till is the surface deposit, the lower till constitutes the bulk of the material in these areas. Lower till is moderately to very compact, and is commonly finer grained and less stony than upper till. An oxidized zone, the lower part of a soil profile formed during a period of interglacial weathering, is generally present in the upper part of the lower till. This zone commonly shows closely spaced joints that are stained with iron and manganese oxides.

End moraine deposits – Composed predominantly of boulders and ablation facies sandy upper till; lenses of stratified sand and gravel occur locally within the till. Surface boulders on end moraine deposits are generally more numerous than on adjacent till surfaces; dense concentrations of boulders are present in some places. Deposits occur as free-standing hummocky landforms, commonly in ridges that trend NE – SW, and range in thickness from 10 to 60 ft.

Bedrock Areas

Bedrock outcrops and areas of abundant outcrop or shallow bedrock— Solid color shows extent of individual bedrock outcrops; line pattern indicates areas of shallow bedrock or areas where small outcrops are too numerous to map individually; in areas of shallow bedrock, surficial materials are less than 5-10 ft thick.

Map Compilation

This compilation shows surficial geology in sixteen 7.5-minute quadrangles in northeast Massachusetts: Exeter, Hampton, Salem Depot, Haverill, Newburyport West, Newburyport East, Lawrence, South Groveland, Georgetown, Ipswich, Wilmington, Reading, Salem, Marblehead North, Gloucester, and Rockport (fig. 4, fig 5 area B). It is the second in a series of interim products intended to cover the entire State of Massachusetts. Figure 5 shows all of the compilation areas for surficial geology in Massachusetts. These maps will be produced sequentially by letter designation.

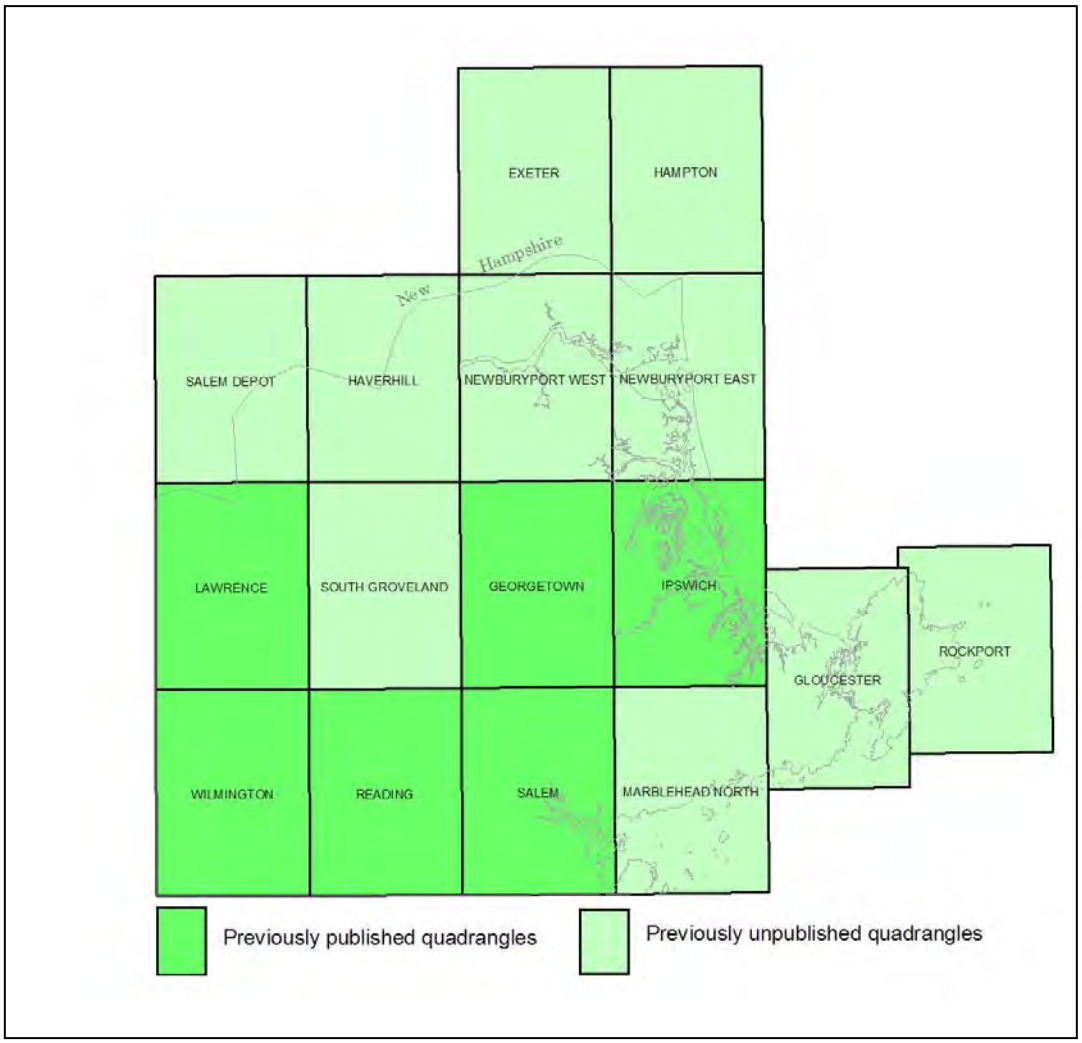

Figure 4. 7.5-minute quadrangles in this compilation.

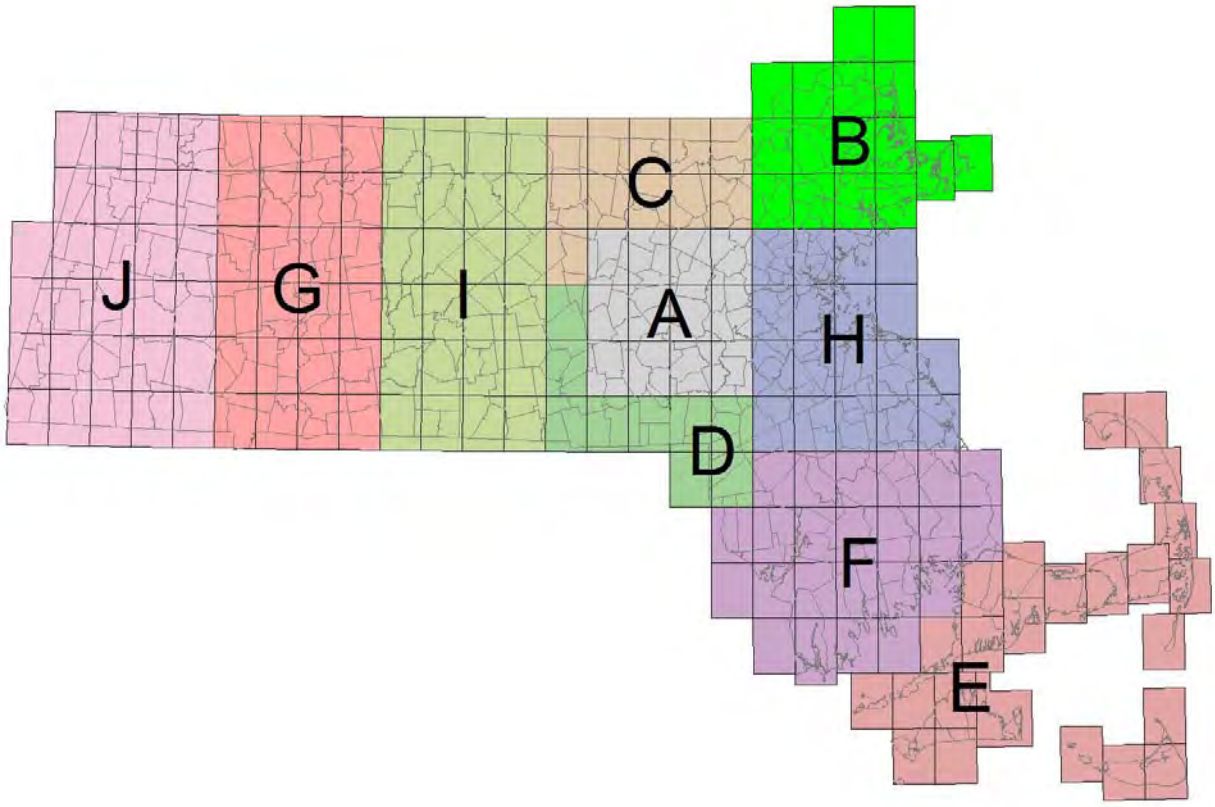

Figure 5. Compilation areas in Massachusetts.

This map was compiled in several steps: 1) Paper copies of the published surficial geologic maps for six quadrangles were scanned and georeferenced by MassGIS. 2) The Office of the Massachusetts State Geologist vectorized the georeferenced images in order to digitally retain the original line work of the published maps (Mabee and others, 2004). 3) Digital geologic map units were compiled and grouped into thirteen basic units in four broader categories: *Postglacial deposits* including artificial fill, floodplain alluvium, swamp deposits, salt marsh deposits, beach and dune deposits, and early postglacial regressive deposits; *glacial stratified deposits* including coarse-grained and fine-grained deposits, *glacial till* including thin till, thick till (drumlins), and end moraine deposits: and *bedrock areas* including outcrops and areas of shallow bedrock). The distribution of glacial stratified deposits beneath adjacent overlying postglacial deposits and water bodies was inferred by the compilers. 4) The same basic units for ten unpublished quadrangles were compiled and digitized from scanned field maps by U.S. Geological Survey personnel. 5) The 16 individual quadrangles were joined and edge-matched in order to form a seamless geologic map. Discrepancies along quadrangle boundaries were resolved, and thick till areas were added by the compilers in quadrangles where this unit was not previously mapped.

All geologic mapping was completed at 1:24,000-scale; however the browse graphic is presented at 1:50,000-scale with shaded relief base. The 1:24,000-scale, 10-ft contour interval topographic base maps used for this mapping effort are included as part of the digital data package in the GIS\24k_basemaps folder. The GIS\shapes folder included with this report contains 4 ARCGIS shapefiles which are geologic units that cover the entire map area, and are intended for use at quadrangle scale; the shapefiles can be clipped by quadrangle or town boundaries. Unlike conventional geologic maps, the digital mapping is arranged in layers according to superposition. The till-bedrock shapefile should be placed on the bottom, and overlain by the stratified deposits shapefile; these materials are shown everywhere that they occur including beneath postglacial deposits, such as swamp deposits, floodplain alluvium, and water bodies. The early_postglacial and postglacial shapefiles should be placed on top because these materials overlie the other two layers. Instructions for using the digital files are included in the README file and metadata.

Stone, B.D., 1982, Unpublished field map

Lawrence
Map units were reproduced from Castle (1958); Glacial Stratified Deposits in this quadrangle include deposits of glacial Lake Methuen, and other glaciofluvial and glaciolacustrine deposits. Fine-grained glacial stratified deposits at land surface include lake-bottom deposits of glacial Lake Methuen (unit Qml of Castle, 1958); the fine-grained unit has been extended beneath adjacent water bodies and postglacial deposits on this map. Deposits mapped as morainal ice-contact deposits (unit Qmi of Castle, 1958) have been included here as coarse stratified deposits. Thick till areas were reproduced from the drumlin till unit (Qgd of Castle, 1958); other areas of thick till were inferred from photographic image and topographic analysis.

South Groveland
Stone, B.D., 1982, Unpublished field maps

Georgetown
Map units were reproduced from Cuppels (1969); Glacial Stratified Deposits in this quadrangle include glaciofluvial, glaciolacustrine, and glaciomarine deposits. Fine-grained glacial stratified deposits at land surface include parts of marine and estuarine deposits (unit Qm of Cuppels, 1969); the fine-grained unit has been extended beneath adjacent water bodies and postglacial deposits on this map. Thick till areas shown on this map were inferred from photographic image and topographic analysis and drumlin symbols shown by Cuppels (1969).

Ipswich
Map units were reproduced from Sammel (1963); Glacial Stratified Deposits in this quadrangle include glaciofluvial, glaciolacustrine, and glaciomarine deposits. Fine-grained glacial stratified deposits at land surface include marine and estuarine clay deposits (unit Qmc of Sammel, 1963); this unit has been extended beneath adjacent water bodies and postglacial deposits on this map. Thick till areas were reproduced from the drumlin till unit (Qd of Sammel, 1963); other areas of thick till were inferred from photographic image and topographic analysis.

Wilmington
Map units were reproduced from Castle (1959); Glacial Stratified Deposits in this quadrangle include glaciofluvial and glaciolacustrine deposits. Thick till areas were reproduced from the drumlin till unit (Qgd of Castle, 1959); other areas of thick till were inferred from photographic image and topographic analysis.

Reading
Map units were reproduced from Oldale (1962); Glacial Stratified Deposits in this quadrangle include glaciofluvial and glaciolacustrine deposits. Fine-grained glacial stratified deposits at land surface include glacial lake deposits (unit Ql of Oldale, 1962); the fine-grained unit has been extended beneath adjacent water bodies and postglacial deposits on this map. Thick till areas were reproduced from the drumlin till unit (Qgd of Oldale, 1962) and other areas of thick till were inferred form photographic image and topographic analysis\.

Salem
Map units were reproduced from Oldale (1964); Glacial Stratified Deposits in this quadrangle include glaciofluvial, glaciolacustrine, and glaciomarine deposits. Fine-grained glacial stratified deposits at land surface include marine clay deposits (unit Qmd of Oldale, 1964); the fine-grained unit has been extended beneath adjacent water bodies and postglacial deposits on this map.

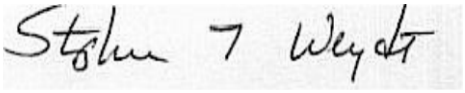
CERTIFICATION OF RESULTS

The assessment was conducted on behalf of and for the exclusive use of *DiNisco Design* and their client, the *City of Amesbury, Massachusetts* and all its successors and assigns, solely for use in an environmental evaluation of the Site. This report and the findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor used by any other party, in whole or in part, other than *DiNisco Design* or the *City of Amesbury* and all its successors and assigns, without the prior written consent of *Environmental & Construction Management Services, Inc. (ECMS).*



ECMS professional services have been performed, our findings obtained, and our recommendations prepared by an environmental professional in accordance with the U. S. Environmental Protection Agency's (EPA) All Appropriate Inquiry (AAI) Rule and customary principles and practices in the fields of environmental science and engineering. This warranty is in lieu of all other warranties either expressed or implied. *ECMS* is not responsible for the independent conclusions, opinions or recommendations made by others based on the records review, site inspection, field exploration, and laboratory test data presented in this report.

Respectfully submitted this 13th day of September 2018.

For ***Environmental & Construction Management Services, Inc.*** by

Kevin J. Kavanaugh, L.S.P., CHMM
Principal Environmental Engineer

Stephen T. Weydt
Principal Environmental Scientist

EXECUTIVE SUMMARY

Environmental & Construction Management Services, Inc. (ECMS) has performed a Phase I Environmental Site Assessment (ESA) for the Amesbury Elementary (AE) School property located at 193 Lions Mouth Road in Amesbury, Massachusetts (herein after referred to as the Site). This assessment was performed to evaluate the likelihood of a release and/or threat of release of oil and/or hazardous materials at the Site pursuant to the Massachusetts General Law, Chapter 21E (MGL Chapter 21E) and the Massachusetts Contingency Plan (MCP) 310 CMR 40.0000.

The site assessment work described in this report was conducted for *DiNisco Design, Inc. (DiNisco)* between August 15 and September 13, 2018 in accordance with *ECMS'* proposal EC18-024 dated April 13, 2018. This work was performed in conformance with the scope and limitations of the most recent ASTM Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process Document E-1527-13 and EPA's All Appropriate Inquiry (AAI) Final Rule (effective as of November 1, 2006).

The purpose of the investigation was to identify possible conditions that would be indicative of releases of oil and/or hazardous materials and threatened releases of oil and/or hazardous materials on, at, in or to the Site. The investigation included inspection of the Site and the exterior of adjacent properties, interviews with Site staff and regulatory officials, review of appropriate Federal, State, and local historical and environmental records. This assessment revealed the following:

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- *ECMS* did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- *ECMS* did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- *ECMS* did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by *ECMS*, which do not qualify as RECs; however, warrant further discussion.

- *ECMS* did not identify any environmental issue during the course of this assessment.

Conclusions, Opinions and Recommendations

This assessment has not revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property. *ECMS* recommends no further actions.

1.0 PURPOSE AND SCOPE OF WORK

1.1 Purpose

This report provides the results of a Phase I Environmental Site Assessment (ESA) performed for the Cashman Elementary School property located at 193 Lions Mouth Road in Amesbury, Massachusetts 01913. This assessment was conducted to identify possible conditions that would be indicative of releases of oil and/or hazardous materials and threatened releases of oil and/or hazardous materials on, at, in or to the Site.

In conducting this assessment, *ECMS* followed the E1527-13 American Society for Testing and Materials (ASTM) document entitled "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process" for commercial real estate, as well as the All Appropriate Inquires (AAI) Final Rule of November 1, 2005. Any exceptions to, or deletions from, this practice are described in Section 1.4 of the report.

The primary purpose of this assessment was to identify *recognized environmental conditions (REC)* in connection with the subject property. ASTM defines *recognized environmental conditions* as the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. The purpose of this practice is to define good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or *bonafide* prospective purchaser limitations on CERCLA liability. The practice constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C.

The practice constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. 9601(35)(B).

As part of the AAI Final Rule, Phase I ESAs must be conducted by or under the supervision of a qualified environmental professional. The AAI Final Rule defines an environmental professional as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and

performance factors of the rule. We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. We have specific qualifications based on education, training and experience to assess the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.2 Scope of Work

In accordance with the above referenced agreement, *ECMS'* Scope of Work for this Phase I Environmental Site Assessment included the following:

- Site inspection and interviews of knowledgeable key site personnel to document the current and past land use and operations from building types and uses; the location and status of underground and aboveground storage tanks, visual evidence of subsurface or surface contamination, such as areas of visibly distressed vegetation and soil staining; types, quantities, and locations of oil or hazardous materials, including polychlorinated biphenyls (PCBs); and wastes generated, stored or disposed of on or from the Site.

- Review of all available current and historical records to establish the history of the Site and nearby properties for approximately the past 100 years using available federal, state, municipal, private and insurance rate maps; aerial photographs, lists of previous owners or operators or city atlases. A review of title records was not included as part of this investigation.

- Research of technical information concerning the local geologic and hydrologic conditions to determine the likely impact of any actual or potential release on the Site or from neighboring properties and nearby potential environmental receptors such as drinking water supplies, surface water bodies, catch basins and/or detention ponds.

- Review of files held by federal, state and local environmental regulatory agencies for records of past disposal practices; accidental releases, regulatory compliance history, fires, explosions, or other accidents, the status of any current operating or discharge permits; and status of any existing storage tanks.

- Prepare written report for the Site to include site location plan, and pertinent maps, discussions of the Site location and description, site and vicinity history, inspection results, geology and hydrology, and a summary of the environmental regulatory files reviewed.

1.3 Special Terms and Conditions

The site assessment work described in this report was conducted for *DiNisco Design* between August 15 and September 13, 2018 in accordance with *ECMS'* proposal number EC18-024 dated April 13, 2018.

1.4 Limitations and Exceptions of Assessment

The investigation was based on information sources cited in Appendix A, which included Federal, State and local regulatory agencies and Site contacts; observations of the Site and readily observable portions of adjacent properties from public right-of-ways; review of an electronic database search report; review of Local Agency database information; and a review of available historical records. Qualifications/Limitations to this report are presented in Appendix B.

It is the opinion of *ECMS* that no data gaps were identified in the information reviewed and/or obtained during this investigation that would adversely affect the ability of the environmental professional to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in or to the Site.

1.5 User Reliance

This report has been prepared for, and can be relied upon by *DiNisco Design and the City of Amesbury.* Reliance or photocopying of this document by parties other than those designated above or use of this document for purposes other than intended, is prohibited without the prior written consent of *ECMS*.

1.6 Qualifications of Environmental Personnel

In accordance with the requirements of ASTM Standard E1527-13, resumes detailing the relevant experience and qualifications of the Environmental Professionals performing this Phase I Environmental Site Assessment. Resumes are included in Appendix C entitled Qualifications/Limitations.

2.0 PROPERTY DESCRIPTION

2.1 Location and Legal Description of the Site

The Site is an irregularly-shaped 35.32-acre parcel of land located at 193 Lions Mouth Road in Amesbury, Essex County, Massachusetts 01913. According to the City of Amesbury Assessor, the property is listed as parcel 50/6. The Site is occupied by the Charles C. Cashman Elementary School and associated athletic fields, playground, parking lots and landscaped areas. Refer to Figure 2 entitled Lot Location Plan.

The Site is depicted on the 7.5 x 15-minute U.S.G.S. topographic quadrangle for Newburyport, Massachusetts dated 1987. The Universal Transverse Mercator (UTM) coordinates of the Site within zone 19 are approximately 4,746,558 meters north latitude and 340,818.9 meters east longitude or 42° 51' 26.06'' north latitude and 70° 56' 54.07'' west longitude. Elevation at the site is approximately 105 feet above mean sea level (amsl). Figure 1 includes both a Site Locus Plan (a section of the USGS Newburyport Quadrangle) and a Street Location Map of the Site. The Site and surrounding properties are shown on Figure 2, Lot Location Plan attached to this report.

2.2 Site and Vicinity Characteristics

The Site is currently occupied by the City of Amesbury Cashman Elementary School housing grades Pre-kindergarten through 4 (approximately 458 children). The Site is located within OSC – Open Space Conservancy. The school building is surrounded by a driveway and associated paved parking lots, a playground area and grass athletic field. Woodsom Farm to the west, and is accessed from Lions Mouth Road to the South. The north edge of the site is steeply sloping forested hill with an intermittent steam at the base. The Site is surrounded with pockets of densely settled residential neighborhoods.

No existing commercial printing facilities, gasoline filling/service stations, industrial properties or fuel depots were identified in the immediate vicinity of the subject site. The past uses of these surrounding properties do not pose recognized environmental concerns to the Site.

2.3 Descriptions of Structures, Roads, Other Improvements on the Site

The 2-story school building is 61,472 gross square feet (GSF). The building is constructed of masonry block with brick veneer on slab on grade construction.

Assessor Office records indicate that the main Site building construction was completed in 1975. The school building is currently heated by natural gas and heated through forced air ducts. The roof is asphalt and on the roof are several HVAC units. Records indicate, the building is and always has been heated by natural gas. A copy of the Assessor Property Card is attached as Appendix D.

The nearest surface water bodies to the Site is Lake Gardner that is located approximately 2,500 feet to the north-northeast. According to the City of Amesbury Health Department, there are no know public or private potable water supply wells in the vicinity of the Site.

The City of Amesbury obtains its drinking water from its watershed area that encompasses about 55 square miles; most of which reside in New Hampshire. Tuxbury Pond feeds the Powow River, which the treatment plant draws from. Lake

Attitash and Meadowbrook also supplement the water source seasonally and in times of drought. All of Amesbury's wastewater empties into their municipal sewer system. The wastewater treatment facility is located at 19 Merrimac Street.

The site is currently supplied with natural gas and serviced by the municipal water and sewer systems.

The existing school building has a sewage ejector system that was observed along the entrance driveway area south of the school.

2.4 Site Ownership

According to City of Amesbury Assessor's records, the subject site is owned by the City of Amesbury as of December 30, 1971 (Book 5833, Page 124).

A Title Search was not supplied to *ECMS*, and therefore additional ownership information was not available.

2.5 Environmental Liens

ECMS did not conduct a review of title records for the Site, therefore, it is not known if there are environmental liens at the Site. However, according to the Environmental Data Resources, Inc. (EDR) database search report dated August 17, 2018, the Site is not currently listed by the Massachusetts Department of Environmental Protection (MassDEP) as a Disposal Site with a Class A-3, Class A-4, Class B-2, or Class B-3 Response Action Outcome (RAO) Statement in accordance with the Massachusetts Contingency Plan (MCP) 310 CMR 40.1000. Therefore, there are no Activity & Use Limitations (AUL's) currently in force at the site.

2.6 Current Uses of the Site

The Site is currently utilized as the City of Amesbury Cashman Elementary School for grades Pre-K through Grade 4.

2.7 Current Uses of Surrounding Properties

The Site is located within an area primarily used for single-family residential homes, farmland and undeveloped wooded vacant land. There were no visual indications observed during *ECMS* visual inspection of nearby or abutting properties of conditions that would indicate a release or threat of release of oil and/or hazardous substances on, at, in, or to the Site.

2.8 Past Uses of the Site and Vicinity

Historical information was obtained from a review of the historical topographs (1932, 1934, 1943, 1944, 1947, 1950, 1956, 1952, 1968, 1973, 1979, 1971, 1985, 1987 and 2012), historical aerial photos (1953, 1960, 1966, 1973, 1978, 1986, 1992, 1998, 2006, 2009, 2012 and 2016), City Directory (1961, 1965, 1968, 1973, 1977, 1982, 1987, 1992, 1995, 2000, 2005, 2010 and 2014). Refer to Appendix A for copies of the above historic documents.

The historical aerial photo from 1978 shows the school building. Prior to construction of the school building, the Site land area was undeveloped and appears to be farmland as depicted in the aerial photographs from 1953 through 1973.

Properties surrounding the Site to the north, south, east and west were developed with sporadic residential properties and some may have been farmland.

The past uses of these surrounding properties do not pose recognized environmental concerns to the Site.

2.9 Summary of Previous Environmental Reports

No copies of any previous reports were provided to *ECMS.*

3.0 RECORDS REVIEW

ECMS utilized the results of an on-line computer environmental database search of facilities in the vicinity listed by agencies for various reasons. Table 1 presents the databases reviewed and the number of properties identified within the specified search distance with respect to the Site. The search distances specified by the ASTM were the minimum distances used during our search. The EDR database search report dated August 17, 2018 is contained in Appendix E.

3.1 U.S. Environmental Protection Agency (EPA)

<u>CERCLIS and NPL</u>

The EPA tracks sites to be investigated or that are currently being investigated for the threatened or actual release of hazardous substances to the environment. This system is under the jurisdiction of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, also known as Superfund. The CERCLA Information System (CERCLIS) database indicates if a site has been or is being considered for designation on the National Priorities List (NPL). The NPL is the list of abandoned and/or uncontrolled hazardous waste sites identified for priority action under Superfund. To be placed on the NPL, a property must

exceed a hazard ranking evaluation, pose a significant threat to health and the environment, and require remedial action. The EPA also tracks the NPL sites that have been delisted from the NPL where no further response is appropriate.

The Site is not listed as either a current or delisted NPL facility or CERCLIS facility. There are no current or delisted NPL facilities within one mile of the Site and no CERCLIS facilities listed within one-half mile of the Site.

NFRAP (No Further Remedial Action Plan)

The EPA maintains a database of archived CERCLA sites where assessment has been completed and a determination has been made that the location is not judged to be a potential NPL property.

The Site is not listed on the NFRAP and there are no NFRAP listed properties located within one-half mile of the Site.

Resource Conservation and Recovery Act (RCRA)

The RCRA TSD list includes any operation that transports, stores or disposes of hazardous waste and which must obtain a hazardous waste identification number or transporter permit. *ECMS* review of the RCRIS Transporters database indicated that the Site was not listed as a RCRA TSD of hazardous waste and there are no RCRA TSD listed facilities located within one-half mile of the Site.

The RCRA COR ACT is a database maintained for management and inventory of RCRA generators, transporters, treaters, storers and disposers of hazardous materials. *ECMS* review of the RCRA COR ACT database indicated that the Site was not listed as a RCRA COR ACT facility and there are no RCRA COR ACT listed facilities located within one-mile of the Site.

The RCRA Generators list includes any operation that generates hazardous waste and which much obtain a hazardous waste generator identification number. The Site is not identified as a RCRA generator. No RCRA generators are located within one-quarter mile of the Site.

NA = Not Applicable

Emergency Response Notification System (ERNS)

The EPA and National Response Center (NRC) Emergency Response Notification System (ERNS) is a list of hazardous material spills. The Site is not listed on the ERNS list and there were no ERNS listed facilities located within a 0.125-mile radius of the Site.

Federal Industrial and Engineering Controls

The federal listing of industrial and engineering controls is the EPA's Brownfield Management System, a database designed to assist EPA in collecting, tracking and updating information as well as reporting on the major activities and accomplishments of the various Brownfield grant programs. Sites listed on this database are Superfund sites that have either engineering or institutional controls in operation. The Site is not listed as having either industrial or engineering controls in operation and there were no properties identified within one-half mile of the Site with industrial or engineering controls in operation.

U. S. EPA Facility Index System (FINDS) List

The Site is identified on the U. S. EPA Facility Index System (FINDS) list. FINDS is an index of identification numbers associated with a property or facility that the EPA has investigated or has been made aware of in conjunction with various regulatory programs. The program identified with the Site is the National Center for Education Statistics (NCES) a primary federal database for collecting and analyzing data related to education in the United States and other nations.

3.2 Massachusetts Department of Environmental Protection (MassDEP)/ Tribal Lands

MassDEP/Tribal Sites List

The MassDEP/Tribal Sites list contains the names of facilities and/or locations within the state of Massachusetts, which have reported releases of contaminants from petroleum storage systems. This report is maintained by the MassDEP. The Site does not appear on the MassDEP Sites List.

The database identified 22 MassDEP Sites listings within a one-mile radius of the subject Site. All of the 22 listed Sites are at a distance greater than ½ mile from the Site and given the distances none are not expected to present conditions indicative of a release or threat of release to the Site.

MassDEP/Tribal Spills List

The Site does not appear on the MassDEP Spills List. No spill of oil and/or hazardous materials was documented in MassDEP records within a 0.25-mile radius of the Site.

MassDEP Leaking Underground Storage Tank (UST) List

The MassDEP maintains this database of releases of oil or hazardous materials from USTs. The Site does not appear on the LUST List. Four (4) MassDEP LUST listed properties were documented in MassDEP records at properties within a one-half mile radius of the Site. All of these four (4) properties are located at distances greater than ¼-mile from the Site therefore, these releases are not expected to present conditions indicative of a release or threat of release to the Site.

3.3 State of Massachusetts/Tribal Registered Underground Storage Tanks (RUST) List

This database, maintained by the State of Massachusetts Fire Marshall, registers locations with either USTs or aboveground storage tanks (ASTs). The Site does not appear on the RUST list. There were no properties within a 0.25-mile radius of the Site identified on the RUST list.

3.4 Municipal and Local Authorities

Information related to environmental responses at the Site was requested from City of Amesbury municipal offices.

Amesbury Prevention Fire Department

Records relative to underground storage tanks and flammables were requested from the City of Amesbury Fire Department. Discussions with Chris with the Amesbury Fire Department revealed that no records were found for this location. A copy of Amesbury Fire Department FOIA Letter is attached in Appendix F of this report.

Amesbury Clerk's Office

Records relative to underground storage tanks and flammables were requested from the City of Amesbury Clerk's Office. No records were on file for the subject site.

Amesbury Health Department

The City of Amesbury Health Department had nothing on file for the property at 193 Lions Mouth Road pertaining to oil and/or hazardous materials. A copy of Amesbury Health Department FOIA Letter is attached in Appendix F of this report.

Amesbury Engineering Department

The Amesbury Engineering Department did not have information pertaining to the use, storage or release of oil or hazardous materials at the Site.

Amesbury Conservation Commission

Records at the Amesbury Conservation Commission indicate that there is no Wetland Resource Areas under the Massachusetts Wetlands Protection Act, and the Amesbury Wetlands Protection Bylaw present at the subject site.

3.5 State/Tribal Solid Waste Landfills

The Site does not appear on the Solid Waste Landfill list. There were no properties listed on the Solid Waste Landfill list within a one-half mile radius of the Site.

3.6 Other Identified Potential Nearby Properties

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are no EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

3.7 Unmapped Sites

There are 5 non-geocoded (unmapped) facilities listed in the EDR report. When possible, the properties within 500 feet of the Site were located during *ECMS'* Site reconnaissance. No identifiable unmapped facilities representing conditions indicative of releases of oil and/or hazardous substances or potential releases of oil and/or hazardous substances on, at, in or to the Site were identified during this investigation.

3.8 Tier 1 Vapor Encroachment Screening

ECMS performed a Tier 1 Vapor Encroachment Screening in compliance with ASTM E 2600-10 "ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" as amended. The purpose of the Tier 1 Vapor Encroachment Screening is to conduct an initial screen to determine if a Vapor Encroachment Condition (VEC) exists in connection with the Site. A VEC is defined as the presence or likely presence of chemical of concern vapors in the

subsurface of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the Site.

ECMS reviewed standard environmental record sources to identify if there are known or suspected sources of contamination within the area of concern. According to ASTM E 2600-10, the area of concern is defined by the approximate minimum search distance which is based upon the chemical of concern (i.e., petroleum hydrocarbons vs. non-petroleum hydrocarbons) and the location of a known or suspected source of contamination with respect to the Site.

According to ASTM E 2600-10 8.2.1 "The area of concern is one third of a mile around the Site, unless the use of a shorter distance is appropriate". In addition, according to ASTM E 2600-10 8.3.1, "The approximate minimum search distance may be expanded or reduced in the up-gradient, down-gradient, and/or cross-gradient directions by the environmental professional conducting the Vapor Encroachment Screening based upon experience in the local area." Given that there were no properties of concern for vapor release to the Site nearby, the minimum search distances were not expanded or reduced. Unless otherwise stated, groundwater flow/gradient is approximated based on surface topography. Based no presence of a potential for oil and or hazardous materials on the site, there does not exist a potential environmental concern with respect to a VEC for this property.

ECMS was not provided information from the user, current landowner or key site manager regarding specialized knowledge or experience or commonly known or reasonably ascertainable information within the local community about the Site that is material to the assessment of a VEC in connection with the Site.

Refer to Appendix G, Environmental Data Resources, Inc. (EDR) Vapor Encroachment report dated September 11, 2018.

4.0 INFORMATION FROM THE SITE RECONNAISSANCE

On August 21, 2018, Mr. Kevin J. Kavanaugh, LSP, CHMM, Principal Environmental Engineer for *ECMS* visited the Site. Mr. Kavanaugh was accompanied during the reconnaissance by Mr. Norman Fredette, head of maintenance for the Cashman Elementary School. Mr. Fredette is considered to be an individual most likely to be knowledgeable about the current and past uses of the property, particularly with regard to current and past uses of hazardous substances on the property. The site reconnaissance was documented with photographs, attached as Appendix H of this report.

The reconnaissance was conducted to observe any condition indicative of the release or threat of release of oil or hazardous substances on, at, in or to the Site. Observations made during the Site visit are summarized below.

4.1 Hazardous Materials Storage and Disposal

Typical cleaning supplies are stored in the building. According to Mr. Fredette, all cleaning supplies are "Green", thus are not considered to be hazardous in nature. The cleaners are organized and labeled. Other hazardous materials observed included paint cans, toner cartridges and miscellaneous cleaners used in general maintenance of the school building. Materials were generally labeled and stored neatly.

4.2 Solid Waste Disposal

Solid waste and recycling are collected in dumpsters located in the parking area to the west of the Site building. *Mello Disposal* of Groveland, Massachusetts collects the solid waste twice per week and recycling once per week.

No areas that were apparently filled by non-natural causes suggesting trash or other solid waste disposal. No mounds or depressions suggesting trash or other solid waste disposal were visually or physically observed at the site during the visit.

4.3 Storage Tanks

According to the EDR report database there are no underground storage tanks (USTs) located on the Site.

No obvious visual evidence (vent pipes, fill pipes, fire pumps or emergency generators, etc.) of USTs was observed during the *ECMS* site reconnaissance performed on August 21, 2018.

One (1) aboveground storage tank (AST) was observed to be on the Site. This tank was a diesel fuel tank associated with and that lies beneath the emergency generator unit that is located north of the school building and south of the athletic fields. No leakage from this AST was observed on August 21, 2018. The emergency generator is enclosed by a locked chain link fence.

4.4 Polychlorinated Biphenyls (PCBs)

PCBs were commonly used as insulating and cooling fluids in electrical equipment, including transformers, ballasts and capacitors as well as in hydraulic fluids such as elevator equipment.

The fluorescent light fixtures appeared in good condition. All ballasts should be inspected and discarded of in accordance with federal, state and regional requirements.

One (1) pad mounted transformer was observed at the Site. It was located along the northwestern corner of the building next to the emergency generator and also located within the chain link fenced area. No notation could be found indicating the presence of potential PCBs within the transformer but there was no evidence of any hydraulic oil leakage or staining on the crushed stone.

One (1) elevator hydraulic system was inspected by *ECMS*. There was a small stain observed on the floor of the elevator equipment room but appeared to be de minimus and there was no evidence of any hydraulic oil leakage from any of the observed equipment. Inspection of the elevator piston was not made.

No investigation to the presence of PCBs in building materials was conducted.

4.5 Electromagnetic Fields (EMFs)

Although epidemiological evidence is not conclusive, there is an increasing awareness and interest in monitoring magnetic radiation produced by power lines, transformers, and electronically driven devices.

There are no overhead high voltage transmission lines, microwave towers, or antennas located on the subject Site.

4.6 Groundwater Wells

No groundwater wells were observed during the Site reconnaissance.

4.7 Landfills, Pits, Sumps

The Underground Injection Control (UIC) program protects drinking water by regulating discharges to the ground via injection wells such as dry wells, septic systems tied to industrial processes, and other subsurface leaching systems. Pursuant to UIC regulations (310 CMR 27.00), where the potential exists for pollutants to enter an injection well (e.g. by means of a floor drain) and the presence of the pollutants causes or may cause a violation of any Massachusetts Drinking Water Regulation or adversely affects or may adversely affect public health, the use of the well is prohibited. With the exception of discharges authorized under the Department's Ground Water Discharge Permit program, the Department considers this prohibition to include the use of any injection well at facilities which have in the past or currently use, store, or otherwise manage hazardous materials and/or wastes as defined in 310 CMR 30.000 and 310 CMR 40.0000. This Notice is not applicable to any facility where the floor drain is connected to a Municipal Sewer System.

At the time of the Site reconnaissance, *ECMS* personnel did not observe any evidence of landfills or pits at the Site.

4.8 Dry Cleaning Operations

The Site is not currently the location of a drycleaner and historical records reviewed did not indicate that a dry cleaner has ever existed at this location.

4.9 Chlorofluorocarbons as Coolants (CFCs)

There are no central cooling units at the Site. Only three (3) window mounted units were observed and thus CFCs do not pose a significant environmental concern to this site.

4.10 Hydrology and Geology of the Site Vicinity

The Site-specific hydrology and geology cannot be known without conducting subsurface investigations at the Site. However, the bedrock in the area consists of granitic rocks and metamorphic schists. During the last glacial maximum, the glaciers cut into the bedrock carving out a portion which then began to fill with various sediments. When the glacier retreated, it left behind a small layer of glacial till as well as small ponds that deposited fine sands and silts on top of the tills.

Depth to groundwater at the Site is not known. However, based on a review of the local topography and nearby surface water features, it is likely greater than 5 feet below ground surface. Direction of groundwater flow is not known. Based on local topography and nearby surface water features, groundwater flow direction is likely southwesterly.

The Site lies at an approximate elevation of approximately 105 feet above mean sea level (amsl). The Site lot is primarily relatively flat but does slope gently to the west where the grassed field and playground area are behind the school building.

According to information in the *Massachusetts Natural Heritage Atlas* (October 2006 edition), no certified vernal pools, priority habitats of rare species or estimated habitats of rare wildlife were identified at the Site or within a 500-foot radius of the Site. Refer to Figure 3 for a map of Priority Habitats of Rare Species and Figure 4 for a Map of Estimated Habitats of Rare Wildlife and Certified Vernal Pools

The nearest surface water body is Lake Gardner that is located approximately 2,500 feet to the northeast. There are no known private potable water supply wells in the vicinity of the Site. Water and sewer service for the Site is provided by the City of Amesbury.

According to a MassGIS Map, the site is located not within a Zone II, Interim Wellhead Protection Area (IWPA) or a Sole Source Aquifer. Refer to MassDEP Priority Resources (21E) Map attached as Figure 6 to this report.

Based on current Site use, no impact to environmental receptors is predicted.

5.0 ADDITIONAL ENVIRONMENTAL CONSIDERATIONS

Section 12 of the ASTM Standard E 1527 discusses "Non-Scope Considerations" outside the scope of "appropriate inquiry" as defined by their ESA standard practice. That is, certain environmental issues or considerations may be present on-Site that may lead to contamination of the property or nearby properties, but are not included in the CERCLA definition of hazardous substances nor otherwise present CERCLA liability.

5.1 Radon

Radon is a colorless, odorless gas produced by the radioactive decay of uranium. The most common sources of radon are igneous and metamorphic rocks, containing uranium (e.g., pitchblende), granite, shale and phosphate, as well as soils/sediments derived from such "parent materials." Radon may also be found in soils contaminated with certain industrial wastes (e.g., uranium or phosphate mine tailings) or in earth-derived building products that contain such industrial wastes (bricks or concrete-containing phosphate slag).

An assessment for radon was not performed as part of the assessment.

The United States Environmental Protection Agency (EPA) Radon Zone for Essex County has a median radon concentration of 2.8 pCi/L and 36% of sites with concentrations of radon greater than the EPA recommended threshold of 4 pCi/L.

Site specific testing for radon would be necessary to determine that actual level at the Site.

5.2 Lead –Based Paint

No documentation relative to lead-based paints (LBP) was reviewed for this assessment. Whereas the school building was constructed before 1979, lead-based paint may be present within the Site building.

5.3 Asbestos Containing Materials (ACMs)

No previous survey information was available for review. Whereas the school building constructed before 1980, the presence of asbestos-containing material (ACM) may pose a recognized environmental condition to the Site.

5.4 Floodplain Management

Based on a review of the National Flood Insurance Program Flood Insurance Rate Map (FIRM), Community Map 25009C0102F dated July 6, 2016, the Site and surrounding area lies within an area classified as Zone X Other Flood Areas, an area determined to be outside the 0.2% annual chance floodplain. Refer to National

Flood Insurance Program Flood Insurance Rate Map (FIRM), Community Map attached as Figure 7 to this report.

5.5 Coastal Barrier Resources

The Site is not located within an area considered to be a Coastal Barrier Resource.

5.6 Coastal Zone Management

The Site is not located within an area designated as a Coastal Zone.

5.7 Sole Source Aquifers

The Site is not located within an area classified as a Sole Source Aquifer.

5.8 Airport Clear Zones

The Site is not located within an Airport Clear Zone.

5.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

The purpose of the investigation was to identify possible conditions that would be indicative of releases of oil and/or hazardous materials and threatened releases of oil and/or hazardous materials on, at, in or to the Site. The investigation included inspection of the Site and the exterior of adjacent properties, interviews with Site staff and regulatory officials, review of appropriate Federal, State, and local historical and environmental records. This assessment revealed the following:

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- *ECMS* did not identify any recognized environmental conditions during the course of this assessment.

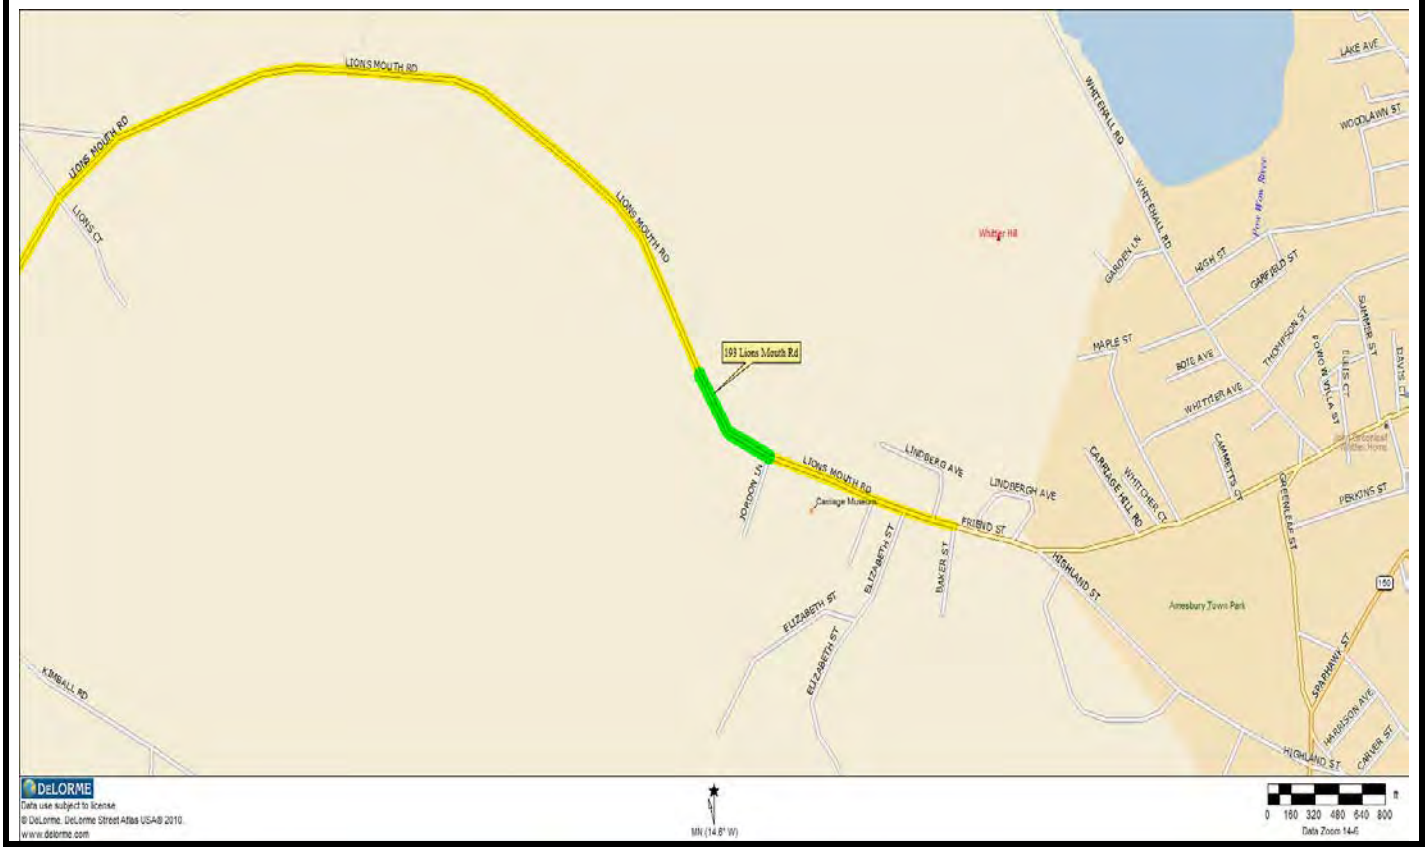
A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- *ECMS* did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- *ECMS* did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by *ECMS*, which do not qualify as RECs; however, warrant further discussion.



- *ECMS* did not identify any environmental issue during the course of this assessment.

Conclusions and Recommendations

This assessment has not revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property. *ECMS* recommends no further actions.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX B

QUALIFICATIONS/LIMITATIONS

QUALIFICATIONS/LIMITATIONS

Environmental & Construction Management Services, Inc. (ECMS) professional services have been performed, our findings obtained, and our recommendations prepared in accordance with customary principles and practices in the fields of environmental science and engineering. This warranty is in lieu of all other warranties either expressed or implied. *ECMS* is not responsible for the independent conclusions, opinions or recommendations made by others based on the records review, site inspection, field exploration, and laboratory test data presented in this report.

Factual information regarding on-site business operations, conditions, and historical data provided to *ECMS* is assumed to be correct and complete. *ECMS* assumes no responsibility for hidden or latent conditions or misrepresentation by the property owner, its representatives, public information officials or any authority consulted in connection with the compilation of this report.

The findings set forth in the attached Site assessment report are strictly limited in time and scope to the date of the evaluation(s). The conclusions presented in the Report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed upon services or the time and budgeting restraints imposed by the client.

The purpose of this report was to assess the physical characteristics of the subject Site with respect to the presence in the environment of hazardous material or oil. No specific attempt was made to check on the compliance of present or past owners or operators or of the Site with Federal, State or local laws and regulations, environmental, or otherwise.

Partial findings of this investigation are based on data provided by others. No warranty is expressed or implied with the usage of such data. Much of the information provided in this report is based upon personal interviews and research of all available documents, records and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability and accuracy of pertinent records, and the personal recollection of those persons contacted by *ECMS* personnel. *ECMS* is not a professional title insurance firm and makes no guarantee, explicit or implied that the listing, which was reviewed, represented a comprehensive delineation of past Site ownership or tenancy for legal purposes.

Observations were made of the Site and of structures on the Site as indicated within the Report. Where access to portions of the Site or to structures on the Site was unavailable or limited, *ECMS* is unable to render an opinion as to the presence of hazardous material or oil, or to the presence if indirect evidence relating to hazardous material or oil, in that portion of the Site or structure. In addition, *ECMS* renders no opinion as to the presence of hazardous material or oil, where direct observation of the interior walls, floor, or ceiling of a structure on a Site was obstructed by objects or coverings on or over these surfaces.

The initial site investigation took into account the natural and man-made features of the Site, including any unusual or suspect phenomenon. These factors combined with the Site's geology, hydrology, topography, and past and present land uses served as a basis for choosing a methodology and location for subsurface exploration as well as ground water and subsurface sampling, if done. The subsurface data, if provided, is meant as a representative overview of the Site.

The conclusions and recommendations contained in this report may be based in part upon various types of chemical data and are contingent upon their validity. As indicated within the Report, some

of these data are preliminary "screening" level data, and should be confirmed with quantitative analyses if more specific information is necessary. It should be noted that variations in the types and concentrations of contaminants and variations in their flow paths may occur due to seasonal water table fluctuations, past disposal practices, the passage of time, and other factors. Should additional data or variations of current data become available in the future, these data should be reviewed, and the conclusions and recommendations presented herein modified accordingly.

Chemical analyses may have been performed for specific parameters during the course of this Site assessment, as described in the text. However, it should be noted that additional chemical constituents not searched for during the current study might be present in soil and/or ground water at the Site.

APPENDIX C

RESUMES OF COMPETENT ENVIRONMENTAL PROFESSIONAL

KEVIN J. KAVANAUGH, L.S.P., CHMM

Principal Environmental Engineer

Kevin has over 33 years of engineering/hydrogeological consulting, environmental site assessment and site remediation experience. In addition to his fiscal and marketing duties as a Principal Environmental Engineer and Chief Executive Officer (CEO) at *Environmental & Construction Management Services, Inc.* (*ECMS*), he oversees the environmental staff, coordinates business and professional development of staff, provides technical QA/QC, and offers specialized corporate technical support in accordance with state and federal regulatory agencies.

Prior to co-founding *ECMS*, Kevin was the National Accounts Director for Hygienetics Environmental Services, Inc. (Hygienetics) in Boston, Massachusetts. As the National Account Director he managed the nationwide environmental due diligence and consulting services for Hygienetics National Accounts including GE Capital Real Estate, Archon Group LP, Finova Realty Capital, American General Realty Advisors, Metropolitan Life Insurance and State Teachers Retirement System of Ohio for all of Hygienetics 14 Offices throughout the Continental United States.

Kevin is a Massachusetts Licensed Site Professional (LSP) since May 1994 and Certified Hazardous Materials Manager (CHMM) since 1998 with extensive experience with preparation and submission of every aspect of the Massachusetts Contingency Plan (MCP) 310 CMR 40.0000 including; Phase I through Phase V reports, Downgradient Property Status (DPS), Activity and Use Limitations (AULs), Method 1 and 3 Risk Characterizations, Class A, B and C Response Action Outcome (RAO) and Permanent Solutions, Numerical Site Ranking, Immediate Response Action (IRA) Plans and Release Abatement Measure (RAM) Plans, status and completion reports, Tier I Permit Applications, Major Permit Modifications and vapor intrusion assessments. He also provided LSP technical report review and provided cost estimates for various lending institutions, insurance companies, law offices and other property acquisition/development corporations. In addition to his extensive experience in Massachusetts, he has personally performed either environmental site assessments and/or site remediation in New Hampshire, Georgia, Rhode Island, New Jersey, Texas, Kansas, California, Florida, Michigan and Pennsylvania.

Prior to joining Hygienetics in 1996, Kevin worked as a Site Operation's Manager/Senior Environmental Engineer responsible for all technical and business activities for a 13-person branch office for Groundwater & Environmental Services, Inc. (a full-service environmental consulting/remediation firm).

Some of his accomplishments include:

Technical Specialties:

Phase I and II Environmental Site Assessments

Soil and Groundwater Investigations

Risk-Based Closure Assessments

UST Management/Closure

Soil and Groundwater Remediation

Education:

B.S., Civil Engineering, University of Maine at Orono, 1985

Certifications:

Massachusetts Licensed Site Professional (LSP) License No. 7610

Certified Hazardous Materials Manager (CHMM) License No. 9287

OSHA Standard 29 CFR 1920 and SARA Section 126(d) (HAZWOPER)

Professional Affiliations:

Massachusetts Licensed Site Professionals Association (LSPA)

KEVIN J. KAVANAUGH, L.S.P., CHMM

Principal Environmental Engineer

- National Account Director as the primary contact for the Hygienetics National Account's Program. A partial client list includes: GE Capital Real Estate, Archon Group LP, Finova Realty Capital, American General Realty Advisors, Storage USA, Metropolitan Life Insurance and State Teachers Retirement System of Ohio.

- Performed and/or supervised the performance of over 1,200 due diligence environmental assessment reports throughout the country. A partial list of local and nationwide client includes: Princeton Properties Management, Jones Lang LaSalle, John Hancock, Trammell Crow Company, Starwood Lodging, Equitable Real Estate, Northwestern Mutual Life Insurance, Insignia/ESG, Cornerstone Properties, Equity Office Properties, Prudential Real Estate and Marriott/Claris Corporation.

- Supervised a technical staff of 13 and was New England Regional Account Manager for a $1 million/year major oil corporation client.

- Designed or redesigned and directed the installation of over 50 remedial treatment systems including dual phase extraction (high vacuum extraction), soil vacuum extraction, air sparging and product/ groundwater recovery and treatment.

- Developed New England regional LSP risk-based closure program for existing client base.

- Performed all phases of environmental project development and management including: groundwater modeling, hydrogeologic studies, physical and chemical interpretation of field data, preparation and review of initial and complex site assessments, and remedial action reports in accordance with MGL21E, MCP, RCRA and other regulations.

- Performed other technical activities including a variety of pilot tests (aquifer, hydraulic conductivity, vacuum extraction and air sparging), the preparing of Wetlands Notice of Intents, air and groundwater discharge permitting and supervision of UST removals/closures.

- Directed the operation and maintenance of over 125 active soil and groundwater organic contamination recovery and treatment systems. Remedial treatment systems included soil vacuum extraction, air sparging, UV peroxidation, hydrogen peroxide Injection and product/groundwater recovery and treatment.

- Completed over 300 MCP Method 1, Method 2 and Method 3 Risk Characterizations and Class A, B and C Response Action Outcomes (RAOs)/Permanent Solutions (regulatory site closures).

- Managed and completed a 40 property real estate due diligence Phase I ESA nationwide portfolio for a large National Account Real Estate Client in an expedited timeframe.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

SHWS: Contains information on releases of oil and hazardous materials that have been reported to DEP.

A review of the SHWS list, as provided by EDR, and dated 04/18/2018 has revealed that there are 22 SHWS sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the UST list, as provided by EDR, and dated 04/18/2018 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.
